Subject:

Consider Approval of the Ratification of a Purchase Contract for Emergency Electrical Repairs at Clear Creek High School

Background:

Shortly before the end of the school year, Clear Creek High School experienced the failure of one of its seven primary electrical feeders serving a significant portion of the campus. Subsequent testing determined that the remaining six feeders are also degraded and at increased risk of failure, creating the potential for catastrophic damage to the existing switchgear and a prolonged campus outage. After evaluating phased construction options, we determined that delaying conductor replacement would expose the District to unacceptable operational and financial risks, and that emergency replacement was necessary for the health and safety of District students and staff. Accordingly, we proceeded with the complete emergency replacement of all seven electrical feeders utilizing C&D Electric at a cost of \$1,539,545, funded through available 2023 Bonds Savings and Interest earnings. Completing the work in a single phase provides the most effective risk mitigation strategy while limiting planned power interruptions to approximately three days during construction.
