

SUBJECT: Consideration and possible approval of General Waivers from the Texas Virtual School Network course review process for select FLEX Virtual High School Program (formerly Pasadena Virtual School) courses.

BACKGROUND: Pasadena ISD has been an online course provider through the Texas Virtual School Network for over 10 years. This allows Pasadena ISD to serve as a premier provider of online instruction for students across the state.

When a course is new, contains updated TEKS or is being moved into a different Learning Management System (LMS), it is required to go through a course review to ensure that it meets all TxVSN course standards and requirements.

Texas Education Agency (TEA) has temporarily suspended the review process for TxVSN courses. Currently, a waiver from the course review process is available to successful TxVSN providers that have course to add to and/or review for the TxVSN catalog. This waiver includes an assurance from Pasadena ISD that our courses have been internally reviewed and they meet the requirements.

The following courses are ready for state review and require a course review waiver to be included in the TxVSN catalog of courses:

- Physics A/B
- Biology A/B
- Chemistry A/B
- Environmental Systems A/B
- English 1 A/B
- English 2 A/B
- Algebra 2 A/B
- Geometry A/B
- Computer Science 1 A/B
- Computer Science 2 A/B
- Lifetime Fitness and Wellness Pursuits A/B

FINANCIAL IMPLICATIONS: None

RECOMMENDATION: We recommend approval of general waivers from the Texas Virtual School Network (TxVSN) course review

process for select FLEX Virtual High School Program
(formerly Pasadena Virtual School) courses.
