

## Board Report Regarding 2025 Charter School Performance Framework

**DATE:** May 28, 2026

**SUBJECT:** 2025 Charter School Performance Framework

**BACKGROUND:** The Charter School Performance Framework (CSPF) is intended to provide parents, the public, charter operators, as well as the charter authorizer with a snapshot of each charter's academic, financial, and operational performance.

Charter schools are encouraged to refer to the performance framework on a continuing basis in order to self-assess overall health and viability of their school throughout the charter term. The performance framework will be used to inform decisions that will help to identify schools that are candidates for replication, expansion, intervention, renewal, nonrenewal, or closure. (<https://tea.texas.gov> Charter School Performance Framework)

**ADMINISTRATIVE CONSIDERATION:** Texans Can Academies, as part of its commitment to continuous improvement, will continue to make data-driven decisions that directly support and increase student academic success. In addition to maintaining a relentless focus on positive student outcomes, TCA will ensure a financially sound, compliant, and effectively operated school system governed with the highest level of integrity and accountability.

See the Charter School Performance Framework for a comprehensive explanation.
