

Henderson ISD
Board Background Information

Subject: Consider the purchase of new sound and lighting items for the Wylie Elementary School cafetorium.

Presented for: Action X

Report Only

Background Information

The stage equipment at Wylie Elementary School is outdated and limited in both functionality and reliability. The lighting is minimal and does not adequately support performances or presentations, making it difficult to properly highlight students and presenters on stage. Additionally, the sound system lacks clarity and consistency—microphones can be unreliable, and audio does not always project well throughout the space, especially for larger audiences.

Upgrading the stage lighting and sound system would significantly improve the quality of student performances, campus programs, and professional development sessions. This would allow for clearer audio, better visibility, and a more engaging experience for both participants and audience members.

Recommendation

Approve the sound and lighting proposals from Mundt Music totaling \$39,083.01.
