GEDC Intern Program

I attended the GEDC Internship Program breakfast last Thursday. Five MCHS students were selected for internships.

Construction Update

Both additions are progressing on time. At South, the floor is still being installed. The weight room equipment has been delivered and installed. The rain screening is currently being installed. The floor in the Cafeteria is being replaced and the hot water heater is being replaced. At Central, there is a lot going on. We are taking delivery of a lot of equipment. Contractors are wrapping up the addition phase of the project and are focusing on the areas being remodeled. The tennis courts are being refurbished and the painting of the small gym and wrestling room are under way.

MCHS Summer Camps

MCHS offers a variety of camps for students over the summer months. These camps include strength & conditioning, high school and youth track and field, tennis, football, youth & high school basketball, band, and theater. At this point in time, we have over 1200 students enrolled in these programs.
