

## June 2026 School Board Update

### **Community Education**

- currently looking into switching registration platforms from Eleyo to Arux- Arux is the software company of Eleyo. Arux 'speaks'/works together with Bound, which will be our new facility management system.

- end of the school year was busy, but things seemed to go smoothly
- I am currently setting up classes/information for the fall edition of the Accent that goes to print in July
- ASK is in full swing at Rippleside
- Spring/summer sports are winding down for many groups

### **Kid Club**

- Summer registration is lower than previous years- but makes it a lot more manageable with staffing
