

AIMS Grant Math Partnership Item of Information

1. Background:

The district has been awarded the AIMS Grant, which fully funds the implementation of Edia's AI-powered math supplement for all four middle schools, focusing on 7th grade mathematics at no cost to the district. Aligned with the Bluebonnet Math curriculum, Edia provides differentiated instructional support through targeted practice, intervention resources, and real-time feedback from its AI Math Coach. This support is designed to improve student learning, address misconceptions as they occur, and help close achievement gaps.

2. Process:

The AIMS Grant provides implementation, professional learning, and ongoing support throughout the school year. As part of the grant, participating campuses will engage in on-site visits, classroom walkthroughs, and data collection through platform engagement analytics to evaluate the impact of AI-powered differentiated instruction on teaching practices and student achievement. Because the grant fully funds the program, there is no financial impact to the district.

3. Fiscal Impact:

NONE

4. Recommendation:

NONE
