Hi friends,

We are delighted to introduce our newest resource tailored to enrich STEM education: the Famous Landmarks Research Pages! 🎉

🏛️ Packed with 14 iconic landmarks and spaces from across the globe, this mini-pack encourages students to embark on exciting research projects filled with fascinating facts, history, and significance.

🗨️ **Explore 14 Famous Landmarks:** From the majestic Eiffel Tower to the ancient Great Pyramids, kids can color the landmarks and research information to add to the spaces provided.

📄 **Facts at Your Fingertips:** Our pack provides dedicated spaces for students to write down the facts they uncover during their research. Encourage critical thinking and exploration as they fill in the blanks with

captivating information about each landmark.

 **Engaging STEM Projects:** Fuel creativity and problem-solving skills with STEM project ideas inspired by these landmarks:

1. **Newspaper Eiffel Tower:** Construct a model of the Eiffel Tower using newspaper while learning about its architectural marvels and historical context.
2. **LEGO Landmark Challenge Cards:** Build miniature versions of famous landmarks like the Great Pyramids using LEGO bricks, and discover engineering principles in action.
3. **Bridge Building Challenges:** Engineer your rendition of the London Tower Bridge using household materials, exploring structural integrity and design concepts.
4. **Easy to Use:** Create a presentation or craft a bulletin board for both classroom and homeschool settings. Use with various age groups.

**Find it all right here! Famous Landmarks Projects**

**TIP:** To enhance the learning experience, we recommend pairing the research activities with virtual tours, allowing kids to explore these landmarks in immersive detail from anywhere in the world.

**P.S.** The **All Access Pass** is your ticket to a world of STEM at your fingertips.

Have fun!

**Sarah**
