WORKERS' COMPENSATION SERVICES

The MSGIA risk management professionals work with our members to review and enhance their state required workplace safety and crisis management plan documents.

Assessing the safety risks in our public schools is becoming an increasingly complex process that required multiple layers of analysis, varying degrees of professional discipline, and, undoubtedly, significant resources beyond those typically found in our member school districts. Yet despite these attendant challenges, if the process is thoughtful and thorough, it can be as worthwhile as it is successful.

MSGIA clients take advantage of our risk managers' expertise to assist district school boards, administrative teams, and district safety committees when working their way through a district-wide risk assessment process. And while this is a process that is proscriptive in the sense of being checklist-driven, it can nonetheless be customized to your location in the state and to your district's unique school culture.

- In-district safety planning reviews, consultation, plan enhancements
- Safety committee support and planning
- Self-inspection forms for building and other hazard assessment checklists
- Ability for safety grants for equipment such as: step ladders, eye protection, ear protection, ergonomic lifts, furniture movers, hand trucks, ice melt, and Yaktrax for workplace safety trainings completed within the school year.

FILING A WORKERS' COMPENSATION CLAIM
