

Prairieview Elementary School
April 2026 Board Report

Goal One – Learning

March was a busy month for our staff to prepare our students for the Illinois Assessment of Readiness. Our after school Triple A program continued, with nearly 60 students benefiting from extra instruction and practice with our teachers. During the day, our teachers familiarized students with the platform via the Student Readiness Tool. This is a big step because it helps students understand the tools and resources available to them within the platform, such as expanding test boxes during written responses and text to speech features for Science and Math. Our teachers also had students take a practice test. I'm proud of the work our students and staff did so students are able to show all the learning they've accomplished this year. Our building leaders are also working hard to streamline our feedback systems this trimester. While we've preached the importance of grace when implementing CBE, it's critical for our grade levels to be more consistent in how they are communicating progress to students and to parents.

Goal Two – Whole Student Development

Monday, April 1st was Paraprofessional Appreciation Day. Unfortunately, we were on spring break and could not celebrate together! Instead, on Friday, March 27th, we celebrated our phenomenal paras with a breakfast in the LRC. Let's show them the love - we know firsthand the impact they have on our students, and how our school operates. Without Mrs. Conley, Mrs. Kose, Mrs. Sarhan, Mrs. Kornafel, Mrs. Glowacz, Ms. Bryant, Mrs. Darji, and Mrs. Martynaitis, we'd have far fewer champions for our students. Thank you, paraprofessional team, for making Prairieview a great place for all students!! The transition to 6th grade poses a lot of challenges, and locker combinations are amongst the most challenging skills to learn. Thankfully, Mrs. Mesker brought over the Lakeview Leadership team to help our students practice!

Goal Three – Environment

Our students are eager to start enjoying our new gaga pit! Once again, thank you to Team 66 for this donation and for getting it up and running last month. Mrs. Cushing and Mr. K (Ide) collaborated on rules and gameplay guidelines for both schools to follow, and will be teaching students when we return from spring break. Our students should be able to play in no time! Thank you Mr. Alberto and his custodial team for keeping our grounds tip top for students to use. The brackets on each of the swings were replaced so that our students can get another 25 years of fun in! Alberto and his team take great care to replace mulch and keep the pavement clear of obstructions. Inside the building, we've had lots of parent compliments on how clean the building has been. Thank you, custodial team!
