March 2026

FFA MAKING AN IMPACT

After a successful inaugural year, the Dixon High School Agriculture program and Future Farmers of America (FFA) club have continued to establish themselves as popular fixtures within our school community. Under the direction of teacher Grace Klein, the program has flourished and participation in major events has skyrocketed.

Junior Addison Fegan shared her thoughts on the program:

“The program has experienced so many new opportunities to grow the future leaders of Dixon. As a junior, I have made it my mission to be involved in almost every competition FFA is a part of. This year, I attended National Convention, the Farm Progress Show, Dairy Foods Judging, State Horse Judging, and Poultry Judging – where we placed 1st as a team. Each event has allowed me to gain experience in the agriculture industry while also helping me develop quality skills that I can use outside of FFA as well. Being a part of this group helps you become a very well-rounded person. I will continue for the next year and a half to become more involved in this group. No matter what the event is, there is a spot for anyone who wants to become a leader and build strong skills for future opportunities.”

CALCULATING SUCCESS

At the end of last month the Dixon High School Math team participated in the ICTM Regional Math Contest. Notable highlights include awards for Jenna Mustapha, Sebastian Seibel, and Aaron Fitzanko who all placed in individual competition.
