Chicago Heights, IL 60411

Re: Ten-Year Safety Survey – 17-802-01

Dear Ms. Rossiter:

We are pleased to submit this cost estimate to provide Professional Services for a Ten-Year Safety Survey for SPEED School District 802. The School District is to be commended for recognizing the need to maintain safe environments for the children.

The scope of the Ten-Year Survey will involve the following:

- Physical survey of the building to identify violations of the Health Life Safety Code for Public Schools
- Update the safety reference plans and send to appropriate agencies
- Update the facility condition report
- Document life safety code violations and corrective recommendations with cost estimates
- Review the document with you
- Post the survey onto the District IWAS HLS processing system
- Prepare forms and certifications for signature by the Operating Committee and/or Governing Board and ISBE

The survey will document life safety related code violations and corrective measures in A, B, and C class categories.

A = Urgent. B = required and C = recommended.

	Area s.f.	Safety Reference Plans/ Condition Report Updates	Violation & Recommendation Report
Administration Building	143,000	\$2,160.00	\$11,440.00

Total cost for the 10 Year Safety Survey: \$13,600.00

A portion of this cost will be credited on projects that Planera Architects designs through construction documents. Please do not hesitate to call should you have any questions.

Respectfully,
Planera Architects

Mario Planera, President
