

Henderson ISD Board Background

Subject: Hear report on donation of anti-choking devices for HISD campuses.

Presented for: Action _____ Report Only X

In accordance with TEC 38.0171, HISD will place LifeVac anti-choking devices in each cafeteria, as well as in the office at Montgomery Achievement Center. These devices are being donated to HISD for use in situations where the Heimlich maneuver is not effective in removing a foreign object from an airway. Each device is valued at approximately \$70, and a total of six units have been donated. Staff training will be conducted once procedures are finalized and the devices have been delivered.
