New Award

Material/Service

Consulting services for the garlandisd.net redesign and Drupal upgrade migration project as well as additional services to support Drupal-based district websites. These additional services include Drupal development and support, user experience (UX) and design, content strategy, analytics, digital strategy, training and managed hosting.

Purpose

These services will be used on an as-needed basis by the Web Services department to enhance and maintain district sites, ensuring that the sites have updated infrastructure and design and that they remain secure and accessible for all GISD constituents. We have determined that ever-changing needs in the District can best be addressed by awarding multiple vendors, allowing the department to quote various projects for which one vendor may prove to have better capabilities than the other. In the end, we believe this award will provide the best value to the district and allow for utilization of various services offered by each company.
