Subject: LCTC Request to Purchase Dell Chromebooks and Carts

I am requesting the purchase of 90 Dell Chromebooks and three housing carts be placed on the BOE COW agenda of April 9, 2018. This is a follow-up item from the Study Session of March 26, 2018, and as a refresher it is a request from the LCTC administration to replace six year old laptops that have aged beyond functional use. The Chromebooks will enhance the instructional and learning environment of the Sports Medicine, Pre-Nursing/Pre-Medical, and Intro to Health Care courses.

The funding for this purchase will be from the State of Michigan Career Technical Education funding referred to as 'added cost' and 61a funds. The 61a funding is provided each year to CTE programs to assist in the purchase of CTE equipment. The total cost of this request is \$32,703.
