Subject: Intentional Technology Integration

MISD Board of Trustees: July 21, 2026

Agenda Item – 7D

Background Information

Midway ISD has a long history of intentional technology integration. As digital ecosystems grow more complex, it is essential to understand and focus on the work we do in Midway to prepare teachers and students for academic excellence and innovative practices within the evolving landscape.

Tonight, Dr. Odajima and Sarah Collins will discuss the historical systems and supports that have laid the foundation for our work in instructional technology. They will also examine current efforts to model screentime in ways that are developmentally appropriate for students at their respective cognitive stages and share the evolving structures being put in place to keep students safe as the digital ecosystem continues to change.
