

Dear Dr. Schroeder and Board Members,

I have given you a collection analysis of both the Elementary and High School libraries. The goal when weeding each collection was to raise the average age of our collection. I have highlighted for you the current average age of our nonfiction collection and the recommended average age. I believe this is very important when it comes to the accuracy of information in these books. Students will be using the nonfiction section to gain access to information and we must have accurate and updated information. Therefore, I only removed books that had copyright dates older than 1970 hoping this would weed out false information and raise the average age of our collection in both libraries. Provided for you is the specific list of each book's title and copyright date if you would like to see the books we are wanting to dispose of. I plan to ask students first and foremost if they would like the books, and any we have left over I would like to ask the public library and also an antique store.

My goal for spending the remaining budgets for both libraries is to then focus on the categories where books are needed. For example, our biography section is very low at the high school. This is where I will be purchasing a vast majority of the books this year to build up this collection. I will also focus on some of the other categories that need more books. I have highlighted our current collection percentage and the recommended collection percentage.

Thank you for your time in reviewing this issue.

Sincerely,

Erica Chancellor
