Fund Performance Update

June 30, 2026

Comments by Mellon, Investment Manager

While the conflict in the Middle East continues to be a focus for financial markets, Federal Reserve (Fed) Chair Kevin Warsh's first Federal Open Market Committee (FOMC) meeting received a lot of attention. The Fed left rates unchanged at 3.5% to 3.75% in a unanimous vote with a hawkish tilt. The statement was cut significantly shorter with little, if any, forward guidance and Chair Warsh reiterated that the Fed's 2% inflation target will remain. The statement removed the easing bias that had drawn dissents at the previous meeting. Chair Warsh did not submit a forecast for the Summary of Economic Projections (SEP), but the median unemployment rate was revised lower for 2026, while inflation was revised higher. Notably, nine of the 18 participants penned a 2026 rate hike. Members now see the balance of risks as more clearly skewed toward higher inflation. Chair Warsh announced a wide-ranging reform agenda for the Fed consisting of five task forces: communications policy, balance sheet policy, improvements to the data sources the Fed uses, implications of artificial intelligence (AI) for productivity and jobs, and the Fed's inflation framework. As of the end of June, the fed funds futures market was pricing one to two rate hikes by the end of 2026.

(c) The Weighted Average Maturity One calculation uses the industry standard definition of state maturity for floating rate instruments, the number of days until the next reset date. The Weighted Average Maturity Two calculation uses the final maturity of any floating rate instruments, as opined in Texas Attorney General Opinion No. JC0359.
