

## **School Board Update**

### **Athletics – Volleyball Season**

The middle school volleyball season recently concluded, and it was a tremendous success. Our student-athletes demonstrated growth in skill, teamwork, and sportsmanship throughout the season. Coaches emphasized fundamentals, communication, and perseverance, resulting in noticeable improvement across all teams. We are proud of the effort and dedication our students showed in representing our school and community.

### **Extracurricular Activities – Running Club**

Running Club continues to be a positive and well-attended activity for students. Participants have been building endurance, setting personal goals, and supporting one another in a healthy and encouraging environment. The club promotes physical fitness and mental well-being, and it has been great to see consistent participation and enthusiasm.

### **State Testing (April 14–16)**

State assessments for middle school students are scheduled for April 14 through April 16. Staff have been preparing students by reviewing key concepts, practicing test-taking strategies, and ensuring a supportive testing environment. We are focused on helping students feel confident and prepared to demonstrate their learning.

### **Brave Block – Popsicle Stick Bridge Project**

Students in Brave Block are currently engaged in a hands-on STEM project building bridges using popsicle sticks. This project integrates concepts of engineering, design, and problem-solving while encouraging creativity and collaboration. Students are testing the strength and efficiency of their designs, making this both an engaging and educational experience.

### **Promotion Planning**

Planning for the 8th grade promotion ceremony is underway. Staff are working to organize a meaningful event that celebrates students' accomplishments and marks their transition to high school. More details will be shared with families as plans are finalized.

### **8th Grade Trip**

Preparations for the annual 8th grade trip are in progress. This experience provides students with an opportunity to build lasting memories with their peers while reinforcing positive behavior and community building. Logistics, safety measures, and itineraries are being carefully coordinated.

### **Allen Marine Trip**

We are also organizing the Allen Marine trip, which offers students a unique educational experience outside the classroom. This trip allows students to explore the natural environment, connect learning to real-world contexts, and engage in hands-on discovery.

Overall, the middle school continues to provide a well-rounded experience that supports academic growth, extracurricular involvement, and student engagement. We appreciate the continued support of the school board and community.
