Teaching Controversial Issues

The ability to discuss, listen, and dissent are essential elements of responsible citizenship. The school district encourages students to develop skills in analyzing issues, respecting the opinion of others, distinguishing between fact and opinion, considering all pertinent factors in reaching decisions, and arriving at group decisions.

Teachers may teach or lead discussions about controversial issues if they comply with the criteria contained in this policy. Controversial issues may be questions, subjects, or problems which can create a difference of opinion. They can include issues which may have political, social, environmental, or personal impacts on pupils and/or the wider community: locally, nationally or internationally. Often they have no easy answer, in part, because solutions may be based on an individual's personal values and beliefs.

1. The issues discussed must be relevant to the curriculum and be part of a planned educational program.
2. Students must have free access to appropriate materials and information for analysis and evaluation of the issues.
3. The teacher must encourage students to consider and discuss a variety of viewpoints.
4. The topic and materials used must be within the range, knowledge, maturity, and competence of the students.
5. The teacher must inform parents and the building principal before discussing sensitive or controversial issues.
6. The teacher must keep detailed, documentary evidence to prove that both sides and/or all facts available were presented.
7. Teachers must refrain from advocating partisan causes, sectarian religious views, or selfish propaganda of any kind through any classroom or a school device. However, a teacher shall not be prohibited from

expressing a personal opinion as long as the student is encouraged to reach his/her own decision independently.

Teachers who are unsure of their obligations under this policy must confer with their principal prior to discussing controversial issues in the classroom.

- under other circumstances which the superintendent deems to be appropriate.

Homebound and off-campus instruction may include a variety of in-person and distance learning services, as determined appropriate by the superintendent or relevant educational team. 6020 Multicultural Education

In every curriculum area and at all grades, the school district will provide programs which foster and develop an appreciation and understanding of the racial, ethnic, and cultural heritage of all students. These programs will allow students to explore the history and contributions made by various ethnic groups and will emphasize human relations, sensitivity toward all races, and the rich diversity of the population of the United States. The district's multicultural education curriculum will be consistent with the district's responsibility under state law to ensure that youth are given the opportunity to become competent, responsible, patriotic, and civil citizens. The district's civics curriculum and multicultural curriculum will work together to make students fully aware of the liberties, opportunities, and advantages we possess and the sacrifices and struggles through whose efforts these benefits were gained.

Philosophy, Mission, and Program Goals. The school district respects and appreciates cultural diversity and seeks to promote the understanding of unique cultural and ethnic heritage. The district will promote the development of a culturally responsible and responsive curriculum. Providing Staff Development. Appropriate school district staff and/or committee(s) will review the staff development provided for administrators, teachers, and support staff to determine that it includes appropriate multicultural education that is consistent with school district and program goals.

reviewing the criteria in this policy to assess whether the school district is adequately and appropriately incorporating multicultural education in all curriculum areas in all grades.

District Criteria for Selecting Evaluators to be Used for Special Education Evaluation and Verification and Independent Educational Evaluations

The following criteria shall be used for selecting evaluators according to 92 Nebraska Administrative Code 51-006.07B:

1. Those in-state service agencies that have approved rates for the current year established by the Nebraska Department of Education. A list of service agencies with approved rates, including state agencies, individual providers, and in-state providers may be found at <https://www.education.ne.gov/sped/service-agencies/>.
2. Those Nebraska providers located within 150 miles of the building of the district where the child attends when driving by ordinary public roadways.
3. Evaluations must consider the educational, health, or other student records of the student provided by the district. The parents, guardians, or age-appropriate student must provide any required consent to the disclosure of these records unless disclosure is already authorized by state and federal law.
4. Evaluations must be provided to the district, including all educational, health, student, or other records created as part of or relied upon to complete the evaluation. The parents, guardians, or age-appropriate student must provide any required consent to the disclosure of these records unless disclosure is already authorized by state and federal law.
5. Evaluations must be conducted by a provider that is authorized, available, and willing to discuss, confer, or otherwise cooperate with the district regarding the evaluation, its results, or any other information related to the evaluation. Such cooperation may include reasonable participation in, or the submission of additional reports or information to, an IEP, MDT, or SAT team. Evaluators must make available to the district any documents or records created in relation to the evaluation, including evaluation and assessment protocols and responses, when the district determines in its sole discretion that such documentation is necessary in order to permit meaningful parental participation. The parents, guardians, or age-appropriate student must provide any required consent to the disclosure of these records or information unless disclosure is already authorized by state and federal law.

6. Evaluations must be sufficiently comprehensive for the evaluator to submit to the district a report that specifically details whether the student should be considered eligible for special education and related services, the nature of special education and related services recommended to accommodate the student's suspected disability, and the particular facts or findings underlying the evaluator's conclusions. This report must be submitted to the district within 45 days after the conclusion of the evaluation.
7. Evaluations must meet the then-current state standards for reliability, research-based processes, and educational or professional best practices.
8. Reimbursement to any evaluator chosen in conformance with this policy shall not exceed the cost that would be charged by the school district's contracted providers for the same or substantially similar evaluation.

All special education evaluations, including those independently obtained at the district's expense, must be obtained in a manner consistent with the criteria set forth above, unless state or federal law requires waiver of one or more criteria in order to accommodate unique circumstances.
