

# Hallsville Independent School District

## For the Consideration of the Board of Trustees

Date of Board Meeting: June 22, 2026

Agenda Item #: \_\_\_\_\_

Topic: IXL

### Background and Rationale:

IXL is a connected experience delivering teacher-led core and supplemental instruction across math and reading. IXL Diagnostic screens our students and provides differentiated goals to accelerate growth. It creates a personalized path of learning for each student.

Texas law (HB 1416) requires all students who do not achieve approaches or higher on STAAR grades 3-8 or EOC assessments be provided accelerated instruction. Supplemental instruction in addition to instruction typically provided to students in the the grade level in which they are enrolled is required.

Relationship to Strategic Plan: Goals

Personnel Affected: NA

### Budget Implications:

- Include in this year's budget
- Amendment of this year's budget required
- Increase in this year's budget required
- Expenditures required for next year's budget

Instructional Materials Allotment for the 2026-2027 School Year

\$92,550.00

### Recommendation:

Approve the purchase of IXL supplemental material.

*Jennifer Hoskins*

A Frog Prince

A Penny For Your Thoughts

A Real Lice Problem

"What shall we do?" asked the King. "We cannot let the fair Princess marry a frog!"

"The most graceful in the land," declared the King's courtiers.

"The best plan will be to seek a girl to marry the prince and give her to the King!"

So when they were seated, the King picked up his glass and they started drinking the golden beer. From a tiny opening, a tiny girl of fifteen and not a trace of a crown or a tiara came and sat herself by the King's side. "I am the fairest in the land," she said. "I will marry you."

They sat down at the table. The King and the Queen were sitting next to her. They were all drinking the golden beer.

ANIMALS  
What Animals Need

## Mexican AXOLOTL

IS IT A FISH? A LIZARD? A BIRD?

The Mexican axolotl (AK-so-LOT-ul) is an amphibian. *Amphibians* are a group of animals. They are born in the water. When they grow up, amphibians usually live on land. But the Mexican axolotl stays in water its whole life.

Are those feathers on the axolotl's head? No. They are *gills*. They help the animal get air from the water. Most amphibians have gills when they are born. They slowly lose their gills and

In the wild, axolotls are usually dark brown. They may have yellow or black spots.
