

August 2026 Board Report

Ted W. Paton
Associate Superintendent of CTE/Principal

Work-Based Learning Paid Summer Internships

This summer, five students from our Diesel Technology program participated in Work-Based Learning through paid summer internships. Austin Grove worked with Green Mark, Kaylynn Wizorek worked with MacAllister Rentals, Cameron Reynolds worked with Premium Tank, Landen Batchelder worked with Pyper Diesel and Trevor Castillo worked with Farm Depot. These students had the opportunity to step into professional work environments and put the skills and knowledge they developed in the classroom into practice.

Through these internships, students gained hands-on experience while learning what it takes to be successful in the diesel and transportation industry. They were able to strengthen their technical skills, learn from experienced professionals, develop workplace communication and problem-solving skills, and experience the day-to-day expectations of a career in their field.

2026-2027 School Year

We are excited to welcome our students and staff back for the 2026–2027 school year! Preparations are underway to ensure a smooth start to the year, with staff planning, scheduling, classrooms and programs being prepared for students. Our first student day will be August 26th, 2026, and we look forward to another successful year of learning, growth, and opportunities for our students at ICCC.
