

Water Committee Meeting
Wednesday, November 29, 2023 6:00 PM
Lower Platte North NRD Office
P.O. Box 126
Wahoo, NE 68066

1. UNFINISHED BUSINESS

2. REGULATORY

2.A. GROUND WATER MANAGEMENT AREA

2.A.1. Variance Request in the Hydrologically Connected Area (Limited Development Area)

Ralph Papa applied for variance LPN-V-023-0614 for 17 acres in NE1/4 S9-T16-R3E, Butler County. The variance ranking score was 307.7, so it was not approved in 2023. This tract of land is a gravity field where Papa's has installed a pivot and would like to swing the pivot around completely. Attached is a map showing the pivot acres and adding the extra acres. They are willing to give up 11.5 acres in the NE of the NE but would be adding 12.62 acres of irrigated grass. This would make the field more efficient by converting gravity to sprinkler irrigation.

2.A.2. Well Permit Program

Staff will now be using two different applications for new well permits. One application will cover new irrigation wells, livestock wells, and domestic wells irrigating one acre or larger. The second permit will cover industrial wells, recovery or remediation wells, dewatering wells, public water supply wells, and other wells. This will save on paper and filing room, as well as simplify the process for applicants.

2.A.2.a. Well Permit Request

Steve Chelberg, representing Smokie L. Lake near Linwood, is requesting a well permit to fill up the lake. Attached are comments from Steve.

Steve said this lake was 27 acres and involves 22 - 23 houses. He explained to the Committee that the well would be pumped from April to August when needed, to keep water in the lake.

Staff showed the Committee and Steve the AEM flights, showing that there is not much of an aquifer and high capacity wells are only 30-40 feet deep in the area. The concern, as this lake is groundwater depended, that pumping would just re-circulate the water and not increase the amount of water in the lake.

Steve asked about drilling deeper, and it was suggested to do a test hole to see if this was a viable water source. A test hole does not require a permit, so no action was taken.

2.A.3. Special Quantity Subareas

As of 12/8/2023 we have received meter readings from 146 of the approximately 300 SQS1 and SQS2 wells. The average usage for 2023 is 4.77". The highest usage is 15.88 and 7 wells reported with less than 1" applied.

Shown below are the rules for SQS#2. If the Committee is interested in making changes, the December 15 deadline is in Rule 4.2.

The staff and committee discussed boundary changes and allocations. The Committee reviewed maps with information obtained in the last 5 years and found that drawing new boundary lines can be difficult. The Committee discussed allocations of 36 inches over 4 years or increasing the allocation to 30 inches over 3 years. By Rule 4.3, the Committee felt that the change from 3 to 4 years would be a rules change, but changing the allocation amount could be an option for the upcoming year. The allocation would need to be addressed yearly or, as the Groundwater Management Plan is being updated, make a rule change. The Committee felt that a 30-inch/3-year rolling allocation was a reasonable option. A meeting with the producers in the area, showing the data, is also planned for the first part of next year.

Rule 4 Colfax/Platte County Special Quantity Subarea

Rule 4.1 Standard Controls

The Standard Controls described in Rule 2 shall apply in the Colfax/Platte County Special Quantity Subarea described in Rule 5.2. District approved Flow Meters required under Rule 2.5 shall be properly installed according to manufacturer's recommendation by May 1, 2016. No Landowner shall operate an irrigation well after May 1, 2016 unless it is in compliance with this requirement.

Rule 4.2 Allocation

The use of Groundwater for agricultural purposes from any water well for irrigation or for the benefit of any Irrigated Acre in the Special Quantity Subarea shall be subject to an Allocation. Allocations shall be based upon a 3 year Rolling Allocation. The Board shall establish the initial annual allocation when establishing the Quantity Subarea. The Board shall thereafter establish the Rolling Allocation by December 15 of each calendar year. The Rolling Allocation shall specify the total number of acre-inches of irrigation water per irrigated acre for the rolling term. If the Board fails to adopt a Rolling Allocation by December 15, the Rolling Allocation for the following rolling three year term shall be 27 acre-inches per irrigated acre in this Special Quantity Subarea (the equivalent of 9 acre-inches per year of the rolling term). Rolling Allocations for any and all wells may be amended, reduced, increased, or made subject to limitations or conditions by the Board upon notice and hearing.

Rule 4.3 Timing and/or Rotation of Water Use

The timing of water use or applications shall be controlled by the District to restrict pumping during certain times of the day or to establish a rotation so high capacity wells are not all pumping at the same time. The Board may establish timing or rotation restrictions when establishing the Quantity Subarea and shall establish new timing or rotation restrictions by December 15 of each calendar year. Timing or rotation restrictions for any and all wells may be amended, reduced, increased, or made subject to limitations or

conditions by the Board upon notice and hearing.

2.A.3.a. John Schure Irrigation Expansion

John Schure, on behalf of Tudy's Farm LLC, has applied to increase the irrigated acres on well G-045714 in the SW 1/4 of 7-19-1W, Platte County, SQS #2. The well currently irrigates 140 acres. Mr. Schure would like to add a corner system to the pivot to pick up an additional 10 acres. The increase of acres would lower the 27" three year rolling allocation to 25.2".

2.A.4. Cost Share Programs

2.A.5. Bellwood Phase 2 Area

2023 is the twenty-first year for this Phase 2 Area.

	Nitrate-nitrogen Range	Percent Nitrate-nitrogen 0 to 8.0 ppm	Percent Nitrate-nitrogen 8.01 to 10.00 ppm	Percent Nitrate-nitrogen 10.01 to 15 ppm	Percent Nitrate-nitrogen greater than 15 ppm
	0 to 25 ppm	46.3% (44 of 95)	8.4% (8 of 95)	45.3% (43 of 95)	
	0 to 25 ppm	47% (44 of 94)	15% (14 of 94)	38% (36 of 94)	
	0 to 24 ppm	41% (29 of 71)	14% (10 of 71)	45% (32 of 71)	
	0 to 31 ppm	48% (48 of 100)	9% (9 of 100)	43% (43 of 100)	
	0 to 28 ppm	53.75% (43 of 80)	7.5% (6 of 80)	38.75% (31 of 80)	
	0 to 22 ppm	45.5% (41 of 90)	15.5% (14 of 90)	39% (35 of 90)	
	0 to 35.7 ppm	48.65% (54 of 111)	11.71% (13 of 111)	39.64% (44 of 111)	
	0 to 26.6 ppm	51% (56 of 110)	6% (7 of 110)	43% (47 of 110)	

	0 to 28.9 ppm	57% (61 of 107)	9% (10 of 107)	34% (36 of 107)	
	0 to 25.8 ppm	50% (53 of 107)	9% (10 of 107)	14% (44 of 107)	26%
	0 to 22.3 ppm	51% (55 of 108)	13% (14 of 108)	18% (39 of 108)	20%
	0 to 32.3 ppm	43% (31 of 72)	8% (6 of 72)	14% (35 of 72)	33%
	0 to 35.1 ppm	34% (25 of 74)	11% (8 of 74)	26% (41 of 74)	26%
	0 to 23.5 ppm	36% (27 of 74)	15% (11 of 74)	19% (36 of 74)	22%
	0 to 30.9 ppm	40% (25 of 63)	11% (7 of 63)	22% (31 of 63)	28%
	0 to 24.5 ppm	46% (22 of 48)	10% (5 of 48)	28% (21 of 48)	22%
	0 to 20.5 ppm	33.33% (20 of 60)	13.33% (8 of 60)	35% (21 of 60)	18.33% (11 of 60)
	0.12 to 27.7 ppm	40.6% (26 of 64)	15.6% (10 of 64)	25% (16 of 64)	18.8% (12 of 64)
	0.13 to 23.0 ppm	43.75% (28 of 64)	12.50% (8 of 64)	26.56% (17 of 64)	17.19% (11 of 64)
	0 to 19.8 ppm	50.8% (32 of 63)	15.9% (10 of 63)	20.6% (13 of 63)	12.7% (8 of 63)

2.A.6. Richland - Schuyler Phase 3 Area

2023 is the eighth year of this Phase 3 Area. This Phase 3 area went into effect September 1, 2015. The 55 sections of this area first went into a Phase 2 Area in 2004. The ten sections that were in Phase 2 are now in Phase 3. As such, the 2020, 2021 and 2022 numbers (at bottom of table) are for 65 sections.

Year	Nitrate-nitrogen Range	Percent Nitrate-nitrogen 0 to 8.0 ppm	Percent Nitrate-nitrogen 8.01 to 10.00 ppm
2004	0 to 47 ppm	30% (42 of 139)	10% (14 of 139)
2005	0 to 120 ppm	31.3% (74 of 236)	10.2% (24 of 236)
2006	0 to 53 ppm	28% (50 of 181)	14% (26 of 181)
2007	0 to 99 ppm	32% (75 of 231)	10% (22 of 231)
2008	0 to 46 ppm	28% (53 of 190)	12% (23 of 190)
2009	0 to 57 ppm	33% (72 of 216)	6% (13 of 216)
2010	0 to 57.5 ppm	31% (70 of 229)	7% (15 of 229)
2011	0 to 65.8 ppm	28% (67 of 241)	9% (21 of 241)
2012	0 to 52.6 ppm	29% (70 of 241)	9% (21 of 241)
2013	0 to 94.0 ppm	25% (63 of 252)	9% (23 of 252)
2014	0 to 101.0 ppm	27% (68 of 251)	9% (22 of 251)
2015	0 to 53.3 ppm	23% (55 of 238)	12% (29 of 238)
2016	0 to 50.5 ppm	25% (58 of 228)	10% (22 of 228)
2017	0 to 53.4 ppm	25% (60 of 238)	6% (14 of 238)
2018	0 to 56.9 ppm	26.5% (50 of 189)	6.3% (12 of 189)
2019	0 to 39.4 ppm	25% (53 of 209)	11% (22 of 209)
2020	0 to 50.8 ppm	26% (69 of 261)	6% (15 of 261)
2021	0 to 43.0 ppm	25.5% (67 of 263)	8.4% (22 of 263)
2022	0 to 58.5 ppm	23.0% (57 of 248)	6.45% (16 of 248)
2023	0 to 46.5 ppm	26% (68 of 263)	6% (17 of 263)

2.B. GROUND WATER ENERGY LEVELS

Fall GWEL Graphs are attached for the 4 aquifer regions within LPN. The fall readings show declines in the majority of the wells compared to the fall of 2022.

2.C. GROUND WATER QUALITY SAMPLING

Attached are maps showing district wide sampling for 2023. Staff have been

sampling the Shell Creek area for the last 3 years. The averages of the sampled wells in the Shell Creek area have been 8.48 - 2021, 7.39 - 2022, and 8.13 - 2023. This data will be evaluated in future Committee meetings.

2.D. WATER QUALITY MANAGEMENT AREA

Attached is information to consider for developing a Phase 4 area within an existing Phase 3 area.

The Committee would like some opinions on the different options before moving forward. Staff will be gathering more information for the board meeting.

Rule 1 Phase Four Criteria

When levels of nitrate-nitrogen exceed 15.01 parts per million, or levels of other human induced non-point source contaminants exceed 100% of the MCL or LHAL, a Phase Four area will be declared. Within the same aquifer; boundary setting for Phase Four Areas will be initiated when: water quality analytical results within a minimum 9 square mile area are at identified trigger levels for a minimum of 2 sampling events. The area must contain a minimum of 10 registered wells and contaminant trigger levels must be exceeded in over 50% of the wells. When irrigation wells are not available, other wells may be used. Initial investigation by the District will be to determine if the contamination is a result of point-source or non-point source pollution. If non-point source pollution is found to be the reason, more intensive investigation for boundary setting will ensue. If a Wellhead Protection Area should be established due to non-point source pollution, the District may set boundaries that are less than 9 square miles. After the establishment of a Phase Four Area, if non-point source contamination levels should decline, two consecutive sampling events below the trigger levels are needed before the Area could be placed in Phase Three, Phase Two or Phase One.

3. GROUND WATER PROGRAMS

3.A. DECOMMISSIONED WELL PROGRAM

3.A.1. Well Estimates

1 new well has been reviewed and approved for decommissioning since the last Committee meeting.

Well Owner	Type of Well	Cost Share Estimate	County
Gary Harma	Irrigation	1624.59	Platte
Randy Fujan	Irrigation	859.66	Dodge

3.A.2. Plugged Wells

wells have been plugged, reviewed, and ready for cost share payment approval this month.

Well Owner	Type of Well	Cost Share Estimate	County

3.B. LOWER PLATTE NORTH NRD GROUND WATER STUDIES

3.B.1. Phase Area Update

LRE invoice is attached for \$5,580.38 along with a budget tracker spreadsheet. This project came in at \$6,525.59 under budget.

The NRCS has received additional funding for approving best management practices. The NRD has received 3 additional gravity to pivot conversion because of NRCS funding, with other producers considering this practice. The plan was to allow 5 of these projects, while other best management practices have not received any applications. Staff would like to move an additional \$50,000 to this practice from other practices.

Received invoice for 3 water flow meters for Dan Stavenson with a cost-share of \$1,000 per meter for a total of \$3,000.

Received invoice for 1 water flow meter for Ken Stevenson with a cost share of \$1,000.

Attached is the cost-share form for water flow meters. The form has an installation date of December 31, 2023. Staff recommends changing the date to April 1, 2024, to allow more promotion to producers.

3.B.2. Lower Platte River Consortium

Below are the notes from the last meeting.

Thank you to everyone who attended the November 14th meeting at Lower Platte South. To recap, we approved the prior ILCA meeting minutes, signed the 1-year addendum to the Interlocal cooperative agreement, voted to approve a support letter for the East Fremont/Elkhorn Township Project. During the meeting we discussed mitigation/projects including WaterSense, decertification, multi-purpose flood control and storage options. We also considered drought trigger levels and focus areas for press releases.

Action items include: Evaluating potential grants, projects, and programs that could be included in the 5 year plan update.

3.C. NEW MONITORING WELLS EQUIPMENT

Updates were given on the In-Situ equipment. The plan is to take the equipment that

needs repairing to In-Situ plant the week of December 11. Staff have been pulling cables and data loggers out of monitoring wells.

4. Groundwater Management Plan

Attached is a RFQ for approval. The plan is to start advertising to meet the 3-week requirement for advertising.

The staff and committee reviewed the plan, with Joe and Bob willing to be part of the interview process.

5. SURFACE WATER PROGRAMS

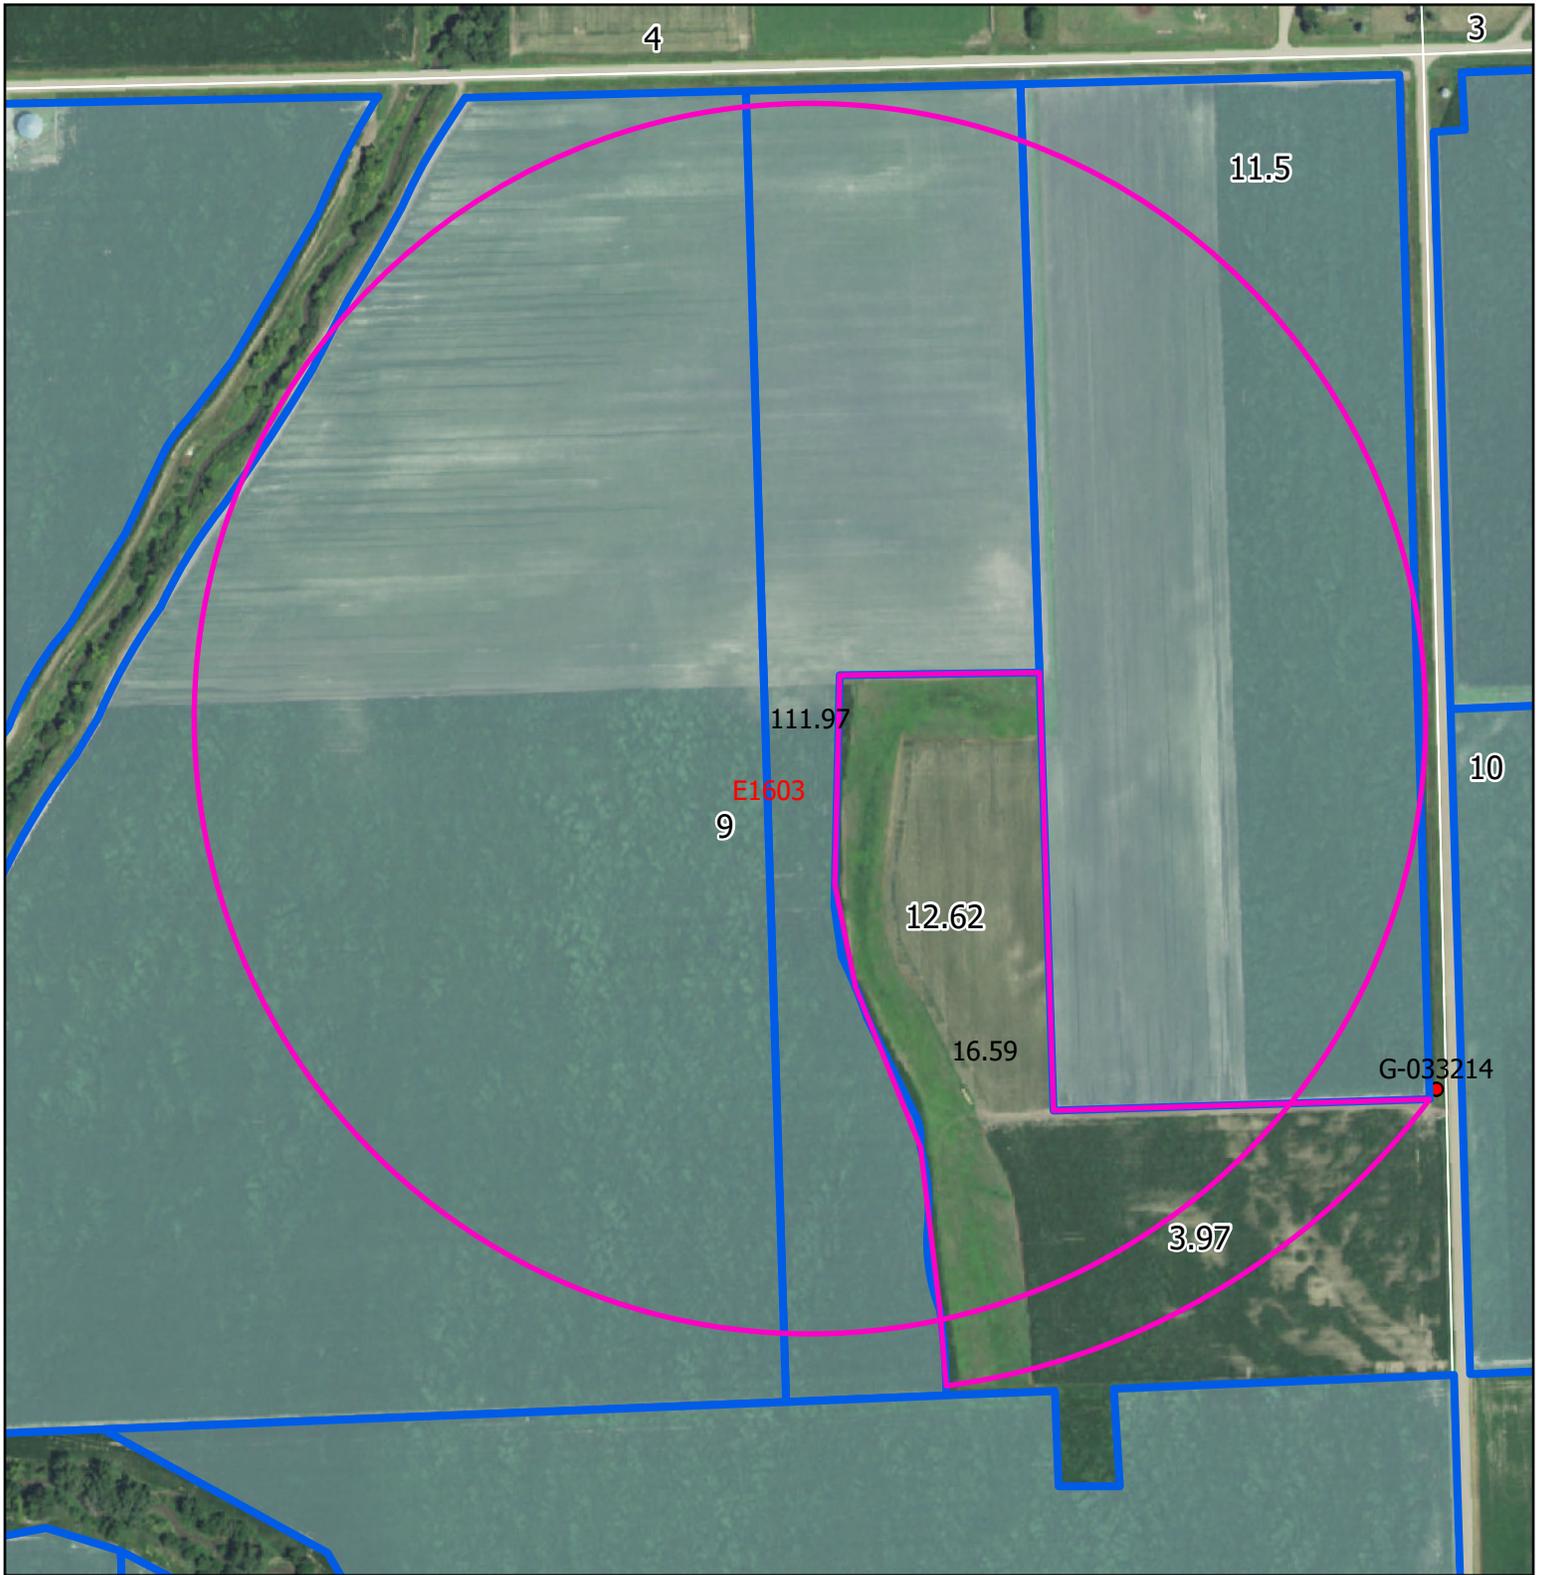

6. Committee Date and Time

The December Water Committee will be on Wednesday, December 27 at 6 pm.

The U.S. Army Corps of Engineers hosted an open house at the Veterans of Foreign Wars Country Club in Yutan on December 6 from 4:30 pm to 7:00 pm. They gave an update on the cleanup efforts of the former ordinance plant at Mead.

7.A. COMMENTS FROM THE PUBLIC

NE 1/4 09-16N-03E
Butler County

**APPLICATION FOR A PERMIT TO CONSTRUCT A WATER WELL
IN THE LOWER PLATTE NORTH NATURAL RESOURCES DISTRICT**

DNR & NRD USE ONLY			
Permit No. _____	Date Approved/Denied _____	NRD Representative _____	
Permit Type: New, Replacement or Late	Date Received _____	Paid: Cash/Check/Card	
Date Post-inspected _____	Registration No. _____	Updated Form: August 2022	

ALL APPLICANTS SEEKING A WATER WELL PERMIT MUST COMPLETE PAGES 1 AND 2, AND THE APPROPRIATE SECTION BASED ON THE PURPOSE OF THE WELL. THIS FORM MUST BE COMPLETED IN FULL AND ACCOMPANIED BY A NON-REFUNDABLE \$50.00 FILING FEE.

1. NAME AND ADDRESS OF <u>LANDOWNER</u>: _____ _____ _____ Phone: _____	NAME AND ADDRESS OF <u>CONTACT</u>: _____ _____ _____ Phone: _____
--	---

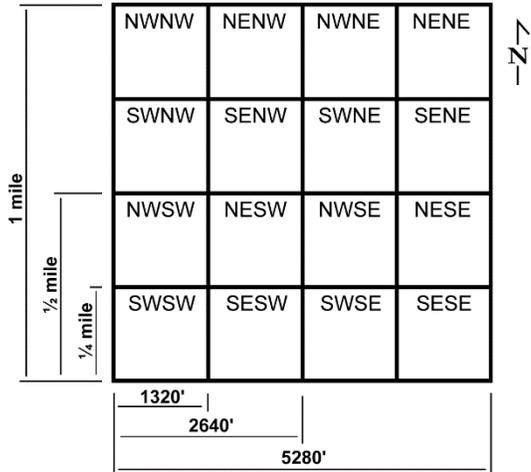

2. PURPOSE OF NEW WATER WELL (indicate one):
 Irrigation (Complete section A) Livestock (Complete section B)
 Domestic (Irr. on one acre or larger, Complete section C)

3. IDENTIFY LOCATION OF PROPOSED WELL:

A. _____ County, _____ 1/4 of the _____ 1/4 of Section _____, Township _____ North, Range _____ East/West. (circle one)

B. The box at the right represents one square mile, (section). Indicate with an "X", the proposed location of the well. Outline the proposed water use area. If the water is to be used outside the above written legal description, give legal description of water use area, _____ 1/4 of the _____ 1/4 of Section _____, Township _____ North, Range _____ East/West.

C. The well will be located _____ feet from the North/South section line, and will be _____ feet from the East/West section line. Or enter Lat. / Long.
 Latitude Degree _____ Minute _____ Second _____
 Longitude Degree _____ Minute _____ Second _____

4. REPLACEMENT AND ABANDONED WELL INFORMATION:

A. Is this a replacement well? Yes, No If yes, fill out the rest of this section.

B. Registration number of well to be replaced: _____

C. Well to be replaced was last operated (month/year): _____

D. Replacement well is _____ feet from original well.

E. Decommissioning of Original well on (month/day/year): _____

F. If water use is for irrigation, list the number of acres watered by the original well: _____

G. If water use is for irrigation, will replacement well, water the same tract of land as the decommissioned well?
 Yes, No: If No, list the number of additional acres _____ and legal description _____ 1/4 of the _____ 1/4 of Section _____, Township _____ North, Range _____ East/West. (circle one)

- A replacement water well must deliver water to the same tract of land as the original water well, pump from a comparable aquifer, and yield approximately the same gallons per minute and total annual water use as the original water well.

5. SPECIFICATIONS OF INTENDED WELL AND PUMP:

- A. Approximate date when construction will begin (month/day/year): _____
- B. Expected total well depth: _____ feet.
- C. Well Casing Diameter: _____ inches.
- D. Pump Column Diameter: _____ inches.
- E. Estimated pumping capacity: _____ GPM.
- F. The system is to be powered by Electric Fuel
- G. Will the well be used in a system with other wells? Yes, No. If Yes, How many _____
List well registration number and legal description of each well in Section 6 below.
- H. Name of Well Driller: _____ (Please attach test hole log, if available.)

6. List additional information requested in this Section or attached additional sheet.

7. Addition information and requirements for Lower Platte North NRD review.

- Attach aerial photo showing location of water source(s) and area water or reuse water is to be used.
- All new and replacement water wells must install a District approved flow meter and report water pumped annually to the LPNNRD by December 15th of each year.
- Water well permit conditions may be required for approval by the Lower Platte North NRD for each individual well.

8. I certify that I am familiar with the information contained in this application, and it's restrictions, rules and regulations and that to the best of my knowledge and belief such information is true, complete and accurate.

Date _____ Signature of Applicant _____
Signature of Well System Operator, if different than Applicant _____
NRD Certification Number of Landowner or Operator _____ (Required for irrigation, livestock, domestic (with irrigation on one acre or more of land), industrial, and public water supply wells.)

9. Lower Platte North NRD Use Only. Comments by District Representative.

**APPLICATION FOR A PERMIT TO CONSTRUCT A WATER WELL
IN THE LOWER PLATTE NORTH NATURAL RESOURCES DISTRICT**

PURPOSE OF WELL

IRRIGATION WELLS (SECTION A)

- A. How many acres will be irrigated? _____ acres
- B. Crops to be planted: _____ Crop rotation schedule _____
- C. Type of irrigation system. Center Pivot, Gravity, Other (specify) _____
- D. Expected total annual consumptive water use in Acre Inches / Year _____ or
Total Gallons / Year _____

LIVESTOCK WELLS (SECTION C)

- A. Name of facility _____
- B. Type of Livestock: Feeder Cattle, Dairy Cattle, Swine over 55 lbs., Swine under 55 lbs.,
 Sheep, Poultry, Horses
- C. Average number of livestock per year _____ and average weight per animal _____ lbs.
- D. Peak number of livestock _____ and time of year _____
- E. Is facility approved by Nebraska Department of Environmental Quality? Yes, No. If Yes, list NDEQ certification IIS number _____ If No, complete the rest of this section.
- F. Type of facility: Open lot, Covered Building
- G. If facility is Open lot, list soil type _____
- H. Estimated depth to ground water under feedlot _____ ft.
- I. Describe manure collection system of feedlot _____

- J. Name and distance of nearest surface watercourse from feedlot _____
- K. For each manure land application site, list legal description and size in acres, method of application, and distance from feedlot operation. _____

DOMESTIC WELLS WITH IRRIGATION ON ONE ACRE OR MORE (SECTION D)

- A. Check all that apply:
 - a. Water use: Lawn and number of acres to be irrigated _____ acres.
 - b. Water use: Commercial garden and number of acres to be irrigated _____ acres.
 - c. Water use: Tree Farm and number of acres to be irrigated _____ acres.
 - d. Water use: Type of livestock _____ and number _____
- B. Type of irrigation system. Sprinkler, Drip Tape, Other (specify) _____
- C. If applicable, give Street address and town _____

* One acre equals 43,560 square feet.

This form must be completed in full and accompanied by a non-refundable \$50.00 filing fee (payable to the Lower Platte North Natural Resources District). Forward this application and filing fees to:

**Lower Platte North Natural Resources District
P.O. Box 126
Wahoo, NE 68066
Phone: (402) 443-4675**

The District will return an incomplete or defective application, with 60 days being allowed for resubmission. The District shall issue all permits with conditions attached, or denied not later than 30 days after receipt of a complete and properly prepared application.

WATER WELL PERMIT RESTRICTIONS

1. A well permit is required prior to the construction of a water well. If construction of a water well is commenced prior to obtaining a permit, a late permit must be completed and accompanied by a \$250.00 application fee. Construction or operation of a new water well without an approved water well permit shall result in the District issuing a 'cease and desist order' against further construction or use of that water well.
2. An irrigation well shall not be constructed within 1000 feet of any registered industrial or public water supply well or within 600 feet of a registered irrigation well; A public water supply well shall not be constructed within 1000 feet of any registered irrigation, industrial or other public water supplier's well; An industrial well shall not be constructed within 1000 feet of any registered irrigation, industrial or public water supply well pursuant to §46-609 and §46-651. These spacing restrictions shall not apply to water wells owned by the same person. Any person may apply to the Nebraska Department of Natural Resources for a special permit to drill a water well without regard to the spacing requirements pursuant to §46-653. The District may adopt stricter well spacing requirements based on different aquifer subareas. Check with the District office if you have any questions.
3. This permit does not register the well with the Department of Natural Resources. All wells are required to be registered by the well driller with the Nebraska Department of Natural Resources within 60 days after the well is completed.
4. A replacement water well is one, which replaces an abandoned water well that has been operated within the last three years, and is constructed to water the same tract of land as the abandoned water well that is being replaced. A replacement water well must be pumping from a comparable aquifer and yield approximately the same gallons per minute and total annual water uses as the original water well it is replacing. As of January 1, 1997, both new and replacement wells need a permit from the Lower Platte North Natural Resources District.
5. Consumptive water use in acre-inches is determined from the Department of Natural Resources (DNR) Net Corn Crop Irrigation Requirement map or a similar map produced by the University of Nebraska.
6. If the well is being replaced it must be properly abandoned according to state guidelines. A copy of these guidelines is available from the Lower Platte North NRD.
7. If the water well is not constructed within a one-year period from the date of approval, a new permit is needed.
8. Water wells may not be drilled within 50 feet of a stream bank without first obtaining a surface water right for that water withdrawal from the Department of Natural Resources pursuant to §46-637.
9. Any person who, on or after January 1, 1997, commences or causes construction of such a well for which the required permit has not been obtained, or who knowingly furnishes false information regarding such a permit, shall be guilty of a Class IV misdemeanor pursuant to §46-602.01 and §46-613.02.
10. Permits are not required for test holes or temporary dewatering wells (30 days or less). Permits are needed for water wells designed to pump 50 gallons per minute or less in Level 3 and Stay management areas.
11. With the well permit application, submit an aerial photograph with markings to show the location of the water source(s) and the location of where the water is to be used.
12. Any person, who knowingly furnishes false information regarding a water well permit, shall be subject to the imposition of penalties imposed through the controls adopted by the District pursuant to §46-746.
13. All new or replacement water wells must install a District approved flow meter and report water pumped annually in acre-inches per year or total gallons per year on LPNNRD approved forms by December 15th of each year.
14. If multiple water sources are used, landowner must supply flow records from each water source in acre-inches per year or total gallons per year on LPNNRD approved forms by December 15th of each year.
15. Water well permit applications require that the applicant or operator of irrigation, livestock, domestic (with irrigation on one acre or more of land), industrial, and public water supply wells be NRD certified.

**** Landowners must list new irrigated acres with the County Assessor, update the DNR well registration, and comply with any additional conditions within 90 days of LPNNRD approval of this water well permit. LPNNRD staff may perform a site visit to verify information provided in the well permit application. ****

SMOKIE L. LAKE / LOWER PLATTE NORTH NRD

November 29, 2023

Location Meeting: Wahoo, NE.

Time: 6:00 P.M.

Mr. Russel Oaklund / Lead Water Specialist

Discussion / Lake problems low water table creating.

First.

The lake water table is down six feet in two years.

Second.

Low water level creates algae and weeds in entire lake. Sun is now hitting bottom of lake. Smokie L. Corporation spent 8k to treat water in the last year, very disappointing results, stopped treatment.

Third.

Lower water causes habitat problems for fish. Ice freezing to bottom will create fish kill off.

Fourth.

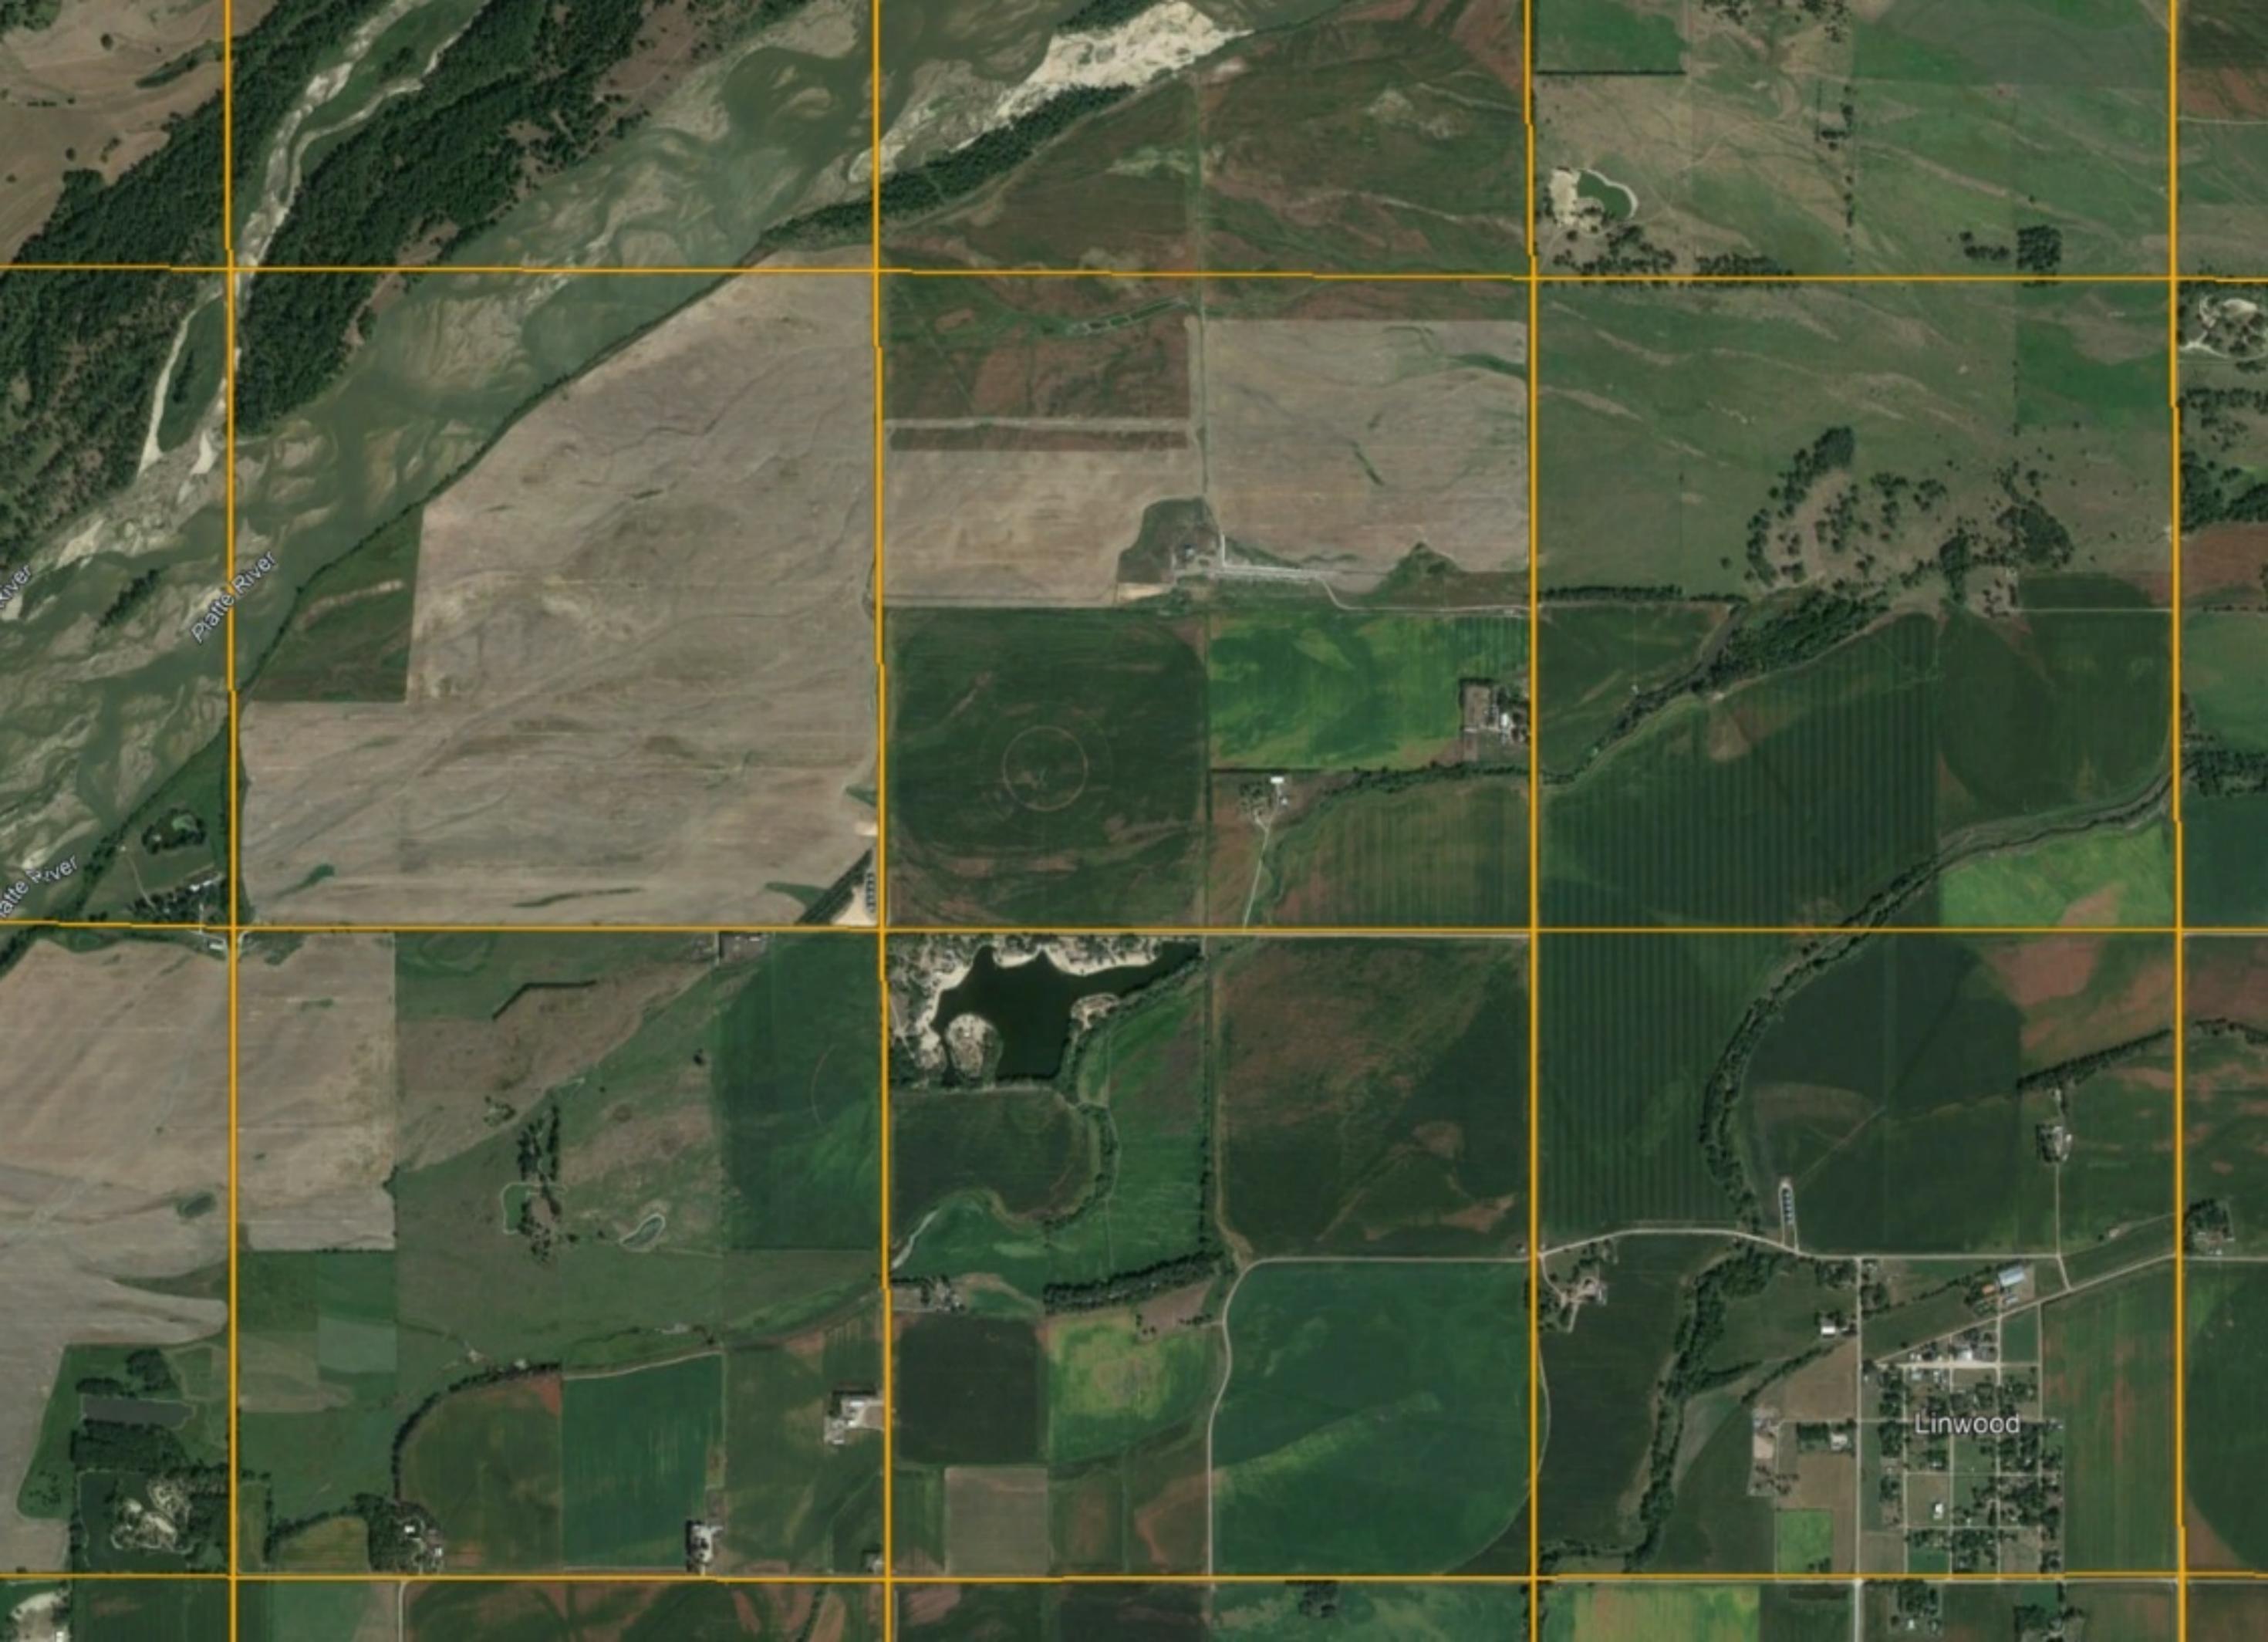

The lower water table has side-lined motorized ski boats and puts a greater liability risk of injury.

Final.

Smokie L. Lake corporation has twenty-seven lot shareholders with homes and substantial investments. Our lake assets are worth next to nothing without a lake with no water. Water is the only way we can protect our large investment in assets, recreation, and livelihood at our lake. With this said, our corporation is asking for permission to move forward on well drilling permit for our lake property.

Thank you for your valuable time.

Steve Chelberg / President

Section I Groundwater Quality Management Area - Phase Four

Rule 1 Phase Four Criteria

When levels of nitrate-nitrogen exceed 15.01 parts per million, or levels of other human induced non-point source contaminants exceed 100% of the MCL or LHAL, a Phase Four area will be declared. Within the same aquifer; boundary setting for Phase Four Areas will be initiated when: water quality analytical results within a minimum 9 square mile area are at identified trigger levels for a minimum of 2 sampling events. The area must contain a minimum of 10 registered wells and contaminant trigger levels must be exceeded in over 50% of the wells. When irrigation wells are not available, other wells may be used. Initial investigation by the District will be to determine if the contamination is a result of point-source or non-point source pollution. If non-point source pollution is found to be the reason, more intensive investigation for boundary setting will ensue. If a Wellhead Protection Area should be established due to non-point source pollution, the District may set boundaries that are less than 9 square miles. After the establishment of a Phase Four Area, if non-point source contamination levels should decline, two consecutive sampling events below the trigger levels are needed before the Area could be placed in Phase Three, Phase Two or Phase One.

Rule 2 Continuation of Phase One, Two and Three Rules

A continuation of Phase One Rules as defined in Section E, Rules 1-6, Section F, Rule 2, Phase Two Rules as defined in Section G, Rules 3, 4, 5, 8, 9, 10 and 11, Phase Three Rules as defined in Section H, Rule 4.

Rule 3 Fertilizer Application On All Soils

Split application of commercial nitrogen fertilizer is required with 80 pounds maximum applied before May 1.

Rule 4 Nitrogen Recommendations

Nitrogen applications must not exceed District Recommendations. Application data may be required to verify the amount of nitrogen that is applied to the field(s) within the management area.

Rule 5 Well Metering

Flow meters are required on all high capacity wells.

Rule 6 Acre-Inch Allocations

A rolling acre-inch allocation, in 3-year increments, will be put into place by the District and will be based on the aquifer subarea, crop planted, irrigation distribution system, percent decline of the aquifer, water use of the aquifer, climatic conditions, net corn crop requirements, and discretionary factors.

Rule 7 Staff Assistance

NRD Staff will work directly with individuals on Best Management Practices. Staff may spot check fields before May 1 by collecting a soil sample to monitor Rule 3.

Article from Nebraska Today (UNL)

Eight years ago, the data was sound but only suggestive, the evidence strong but circumstantial.

Now, the University of Nebraska–Lincoln’s Karrie Weber and colleagues have experimentally confirmed that nitrate, a compound common in fertilizers and animal waste, can help transport naturally occurring uranium from the underground to groundwater.

The new research backs [a 2015 Weber-led study](#) showing that aquifers contaminated with high levels of nitrate — including the High Plains Aquifer residing beneath Nebraska — contain uranium concentrations far exceeding a threshold set by the Environmental Protection Agency. Uranium concentrations above that EPA threshold have been shown to cause kidney damage in humans, especially when regularly consumed via drinking water.

“Most Nebraskans do rely on groundwater as drinking water,” said Weber, associate professor in the School of Biological Sciences and Department of Earth and Atmospheric Sciences. “In Lincoln, we rely on it. A lot of rural communities, they’re relying on groundwater.

“So when you have high concentrations (of uranium), that becomes a potential concern.”

Research had already established that dissolved inorganic carbon could chemically detach traces of uranium from underground sediment, ultimately priming it for transport into groundwater. But the 2015 study, which found that certain areas of the High Plains Aquifer contained uranium levels up to 89 times the EPA threshold, had convinced Weber that nitrate was contributing, too.

So, with the help of 12 colleagues, Weber set out to test the hypothesis. To do it, the team extracted two cylindrical cores of sediment — each roughly 2 inches wide and running 60 feet deep — from an aquifer site near Alda, Nebraska. That site not only contains natural traces of uranium, the researchers knew, but also allows groundwater to flow east into the adjacent Platte River.

Their goal? Recreate that flow in the samples of sediment, then determine whether adding some nitrate to the water would increase the amount of uranium that got carried away with it.

“One of the things we wanted to make sure of was that we did not alter the state of the uranium or the sediments or the (microbial) community when we collected the samples,” Weber said. “We did everything we could to preserve natural conditions.”

“Everything” meant immediately capping and wax-sealing the extracted cores, sliding them into airtight tubes, flushing those tubes with argon gas to dispel any oxygen, and putting them on ice. Back at the lab, Weber and colleagues would eventually remove 15-inch segments from each of the two cores. Those segments consisted of sand and silt that contained relatively high levels of uranium.

Later, the team would fill multiple columns with that silt before pumping simulated groundwater through at roughly the same rate it would have traveled underground. In some cases, that water contained nothing extra. In others, the researchers added nitrate. In still other cases, they added both nitrate and an inhibitor designed to halt the biochemical activity of microorganisms living in the sediment.

The water containing nitrate, but lacking the microbial inhibitor, managed to carry away roughly 85% of the uranium — compared with just 55% when the water lacked nitrate and 60% when it contained nitrate

plus the inhibitor. Those results implicated both the nitrate and the microbes in further mobilizing the uranium.

They also supported the hypothesis that a series of biochemical events, kicked off by the microbes, was transforming the otherwise-solid uranium into a form that could be easily dissolved in water. First, bacteria living in the sediment donate electrons to the nitrate, catalyzing its transformation into a compound called nitrite. That nitrite then oxidizes — steals electrons from — the neighboring uranium, ultimately turning it from a solid mineral into an aqueous one ready to surf the trickle of water seeping through the silt.

After analyzing DNA sequences present in its sediment samples, the team identified multiple microbial species capable of metabolizing nitrate to nitrite. Though that uranium-mobilizing biochemistry had been known to unfold in highly contaminated areas — uranium mines, sites where nuclear waste is processed — Weber said the new study is the first to establish that the same mobilization process also takes place in natural sediment.

“When we first got this project funded, and we were thinking about this, it was as a primary contaminant leading to secondary contamination,” she said of the nitrate and uranium. “This research supports that, yes, that can happen.”

Still, as Weber said, “Nitrate isn’t always a bad thing.” Both her previous research and some forthcoming studies suggest that nitrate mobilizes uranium only when the compound approaches [its own EPA threshold of 10 parts per million](#).

“If we reflect upon what we published prior, that data suggests there’s a tipping point. The important thing,” she said, “is not to have too much.”

The team reported its findings in the journal [Environmental Science & Technology](#). Weber authored the study with Nebraska’s Jeff Westrop, Pooja Yadav, Alicia Chan, Anthony Kohtz, Olivia Healy, Daniel Snow, P.J. Nolan and Donald Pan; Kate Campbell of the U.S. Geological Survey; Rajesh Singh, from India’s National Institute of Hydrology; along with Sharon Bone and John Bargar of the SLAC National Accelerator Laboratory.

Article from:
[Environment and Climate Change](#)

What are the environmental health concerns of uranium?

Naturally occurring uranium has very low levels of radioactivity. The chemical properties of uranium in drinking water are of greater health concern than its radioactivity. Most ingested uranium is due to food intake with lesser amounts accumulated from water or from the air. Uranium mostly is rapidly eliminated from the body, however a small amount is absorbed and carried through the blood stream. Studies show that elevated levels of uranium in drinking water can affect the kidneys. Bathing and showering with water that contains uranium is not considered a health concern. There is inadequate data available to evaluate the carcinogenicity of ingested uranium.

Lower Platte North Natural Resources District

Schuyler – Richland Nitrogen Management Area Water Flow Meter Cost Share Program

Instructions: The Lower Platte North NRD (LPNNRD) is offering a cost share program on water flow meters, which are properly installed within the Schuyler-Richland Nitrogen Management Area. Please fill out the requested information on the back side of this form and submit it with your water flow meter receipt to the Lower Platte North NRD / PO Box-126 / Wahoo Nebraska / 68066. The LPNNRD will use a fixed amount for cost-share reimbursement based on the irrigation pipe diameter used with the flow meter. These amounts are given below: Please note the dates:

Flow Meter for Pipe Diameter	Amount of cost share provided by LPNNRD if installed by December 31, 2023	Amount of cost share provided by LPNNRD if installed between January 1 – December 31, 2024	Amount of cost share provided by LPNNRD if installed after January 1, 2025
6 inches	\$800	\$600	NONE
8 inches	\$1000	\$800	NONE
10 inches	\$1200	\$1000	NONE

Generally, only one flow meter per irrigation system will be eligible for cost share funding. If you have multiple fields, please fill out a separate cost share sheet for each flow meter purchased and installed. Do not purchase any water flow meters until applications are reviewed by LPNNRD. Applications will be reviewed each month and approved or denied at the following LPNNRD Board meeting. A current Nitrogen Certification card is required to be eligible for LPNNRD cost share. Also please fill out one Citizen Attestation form and one W-9 form (which are included in this packet) and submit these with your cost share application sheets and flow meter receipts to the LPNNRD.

Cost share applies to the water flow meter alone. Installation cost and any additional equipment such as straightening vanes, flow stabilizers, etc. are the total cost of the producer or landowner. Flow meters are to be from the LPNNRD Approved Flow Meter List and meet other requirements as outlined on this document, such as installed to manufacturer's recommendations, etc. (see attached). Flow meter readings are to be taken at the end of the irrigation season and reported to the Lower Platte North NRD by December 15th of each year. Failure to properly install the flow meter or failure to report these readings could result in denial of cost share assistance.

The LPNNRD will inspect each flow meter installation to make sure it has been properly installed and it matches the description on the cost share application. Incomplete applications maybe denied or delayed until the required information has been submitted and other requirements have been met.

Applications will be accepted starting January 1, 2023, with final deadline March 1, 2024. If funds should become limiting, cost share will be awarded on a 'first come – first serve' basis with priority awarded to meters purchased between January 1, 2023 to November 1, 2023. Time extensions and other considerations will be reviewed on a case-by-case basis by the LPNNRD.

**Request for Qualifications
Lower Platte North Natural Resources District
Groundwater Management Plan Update**

Proposals Must Be Received by: 10:00 am on December 27, 2023.

The Lower Platte North Natural Resources District (LPNNRD) is requesting qualifications from firms specializing in the technical writing of a Groundwater Management Plan. The plan should meet all the requirements outlined by Nebraska State Statues 46-709 as shown:

- (1) Ground water supplies within the district including transmissivity, saturated thickness maps, and other ground water reservoir information, if available;
- (2) Local recharge characteristics and rates from any sources, if available;
- (3) Average annual precipitation and the variations within the district;
- (4) Crop water needs within the district;
- (5) Current ground water data-collection programs;
- (6) Past, present, and potential ground water use within the district;
- (7) Ground water quality concerns within the district;
- (8) Proposed water conservation and supply augmentation programs for the district;
- (9) The availability of supplemental water supplies, including the opportunity for ground water recharge;
- (10) The opportunity to integrate and coordinate the use of water from different sources of supply;
- (11) Ground water management objectives, including a proposed ground water reservoir life goal for the district. For management plans adopted or revised after July 19, 1996, the ground water management objectives may include any proposed integrated management objectives for hydrologically connected ground water and surface water supplies but a management plan does not have to be revised prior to the adoption or implementation of an integrated management plan pursuant to section [46-718](#) or [46-719](#);
- (12) Existing subirrigation uses within the district;
- (13) The relative economic value of different uses of ground water proposed or existing within the district; and
- (14) The geographic and stratigraphic boundaries of any proposed management area.

Each district's ground water management plan shall also identify, to the extent possible, the levels and sources of ground water contamination within the district, ground water quality goals, long-term solutions necessary to prevent the levels of ground water contaminants from becoming too high and to reduce high levels sufficiently to eliminate health hazards, and practices recommended to stabilize, reduce, and prevent the occurrence, increase, or spread of ground water contamination.

The LPNNRD's first plan was approved in 1985 and most recently updated in 1995. Since 1995 the NRD has collected additional geologic, groundwater quality, and quantity data. Maps and reports created with this data are available at the LPNNRD office in Wahoo. The LPNNRD's goal is to create a new Groundwater Management Plan that is concise, easily readable by the public, adaptable, and meets statutory requirements. Additional topics of focus in the plan shall include:

- The availability of supplemental water supplies;
- Public health concerns;
- Contamination triggers;
- Rural and urban best management practices;
- Organic and inorganic nitrogen;
- References to additional interactive maps for public viewing currently being developed by the LPNNRD; and
- Other recommendations that arise during the process of updating the plan.

Minimum Project Requirements:

1. Exemplary communication and a robust public participation process, including:
 - a. One in-person kickoff meeting at LPNNRD office with District personnel;
 - b. Two in-person public meetings and six stakeholder meetings;
 - i. The NRD will take care of invites, notices, facilities, and printing of information with general guidance from contractor;
 - c. Two in-person meetings with LPNNRD water committee;
 - d. One in-person meeting/presentation to LPNNRD board of directors; and
 - e. Virtual and/or in-person meetings with staff as needed.
2. Final state approved groundwater management plan, which shall include:
 - a. One round of revisions requested from NeDNR and other applicable reviewing agencies; and
 - b. Adobe PDF format and the editable documents including all links used to produce the final PDF (Adobe InDesign, Microsoft Word, or other software package as agreed to).

If interested, the following information should be submitted:

1. A letter of interest not to exceed two (2) 8 ½ x 11 pages. Include the firm name, address, telephone number and email address, the year the firm was established, any previous names for the firm and a list of the types of services for which the firm is qualified.
2. The body of the proposal not to exceed five (5) 8 ½ x 11 pages and three (3) 11 x 17 pages. General overview of firm's understanding of the project(s) and approach to the project(s).
3. A description of the project organization not to exceed two (2) 8 ½ x 11 pages. Including the names of the principals of the firm, the names of the personnel expected to be utilized including any sub-consultant personnel and the specific project contact person.
4. A list of similar projects completed by the firm within the last 5 years. Please list key personnel involved in each project. Each project description shall be limited to one (1) 8 ½ x 11 page (maximum of 4 pages).
5. Resumes of key personnel. Resumes shall include their workplace location, a description of their relevant experience, length of time with the firm, applicable licensures and

registrations, and their proposed role in the project. Resumes shall be limited to one (1) 8 ½ x 11 page per resume (maximum of 10 pages).

6. Proposed schedule of completion not to exceed one (1) 11 x 17 page.
7. Proof of professional liability insurance in the amount of \$1,000,000 not to exceed one 8 ½ x 11 page.

Selection factors for the project will include the following:

1. Project understanding and approach;
2. The project organization, adequacy of available staff, location of personnel relative to the project location;
3. Ability to meet schedule of completion;
4. Similar projects completed by the firm; and
5. Qualifications of the professional personnel and staff members.

Project Fee:

Estimated fees should be submitted for all aspects of this project.

General guidelines:

This RFP for consulting services is a qualifications-based selection process, however, an estimate of probable costs for services are requested with the proposal as outlined above. The final price for consulting services will be negotiated with the selected firm during the scoping process. All consultant firms submitting proposals must be available to initiate work upon notice to proceed.

Final selection of the firm to perform such services may require an in-person interview that will be scheduled after receipts of the project proposals. If selected for an interview, firm must be available the first week of January (January 3rd, 4th, or 5th) to present to the LPNNRD's selection committee. The LPNNRD intends to negotiate a contract with the recommended firm and approve a contract at the January 8, 2024 Board meeting.

One hard copy and an electronic copy of your qualifications/proposals must be provided to: Lower Platte North NRD, Box 126, 511 Commercial Park Road, Wahoo, NE 68066, no later than 10:00 AM on Wednesday December 27th, 2023.

Questions regarding the RFQ/RFP and hiring process can be addressed to Daryl Andersen, LPNNRD (phone: 402-443-4675; e-mail address: dandersen@lpnnrd.org).

Your interest in submitting a project proposal is appreciated.

Attachment available on the District's website (lpnnrd.org):

1. GW Management Plan 1995

Send to Wahoo Newspaper on November 30, 2023, to be published in the December 8th, 15, and 22nd, 2023 issue of the Wahoo newspaper.

Request for Qualifications

The Lower Platte North Natural Resources District (LPNNRD) is requesting proposals for updating the LPNNRD Groundwater Management Plan as outline in State Statute 46-709. Deadline for proposals is Wednesday December 27th, 2023 at 10:00 AM. Additional details can be obtained online at lpnnrd.org or by calling the NRD office at 402-443-4675.
