

SUBJECT: PBK Architects to present an update on the Planning and Campus Facility Condition Assessments Project – *For Information Only*

BACKGROUND: On September 23, 2025, the board approved a Professional Services Agreement with PBK Architects. Services include a districtwide Facilities Condition Assessment, with a comprehensive review of the physical condition of all PISD facilities, as well as a Long-Range Facility Master Plan.

The presentation will cover the assessment timeline and stakeholder engagement process, including survey feedback gathered from staff and facility users, and an explanation of the tools and platform used to collect and organize field data across all campuses.

The bulk of the presentation will cover the findings organized by discipline, and the priority levels used to categorize the urgency of identified needs from critical/immediate items to long term considerations.

This information is intended to provide data-informed foundations for future facilities planning and capital improvement discussions.

FINANCIAL IMPLICATIONS: None

RECOMMENDATION: None
