Board Report

July 2026

- Planning for SY2027
 - Shifting paraprofessional positions
 - Each summer, the District evaluates student needs to strategically align our paraprofessional staffing across all buildings, carefully considering individual skillsets, experience, and preferences during transitions. While we deeply value the strong relationships our paraprofessionals build within their schools, we formally commend their outstanding adaptability and dedication in embracing these new roles; their unwavering commitment ensures that students throughout the entire district receive the high-quality support they need to succeed.
 - Curriculum and Materials
 - Special education teachers have requested supplies, equipment, curriculum, and materials they project to need throughout the upcoming school year. Purchases are being evaluated and purchased.
 - Summer Professional development
 - Professional development opportunities have been offered through the ROE for paraprofessionals and teachers. We have several paraprofessionals taking advantage of these opportunities to jump start their school year. We are thankful for their dedication.
 - Perandoe
 - Conversations with Perandoe have begun to ensure all staff have necessary training throughout the school year.
