

**Homedale School District
Transportation and Maintenance**

I have had two drivers quit in the last month. One driver went back to school and the other found a job with insurance benefits. One of the drivers said she will stay and help out until the end of the year but cannot drive Monday and Wednesday evenings. I have ran an ad in the paper for drivers but did not get a good response.

Football field water pump: The galvanized line going to the river is all but gone. With the river so low it is not getting enough water to the pump. We would have to tear out the concrete box and build a new one and replace the line. We have a lot of ground water so I would like to dig a test hole and see if we could get enough water .
