

## BNAS 2026 assessment

12 students per grade were given the pre-assessment and 12 (or less) were given the post assessment. The assessment was an oral assessment aided by images taken from ASLA method that BNAS and immersion teachers have been given PD.

In this assessment we tested for production, in that the student either looked at a picture of a horse and said *pō'nōkäämiitää*, then, after student confirmed they said all the words they could summon, we said the remaining words in random order and the student would point at the picture, confirming they were cognitive with the Blackfoot being spoken

This assessment was administered with the intention of seeing BPS student community and their status in the Blackfoot Language.
