May 30, 2024

Dear City of Bennet,

My name is Jordon Bang and I am the District Manager for Lancaster Rural Water No.1. The Water District has been in the transition of raising base rates to all benefit holders in the district to help offset the costs of property purchased in the district for a future well field and total replacements of wells 5 and 6. The City of Bennet and Lancaster Rural Water have had a contract agreement in place since Bennet connected as a bulk user.

At the May 8, 2024 monthly meeting, The Board of Directors voted in favor of increasing the per 1,000 gallons charge to \$4.00 instead of \$3.00. This will change the amount that is charged per month for the total number of gallons that are recorded through the master meter. By contract agreement, I have to give the Bulk Water users 120-day notice of this change. Starting October 1, 2024, the price increase will take effect. I would be more than happy to attend the City of Bennet's monthly Council Meeting to discuss this further.

If you have any questions, please call me at 402-782-3495.

Thank you,

Jordon D. Bang
District Manager
Lancaster Rural Water No.1
