BACKGROUND INFORMATION:

Background:

Population and Survey Analysts (PASA) completed a comprehensive demographic study for Gregory-Portland ISD that evaluates historical enrollment trends, housing and economic development, population shifts, and long-range student enrollment projections over the next ten years. The study serves as a strategic planning tool to help the Board and administration make informed, data-driven decisions regarding future facility needs, attendance zones, staffing, capital improvements, and financial planning based on anticipated growth and enrollment patterns. This presentation is intended to provide the Board with an overview of the study's key findings and projected trends to support future planning efforts and long-term decision-making.
