

The American Indian Parent Advisory Parent Committee met on February 2, 2026 and held their annual vote of compliance. The committee at this time has only one parent representative that is a part of the committee that convenes to discuss whether or not the district is meeting the needs of our American Indian students. The parent agreed that the district is doing what they can at this time to work towards meeting the needs of our students.

The work we are focusing on this year is centered around the English Language Arts and Social Studies standards. We are having teachers look at the standards and the additions of the contributions of Minnesota's American Indian tribes and communities and how they are integrated into the standards. We need to identify what resources are necessary in order to successfully teach these standards with fidelity.

The committee also engaged in conversation with our parent representative about how we can get more parents involved. We have brainstormed ideas to work through possible ideas to engage our parent group. We will continue this work.
