Re**:** Mentors Care Update

Strategic Goal, Objective or <u>Need</u> Addressed:

District Goal 4 Objective: Work in collaboration with students, parents, and community members to ensure everyone is welcome, respected, and valued.

Summary:

Since 2009, Mentors Care has been connecting struggling high school students with mentors, tools, and resources to help lead them toward graduation and purposeful lives. CISD partnered with Mentors Care August 2024. Brian Blackwell will provide an update on our partnership.

<u>Action Requested</u>
No board action is required.

Student Outcries

Students often reach out to our coordinators for emotional support. Throughout the week, students can count on our office being open & welcoming.

- CHS had 19 student outcries to the coordinator
- CHS coordinator provided emotional support 2 times for CHS students NOT in our program.

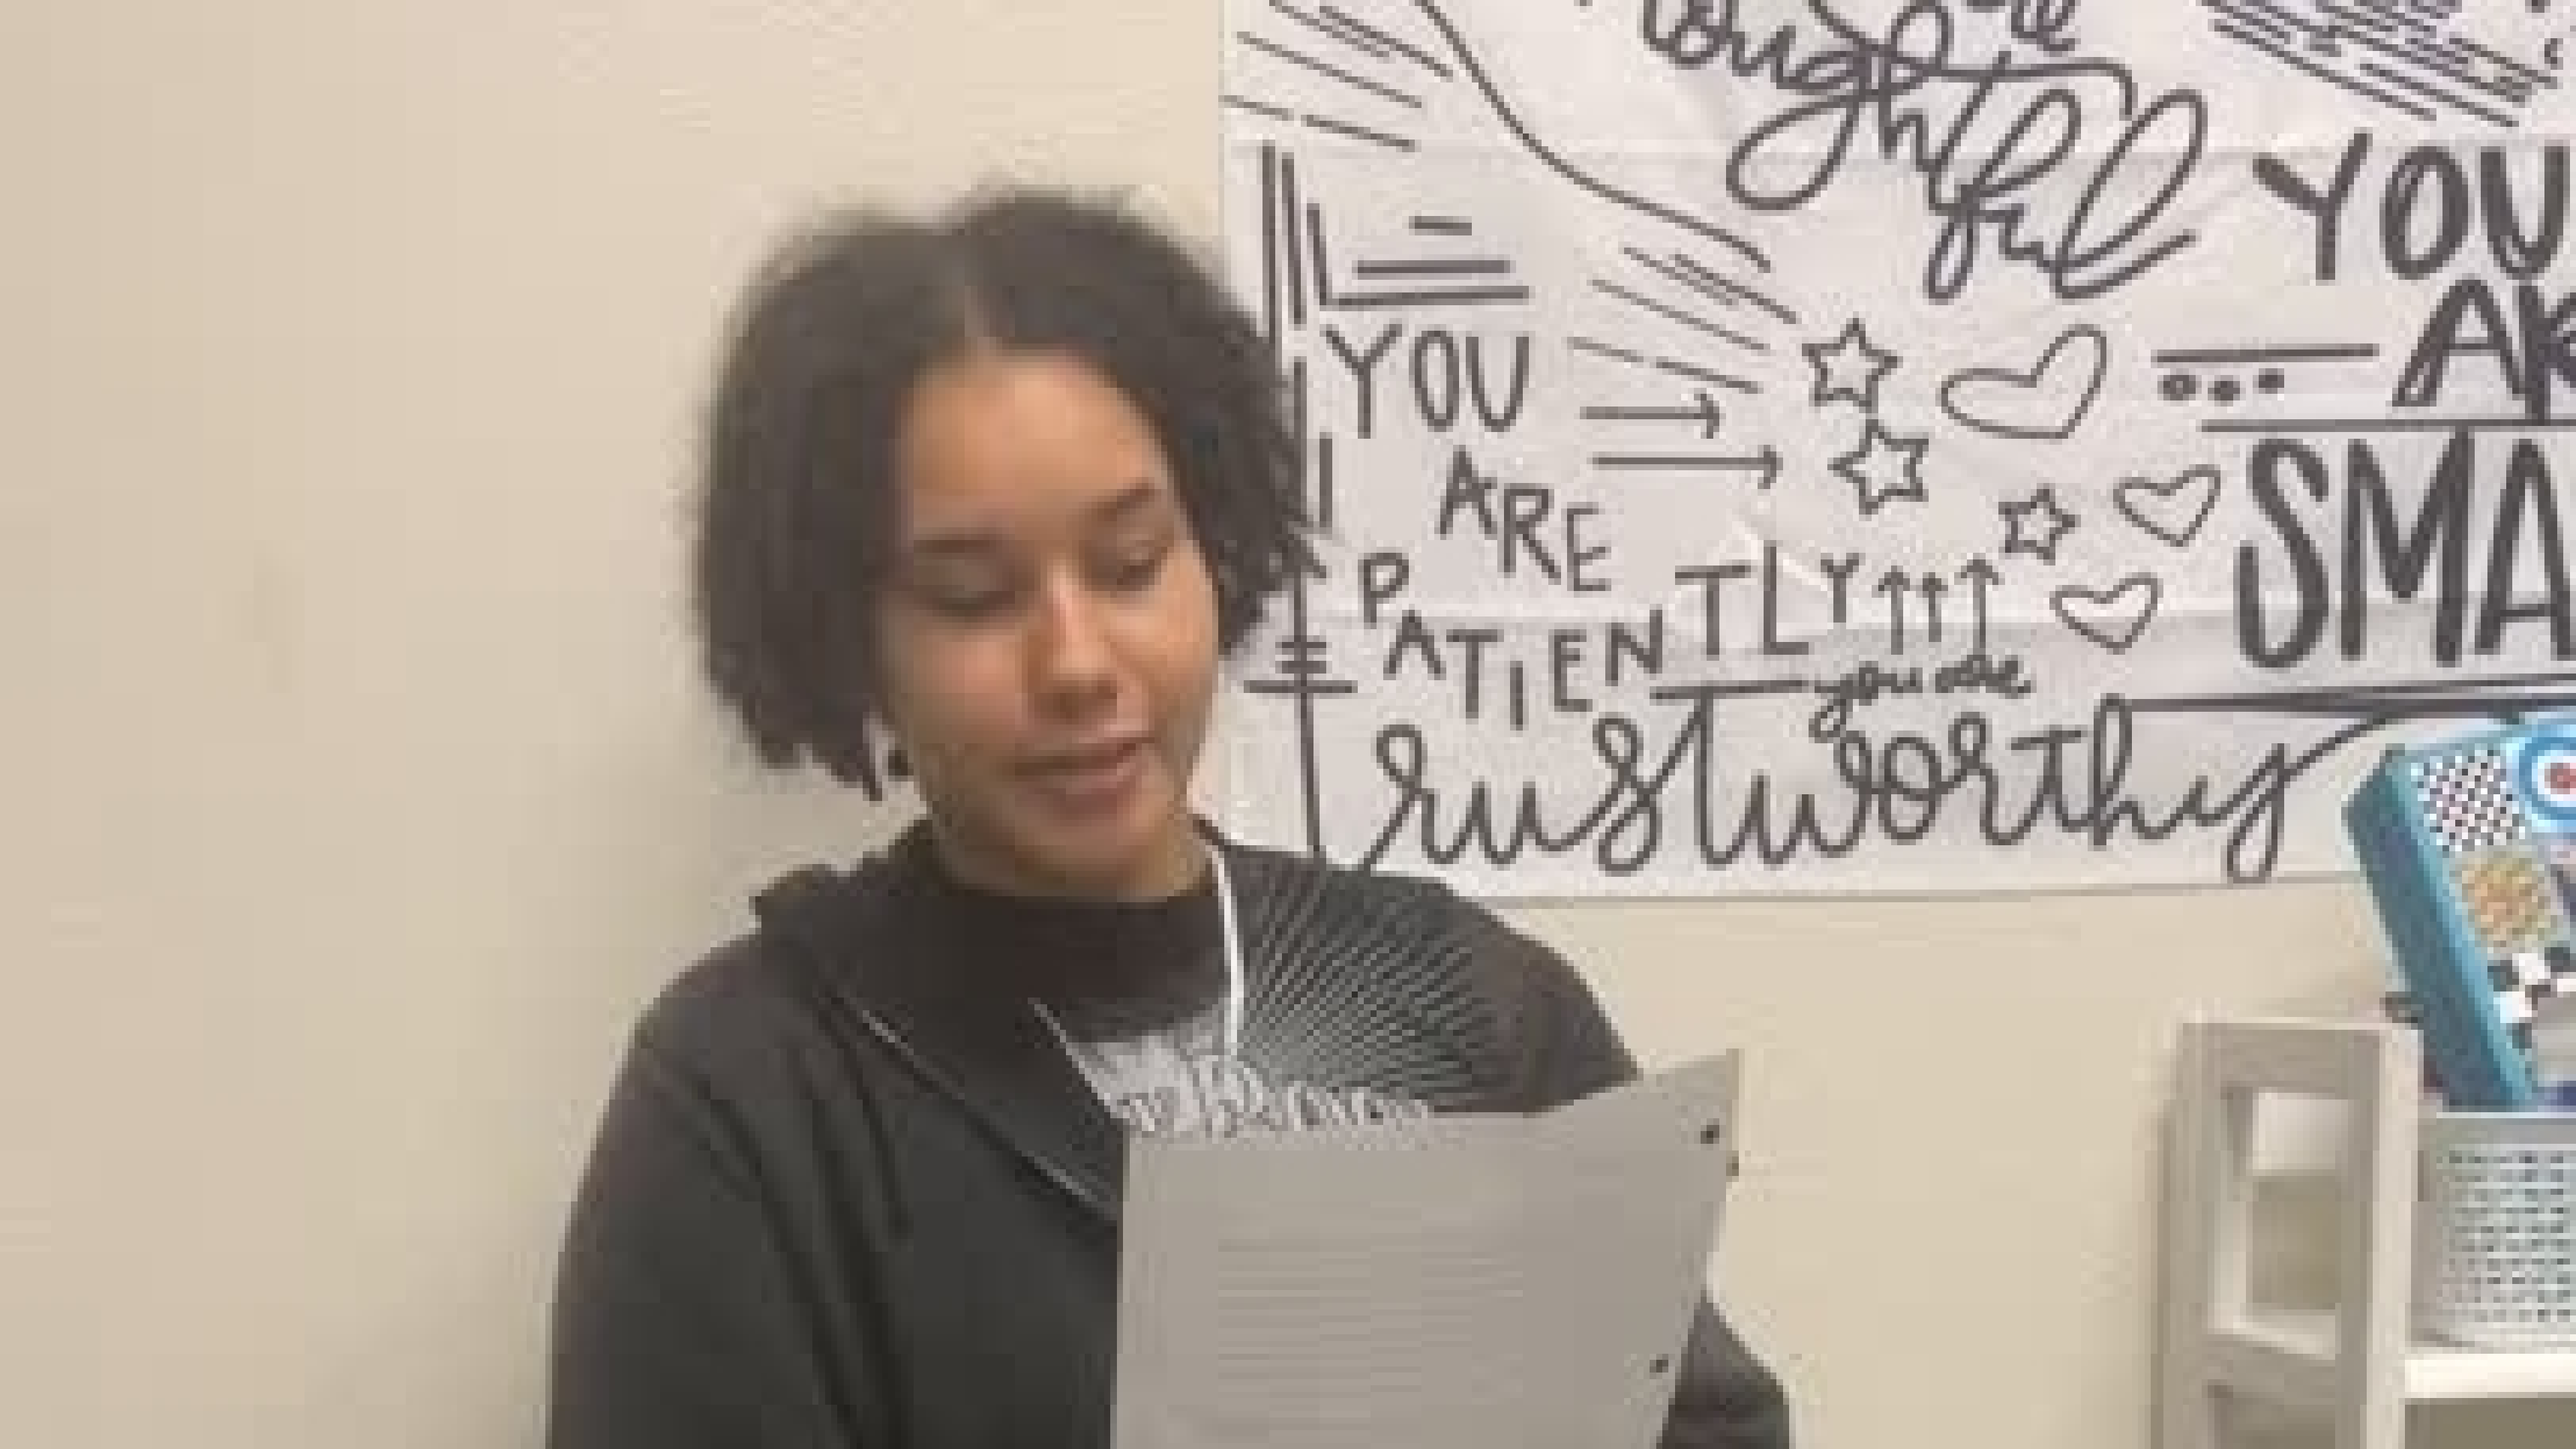
*Students in the program for any length of time Aug. 2024 – Jan. 2025

FROM THE STUDENTS

47%

of Mentors Care students did *not* have a safe person to talk to prior to Mentors Care

"I love having caring adults by my side. Mentors Care has taught me how to open up about things going on in my life and how to ask for help when I hit a rough patch."



-Mentors Care Student

CLEBURNE HIGH SCHOOL COORDINATOR

“Mentors Care invests in the lives of students no matter their situation, past or present. We love, support and encourage students to reach their full potential daily. The students look forward to their meetings, sharing about their week and the progress they have made. It is inspiring to see the mentors show up consistently, and to watch their relationships evolve. Mentoring is making a difference in the lives of the students they serve.”

Re: Out of State Travel

Strategic Goal, Objective or Need Addressed:

Approval of 1 student along with the CTSO advisor to travel out of state for national competition.

Summary:

After competing at the Future Business Leaders of America (FBLA) state convention, 1 student earned the opportunity to advance to the national Future Business Leaders of America convention in Anaheim, CA. The dates for the convention are June 29 – July 2, 2025. The students will be accompanied by advisor Kelly Perez.

Attachments:

Cleburne ISD

Open Education Resource (OER) Transition Plan for Bluebonnet Learning Instructional Materials

SPRING 2025

ACTION 1: Setting Implementation Goals

1A: Implementation Framework

Review the **Implementation Framework** and the **Fidelity of Implementation (FOI) Look-Fors** to identify the phase of implementation (initial or deeper) and become familiar with key actions to support successful implementation efforts.

TAKE ACTION: Implementation Framework

Describe the phase of Bluebonnet Learning implementation (initial or deeper) for the start of the upcoming school year:

The Cleburne ISD curriculum and leadership team identified inequitable instruction, specifically a lack of access to grade-level content and high expectations, as a practice observed throughout many K–5 classrooms over previous years. The team decided that it is critically important for Cleburne ISD to adopt and implement high-quality instructional materials so that all students can achieve success in school and beyond.

An adoption committee was established. After months of reviewing additional research and studying instructional materials options, the team selected Bluebonnet Learning instructional materials.

Cleburne ISD will implement Bluebonnet Learning in the upcoming school year in the initial implementation phase. The adoption team worked with the curriculum leadership team to develop the OER Transition Plan for Bluebonnet Learning instructional materials.

1B. Implementation Goals

Based on the implementation phase and local context, develop a specific goal for each implementation goal area: Bluebonnet Learning Implementation, Stakeholder Investment, Teacher Practice, and Student Outcomes. Identify the continuous improvement process that will be followed and develop a progress monitoring timeline.

TAKE ACTION: Implementation Goals

Goal Area: Bluebonnet Learning Implementation

- Goal: 100% of teachers implement the materials consistently by the middle of the 2025-26 school year.
- Measure(s): Classroom walkthroughs using a locally developed observation form.
- Frequency: Minimum monthly walkthroughs of each classroom

- Progress Monitoring: Quarterly data review and reflection at campus leadership and district principal meetings

---

Goal Area: Stakeholder Investment

- Goal: 85% of teachers and leaders report high confidence in Bluebonnet Learning instructional materials by the end of the school year
- Measure(s): Stakeholder surveys to teachers, campus math specialists, and school leaders
- Frequency: Beginning and middle of the school year (September and May)
- Progress Monitoring: The curriculum team will synthesize the data and provide reports to campus leadership teams within one week of administration. Campus leadership teams will review, analyze, and plan next steps to support adaptive change management and continued investment in Bluebonnet Learning instructional materials.

Goal Area: Teacher Practice

- Teacher Practice Goal: 90% of teachers use unit or lesson internalization protocols at least once each week during collaborative planning time.
- Measure(s): PLC observations using the locally-developed learning walk tool for collaborative planning and review of annotations in Bluebonnet Learning teacher materials.
- Frequency: School leaders will observe one PLC per grade band each week; school leaders will review teacher annotations weekly.
- Progress Monitoring: Quarterly data review and reflection at campus leadership and district principal meetings.

Goal Area: Student Outcomes

- Student Outcomes Goal: 100% of students engage with grade-level content from Bluebonnet Learning and build familiarity with embedded routines and strategies.
- Measure(s): Classroom walkthroughs using a locally developed Bluebonnet Learning observation form.
- Frequency: Minimum monthly walkthroughs for each classroom.
- Progress Monitoring: Quarterly data review and reflection at campus leadership meetings and at district principal meetings

---

ACTION 2: Creating the Conditions for Success

2A. Materials Access

Develop a plan for timely access to print materials and related manipulatives through Bluebonnet Learning procurement and distribution.

TAKE ACTION: Materials Access Planning

Task: **Order Bluebonnet Learning instructional print materials. Identify quantity by grade level and campus. If applicable, procure instructional materials through requisitions in EMAT.**

- Task owner/manager: Fixed Assets and Textbook Coordinator
- Timeline: March 2025
- Key Actions/Steps:
    - The Mathematics Curriculum Coordinator will obtain projected enrollment numbers for Bluebonnet Learning instructional materials.
    - The Fixed Assets and Textbook Coordinator will submit orders through EMAT.

Task: Order or secure any related manipulatives needed. Identify items and quantity by grade level and campus. If applicable, procure related manipulatives in EMAT.

- Task owner/manager: Mathematics Curriculum Coordinator
- Timeline: February–April 2025

  Key Actions/Steps:
    - The Mathematics Curriculum Coordinator will review the Bluebonnet Learning instructional materials guides and materials lists to identify and create lists of any related manipulatives that need to be ordered by subject area and grade level.
    - The Mathematics Curriculum Coordinator will communicate this information to Fixed Assets and Textbook Coordinator to order available manipulative kits in EMAT to ensure delivery before the start of the school year

---

Task: Determine the process for receiving and distributing materials to campuses and classrooms.

- Task owner/manager: Fixed Assets and Textbook Coordinator
- Timeline: March–August 2025

  Key Actions/Steps:
    - The Fixed Assets and Textbook Coordinator will inventory and barcode all Bluebonnet Learning instructional materials upon delivery.
    - The Fixed Assets and Textbook Coordinator will coordinate with campus principals to arrange delivery of received materials to each campus.
    - Campus principals will ensure that delivered material matches the campus order form and is entered into the campus inventory.
    - Campus principals will establish a process for the distribution of Bluebonnet Learning instructional materials and any related manipulatives to staff and students.

Task: Communicate the Bluebonnet Learning printed instructional materials and related manipulatives ordering and distribution process with appropriate stakeholders.

- Task owner/manager: Fixed Assets and Textbook Coordinator and campus principals
- Timeline: March–August 2025
  Key Actions/Steps:
    - The Fixed Assets and Textbook Coordinator will communicate with campus principals regarding the status of Bluebonnet Learning instructional materials delivery and distribution.
    - Campus principals will communicate the process for the distribution of materials to staff and students to all relevant stakeholders.

Task: Determine the process for ensuring all teachers, campus math specialists, and school leaders who will be involved in the implementation of Bluebonnet Learning have access to all the necessary instructional materials and manipulatives.

- Task owner/manager: Campus principals
- Timeline: March 2025~May 2026
  Key Actions/Steps:
    - Campus principals will ensure that all teachers, including general education and specialized teachers, campus math specialists, campus administrators, and any other relevant staff have access to Bluebonnet Learning instructional materials and any other related materials necessary for implementation.
    - Campus principals will ensure that all students have Bluebonnet Learning instructional materials and access to any manipulatives or other materials needed.
    - The Fixed Assets and Textbook Coordinator has developed a plan to maintain an inventory of teaching materials and a process for securing additional materials based on increased teacher allotments and/or student population increases.

Task: Ensure that all teachers, campus math specialists, and school leaders can access essential Bluebonnet Learning planning and support resources including scope and sequences and locally adapted internalization protocols, student work analysis protocols, and observation tools.

- Task owner/manager: Mathematics Curriculum Coordinator, Campus Math Specialists, Campus Principals
- Timeline: April 2025–August 2025 and then ongoing through May 2026
  Key Actions/Steps:
    - The Mathematics Curriculum Coordinator and Math Specialists will provide training sessions for district leaders, campus principals and leadership teams, and teachers on how to access and navigate Bluebonnet Learning instructional materials, specifically scope and sequences, locally adapted protocols, and locally adapted observation tools.
    - Campus Math Specialists will provide this training experience to any new staff hired after the start of the school year.

Task: If applicable, determine the process and timeline for digital access and related technology support resources.

- Task owner/manager: Mathematics Curriculum Coordinator, Information Technology Systems Administrator
- Timeline: April–September 2025
  Key Actions/Steps:
    - The Information Technology Systems Administrator, along with support from the Mathematics Curriculum Coordinator, will coordinate with platform developer professional learning teams to develop training or resources for staff to access and navigate digital versions of Bluebonnet Learning instructional materials.
    - The Mathematics Curriculum Coordinator and Math Specialists in coordination with the platform developer professional learning teams will communicate resources and provide training opportunities to staff.

2B. Schedules and Calendars

Design master schedules and instructional calendars to 1) meet the required instructional minutes as outlined in Bluebonnet Learning, and 2) ensure time for teacher planning and lesson preparation is provided within the normal teacher workday.

TAKE ACTION: Schedules and Calendars

Master Schedule(s): Describe expectations and guidelines for development of master schedule that meet the requirements outlined in Bluebonnet Learning instructional materials. Include resources/links, as necessary, of master schedules that reflect instructional minute allocations for daily instruction.

Campuses will develop master schedules that allocate the recommended instructional minutes for Bluebonnet Learning instructional materials. Campuses may choose to allocate additional minutes but must ensure all additional instructional programming requirements are met as described in Cleburne ISD instructional minutes allotments.

- Bluebonnet Learning Math Grade K–5, minimum of 60 minutes daily of Tier 1 Core instruction
- Bluebonnet Learning Math Grade 6-Alg I, minimum of 45 minutes daily of Tier 1 Core instruction

---

Instructional Calendar(s): Describe expectations and guidelines for the development of an instructional calendar that includes time allocations for teacher planning and preparation including routine time for collaborative planning and preparation with an campus math specialist and/or school leader. Include resources/links, as necessary, of instructional calendars that reflect instructional minute allocations for teacher planning and preparation, including opportunities for collaboration.

Each campus should aim to provide an instructional calendar reflecting time for internalization and student work analysis at least 75 minutes per week during common planning time and teacher conference times.

PLC, at minimum, should be scheduled once per week for prioritization of internalization and job-embedded support for teachers. The additional 30 minutes of common planning per week may be scheduled in blocks of 3 hours each six weeks during early release days or used once per week during enrichment/intervention block.

2C. Aligned Expectations

Develop and communicate clear expectations for using Bluebonnet Learning instructional materials with fidelity.

Please note that Action Items 3A-C and 5A-B complement and support this action item (2C).

TAKE ACTION: Aligned Expectations

Alignment Item: Use of Bluebonnet Learning instructional materials.

- **Expectations:** Bluebonnet Learning instructional materials are used for daily Tier 1 instruction for all students without substituting or supplementing with other materials not approved for use. Other approved materials will be listed in the Approved Supplemental Materials List, maintained by the Mathematics Curriculum Coordinator.
- **Plan for Communication:** Expectations for materials use will be integrated into Bluebonnet Learning onboarding training for all stakeholders. All teachers, coaches, and school leaders will have the opportunity to review Bluebonnet Learning instructional materials during summer professional development and back-to-school in-service and will be able to make any recommendations for modifications and/or integration of any additional materials. The Mathematics Curriculum Coordinator will identify a team of representative stakeholders who will review the requests for supplemental materials and update the Approved Supplemental Materials List accordingly.
- **Timeline:** The supplemental materials committee will be identified no later than the first week of August. A review of the materials will take place by the August in-service. Recommendations for modifications and/or the addition of supplemental materials can be submitted at any time. Recommendations and updates to the supplemental materials list will be made quarterly (September, December, March, and June).

Alignment Item: Internalization protocol and process.

- **Expectations:** Teachers prioritize internalization during common planning time and use locally adapted Bluebonnet Learning protocols as the planning and preparation process for both common and individual practices. Teachers will annotate lessons in a way that demonstrates alignment with the protocols and will submit annotated lessons to their administrator for review at least once per

month. Principals may indicate a more frequent cadence for annotation submission. School leaders will observe PLCs weekly using the locally developed PLC Protocols Tool
- **Plan for Communication:** All requirements for protocol use will be communicated to stakeholders as part of the onboarding and orientation training.
- **Timeline:** Onboarding and orientation training will be scheduled throughout August. The training will be repeated in October and January for new hires.

Alignment Item: Student work analysis protocols and process.

- **Expectations:** Teachers, Math Specialists, and campus leaders analyze student work using the Bluebonnet Learning protocol during common planning time at least once per month beginning in October.
- **Plan for Communication:** All requirements for protocol use will be communicated to stakeholders as part of the onboarding and orientation training. campus math specialists and school leaders will model the use of student work analysis protocol and review expectations for use during all PLCs in early October.
- **Timeline:** Onboarding and orientation training will be scheduled throughout August. The training will be repeated in October and January for new hires.

Alignment Item: Curriculum-embedded assessment expectations.

- **Expectations:** Teachers consistently administer Bluebonnet Learning embedded assessments. During the initial year of implementation, all teachers will administer all Bluebonnet Learning assessments as designed. Modifications and/or accommodations may be made to meet individual student needs based on IEP or another student's educational plan. School leaders will monitor the fidelity of administration for Bluebonnet Learning unit assessments.
- **Plan for Communication:** Expectations for embedded-assessment use will be integrated into Bluebonnet Learning onboarding training for all stakeholders.
- **Timeline:** Onboarding and orientation training will be scheduled throughout August. The training will be repeated in October and January for new hires. Principals will report on the fidelity of the use of Bluebonnet Learning assessments at principal meetings.

2D. Professional Learning Plan

Develop a professional learning plan for teachers, campus math specialists, and school leaders that includes 1) product onboarding and orientation, and 2) ongoing job-embedded, curriculum-based professional development.

TAKE ACTION: Professional Learning Plan

Professional Learning Experience: Training on Research-based Instructional Strategies (RBIS) and how Bluebonnet Learning instructional materials support RBIS.

- **When will this happen?** The Mathematics Curriculum Coordinator, CISD Professional Development Coordinator, and ESC 11 trainers will collaborate to determine dates for RBIS training to be offered beginning June 2025 and ending October 2025. The summer sessions will be hosted during the weekday by ESC 11 staff. The October sessions will be hosted by Cleburne ISD staff.
- **Who will lead/participate?** Our Education Service Center and Professional Development Coordinator will provide several options for receiving RBIS training. All classroom teachers, specialized teachers, campus math specialists, district curriculum and instruction coordinators and specialists (including all related programs), campus math specialists, principal supervisors, principals, and all school administrators are required to attend RBIS training.
- **What materials or resources are needed?** Our ESC will coordinate the training sessions during the summer; the Mathematics Curriculum Coordinator will communicate with the ESC to organize the sessions and arrange any materials or resources needed.

Professional Learning Experience: Training that focuses on communicating expectations, implementation goals, and change management.

- **When will this happen?** General expectations regarding the use of Bluebonnet Learning instructional materials and practices will be integrated into onboarding and orientation training. Implementation goals and purpose/reasons for implementation of Bluebonnet Learning will be the focus of beginning-of-year faculty meetings conducted by campus principals. Additional expectations and change management supports will be an ongoing district-level focus at principal meetings (led by the assistant Assistant Superintendent of Curriculum and Instruction and Mathematics Curriculum Coordinator) and a campus-level focus at faculty/staff meetings (led by campus principals).
- **Who will lead/participate?** The Assistant Superintendent of Curriculum and Instruction, Mathematics Curriculum Coordinator, and campus principals will lead the development and delivery of these experiences. Attendees will include all instructional staff.
- **What materials or resources are needed?** Leaders will study and use the Bluebonnet Learning Program and Course Level Resources along with resources from the service center to develop a launch presentation for beginning-of-year faculty meetings. . The Assistant Superintendent of Curriculum and Instruction, the principal supervisor, and the Mathematics Curriculum Coordinator will develop a protocol for recurring discussion of these topics at principal meetings. Principals will receive template slides for use at recurring faculty meetings.

Professional Learning Experience: Bluebonnet Learning instructional material onboarding and orientation.

- **When will this happen?** Cleburne ISD will partner with our Education Service Center and third party vendors to provide onboarding and orientation (including an introduction to the design principles of the materials) for Bluebonnet Learning instructional materials in August and September. District curriculum and instruction program staff will coordinate with the service center to integrate local

context, expectations, and change management practices into the onboarding and orientation experience.
- **Who will lead/participate?** Sessions will be led jointly by ESC partners and Cleburne ISD curriculum and instruction staff. All elementary instructional staff, secondary mathematics teachers, and campus leaders will attend the onboarding and orientation training.
- **What materials or resources are needed?** The Mathematics Curriculum Coordinator and Professional Development Coordinator will communicate with the ESC to organize the sessions and arrange any materials or resources needed.

Professional Learning Experience: Training and intentional work time dedicated to understanding the design principles of Bluebonnet Learning instructional materials.

- **When will this happen?** The first professional learning experience around understanding the design principles of Bluebonnet Learning instructional materials will include an introduction to the design principles as part of the onboarding and orientation. Ongoing, job-embedded professional learning focused on understanding the design principles of Bluebonnet Learning materials will be the focus of campus math specialist and school leader-facilitated internalizations and will occur weekly during common planning. Campus math specialists and school leaders will attend additional training to support leading internalization and conducting observation and feedback cycles.
- **Who will lead/participate?** Onboarding and orientation sessions will be led jointly by ESC partners and Cleburne ISD curriculum and instruction staff. All K-Algebra I instructional staff and leaders will attend the onboarding and orientation training. All teachers will attend internalization facilitation sessions. All campus math specialists and administrators will attend coaching training.
- **What materials or resources are needed?** The Mathematics Curriculum Coordinator and Professional Development Coordinator will communicate with the ESC to organize the sessions and arrange any materials or resources needed. Campus staff will use the Bluebonnet Learning internalization protocols for facilitation sessions.

Professional Learning Experience: Regular unit and lesson internalization in collaborative teams and/or individually with an campus math specialist or school leader.

- **When will this happen?** Teachers and campus math specialists/school leaders will engage in weekly facilitation of internalization of an upcoming unit or lesson. Additional internalization support sessions may occur at the teacher's discretion.
- **Who will lead/participate?** Campus math specialists and school leaders will facilitate internalization practice at least once weekly per teacher/grade level using the Bluebonnet Learning internalization protocols. All teachers will attend internalization facilitation sessions either with their grade level or individually for those who are departmentalized.
- **What materials or resources are needed?** Bluebonnet Learning instructional materials and protocols and available campus math specialists/school leaders for all teaching teams/teachers.

Professional Learning Experience: Regular student work analysis in collaborative teams and/or individually with an campus math specialist or school leader.

- **When will this happen?** Teachers and campus math specialists/school leaders will engage in student work analysis either weekly during the additional 30 minutes of common planning time or once every six weeks for a time-period of three hours during early release. Additional student work or data analysis support sessions may occur at the teacher's discretion.
- **Who will lead/participate?** Campus math specialists and school leaders will facilitate student work analysis practice for all grade levels or vertical content teams using the Bluebonnet Learning student work analysis protocols. All teachers will attend facilitated student work analysis sessions either with their grade level, vertical team, or individually.
- **What materials or resources are needed?** Bluebonnet Learning instructional materials and protocols and available campus math specialists/school leaders for all teams/teachers.

Professional Learning Experience: Regular observation and feedback cycles with a campus math specialist or school leader.

- **When will this happen?** School leaders and campus math specialists will observe classroom instruction weekly with each teacher receiving an observation (with a feedback session) at least once every six weeks.
- **Who will lead/participate?** School leaders and campus math specialists will conduct observations of K–Algebra 1 math general education and specialized teachers.
- **What materials or resources are needed?** Bluebonnet Learning observation tool, Bluebonnet Learning instructional materials (teacher's guide)

Professional Learning Experience: Additional ongoing, job-embedded, curriculum-based professional learning opportunities.

- **When will this happen?** Teachers will receive ongoing, job-embedded, curriculum-based professional learning during the facilitated internalization sessions (weekly), facilitated student work analysis sessions (three hours every six weeks), observation and feedback sessions (every six weeks), and optional additional supports at the teacher's discretion. Additionally, principals will prioritize campus-professional development time to focus on curriculum-based professional learning opportunities using Bluebonnet Learning instructional materials.
- **Who will lead/participate?** campus math specialists and school leaders will facilitate ongoing support. The Mathematics Curriculum Coordinator, Campus Math Specialists, Assistant Superintendent of Curriculum & Instruction and principal supervisor will serve as resources and support for the support provided at the campuses.
- **What materials or resources are needed?** School leaders will need specific training on facilitation and coaching with Bluebonnet Learning instructional materials (which will be provided prior to the start of the school year), protocols, and observation tools.

2E. Adaptive Change and Communication

Develop a communication plan that supports adaptive change management and ensures stakeholder understanding and commitment to the purpose of adopting and implementing Bluebonnet Learning. Include a plan for stakeholder communication and public posting if the materials are modified as outlined in TEC §26.006.

TAKE ACTION: Adaptive Change and Communication

Key Message 1: What is our purpose for implementing Bluebonnet Learning?

- **Message:** Access to grade-level materials matters. When students are given grade-appropriate assignments, aligned to the TEKS, and combined with strong instruction, engagement, and high expectations, they achieve higher outcomes. Our expectations for student learning are reflected in the materials (assignments and assessments) that we give them. Students will rise to the occasion and do what is asked of them. When expectations are high, student performance and outcomes are also high. Implementing rigorous instructional materials does not preclude teachers from supporting and accommodating individual learners.
- **Audience:** All district instructional and leadership staff; all instructional staff
- **Timeline:** Summer training sessions, back-to-school faculty meetings, back-to-school in-service events, and ongoing throughout the school year

---

Key Message 2: What is our plan for stakeholder communication and public posting if any aspect of the materials is modified, as outlined in TEC §26.006?

- **Message:** Modifications to components of Bluebonnet Learning instructional materials, sequencing, and/or assessments will be available for parent review as outlined in statutes (TEC §26.006). Any modifications must be reported to the campus principal and Mathematics Curriculum Coordinator and made available for parent access through any classroom using Canvas, Seesaw, or in another manner specified before the start of the school year.
- **Audience:** All instructional staff, families, and external stakeholders
- **Timeline:** Summer communication to all stakeholder groups; ongoing communication with internal stakeholders and families. Each campus principal will submit their plan for this item to the Mathematics Curriculum Coordinator by July 31.
- **Considerations:** This message and communication item connects to Action 2C: the use of Bluebonnet Learning instructional materials and Action 3C: instructional flexibility to support all learners. Additionally, all principals must ensure that teachers and other relevant staff understand the statutes about Access to Teaching Materials as described in TEC §26.006.

Key Message 3: Which adaptive strategies will we use to support positive change management?

- **Message:** Cleburne ISD is committed to ensuring alignment across stakeholders, communicating for clarity, focusing on positive aspects of implementation, and gathering and responding to stakeholder feedback.
- **Audience:** The Cleburne ISD community - all internal and external stakeholders
- **Timeline:** On-going beginning in the spring before implementation
- **Considerations:** The district and campus leadership teams will focus on these strategies to support positive implementation efforts:
    - We will provide clear guidance on implementation expectations and the why/purpose behind choosing Bluebonnet Learning instructional materials and ensure the message is shared widely including the deck templates for principals to use at faculty meetings.
    - We will send quarterly “Bluebonnet Learning Updates” that include celebrations and a summary of growth as measured by progress monitoring of the implementation goals.

ACTION 3: Leading Internalization and Professional Learning Communities (PLCs)

3A. Analyzing PLC Practices

Analyze the current state of PLCs/teacher planning and preparation practices to prioritize high-impact changes and next steps.

TAKE ACTION: Analyzing PLC Practices

Task: Conduct a current state analysis of PLC/teacher planning and preparation practices and summarize the takeaways. What is working well? What is an area for improvement? What might be a short-term area of focus?

The district has had a PLC structure in place for the last four years and it is a time protected by campus leadership for teachers to meet and plan. Campus leadership regularly attends PLCs, but the meetings are not guided by an agenda focused on the group's HQIM protocols. Training campus leaders to develop and use PLC agendas should be scheduled.

Task: Identify which keys to success are currently in place, which are not, and which ones need refining.

Vision: The vision for PLCs will be refined to support the use of Bluebonnet Learning instructional materials by engaging all internal stakeholders in the process.
Protected Time and Frequency: Common planning time is protected and currently in place for once weekly, but refinement may be necessary to accommodate the additional 30 minutes weekly (or 3 hours every six weeks) that will be allocated for student work and data analysis.
Ownership: Since the previous PLC structures were not focused on Bluebonnet Learning instructional materials, the roles and responsibilities of the participants should be clearly defined for all stakeholders.
Use of Time: The use of an agenda focused on the Bluebonnet Learning protocols and outlining any required pre-work or post-work for teachers will ensure the most effective use of time.
Educational Practices: Addressing the other keys to success that need revision will lead to collaborative PLCs for Cleburne ISD.

3B. Structures for Internalization and PLCs

Develop structures and systems to support internalization practices that include a vision, roles and responsibilities, and technical conditions needed.

> The term, technical conditions, refers to the defined systems, structures, and procedures that must be in place to support Bluebonnet Learning implementation.

TAKE ACTION: Structures for Internalization and PLCs

Task: Explain the vision for unit and lesson internalization.

Internalization is the process of deeply studying a unit or lesson from Bluebonnet Learning instructional material to understand what students are expected to learn and how to teach it to achieve those outcomes.

Internalization supports implementation with fidelity. Teachers who deeply understand student expectations and the design of the Bluebonnet Learning instructional materials can teach units and lessons more effectively and make intentional instructional decisions that support engagement and learning for all students.

Internalization happens consistently and regularly before instruction occurs.

- Unit internalization happens at least 2–3 weeks before a new unit begins.
- Lesson internalization happens for each daily lesson at least 1–2 days in advance.

1. Campus math specialists, school leaders, and teachers use locally adapted Bluebonnet Learning internalization protocols to prepare for teaching units and lessons.
2. All instructional staff attending weekly or other collaborative sessions will complete any needed pre- or post-work as agreed by the team or with the facilitator.
3. Teachers annotate their Bluebonnet Learning teacher instructional materials and resources while following the protocols. Completion of a standardized lesson plan template is no longer required.
4. Teachers attend weekly collaborative internalization sessions led by campus math specialists or school leaders. This time is protected in the instructional calendar and pre-work is determined ahead of time through consensus and communicated to all members.
5. Teachers receive ongoing, regular 1:1 support from a campus math specialist or school leader focused on practicing and improving internalization.

Task: Name the roles and responsibilities of the school leaders, campus math specialists, and teachers to support the vision for internalization.

Principals:

- Establish and communicate the vision for internalization and role-specific responsibilities.
- Monitor progress towards the vision for internalization, reflecting and providing support as needed.
- Align schoolwide systems and structures with the vision for internalization.
- Build knowledge of the Bluebonnet Learning instructional materials and locally adapted internalization protocols.

Campus Math Specialists and Assistant Principals:

- Complete Bluebonnet Learning onboarding and orientation training to gain a deep understanding of the product and unit/lesson internalization protocols.
- Support teachers to improve their use of Bluebonnet Learning internalization protocols by providing 1:1 support and co-planning.
- Plan and lead collaborative planning time with teams of teachers.

Teachers:

- Complete Bluebonnet Learning onboarding and orientation training to gain a deep understanding of the product and unit/lesson internalization protocols.
- Regularly utilize the product-specific internalization protocols to prepare to teach units and lessons from Bluebonnet Learning.
- Participate in 1:1 internalization meetings and collaborative planning time led by a campus math specialist or other instructional leader.

Task: Identify priorities based on the current state analysis conducted in Action 3A to support effective internalization.

1. Refine Cleburne's Vision for mathematics PLCs to focus on Bluebonnet Learning best practices, design principles, and use of locally adapted protocols.
2. Train campus math specialists and school leaders to develop mathematics PLC agendas focused on the use of locally adapted Bluebonnet Learning protocols.
3. Support principals in developing master schedules and instructional calendars that support common planning time for engagement in Bluebonnet Learning practices.
4. Determine and communicate stakeholder (leaders, teachers) roles and responsibilities for PLCS.
5. Develop a protocol calendar for instructional leaders to guide their facilitation of each of the Bluebonnet Learning protocols.

Task: Name the technical conditions, systems, and structures that need to be in place to support the identified priorities and the vision.

Time: The master schedule includes protected, weekly meeting time(s) for general education and specialized teachers to meet with campus math specialists or school leaders to meet for at least 45 minutes weekly for internalization practices. Additional common planning sessions will occur 30 minutes weekly or 3 hours every six weeks during early release time.
Ownership: Schools have identified campus math specialists and school leaders who will plan and facilitate 1:1 and collaborative planning time and provide teachers feedback and support on their preparation.
Protocols: Teachers, campus math specialists, and school leaders are familiar with and have received training on the locally adapted Bluebonnet Learning protocols for unit internalization, lesson internalization, and student work analysis.
Accountability: There is a process for monitoring progress towards effective internalization and aligned expectations for teachers. There is the expectation to annotate within the Bluebonnet Learning instructional materials instead of filling out a standardized lesson plan template.

3C. Supporting All Learners

Develop and communicate clear guidelines for teachers to support all learners and maintain instructional flexibility that outline acceptable teacher modifications to address student needs.

TAKE ACTION: Supporting All Learners

Support: Bluebonnet Learning Embedded Supports

Teachers will identify which embedded supports will be used during instruction when internalizing lessons. These supports will be annotated in the teacher guide and available to campus math specialists and school leaders at least three days prior to the lesson's instructional delivery.

Support: Engagement Strategies

Teachers will annotate in their materials which engagement strategies will be used during instruction. To meet the needs of all students, additional engagement strategies may be necessary, including using flexible grouping and anchor documents and resources.

Support: Instructional Flexibility

Teachers have flexibility within the scope and sequence of five instructional days to adjust pacing to address the needs of each student. Teachers can adjust instructional strategies and resources to meet the needs of a student's Individualized Education Plan (IEP) or other educational needs. Additionally, teachers will have

the opportunity to review materials and make recommendations regarding the use of additional materials as described in Action 2C: Use of Bluebonnet Learning instructional materials.

ACTION 4: Establishing Observation and Feedback Practices

4A. Observation Expectations

Develop observation expectations for Bluebonnet Learning implementation.

TAKE ACTION: Observation Expectations

Action: Clearly define the purpose of observations.

At Cleburne ISD, district and school leaders use learning walk tools to conduct instructional rounds to collect evidence of the fidelity of implementation and to measure attainment toward goals. School leaders and campus math specialists use a locally adapted Bluebonnet Learning observation tool to engage in cycles of observation and feedback to support continuous growth and development of teaching and educational practices using Bluebonnet Learning instructional materials. Leaders and campus math specialists look beyond the surface of instruction to identify concrete evidence that the teacher has internalized the units and lessons taught.

Next Steps:

- District leaders, school leaders, and campus math specialists will receive training specific to the observation and feedback practices used with Bluebonnet Learning during the leadership retreat in June. The Mathematics Curriculum Coordinator and Professional Development Coordinator will coordinate with the vendor on the planning and content for the leader implementation training.
- District leaders, school leaders, and campus math specialists will engage in practice opportunities with the observation instruments twice in September and October. The Mathematics Curriculum Coordinator and the Assistant Superintendent of Curriculum and Instruction will coordinate these events.

Action: Name the observation expectations and responsibilities for school leaders.

District Leader Roles and Responsibilities

- Have a high-level understanding of the observation tools that coaches, and school leaders will use to provide feedback to teachers.
- Use Bluebonnet Learning observation tools to co-observe with school leaders and norms on evidence of internalization and fidelity of implementation.

- Support school leaders in analyzing and responding to data collected during observations and learning walks.

School Leader Roles and Responsibilities

- Co-observe classroom instruction with coaches to ensure alignment on what to look for when observing instruction for evidence of internalization.
- Observe feedback meetings and coaching sessions to look for evidence that these conversations are grounded in the Bluebonnet Learning instructional materials and that meaningful connections are being made back to planning and internalization.
- Support coaches in developing effective observation and feedback schedules; monitor implementation of these schedules and support coaches to adjust as needed.
- Use Bluebonnet Learning observation tools to supplement data on evidence of internalization in instruction across classrooms and analyze this data with coaches to identify schoolwide trends.

Next Steps:

- District leaders, school leaders, and campus math specialists will receive training specific to the observation and feedback practices used with Bluebonnet Learning during the leadership retreat in June. The Mathematics Curriculum Coordinator and Professional Development Coordinator will coordinate with the vendor on the planning and content for the leader implementation training.
- The Assistant Superintendent of Curriculum and Instruction, principal supervisor, and Mathematics Curriculum Coordinator will develop expectations and outline planning related to conducting learning walks and observation and feedback cycles that will be shared as part of the training content during the leadership retreat and summer professional development.

Action: Name the observation expectations and responsibilities for campus math specialists.

- Leverage training and professional development to regularly observe classroom instruction using the locally adapted Bluebonnet Learning Observation tools.
- Review the Bluebonnet Learning lesson before classroom observations and reference the lesson as needed during the observation.
- Provide content-specific feedback to teachers and connect this feedback to planning and internalization when appropriate.
- Support teachers during feedback meetings to examine upcoming lessons to identify opportunities to implement action steps.
- Collect and report data on evidence of internalization in alignment with progress monitoring expectations.

Next Steps: District leaders, school leaders, and campus math specialists will receive training specific to the observation and feedback practices used with Bluebonnet Learning during the leadership retreat in June.

Action: Explain which observation tool(s) will be used.

Bluebonnet Learning observation tools will be used for monitoring the fidelity of implementation and to provide ongoing, job-embedded support through feedback to teachers.

Next Steps:

- The Mathematics Curriculum Coordinator will ensure access to all district/school leaders and campus math specialists have access to the locally adapted Bluebonnet Learning observation tool.
- The Mathematics Curriculum Coordinator and the principal supervisors will present and share the observation tool to principals at the August principal meeting.

Action: Decide on the planning regarding the cadence, frequency, and scheduling of observations.

- All school leaders and campus math specialists will conduct weekly observations of Bluebonnet Learning instruction using the locally adapted Bluebonnet Learning observation tools with each teacher receiving at least one observation and feedback cycle session each six weeks.
- Campus principals and leadership teams are responsible for scheduling observations on the Bluebonnet Learning observation calendar and communicating this calendar to teachers and instructional staff.

Next Steps: The district will develop the Bluebonnet Learning observation calendar for each campus and share these with campus principals before the start of school.

Action: Name the requirements for documentation and follow-up.

All Bluebonnet Learning observations will be recorded using the Bluebonnet Learning observation tool and shared with each teacher observed. Documentation can be recorded electronically or on paper. All documentation will be uploaded or entered into the district observation platform.

Next Steps:

- The Assistant Superintendent of Curriculum and Instruction will update the district observation platform to include the locally adapted Bluebonnet Learning observation tools.
- School leaders and campus math specialists will receive information about documentation and follow-up for Bluebonnet Learning observations during the leader training on Bluebonnet Learning observation and feedback.

4B. Observation and Feedback Cycles

Develop a plan that supports professional learning and development for school leaders, campus math specialists, and teachers through observation and feedback cycles.

TAKE ACTION: Observation and Feedback Cycle Planning

Topic: School leader and campus math specialist training and practice

District/school leaders and campus math specialists will receive training on the Bluebonnet Learning observation tools and have opportunities to practice using the tools. This is outlined in Action 2D: Professional Learning Plan.

Next Steps: Next steps are outlined in Action 2D: Professional Learning Plan.

Topic: Coaching Model

Decision/Expectations: Cleburne ISD school leaders and coaches will use the See It, Name It, Do It coaching model to provide feedback and ongoing professional learning and development to teachers implementing Bluebonnet Learning.

Next Steps:

- The Mathematics Curriculum Coordinator will integrate training on the coaching model in the professional development sessions that leaders and campus math specialists will attend before the start of the school year.
- The Assistant Superintendent of Curriculum & Instruction and/or principal supervisor will provide refresher training for the See It, Name It, Do It coaching model and resources during the leadership retreat in June and again in the October principal meeting.

Topic: Feedback Cycle Process

Decision/Expectations: Teachers will receive feedback, in person, from their observer at least once each six weeks using the See It, Name It, Do It protocol to provide actionable, concrete next steps to support teacher delivery of Bluebonnet Learning instructional materials. Each observer will follow up to observe the action steps in play within ten school days. Feedback and action steps will be recorded on the district observation platform.

Next Steps: Principal supervisors and the Mathematics Curriculum Coordinator will meet with campus leaders and campus math specialists to communicate expectations and processes.

Topic: Ongoing, Job-embedded Support

Decision/Expectations: Teachers will receive ongoing, job-embedded support through the process of the six-week observation and feedback cycles. School leaders and campus math specialists will engage in co-

observations and coaching sessions with their supervisors once per semester as part of their leader's ongoing, job-embedded support.

Next Steps: Principal supervisors and principals will schedule co-observations with leaders they supervise once each semester to observe at least one full observation and feedback cycle for Bluebonnet Learning and will engage with their supervisor.

Topic: Measuring Impact

Decision/Expectations: School leaders and campus math specialists will measure impact based on the data entered in the district observation platform specific to the action steps identified and the degree that teachers are implementing these actions successfully.

Next Steps:

- Principal supervisors will meet with leadership teams to review the progress monitoring aspects of the action steps provided to teachers during Bluebonnet Learning observation and feedback cycles.
- The Assistant Superintendent of Curriculum & Instruction will provide opportunities for new leaders to receive training on the district observation platform.

ACTION 5: Aligning Assessment Strategy

5A. Analyzing Assessment Practices

Conduct a current state analysis of assessment practices to prioritize high-impact changes and next steps.

TAKE ACTION: Analyzing Assessment Practices

Task: Conduct a current state analysis of assessments and summarize the takeaways. What is working well? What is an area(s) for improvement?

- The Assessment Coordinator creates comprehensive assessment calendars that track universal screeners, district benchmarks, interim assessments, and other assessments administered across the district including STAAR, End of Course, and college readiness related assessments.
- Campuses follow a process of administering common unit assessments developed at the campus level for each grade level and course in the required curriculum.
- Teachers and leaders frequently review student data from assessments to determine instructional adjustments and/or student support needed.
- Areas that will need improvement include the shift to using Bluebonnet Learning assessments across all elementary campuses and removing benchmark exams since they do not align with Bluebonnet Learning instructional materials/scope and sequences.

Task: Identify which keys to success are currently in place, which are not, and which ones need refining.

- The Cleburne ISD Assessment Plan will need to be refined to reflect Bluebonnet Learning design principles and expectations regarding the use of curriculum-embedded assessments.
- Another key to success is the practice of maintaining an assessment calendar. Cleburne ISD will refine this to create assessment calendars that include the Bluebonnet Learning unit assessments.
- Teachers and instructional staff have collaboratively developed district assessments for many years and integrity of the use of these assessments is a strength of Cleburne ISD. Refinement will be needed to explicitly outline expectations for the use of Bluebonnet Learning embedded assessments with clear guidelines for how and in what manner assessments may be adapted or changed. Also, any changes must be communicated to campus principals to ensure compliance with parents' access to the materials.

5B. Structures for Assessment Practices

Develop and communicate expectations that prioritize curriculum-embedded assessments and student work analysis.

TAKE ACTION: Structures for Assessment Practices

Task: Identify a priority action for curriculum-embedded assessments based on the current state analysis conducted in Action 5A.

- Update district assessment calendars to reflect Bluebonnet Learning embedded assessments.
- Communicate expectations regarding use of Bluebonnet Learning assessments and the process for any adjustments or modifications.

Task: Identify a priority action for student work analysis based on the current state analysis conducted in Action 5A.

- Facilitated student work analysis sessions will begin no later than October. All instructional staff will receive initial training on student work analysis protocols during the Bluebonnet Learning onboarding and orientation training.
- Data analysis practices will be a practice of using the student work analysis protocol for data analysis purposes.

Task: Plan next steps that focus on high-impact changes to support effective assessment practices.

- District leadership will develop guidelines and samples for communicating expectations for the prioritization of Bluebonnet Learning embedded assessments, which assessments will no longer be administered, and the process and legal requirements for any adjustments or modifications made to Bluebonnet Learning assessments.
- The Assessment Coordinator and the Mathematics Curriculum Coordinator will update the district assessment calendars to include Bluebonnet Learning unit assessments.

Task: Explain the communication plan for ensuring all school leaders, campus math specialists, and teachers are on the same page regarding curriculum-embedded assessments.

- The Assistant Superintendent of Curriculum and Instruction and district leadership team will communicate assessment strategy updates and expectations to all school leaders and campus math specialists during the leadership retreat in June.
- All teachers and other instructional staff will receive training and detailed information on expectations for Bluebonnet Learning assessments during onboarding and orientation training.
- Principal supervisors will communicate regularly with school principals the expectation for prioritization of Bluebonnet Learning embedded-assessments, maintenance of assessment integrity,

and the use of student work analysis as the primary data analysis process for formative assessments.

Communication
March 10, 2025

To: CISD Board of Trustees

From: Dr. Coby Kirkpatrick
Dr. Chris Jackson

Re: Cleburne ISD Transition Plan for Bluebonnet Learning

Strategic Goal, Objective or Need Addressed:

District Objective 1.1 – Guarantee that every student is provided a high-quality curriculum, data-driven instruction, and standards-based assessment to ensure continuous growth and high levels of achievement.

Summary:

Bluebonnet Learning is a collection of state-developed instructional materials that provide teachers with the tools to foster student success. Developed using the latest cognitive science, the Bluebonnet Learning math curriculum covers 100% of the Texas Essential Knowledge and Skills (TEKS) and provides a full suite of resources including scope and sequence, daily lesson plans, and student materials.

After a recommendation from a Cleburne ISD advisory committee that we adopt Bluebonnet Learning math curriculum for 2025-26, we developed a required transition plan outlining the necessary next steps. By adopting the Bluebonnet Learning curriculum, Cleburne ISD is able to access an additional $60 per student per year in instructional materials funding. For a district to qualify for the additional funding, the Board of Trustees must approve the transition plan to Bluebonnet Learning.

Attachments:

- Cleburne ISD Transition Plan for Bluebonnet Learning
- Presentation - Implementation of Bluebonnet Learning Math Curriculum for 2025-26

Action Requested
It is requested the Board approve the Cleburne ISD Transition Plan for Bluebonnet Learning math curriculum for the 2025-26 school year.

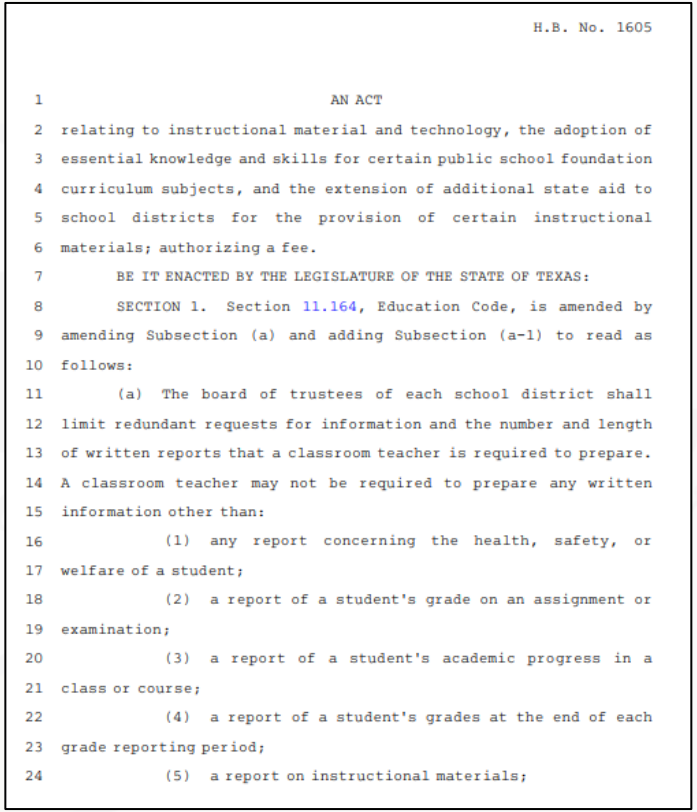
MATH CURRICULUM PROPOSAL



2025-26

Dr. Chris Jackson
Assistant Superintendent
Curriculum and Instruction

HB 1605

88th Legislature

- Established a process for the SBOE to approve instructional materials
- Increased funding for approved materials
- Created state-owned Open Education Resources (OER) for reading and math

H.B. No. 1605

AN ACT

relating to instructional material and technology, the adoption of essential knowledge and skills for certain public school foundation curriculum subjects, and the extension of additional state aid to school districts for the provision of certain instructional materials; authorizing a fee.

BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF TEXAS:

SECTION 1. Section 11.164, Education Code, is amended by amending Subsection (a) and adding Subsection (a-1) to read as follows:

(a) The board of trustees of each school district shall limit redundant requests for information and the number and length of written reports that a classroom teacher is required to prepare. A classroom teacher may not be required to prepare any written information other than:

(1) any report concerning the health, safety, or welfare of a student;

(2) a report of a student's grade on an assignment or examination;

(3) a report of a student's academic progress in a class or course;

(4) a report of a student's grades at the end of each grade reporting period;

(5) a report on instructional materials;

Instructional Materials and Technology Allotment

The Instructional Materials & Technology Allotment was restored in HB 1 to traditional levels (roughly $1B per biennium). HB 1605 establishes two new Foundation School Program (FSP) entitlements for SBOE-approved instructional materials, in addition to the Allotment. These new FSP funds will be managed in each district's Instructional Materials and Technology Account.

	Instructional Materials and Technology Allotment	SBOE-Approved Instructional Materials	SBOE-Approved OER Instructional Materials
2022 & 2023 Biennium	$ 61.72 per student + $ 11.32 per EB student	n/a	n/a
2024 & 2025 Biennium	$ 171.82 per student + $ 15.58 per EB student	$40 per student each school year	$20 per student each school year
Timing	Biennially	Annually	Annually
Carryover of Funding	Yes, unexpended balances carryover	Yes, unexpended balances carryover	No, unexpended balances do not carryover
Allowable Use of Funds	Any instructional materials and technology needed to implement those instructional materials	Only SBOE-approved instructional materials from the new process established in HB 1605	Only costs associated with printing SBOE-approved open education resource (i.e. state-owned) instructional materials

Total allotment for the 2024 & 2025 biennium including new state aid is $1.562 Billion or $275.41 per-student

Details on the 2024-25 biennial allotment shared in a TAA published on June 22, 2023.

SBOE BOARD MEETING	SBOE BOARD MEETING	
September 2024	**November 2024**	**December 2024**
SBOE reviews the reviewer reports and all public feedback. Public testimony is taken on any of the materials under consideration.	SBOE will vote and decide to place instructional materials on the approved list, take no action, or place materials on the rejected list.	Updated EMAT site will be available for districts to compare approved and reviewed instructional materials.
March 2025	**July 2025**	**August 2025**
Materials will be available in EMAT site for districts to requisition SBOE-approved instructional materials, if school systems are choosing new materials to adopt locally.	New instructional materials are shipped, and school systems conduct professional development to orient teachers to the new materials.	School systems begin implementation of new materials in classrooms.

What are Open Education Resource (OER) Materials?

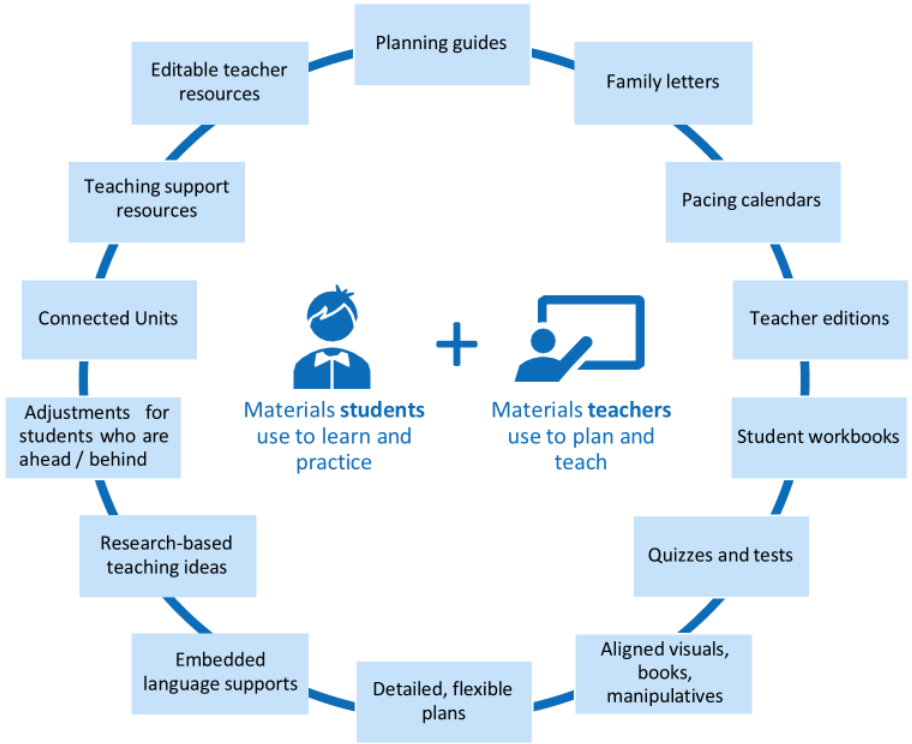
Bluebonnet Learning

What are OER instructional materials?

STRONG FOUNDATIONS Implementation

Instructional Materials = "textbooks +"

"teaching, learning, and research resources... including full courses, course materials, modules, textbooks, streaming videos, tests, software, and any other tools, materials, or techniques used to support access to knowledge."



It includes material used by a teacher; material used by a principal; and material used by a student.

Open Education Resources

"reside in the public domain or have been released under an intellectual property license that allows for free use, reuse, modification, and sharing with others"

Effectively, open education resources are…

State-owned "textbooks +"
that can be modified over time

Texas OER is one option available to Texas schools; selection of instructional materials continues to be a **local decision**

November 2025 IMRA Approval*

Pilot SY 2025–26

All timelines pending SBOE approval and are subject to change

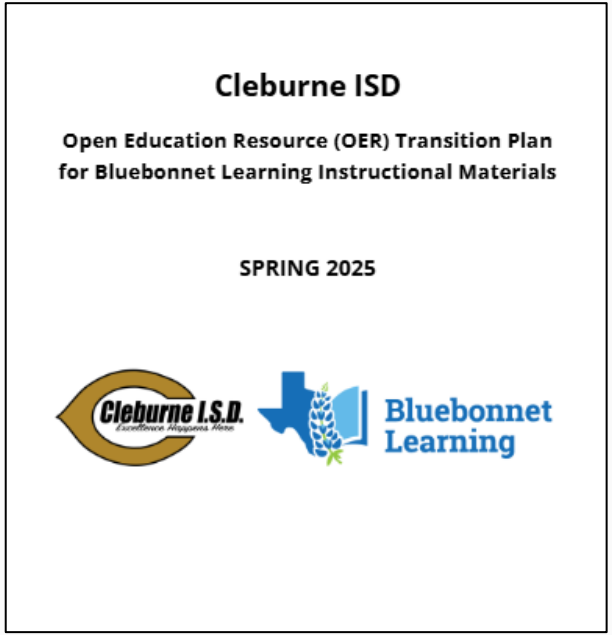
Cleburne ISD Advisory Committee

- We formed a Cleburne ISD committee of teachers, administrators, specialists, and coordinators to review the Bluebonnet Learning materials for math and RLA.
- The committee had a series of four meetings to review the Bluebonnet Learning materials from December 2024 to February 2025.
- The advisory committee did not feel the Bluebonnet Learning RLA resources were in the best interest of our district.
- However, the **Bluebonnet Learning math curriculum was unanimously recommended** for adoption in Cleburne ISD by the advisory committee.

Board Action Items

Two board action items are presented for your consideration and approval:

1. Approval of the Cleburne ISD Transition Plan to Bluebonnet Learning



2. The purchase of Bluebonnet Learning from Great Minds (K-5) and Carnegie Learning (6-Algebra I)

Bluebonnet Learning Transition Plan

- TEA requires districts to adopt a board-approved transition plan to access the additional instructional materials funding.

- This plan must address:
  - Implementation Goals
  - Creating the Conditions for Success
  - Lesson Internalization and PLC Process
  - Observation and Feedback Practices
  - Aligned Assessment Strategy

Bluebonnet Learning Transition Plan

I. **Implementation Goals**
   - 100% of teachers implementing the materials consistently.
   - 85% of teachers report high confidence in the instructional materials.
   - Teachers routinely use lesson internalization protocols.

II. **Creating the Conditions for Success**
   - Materials are ordered and distributed to teachers in a timely manner.
   - Plan for summer professional development and ongoing support throughout the year.

III. **Professional Learning Community (PLC) Practices**
   - Ensure that PLCs are focused on teacher lesson internalization.
   - PLCs agendas have clear protocols and are effectively facilitated.

Bluebonnet Learning Transition Plan

IV. Observation and Feedback Practices

- Teachers receive feedback and coaching on Bluebonnet Learning implementation through observation and feedback coaching.
- Campus leaders and instructional coaches are provided training and calibrate with each other on effective implementation.

V. Aligned Assessment Strategy

- Create a comprehensive assessment calendar that track universal screeners, district benchmarks, curriculum assessments, and other assessments.
- Teachers and leaders frequently review student data from assessments to determine instructional adjustments and/or student support needed.

Procurement of Bluebonnet Learning

- Bluebonnet Learning has three approved providers of the curriculum:
    - Region 4 (K – Algebra I, **print only**)
    - Great Minds (K – 5th, **print, digital, and manipulative kits**)
    - Carnegie Learning (6th – Algebra I, **print and digital**)
- Our recommendation is to procure the Bluebonnet Learning materials through Great Minds and Carnegie Learning to have access to the digital platform and manipulative kits for K – 5th grade.
- The additional $60 per student per year of IMA funding more than covers the purchase cost through Great Minds and Carnegie Learning.

GREAT MINDS™

CARNEGIE LEARNING

region 4

Procurement of Bluebonnet Learning

- It is requested the Board approve the adoption and purchase of the Bluebonnet Learning math curriculum from Great Minds (Kindergarten - 5th Grade) and Carnegie Learning (6th Grade - Algebra 1) for up to $500,000.
- We currently have $665,720 in additional IMA funding from the state that is accessible by purchasing SBOE-approved instructional materials (Bluebonnet Learning).
- The 20% additional amount included beyond the quoted requests provides flexibility to modify the order based on changes in student enrollment, the number of teachers, or program requirements.

Dr. Chris Jackson

Re: Bluebonnet Learning Math Curriculum - Great Minds

Strategic Goal, Objective or Need Addressed:

District Objective 1.1 – Guarantee that every student is provided a high-quality curriculum, data-driven instruction, and standards-based assessment to ensure continuous growth and high levels of achievement.

Summary:

Bluebonnet Learning is a collection of state-developed instructional materials that provide teachers with the tools to foster student success. Developed using the latest cognitive science, the Bluebonnet Learning math curriculum covers 100% of the Texas Essential Knowledge and Skills (TEKS) and provides a full suite of resources including scope and sequence, daily lesson plans, and student materials.

A Cleburne ISD committee of math educators reviewed the Bluebonnet Learning materials over a series of four meetings. The unanimous recommendation was to implement these materials for the 2025-26 school year in grades K through Algebra I. By adopting the Bluebonnet Learning curriculum, Cleburne ISD is able to access an additional $60 per student per year in instructional materials funding.

Carnegie Learning Solutions

CL Overview

Pittsburgh-based Carnegie Learning is the premier edtech company using data and AI to dramatically improve learning outcomes for students. A leader in K-12 education for 26+ years, we provide award-winning math, literacy, world language, professional learning, and high-dosage tutoring solutions to more than 5.5 million students and educators in all 50 states and Canada. Born out of Carnegie Mellon University, our company continues to conduct research with more than $90M in grant funding from the Gates Foundation, Walton Family Foundation, and U.S. Department of Education, among others.

The resources outlined in this proposal include both **print** and enhanced **interactive** materials that include:

Bluebonnet Learning Print and PDF Access - Ordered in EMAT and funded by TEA

- Student Editions
- Skills Practice Workbooks
- Teacher Implementation Guides
- End of Topic Assessments

Enhanced Bluebonnet Learning on Clear Learning Center (CLC)

- Unified Platform for Secondary Math
- Interactive assignments (digital)
- Interactive daily exit tickets (digital)
- Standards-based Reporting (digital) for data-informed decision making
  Embedded Digital Tools:
    - Desmos
    - PPTs/Gslides (digital)
    - Lesson videos (digital)

Michael Wallace

Re: Campus Switches Purchase

Strategic Goal, Objective, or Need Addressed:

To upgrade aging campus switches deployed in 2011 to ensure enhanced connectivity and support modern educational needs.

Summary:

Dependable internet access, achieved through upgrading campus switches, empowers teachers with reliable access to digital resources and facilitates seamless collaborative learning experiences for students.

A Request for Proposal (RFP) was released through the federal E-rate program to upgrade the campus switches. Seven responses were received and evaluated. Advanced Networks' bid, at $113,100, was found to have the best value and includes a 10% contingency. The 2021 Bond includes this project, and bond funds will make the purchase. E-rate could fund up to 80% of the total cost.

Attachment(s):

- Erate - Campus Switches

Action Requested
We respectfully request the Board approve the purchase of campus switches from Advanced Networks in the amount of $113,100.

Note to customer

This signed quote constitutes a contract for delivery and installation of the listed products and services for the period April 01, 2025 to September 30, 2026. An extension of this contract may be provided upon written notice for both parties. This proposal is contingent upon

E-rate anticipated funding. If the customer does not receive the total anticipated funding for this proposal, the school may choose to void all or part of this contract. However, if the customer does not receive the total anticipated funding from the E-rate program for this proposal, the school will be liable for any products ordered and delivered complete with any with any work performed to date. The parties agree that the terms of this paragraph may be enforced by injunction. All risk or loss or damage in respect of the hardware shall be the customers from the time that Advanced Networks of Texas (ANET) delivers the hardware to a carrier for transportation to the customer (F.O.B. point of shipment).

Re: E-rate CAT2 Year 28 (2024-2025) Response Cover Letter

Dear School,

Advanced Networks of Texas Spin # 143036711 is pleased to enclose a bid response to your C2 Internal Connections and or basic maintenance requirements as noted on your YR 28 E-Rate 470 application and or RFP filed on the SLD web site.

Advanced Networks of Texas, Inc. SPIN # 143036711 is aware that this proposal is contingent upon E-Rate funding. If the applicant does not receive the total anticipated funding from the E-Rate program for this proposal, the school may choose to void all or part of this proposal. Advanced Networks of Texas will also certify our **SPAC is current** and that no federal or state suspension or debarment is in place and we offer both **SPI and BEAR invoicing methods**.

Advanced Networks of Texas has been specializing in E-rate solutions for over 15 years in the state of Texas and surrounding states including Oklahoma. We look forward to the opportunity in establishing a working relationship with you on this E-rate project.

Please review the attached proposal and let us know if you have any questions or if any changes are needed.

Yours sincerely,

Mark Morrone

Note to customer

This signed quote constitutes a contract for delivery and installation of the listed products and services for the period April 01, 2025 to September 30, 2026. An extension of this contract may be provided upon written notice for both parties. This proposal is contingent upon E-rate anticipated funding. If the customer does not receive the total anticipated funding for this proposal, the school may choose to void all or part of this contract. However, if the customer does not receive the total anticipated funding from the E-rate program for this proposal, the school will be liable for any products ordered and delivered complete with any with any work performed to date. The parties agree that the terms of this paragraph may be enforced by injunction. All risk or loss or damage in respect of the hardware shall be the customers from the time that Advanced Networks of Texas (ANET) delivers the hardware to a carrier for transportation to the customer (F.O.B. point of shipment).

Project Details: Complete school networking refresh. Provided whole campus with switches, WAPs, routers, cabling and Fiber.

Form **W-9**
(Rev. March 2024)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

Go to *www.irs.gov/FormW9* for instructions and the latest information.

Give form to the requester. Do not send to the IRS.

Before you begin. For guidance related to the purpose of Form W-9, see *Purpose of Form*, below.

Print or type. See *Specific Instructions* on page 3.

1 Name of entity/individual. An entry is required. (For a sole proprietor or disregarded entity, enter the owner's name on line 1, and enter the business/disregarded entity's name on line 2.)

ANET PARTNERS LLC

2 Business name/disregarded entity name, if different from above.

Advanced Networks of Texas

3a Check the appropriate box for federal tax classification of the entity/individual whose name is entered on line 1. Check only **one** of the following seven boxes.

☐ Individual/sole proprietor ☐ C corporation ☐ S corporation ☐ Partnership ☐ Trust/estate

☑ LLC. Enter the tax classification (C = C corporation, S = S corporation, P = Partnership) . . . . P

Note: Check the "LLC" box above and, in the entry space, enter the appropriate code (C, S, or P) for the tax classification of the LLC, unless it is a disregarded entity. A disregarded entity should instead check the appropriate box for the tax classification of its owner.

☐ Other (see instructions)

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):

Exempt payee code (if any)

Exemption from Foreign Account Tax Compliance Act (FATCA) reporting code (if any)

(Applies to accounts maintained outside the United States.)

3b If on line 3a you checked "Partnership" or "Trust/estate," or checked "LLC" and entered "P" as its tax classification, and you are providing this form to a partnership, trust, or estate in which you have an ownership interest, check this box if you have any foreign partners, owners, or beneficiaries. See instructions . . . . . ☐

5 Address (number, street, and apt. or suite no.). See instructions.

23144 Cinco Ranch Blvd. Suite B

Requester's name and address (optional)

6 City, state, and ZIP code

Katy, TX 77494

7 List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN*, later.

Note: If the account is in more than one name, see the instructions for line 1. See also *What Name and Number To Give the Requester* for guidelines on whose number to enter.

Social security number

			–			–				

or

Employer identification number

4	7	–	4	0	8	0	3	1	8

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and, generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

Sign Here Signature of U.S. person Mark D Mann Date 8/29/2024

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9*.

What's New

Line 3a has been modified to clarify how a disregarded entity completes this line. An LLC that is a disregarded entity should check the appropriate box for the tax classification of its owner. Otherwise, it should check the "LLC" box and enter its appropriate tax classification.

New line 3b has been added to this form. A flow-through entity is required to complete this line to indicate that it has direct or indirect foreign partners, owners, or beneficiaries when it provides the Form W-9 to another flow-through entity in which it has an ownership interest. This change is intended to provide a flow-through entity with information regarding the status of its indirect foreign partners, owners, or beneficiaries, so that it can satisfy any applicable reporting requirements. For example, a partnership that has any indirect foreign partners may be required to complete Schedules K-2 and K-3. See the Partnership Instructions for Schedules K-2 and K-3 (Form 1065).

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS is giving you this form because they

Professional Services for Core Network

The selected vendor will be responsible for providing all necessary professional services to design, implement, and configure a new network solution. These services include, but are not limited to:

Network Design: Develop a detailed network design that aligns with our specific requirements, including topology, device selection, and configuration specifications.

Hardware Procurement: Source and procure all required network hardware, including switches, routers, firewalls, and wireless access points.

Network Implementation: Install and configure all network devices according to the approved design and specifications.

Network Configuration: Configure all network devices to meet our specific requirements, including IP addressing, routing protocols, security policies, and quality of service (QoS) settings.

Network Cabling: Provide and cable all required cabling and SFP modules to industry standards.

Existing Network Cabling: Remove existing network cabling and return to CISD.

Testing and Validation: Thoroughly test the entire network solution to ensure it meets performance, security, and reliability standards.

Documentation: Provide comprehensive documentation of the network design, implementation, and configuration.

Project Management: Manage the entire project, including planning, scheduling, and communication with all stakeholders.

Pricing

The vendor must provide a detailed breakdown of all costs associated with the professional services, including:

Professional Services Fees: Hourly rates for network engineers, project managers, and other technical staff.	Network Engineers: $194 per hour Project Manager: $155 per hour OTS: $62 per hou	$33,700	see attached sales quote for PS and deployment
Hardware Costs: Costs for all network hardware, including switches, routers, firewalls, and wireless access points.	$79138.44 (includes hw maintenance support)	$79,138.44	see attached sales quote for HW breakdown
Software Licenses: Costs for any required network software licenses.	$9336.28 (includes sw & resale SaaS services)	$9,336.28	see attached sales quote for SW licenses/subscription
Travel and Expenses: Costs for travel, lodging, and other expenses incurred during the project.	$1,200	$1,200	
	Total	**$123,375**	

Solution Delivery

The delivered network solution must be:

100% Configured: All network devices must be fully configured to our specifications, including IP addressing, routing protocols, security policies, and QoS settings.

Fully Functional: The network solution must be fully functional and perform to our required standards.

Documented: The vendor must provide comprehensive documentation of the network design, implementation, and configuration.

Professional Services for Wireless Network Implementation

The selected vendor will be responsible for providing all necessary professional services to design, implement, and configure a new wireless network solution. These services include, but are not limited to:
Network Design: Develop a detailed wireless network design that aligns with our specific requirements, including topology, access point selection, and RF channel planning.
Hardware Procurement: Source and procure all required wireless hardware, including access points, controllers, and antennas.
Network Implementation: Install and configure all wireless devices according to the approved design and specifications.
Network Cabling: Install, run, terminate, use J-hooks, and use conduit for all outdoor runs and in interior locations as needed. No cabling will be exposed.
Network Cabling: Supply Cat6a patch cables for each new drop.
Network Cabling: Use the existing cabling and patch cables.

Wireless Configuration: Configure all wireless devices to meet our specific requirements, including SSID, security settings, QoS, and roaming policies.
Testing and Validation: Thoroughly test the entire wireless network solution to ensure it meets performance, security, and reliability standards.
Maps & Heat Maps: Import building floor maps into the system and create heat maps for each location AP's are deployed.
Documentation: Provide comprehensive documentation of the wireless network design, implementation, and configuration.
Project Management: Manage the entire project, including planning, scheduling, and communication with all stakeholders.

Pricing

The vendor must provide a detailed breakdown of all costs associated with the professional services, including:

		Total	
Professional Services Fees: Hourly rates for network engineers, RF engineers, project managers, and other technical	Network Engineers: $194 per hour Project Manager: $155 per hour OTS: $62 per hour	$486,763.00	see attached sales quote for PS and deployment breakdown

Professional Services for Firewall Implementation

The selected vendor will be responsible for providing all necessary professional services to design, implement, and configure a new firewall solution. These services include, but are not limited to:
Security Needs Assessment: Conduct a thorough assessment of our security requirements to identify potential threats and vulnerabilities.
Firewall Configuration: Configure the firewall to implement security policies, including firewall rules, intrusion prevention, VPN, and other security features.
Network Integration: Integrate the firewall into our existing network infrastructure, ensuring seamless communication and optimal performance.
Network Cabling: Provide and cable all required cabling and SFP modules to industry standards.
Testing and Validation: Thoroughly test the firewall configuration to ensure it meets our security requirements and does not impact network performance.
Documentation: Provide comprehensive documentation of the firewall design, implementation, and configuration.
Project Management: Manage the entire project, including planning, scheduling, and communication with all stakeholders.

Pricing

The vendor must provide a detailed breakdown of all costs associated with the professional services unless professional services are reflected in the recurring expense, including:

Professional Services Fees: Hourly rates for network security engineers, project managers, and other technical staff.	Network Engineers: $167 per hour Project Manager: $155 per hour OTS: $62 per hour	$10,252	see attached sales quote for PS and deployment breakdown
Hardware Costs: Costs for the firewall hardware w/maintenance support	$73,557.66	$73,557.66	see attached sales quote for HW breakdown
Software Licenses: Costs for any required firewall software licenses.	$124,143.18	$124,143.48	see attached sales quote for SW licenses/subscription
Travel and Expenses: Costs for travel, lodging, and other expenses incurred during the project.	$1,500	$1,500	
	Total	**$209,453**	

Solution Delivery

The delivered firewall solution must be:

100% Configured: The firewall must be fully configured to our specifications, including firewall rules, intrusion prevention, VPN, and other security features.
Fully Functional: The firewall must be fully functional and perform to our required standards, providing robust security protection.
Documented: The vendor must provide comprehensive documentation of the firewall design, implementation, and configuration.

Professional Services for Core Network

The selected vendor will be responsible for providing all necessary professional services to design, implement, and configure a new network solution. These services include, but are not limited to:

Network Design: Develop a detailed network design that aligns with our specific requirements, including topology, device selection, and configuration specifications.

Hardware Procurement: Source and procure all required network hardware, including switches, routers, firewalls, and wireless access points.

Network Implementation: Install and configure all network devices according to the approved design and specifications.

Network Configuration: Configure all network devices to meet our specific requirements, including IP addressing, routing protocols, security policies, and quality of service (QoS) settings.

Network Cabling: Provide and cable all required cabling and SFP modules to industry standards.

Existing Network Cabling: Remove existing network cabling and return to CISD.
Testing and Validation: Thoroughly test the entire network solution to ensure it meets performance, security, and reliability standards.
Documentation: Provide comprehensive documentation of the network design, implementation, and configuration.
Project Management: Manage the entire project, including planning, scheduling, and communication with all stakeholders.

Pricing

The vendor must provide a detailed breakdown of all costs associated with the professional services, including:		Total	
Professional Services Fees: Hourly rates for network engineers, project managers, and other technical staff.	Network Engineers: $194 per hour Project Manager: $155 per hour OTS: $62 per hour	$42,615.00	see attached sales quote for PS and deployment breakdown
Hardware Costs: Costs for all network hardware, including switches, routers, firewalls, and wireless access points.	$79,384.00	$79,384.50	see attached sales quote for HW breakdown
Software Licenses: Costs for any required network software licenses.	$12,240.50	$12,240.50	see attached sales quote for SW licenses/subscription
Travel and Expenses: Costs for travel, lodging, and other expenses incurred during the project.	$3,500	$3,500	
	Total	**$137,740.00**	

Solution Delivery

The delivered network solution must be:
100% Configured: All network devices must be fully configured to our specifications, including IP addressing, routing protocols, security policies, and QoS settings.
Fully Functional: The network solution must be fully functional and perform to our required standards.
Documented: The vendor must provide comprehensive documentation of the network design, implementation, and configuration.

Replace Degraded Exposed Structured Cabling

Campus	Cabling	Drop Length	Drop Qty
Coleman	Cat6a	100 meters	200
Cooke	Cat6a	100 meters	300

Network Cabling: Install, run, terminate, use J-hooks, and use conduit for all outdoor runs and in interior locations as needed. No cabling will be exposed.
Network Cabling: Supply Cat6a patch cables for each new drop.
Network Cabling: Use the existing cabling and patch cables.

Professional Services for structured cabling

The selected vendor will be responsible for providing all necessary professional services to design, implement, and configure a new network solution. These services include, but are not limited to:
Network Design: Develop a detailed network design that aligns with our specific requirements, including topology, device selection, and configuration specifications.
Hardware Procurement: Source and procure all required network hardware, including switches, routers, firewalls, and wireless access points.
Network Implementation: Install and configure all network devices according to the approved design and specifications.
Network Configuration: Configure all network devices to meet our specific requirements, including IP addressing, routing protocols, security policies, and quality of service (QoS) settings.
Network Cabling: Provide and cable all required cabling and SFP modules to industry standards.
Existing Network Cabling: Remove existing network cabling and return to CISD.
Testing and Validation: Thoroughly test the entire network solution to ensure it meets performance, security, and reliability standards.
Documentation: Provide comprehensive documentation of the network design, implementation, and configuration.
Project Management: Manage the entire project, including planning, scheduling, and communication with all stakeholders.

Pricing

The vendor must provide a detailed breakdown of all costs associated with the professional services, including:		Total	
Professional Services Fees: Hourly rates for network engineers, project managers, and other technical staff.	$406,000.00	$406,000.00	(PS & T&E)
Hardware Costs: Costs for all network hardware, including switches, routers, firewalls, and wireless access points.	NA	$0	
Software Licenses: Costs for any required network software licenses.	NA	$0	
Travel and Expenses: Costs for travel, lodging, and other expenses incurred during the project.	NA (Included in project total for structured cabling)	$0	
	Total	**$406,000.00**	

Solution Delivery

The delivered network solution must be:
100% Configured: All network devices must be fully configured to our specifications, including IP addressing, routing protocols, security policies, and QoS settings.
Fully Functional: The network solution must be fully functional and perform to our required standards.
Documented: The vendor must provide comprehensive documentation of the network design, implementation, and configuration.

A OneC1 solution for

Cleburne Independent School District

Michael Wallace
techrfp@c-isd.com
Cleburne Independent School District
513 N Ridgeway Drive
Cleburne, TX 76033

Dear Michael:

Thank you for the opportunity to participate in the Cleburne Independent School District Form 470 #: 250008635. We understand that Cleburne Independent School District is ready to invest to enable your staff to engage more effectively virtually serving your constituents, residents and businesses.

In the attached response, we have attempted to address all the questions as succinctly and factually as possible. As you are reviewing this response, please do not hesitate to let me know if you have any questions or clarifications regarding our answers.

C1, a subsidiary of ConvergeOne, Inc.is committed to providing best-in-class design, implementation and day two support services with our industry leading, certified teams. With our local presence, our teams are readily available to service Cleburne Independent School District with our local resources.

C1 maintains a dedicated government practice with resources focused on local government. As you evaluate our response, please know that C1 prides ourselves on our client satisfaction and building a long-term partnership with our clients.

Thank you again for this opportunity. Please do not hesitate to reach out directly to Chericia Curtis at ccurtis@oneC1.com

Thank you,

Shane Harper

Executive Summary

C1 is a proven, service led, cloud solution provider that utilizes intellectual property and unique methodologies to create value for our customers to develop progressive solutions that connect people with purpose. Over 6,000 enterprise and mid-market customers trust C1 with cloud, collaboration, enterprise networking, data center and cybersecurity solutions to achieve business outcomes. Our investments in cloud infrastructure and professional and managed services provide transformational opportunities for customers to achieve financial and operational benefits with leading technologies.

C1 has partnerships with more than 300 global industry leaders, including Avaya, Cisco, Dell Technologies, Extreme Networks, Genesys, Juniper, IBM, Microsoft and VMware to customize specific business outcomes. We deliver solutions with a full lifecycle approach including strategy, design and implementation with professional, managed and support services. C1 holds more than 5,600 technical certifications across hundreds of engineers throughout North America, including three Customer Success Centers.

Our Expertise

- 30+ years of experience – and counting!
- More than 6,000 customers, including 55% of the Fortune 100, 41% of the Fortune 500 and 36% of the Fortune 1000 customers across the healthcare, finance, manufacturing, education and energy enterprises
- In-house engineers, design specialists, and technicians holding 5,600+ active industry certifications

Our Portfolio

- Intellectual Property (IP): C1Conversations and OnGuard – Spans customer environments encompassing many different technologies, making those technologies more efficient and allowing customers to continue to realize benefits from existing investments.
- Solutions: Customer Experience, Cybersecurity, Data Center, Enterprise Networking and Unified Communications
- Services: Cloud, Maintenance, Managed Services and Professional Services
- Center of Excellence: Extensive technical and administrative training courses with multiple delivery options: web, instructor led, on-site, etc.

Our Resources

- 2,600+ employees in offices nationwide – and growing
- Strategic partnerships for integration of best-of-breed hardware, software, and applications
- Three state-of-the-art Network Operations Centers for multivendor support
- High-tech Performance Readiness Center® for configuration, staging, and testing
- One source for systems integration, data networking, IT specialty consulting, application development, program management, and more

- Alliance Program: Bringing our expertise and solutions to global clients through our international partnerships

Our Partners

- Strategic technology partners include Avaya, Cisco, Dell Technologies, Extreme Networks, Genesys, Juniper, IBM, Microsoft, VMware and many more.

At ConvergeOne, our goal is to earn your trust as an advisor – someone you count on to deliver the very best solution based on a thorough understanding of your business and the ways in which the right technology can help you achieve your goals.

ConvergeOne E-Rate Program

The ConvergeOne team has been responding to E-Rate Category 2 Internal Connections since Year One (1998) for a combined total of 48 years of experience. In addition, ConvergeOne sends members of our SLED and Public Sector Contracts teams to the yearly USAC/SLD training. Additionally, ConvergeOne employs an independent consulting firm, Funds for Learning, to ensure ConvergeOne maintains complete program compliance. For FY22, ConvergeOne was the #2 E-Rate Partner providing Category 2 Internal Connections hardware/software, cabling, professional services and maintenance. ConvergeOne can support SPI or BEAR invoicing.

- ConvergeOne SPIN: 143011994
- ConvergeOne FRN: 0011951522

Why ConvergeOne?

Since it was launched in 1993, ConvergeOne has earned a reputation as a quality provider of value-added communications solutions for businesses of all types and sizes. Our investments in a dedicated implementation team, ongoing training, industry certifications, and state-of-the-art service delivery tools make us skilled in sales, design, network integration, project management, ongoing support – virtually everything you need to implement an end-to-end information technology solution.

From the start, ConvergeOne has focused on delivering personalized attention rather than a "one size fits all" solution. We listen closely and work to learn all we can about a customer's business, and then create an end-to-end solution designed to meet the customers' needs on all levels.

At ConvergeOne, we measure the trust that organizations place in us based on the long-standing relationships we develop with customers and a high percentage of repeat business. These relationships, as well as those we've built with our partners, are key to our success and instrumental to our growth.

C1 combines unequaled knowledge and experience with a can-do attitude to develop customer solutions that work from day one and keep on working. We don't simply install the "latest and greatest." Our professionals transform leading-edge technologies into innovative, reliable communications solutions.

ConvergeOne's portfolio is not limited by proprietary products and services, giving us the flexibility to create a "vendor-agnostic" solution based on a customer's unique business criteria and communications requirements. ConvergeOne's multivendor capabilities also include monitoring and maintenance services from our high-tech CSCs.

All manufacturer solutions are carefully screened and field-tested by C1 to ensure the results and deliver the promised value to our customers. Our engineers and technicians also take extra steps to ensure seamless integration of an end-to-end solution – programming and testing every component at our state-of-the-art Performance Readiness Center® prior to shipment to a customer's site.

The Center of Excellence for Learning and Development further enhances the C1 advantage by offering customers a variety of training opportunities to help them build their own administrative and application proficiency.

When you choose C1 as your information technology solutions and services provider, you not only work with one of the most experienced multi-vendor Business Partners in the industry – you gain a partner who is dedicated to the relationship and committed to adding value to your business.

ConvergeOne Fact Sheet

GREEN LIGHT STATUS:	

Customer RFP

Site Visit: The district will have a site visit Friday, December 20, 2024 with a start time of 10 AM CST. Vendors should report to Cleburne ISD Central Office Annex (Technology Building), located at 513 N Ridgeway Drive, Cleburne TX, 76033. The District would like to limit the site visit to two individuals per company/service provider. Attendance is not mandatory but highly encouraged. Please RSVP to Michael Wallace viaemail:techrfp@c-isd.com.

All proposals need to be submitted through this system to be accepted. No phone calls concerning this application will be accepted. All communication about this RFP will only be provided via the Q&A section of this RFP in which questions and answers will be posted publicly. Responses received after the stated deadline may be deemed non-responsive. All vendors must comply with Texas Education Agency Financial Accountability Guidelines found in Module 5:Purchasing.

C1 has read and understands.

Specific Requirements:

- All proposals should be received by the Bid Close Date. Any offer, modification, revision, or withdrawal of an offer received after this Close Date may not be considered unless it is determined that an untimely submission was due to circumstances beyond the vendors control, a consideration of the offer would be in the best interest of the applicant, or the offer is the only proposal received.

C1 has read and understands.

- For all of the items/services listed in this Request for Proposal, please consider services that are equivalent, more/less in quantity, better and/or more cost effective when submitting proposals.

C1 has read and understands.

- If installation is requested, then installation must be included with the equipment and/or service requested. Otherwise, the bid may be considered non-responsive.

C1 has read and understands.

- All equipment on this request is for owned equipment. Unless otherwise stated, any leased equipment responses may be deemed non responsive.

C1 has read and understands.

- In the event that no bids are received in a certain service category, we may solicit cost-effective bids after the Bid Close Date.

C1 has read and understands.

- If special construction charges apply, please include the option for installment payments of up to 4 years for the applicants non-discounted share.

C1 has read and understands.

- All contracts are contingent upon funding by the Schools and Libraries Division (SLD) of the Universal Services Administrative Company (USAC) unless otherwise agreed upon by district.

C1 has read and understands.

- All pricing provided in the proposal should be in accordance with the Lowest Corresponding Price rule.

C1 has read and understands.

- Service providers may include contingency fees in their bid responses if they deem it a necessary item and the fees are reasonable and a regular business practice. These fees should be included based on the situation/circumstances to provide the service/products. These charges should be separate from any other charges and clearly listed in the proposal. The fees will only be paid if the service/products are completed.

C1 has read and understands.

- Proposers should separate the cost of eligible services/products from non-eligible services/products and clearly indicate this separation on the proposal.

C1 has read and understands.

- Proposer must be in good standing with the Federal Communications Commission (FCC)and does not have a red-light status. If there is a red-light status, the contract will become null and void without penalty to the applicant.

C1 has read and understands.

- Proposers will be held responsible for complying with all E-Rate program rules. No gifts shall be offered or accepted by the applicant at any time.

C1 has read and understands.

- All submitted bids should include contracts and the contracts should also include the option for voluntary extensions unless they are month to month services.

C1 has read and understands.

- Submitted bids should include scalability of bandwidth during the terms of the contract.

C1 has read and understands.

- A manufacturer's multi-year warranty for a period up to three years that is provided as an integral part of an eligible component, without a separately identifiable cost, may be included in the cost of the component.

C1 has read and understands.

Approximately 2 or more Cisco Catalyst C9K-PWR-650WAC-R/2, 650W AC Config 4 Power Supply front to back cooling, UPS/Battery Backups or equivalent and all related components including software and licenses for the following locations: 2 more or less located at the Cleburne ISD Admin (DMARC) for district wide use. *Please bid on a 5-year license if a license is required. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
UPS, Components, and Software & Licenses	Cisco Catalyst or Equivalent	PWR-C1-350WAC-P/2	4	Each	Yes	District Wide
Approximately 4 or more Cisco Catalyst PWR-C1-350WAC-P/2, UPS/Battery Backups or equivalent and all related components including software and licenses for the following locations: 4 more or less located at the Cleburne ISD Admin (DMARC) for district wide use. *Please bid on a 5-year license if a license is required. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Cabling & All Related Components	No Preference	Cat6a	1200	Feet	Yes	District Wide
Approximately 1200 feet of Cat6a or equivalent for the network cabling located at Cleburne ISD Admin (DMARC) for distribution at the network core. The cabling will be for approximately 80 drops or more at approximately 15 feet per drop. ***To include all related components, such as but not limited to: j hooks, patch panels, patch cables, connectors, conduit, installation, configuration, runs and terminations. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Cabling & All Related Components	Cisco Catalyst or Equivalent	STACK-T1-50CM	6	Feet	Yes	District Wide
Approximately 6 feet (4 at 50cm each) of Cisco Catalyst STACK-T1-50CM, 50CM Type 1 Stacking Cable, or equivalent for the core network equipment located at Cleburne ISD Admin (DMARC). The cabling will be for approximately 4 stacking cables or more at approximately 50cm each. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Cabling & All Related Components	Cisco Catalyst or Equivalent	CAB-SPWR-30CM	4	Feet	Yes	District Wide
Approximately 4 feet (4 at 30cm each) of Cisco Catalyst CAB-SPWR-30CM, Catalyst Stack Power Cable 30 CM, or equivalent for the core network equipment located at Cleburne ISD Admin (DMARC). The cabling will be for approximately 4 stacking cables or more at approximately 30cm each. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
WAPs, Components, and Software & Licenses	Extreme or Equivalent	AP5020-WW	822	Each	Yes	Multiple Locations
Approximately 822 or more Extreme Solutions AP5020-WW (Internal) or equivalent Wireless Access Points and all related components for the following locations: 54 more or less WAPs at Adams Elementary School, 264 more or less WAPs at Cleburne High School, 45 more or less WAPs at Coleman Elementary School, 50 more or less WAPs at Cooke Elementary School, 43 more or less WAPs at Gerard Elementary School, 54 more or less WAPs at Irving Elementary School, 51 more or less WAPs at Marti Elementary School, 54 more or less WAPs at Santa Fe Elementary School, 102 more or less WAPs at Lowell Smith JR Intermediate, and 105 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on the following 5-year license if a license is required: XCIQ-PT0-C-EW-5YR-K12 or equivalent.						
WAPs, Components, and Software & Licenses	Extreme or Equivalent	AP460S12C-FCC	62	Each	Yes	Multiple Locations

Function	Mfg or Equivalent	Model	Quantity	Unit	Install & Config	Campus
Approximately 62 or more Extreme Solutions AP460S12C-FCC (External) or equivalent Wireless Access Points and all related components for the following locations: 4 more or less WAPs at Adams Elementary School, 15 more or less WAPs at Cleburne High School, 4 more or less WAPs at Coleman Elementary School, 3 more or less WAPs at Cooke Elementary School, 4 more or less WAPs at Gerard Elementary School, 4 more or less WAPs at Irving Elementary School, 4 more or less WAPs at Marti Elementary School, 4 more or less WAPs at Santa Fe Elementary School, 9 more or less WAPs at Lowell Smith JR Intermediate, and 11 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on the following 5-year license if a license is required: XCIQ-PT0-C-EW-5YR-K12 or equivalent.						
WAPs, Components, and Software & Licenses	Extreme or Equivalent	AP460S6C-FCC	34	Each	Yes	Multiple Locations
Approximately 34 or more Extreme Solutions AP460S6C-FCC (Directional) or equivalent Wireless Access Points and all related components for the following locations: 20 more or less WAPs at Cleburne High School, 6 more or less WAPs at Lowell Smith JR Intermediate, and 8 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on the following 5-year license if a license is required: XCIQ-PT0-C-EW-5YR-K12 or equivalent.						
WAPs, Components, and Software & Licenses	Extreme or Equivalent	ACC-MBO-KT-AX	96	Each	Yes	Multiple Locations
Approximately 96 or more Extreme Solutions ACC-MBO-KT-AX or equivalent Mounting Brackets for Wireless Access Points and all related components for the following locations: 4 more or less WAPs at Adams Elementary School, 35 more or less WAPs at Cleburne High School, 4 more or less WAPs at Coleman Elementary School, 3 more or less WAPs at Cooke Elementary School, 4 more or less WAPs at Gerard Elementary School, 4 more or less WAPs at Irving Elementary School, 4 more or less WAPs at Marti Elementary School, 4 more or less WAPs at Santa Fe Elementary School, 15 more or less WAPs at Lowell Smith JR Intermediate, and 19 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
WAPs, Components, and Software & Licenses	Extreme or Equivalent	KT-147407-02	96	Each	Yes	Multiple Locations
Approximately 96 or more Extreme Solutions KT-147407-02 or equivalent Mounting Brackets for Wireless Access Points and all related components for the following locations: 4 more or less WAPs at Adams Elementary School, 35 more or less WAPs at Cleburne High School, 4 more or less WAPs at Coleman Elementary School, 3 more or less WAPs at Cooke Elementary School, 4 more or less WAPs at Gerard Elementary School, 4 more or less WAPs at Irving Elementary School, 4 more or less WAPs at Marti Elementary School, 4 more or less WAPs at Santa Fe Elementary School, 15 more or less WAPs at Lowell Smith JR Intermediate, and 19 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Cabling & All Related Components	No Preference	Cat6a	29200	Feet	Yes	Multiple Locations
Approximately 29,200 feet of Cat6a (Internal) or equivalent for drops and patch cables. The cabling will be for approximately 89 or more drops at approximately 100 meters (328.08 feet) per drop located at the following locations: 6 more or less drops at Adams Elementary School, 28 more or less drops at Cleburne High School, 3 more or less drops at Coleman Elementary School, 2 more or less drops at Cooke Elementary School, 4 more or less drops at Gerard Elementary School, 6 more or less drops at Irving Elementary School, 4 more or less drops at Marti Elementary School, 6 more or less drops at Santa Fe Elementary School, 21 more or less drops at Lowell Smith JR Intermediate, and 9 more or less drops at Wheat Middle School. ***To include all related components, such as but not limited to: j hooks, patch panels, patch cables, connectors, conduit, installation, configuration, runs and terminations. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Cabling & All Related Components	No Preference	Cat6a	19685	Feet	Yes	Multiple Locations
Approximately 19,685 feet of Cat6a (External) or equivalent for drops and patch cables. The cabling will be for approximately 60 or more drops at approximately 100 meters (328.08 feet) per drop located at the following locations: 4 more or less drops at Adams Elementary School, 15 more or less drops at Cleburne High School, 4 more or less drops at Coleman Elementary School, 3 more or less drops at Cooke Elementary School, 4 more or less drops at Gerard Elementary School, 4 more or less drops at Irving Elementary School, 4 more or less drops at Marti Elementary School, 4 more or less drops at Santa Fe Elementary School, 9 more or less drops at Lowell Smith JR Intermediate, and 9 more or less drops at Wheat Middle School. ***To include all related components, such as but not limited to: j hooks, patch panels, patch cables, connectors, conduit, installation, configuration, runs and terminations. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						

Function	Mfg or Equivalent	Model	Quantity	Unit	Install & Config	Campus
WAPs, Components, and Software & Licenses	Aruba or Equivalent	HPE ANW AP-735	822	Each	Yes	Multiple Locations
Approximately 822 or more Aruba HPE ANW AP-735 (Internal) or equivalent Wireless Access Points and all related components for the following locations: 54 more or less WAPs at Adams Elementary School, 264 more or less WAPs at Cleburne High School, 45 more or less WAPs at Coleman Elementary School, 50 more or less WAPs at Cooke Elementary School, 43 more or less WAPs at Gerard Elementary School, 54 more or less WAPs at Irving Elementary School, 51 more or less WAPs at Marti Elementary School, 54 more or less WAPs at Santa Fe Elementary School, 102 more or less WAPs at Lowell Smith JR Intermediate, and 105 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on the following 5-year license if a license is required: #Q9Y60AAE (HPE ANW Central AP Fnd 5y E- STU) or equivalent.						
WAPs, Components, and Software & Licenses	Aruba or Equivalent	HPE ANW AP-675 #S0P50A	62	Each	Yes	Multiple Locations
Approximately 62 or more Aruba HPE ANW AP-675 #S0P50A (External) or equivalent Wireless Access Points and all related components for the following locations: 4 more or less WAPs at Adams Elementary School, 15 more or less WAPs at Cleburne High School, 4 more or less WAPs at Coleman Elementary School, 3 more or less WAPs at Cooke Elementary School, 4 more or less WAPs at Gerard Elementary School, 4 more or less WAPs at Irving Elementary School, 4 more or less WAPs at Marti Elementary School, 4 more or less WAPs at Santa Fe Elementary School, 9 more or less WAPs at Lowell Smith JR Intermediate, and 11 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. WAPs, Components, and Software & Licenses	Aruba or Equivalent	AP-270-MNT-H3 #R6W11A	34	Each	Yes	Multiple Locations
Approximately 34 or more Aruba AP-270-MNT-H3 #R6W11A Outdoor Dual Tilt Mount or equivalent Mounting Brackets for Wireless Access Points and all related components for the following locations: 20 more or less WAPs at Cleburne High School, 6 more or less WAPs at Lowell Smith JR Intermediate, and 8 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Firewall, Components, and Software & Licenses	Palo Alto or Equivalent	PAN-PA-3420	1	Each	Yes	District Wide
Firewall appliance: Palo Alto PAN-PA-3420 5 YR or equivalent and all related components to be installed at Cleburne ISD Admin (DMARC) shared by all entities for district-wide use. Bids should include applicable software and licenses to make the service work. Also include any other parts as required and all relevant components including installation, implementation, configuration, and software and licenses. ***Please identify eligible costs from ineligible costs. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on the following 5 year license if a license is required: PAN-PA-3420-BND-CORESEC-5YR or equivalent.						
Switches, Components, and Software & Licenses	Cisco Catalyst or Equivalent	C9200L-48P-4X-EDU	25	Each	Yes	Multiple Locations
Approximately (25) or more Cisco Catalyst C9200L-48P-4X-EDU, Catalyst 9200L 48-port PoE+ only, 4x10G uplinks, K12, or equivalent switches, located at multiple campuses, each configured with related components as follows: (1) x C9200L-DNA-E-48, C9200L Cisco DNA Essentials, 48-port Term license-- (1) x C9200L-DNA-E-48-3Y, C9200L Cisco DNA Essentials, 48-port, 3 Year Term license-- (1) x C9200L-NW-E-48, C9200L Network Essentials, 48-port license-- (2) x CAB-TA-NA, North America AC Type A Power Cable-- (1) x C9K-ACC-RBFT, RUBBER FEET FOR TABLE TOP SETUP 9200 and 9300-- (1) x C9K-ACC-SCR-4, 12-24 and 10-32 SCREWS FOR RACK INSTALLATION, QTY 4-- (1) x CAB-GUIDE-1RU, 1RU CABLE MANAGEMENT GUIDES 9200 and 9300-- (2) x C9200-STACK, Catalyst 9200 Stack Module-- (1) x NETWORK-PNP-LIC, Network Plug-n-Play Connect for zero-touch device deployment-- ## *7 more or less Switches at Adams Elementary School, *3 more or less Switches at Irving Elementary School, *2 more or less Switches at Marti Elementary School, *11 more or less Switches at Santa Fe Elementary School, *2 more or less Switches at Lowell Smith JR Intermediate, and ***And any other parts as required and all relevant components including installation, implementation, configuration, and software and licenses. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on a 3 year license if a license is required.						
Switches, Components, and Software & Licenses	Cisco Catalyst or Equivalent	C9200L-STACK-KIT	25	Each	Yes	Multiple Locations
Approximately (25) or more Cisco Catalyst C9200L-STACK-KIT, Catalyst 9200L Stack Module for switches, or equivalent , located at multiple campuses, each configured with related components as follows: *7 more or less Switches at Adams Elementary School, *3 more or less Switches at Irving Elementary School, *2 more or less Switches at Marti Elementary School, *11 more or less Switches at Santa Fe Elementary School, *2 more or less Switches at Lowell Smith JR Intermediate, ***And any other parts as required and all relevant components including installation, implementation, configuration, and software and licenses. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
UPS, Components, and Software & Licenses	Cisco Catalyst or Equivalent	PWR-C5-1KWAC/2	25	Each	Yes	Multiple Locations
Approximately 25 or more Cisco Catalyst PWR-C5-1KWAC/2, 1KW AC Config 5 Power Supply, UPS/Battery Backups or equivalent and all related components including software and licenses for the following locations: *7 more or less Switches at Adams Elementary School, *3 more or less Switches at Irving Elementary School, *2 more or less Switches at Marti Elementary School, *11 more or less Switches at Santa Fe Elementary School, *2 more or less Switches at Lowell Smith JR Intermediate, ***And any other parts as required and all relevant components including installation, implementation, configuration, and software and licenses. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on a 3-year license if a license is required.						
Cabling & All Related Components	Cisco Catalyst or Equivalent	STACK-T4-50CM	41	Feet	Yes	Multiple Locations

Function	Mfg or Equivalent	Model	Quantity	Unit	Install & Config	Campus
Approximately 41 feet (25 at 50cm each) of Cisco Catalyst STACK-T4-50CM, 50CM Type 4 Stacking Cable, or equivalent for the following locations: *11.5 feet (7 units) more or less at Adams Elementary School, *5 feet (3 units) more or less at Irving Elementary School, *3 feet (2 units) more or less at Marti Elementary School, *18 feet (11 units) more or less at Santa Fe Elementary School, *3 feet (2 units) more or less at Lowell Smith JR Intermediate, The cabling will be for approximately 25 stacking cables or more at approximately 50cm each. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Cabling & All Related Components	Cisco Catalyst or Equivalent	STACK-T4-1M=	82	Feet	Yes	Multiple Locations
Approximately 82 feet (25 at 1m each) of Cisco Catalyst STACK-T4-1M=, 1M Type 4 Stacking Cable, or equivalent for the following locations: *23 feet (7 units) more or less at Adams Elementary School, *10 feet (3 units) more or less at Irving Elementary School, *6.5 feet (2 units) more or less at Marti Elementary School, *36 feet (11 units) more or less at Santa Fe Elementary School, *6.5 feet (2 units) more or less at Lowell Smith JR Intermediate, The cabling will be for approximately 25 stacking cables or more at approximately 1m each. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Cabling & All Related Components	Cisco Catalyst or Equivalent	STACK-T4-3M=	246	Feet	Yes	Multiple Locations
Approximately 246 feet (25 at 3m each) of Cisco Catalyst STACK-T4-3M=, 3M Type 4 Stacking Cable, or equivalent for the following locations: *69 feet (7 units) more or less at Adams Elementary School, *29.5 feet (3 units) more or less at Irving Elementary School, *20 feet (2 units) more or less at Marti Elementary School, *108 feet (11 units) more or less at Santa Fe Elementary School, *20 feet (2 units) more or less at Lowell Smith JR Intermediate. The cabling will be for approximately 25 stacking cables or more at approximately 3m each. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Cabling & All Related Components	No Preference	Cat6a	164040	Feet	Yes	Multiple Locations
Approximately 164,040 feet of Cat6a or equivalent for drops to replace degraded and exposed Structured cabling. The cabling will be for approximately 500 or more drops at approximately 100 meters (328.08 feet) per drop located at the following locations: 200 more or less drops at Coleman Elementary School, and 300 more or less drops at Cooke Elementary School, ***To include all related components, such as but not limited to: j hooks, patch panels, patch cables, connectors, conduit, installation, configuration, runs and terminations. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Software and Licenses - (Existing Equipment)	Cisco or equivalent	See Narrative	16	Each	Yes	Multiple Locations
Software and licenses supporting all relevant components of the existing equipment used to distribute high-speed broadband throughout the school buildings. We are requesting E-Rate reimbursement beginning July 1, 2025. ***See RFP Attachment "Cleburne BMIC Licenses Equipment List 2025" for all specifications and locations to include in bid response. E-Rate eligible equipment is highlighted in yellow with a quantity of 12 and the remaining 4 in white are ineligible. ***Bid response must clearly separate out eligible and ineligible costs.						
Software and Licenses - (Existing Firewall)	Palo Alto or equivalent	PA-5220 (See Narrative)	1	Each	Yes	District Wide
Software and licenses supporting all relevant components of the existing firewall used to distribute high-speed broadband throughout school buildings. The district is requesting bid for two different options: Option 1: PAN-PA-5220-BND-CORESEC-R (PA-5220, Core Security Subscription Renewal Bundle (Advanced Threat Prevention, Advanced URL Filtering, Advanced Wildfire, DNS Security and SD-WAN), 1 years (12 months) term) or equivalent to support PA-5220-- Option 2: PAN-PA-5220-BND-CORESEC-3YR-R (PA-5220, Core Security Subscription Renewal Bundle (Advanced Threat Prevention, Advanced URL Filtering, Advanced Wildfire, DNS Security and SD-WAN), 3 years (36 months) term) or equivalent to support PA-5220.						

Managed Internal Broadband Services

Leased or Existing	Already Installed	Model or Equivalent	Install & Config	Quantity	Unit	Campus
Leased	False	Palo Alto or Equivalent	No	1	Each	District Wide
Seeking quotes on managed services for (1) Palo Alto FWaaS - PAN-PA-3420 5 YR (leased) firewall or equivalent to be installed at Cleburne ISD Admin (DMARC) shared by all entities for district-wide use. There are approximately 7400 students plus staff and faculty across 20 campuses. Please provide bids for 5-year managed services. Please include the Subscription - Core Security Bundle PAN-PA-3420-BND-CORESEC-5YR or equivalent. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						

Basic Maintenance of Internal Connections

CONFIDENTIAL AND PROPRIETARY INFORMATION OF C1

This Solution Summary summarizes the documents(s) that are attached hereto and such documents are incorporated herein by reference (collectively, this "Order"). Customer's signature on this Order (or Customer's issuance of a purchase order in connection with this Order) shall represent Customer's agreement with each document in this Order and acknowledgement that such attached document(s) are represented accurately by this Solution Summary.

Unless otherwise specified in this Order, this Order shall be subject to the following terms and conditions (the "Agreement"): (i) the Master Sales Agreement or other applicable agreement in effect as of the date hereof between ConvergeOne, Inc. and/or its subsidiaries and affiliates (collectively, "C1" or "Seller") and Customer; or (ii) if no such applicable agreement is currently in place between C1 and Customer, the Online General Terms and Conditions currently found on the internet at: https://www.onec1.com/agreements . If Customer's Agreement is a master agreement entered into with one of C1's predecessors, affiliates and/or subsidiaries ("Legacy Master Agreement"), the terms and conditions of such Legacy Master Agreement shall apply to this Order, subject to any modifications, located at: https://www.onec1.com/agreements . In the event of a conflict between the terms and conditions in the Agreement and this Order, the order of precedence shall be as follows: (i) this Order (with the most recent and specific document controlling if there are conflicts between the Solution Summary and any applicable supporting document(s) incorporated into this Order), (ii) Attachment A to the Agreement (if applicable), and (iii) the main body of the Agreement.

This Order may include the sale of any of the following to Customer: (a) any hardware, third party software, and/or Seller software (collectively, "Products"); (b) any installation services, professional services, and/or third party provided support services that are generally associated with the Products and sold to customers by Seller (collectively, "Professional Services"); (c) any Seller-provided vendor management services, software release management services, remote monitoring services and/or, troubleshooting services (collectively, "Managed Services"); and/or (d) any Seller-provided maintenance services ordered by Customer to maintain and service Supported Products or Supported Systems at Supported Sites to ensure that they operate in conformance with their respective documentation and specifications (collectively, "Maintenance Services"). For ease of reference only, Professional Services, Managed Services and Maintenance Services may be referred to collectively as "Services." Unless otherwise defined herein, capitalized terms used herein will have the same meanings as set forth in the Agreement.

Notwithstanding anything to the contrary stated above, this Order is subject to the terms and conditions of the Public Sector Contract referenced herein, and such Public Sector Contract supersedes all references to a Master Sales Agreement, the Online General Terms and Conditions, and/or a Legacy Master Agreement referred above

Products and/or Services not specifically itemized are not provided hereunder. This Order will be valid for a period of thirty (30) days following the date hereof. Thereafter, this Order will no longer be of any force and effect. Due to rapidly changing prices in the market for third party Products and/or Services, after the expiration of the foregoing 30 day period, Seller reserves the right to adjust offerings and/or prices accordingly prior to issuing any new Order(s).

This Order is a configured order and/or contains software.

1. SCOPE OF WORK - TERMS AND CONDITIONS

This Statement of Work or Scope of Work ("SOW") and the applicable Solution Summary (and any documents attached thereto and incorporated therein by reference) (collectively, this "Order") is between ConvergeOne, Inc. and/or its subsidiaries and affiliates (collectively, "ConvergeOne" or "Seller") and Cleburne Independent School District ("Customer"), and is subject to the terms and conditions of the Public Sector Contract(s) referenced in Professional Services Pricing and Billing Schedule herein (each individually and collectively, the "Agreement"), and such Public Sector Contract(s) supersedes any and all references to a Master Sales Agreement, the Online General Terms and Conditions, and/or a Legacy Master Agreement in the Order. In the event of a conflict between the terms and conditions in the Agreement and this Order, the terms of the Agreement shall control.

Any dates and/or time intervals listed in this Order are approximate and for planning purposes only. ConvergeOne will use commercially reasonable efforts to accommodate any requested dates; provided however, project milestones will be fully discussed and mutually agreed upon between ConvergeOne and Customer after project kickoff.

Services not specifically itemized are not provided herein. Any additional applications, technologies, integrations, or other Services not specified herein, are not included in this SOW, and may result in additional charges at any time during the project.

The outline of deliverables for this Order follows below.

The outline of deliverables for this Order follows below.

DRAFT

2. PROJECT TIMELINE EXPECTATIONS

Approximately 5 business days after signed acceptance of this SOW, C1 will assign a project manager that will make contact and start planning a project kick-off meeting. The project kick-off may not take place immediately. Project start times depend on the availability of C1 and Customer resources.

The expected duration of this project has been budgeted at twenty (20) weeks from the time of kick-off to completion. If the project exceeds this timeframe, a project change order may be required to extend the engagement, resulting in additional fees.

3. PROJECT OVERVIEW

Thank you for the opportunity to work with you on the Cleburne ISD RFP project. This document describes the work to be performed during this engagement and covers the assumptions as the basis for this agreement, the responsibilities of C1 personnel, and the responsibilities of the Customer.

3.1. ITLS (IT Life Cycle Services)

The scope of this service engagement is to provide system deployment and/or imaging services for **Cleburne Independent School District**. Details of the engagement are outlined below, and specific deployment details are contained in the body of this document.

ITLS Switches Configuration & Deployment:
A total of 32 Switches will be deployed as part of this engagement.

ITLS Wireless Access Points Device Configuration and Deployment:
A total of 918 Wireless Access Points will be deployed as part of this Engagement.

C1 will be implementing or performing the following as part of this project:

- ExtremeCloud IQ cloud-managed network

3.2. Project Location(s)

Below is a list of the location(s) that are included in this project.

Client will provide a list of installation sites for this engagement.

DRAFT

4. PROJECT SCOPE OF SERVICES

This section identifies the work that will be performed as part of this project. Below is an initial, high-level list of tasks and assumptions for the project. This schedule may change depending on the Customer's business requirements and other factors. Also, depending on the schedule finally agreed upon at the kickoff meeting, the days worked may not be contiguous. C1 will conduct a meeting with the Customer to review and finalize the technical approach, constraints, and project schedule. This meeting is intended to ensure that all parties are working with consistent expectations for the project.

4.1. Enterprise Networking

Cloud-Managed Networking Implementation

Planning and Design Tasks

C1 Responsibilities

- This project is for an ExtremeCloud IQ cloud-managed network
- Review current network deployment, including hardware, firmware, and general configuration
- Work in collaboration with the Customer to verify the solution requirements for the cloud-managed networking solution
- Review and provide a document that outlines all of the information needed to implement the solution
- Consult with the Customer to determine requirements and document these requirements
- Validate quantities of devices to be part of system and their locations (types as defined for the project). This does not include visual verification of locations.
- Develop implementation/migration plan
- Develop test plan

Customer Responsibilities

- Work in collaboration with C1 to verify the solution requirements for the cloud-managed networking solution
- Work with C1 to determine the specified requirements
- Work with C1 to validate product quantities and locations
- Work with C1 to develop implementation/migration plan
- Work with C1 to develop test plan

Execution Tasks - General

C1 Responsibilities

- Add the cloud-managed devices that are part of this project to customer's cloud-managed network, typically using serial numbers or sales order numbers, on behalf of the customer
- Configure the system to support 6 networks/sites
- Perform 16 hours of post-install support
- Perform 8 hours of System Administrator Training
- Provide end of project documentation

Customer Responsibilities

DRAFT

- Provide Internet connectivity for cloud-managed networking devices
- Provide DHCP services for cloud-managed network devices, including approprite DNS services
- Provide required information including but not limited to: hostnames, username(s), password(s), IP addressing, DNS, NTP
- Any configuration of AAA services is the customer's responsibility unless otherwise indicated in this document

Assumptions

- Provide administrator rights to cloud-managed networking platform

Execution Tasks - Wireless

C1 Responsibilities

- This project includes 918 access points
- Verify licensing for 918 APs
- Configure the cloud-managed networking system per the agreed upon system requirements documentation
- Import 12 floor plans
- Implement 4 SSID(s)
- Configure splash page
- Configure switch network to support wireless access
- Mount access points, including 822 drop-ceiling mounted APs
- Provide remote assistance for cutover to new wireless system

Customer Responsibilities

- Provide OSHA approved ladders/lifts with sufficient height to enable installation of ceiling-mount access points, for any access points to be installed by C1, unless stated otherwise in this document
- Validate that wireless system is operating as expected
- Provide any/all patch cabling unless otherwise stated in this document

Assumptions

- Other wireless systems that are operating in the area may cause interference and performance issues that are outside the control of C1.
- Mounting of access points does not include cabling to those access points unless designated in another part of this SOW

DRAFT

- Configuration of network for access points does not include tuning of quality of service settings, access-lists, or firewall rules unless otherwise stated in this document
- If the existing switch to switch connections are access ports or only have an untagged VLAN for the connection, the conversion of those switchports to trunk or tagged VLANs is outside of this scope unless otherwise stated in this documen

Execution Tasks - Switching

C1 Responsibilities

- This project includes 31 48-port switches
- Verify licensing for switches
- Configure the cloud-managed networking system per the agreed upon system requirements documentation
- Configure 2 switches for layer 3 functionality
- Configure 29 switches for layer 2 functionality
- Install 31 switches in 6 MDF/IDFs at 10 sites
- Remotely assist with migration to switches

Customer Responsibilities

- Validate that switching system operates as expected

4.2. Security Services

Firewalls

Palo Alto Services

Installation and Configuration of Palo Alto Security Devices

C1 Responsibilities

- Pre-Configuration / Staging / Burn-in
  - Ensure latest Stable OS version or upgrade to same
  - Configure for secure remote access
  - Configure IP Addressing and Interfaces
  - Configure Initial Rule Set if available
  - Integrate with existing Panorama if available (C1 does not have knowledge of existing network)

DRAFT

- Installation / Configuration
    - Physically install / Rack equipment in a space to be provided by the customer.
    - Cable to existing WAN and LAN infrastructure.
    - Integrate with customer Active Directory if applicable
    - Configure firewall up to twenty (20) rules per firewall.
    - Configure secure outbound NAT as required by customer
    - Verify Internet access from LAN segment.
    - Verify inbound access to devices allowed through firewall per Firewall Configuration Workbook, with quantities as shown below.
        - E-mail servers
        - Web servers
        - Other servers/assets per the firewall configuration worksheet.
    - Install feature licensing as defined by BOM, for example if applicable Wildfire,URL,ATP, DNS,etc
- Configure Second Palo Alto NGFW for Active / Passive failover (If Applicable)
    - Configure IP Addressing / VIP
    - Configure Heart Beat
    - Connect ISPs to alternate NGFW
    - Verify correct failover operation
- Training / Demonstration
    - Provide demonstration and training on basic firewall configuration and functionality.
    - Ensure customer has logon credentials and is able to log on to NFGW, telnet, or SSH, depending on customer requirements.

Skills Transfer

- Up to one (1) 4-hour training sessions covering the basic administration of NGFW or Panorama. This includes customization of policy rules, health monitoring, and creation of reports.

Rule Tuning

- Up to one (1) 4-hour remote configuration sessions by a engineer to fine-tune the policies. The policy customization usually happens after traffic is allowed to flow for 2 weeks, which is the recommended time to gather useful traffic statistics

Execution Deliverables

C1 may provide the following execution deliverables as part of the deployment:

Documentation

- Completed Configuration Information Workbook
- Network Diagram showing logical connectivity in Visio or PDF format.
- Configurations of all newly installed networking devices.
- Usernames & Passwords of devices installed.

4.3. ITLS (IT Life Cycle Services)

Inventory Management

- Equipment will be shipped to C1.
- C1 will pull the equipment from inventory.
- C1 will submit the equipment to the C1 Configuration Depot for services.
- Inventory counts will be reviewed upon receipt and deployment.

Pre-production Setup

- C1 will complete pre-work in preparation of the hardware benching.
- C1 will prepare the Technician Instruction Sheet (TIS)
- Customer Signoff of TIS
- QA/QC checklist confirmation

Enrollment Process

- Unbox the Wireless Access Points and attach ethernet cable for setup process.
- Boot the unit, configure cloud network parameters.
    - Customer to provide any network configuration information required.
- Add device to Extreme Cloud IQ management dashboard
- Validate licensing on Extreme Cloud IQ

DRAFT

- Move each enrolled wireless access points into the proper Google Admin Console container, as identified by the Customer.
- Ensure all Wireless Access Points have been updated to the latest approved firmware version identified by the Customer. This will be the version for the duration of the project.

Network Switch Setup & Configuration

C1 will setup and configure the switches.

- Unbox the units and attach power cable for setup process.
- Boot the units
- Enroll the switches on Extreme Cloud IQ
- Initiate the configuration process
- Enroll devices on the required network
- Validate licensing
- C1 will capture and provide a complete inventory report upon project completion, to include: serial number and PO.

Inventory Reporting

- C1 will capture and provide a complete inventory report based on the agreed upon format.

Quality Assurance

- C1's quality technicians perform a quality assurance check on each build that passes through the configuration service depot. Each system is carefully and thoroughly inspected.
- QA documentation is created for each deployment order.

Deployment Services

- C1 technician will transport the completed order to the logistics department.
- Logistics Management Team will fulfill on the request.
- Logistics QA is performed to validate the accuracy of all order information.
- C1 will deliver the order to the designated location based on the information provided by the Customer.

DRAFT

Project Assumptions and Responsibilities

C1 performances is subject to the execution and completion of the following tasks by Customer as required:

- C1 will deliver the devices to a designated Customer's central location unless otherwise called out in the scope above.
- Customer to provide a single point of contact for C1's team
- Customer to notify C1 of any work performance discrepancies requiring remediation by C1 within 24 hours of the installation completion.
- Customer to provide requisite credentials.
- Customer to provide laser etching image, placement and designated size.
- Customer to provide estimated completion dates for the project.
- Customer to provide anticipated number of Units.
- Customer to provide labeling requirements.

4.4. Cabling Services

Cabling Services

Replace Degraded Exposed Structured Cabling

Network Cabling: Install, run, terminate, use J-hooks, and use conduit for all outdoor runs and in interior locations as needed. No cabling will be exposed.

Network Cabling: Supply Cat6a patch cables for each new drop.

Table 4-1

Campus	Cabling	Drop Length	Drop Qty
Coleman	Cat6a	100 meters	200
Cooke	Cat6a	100 meters	300

5. PROJECT MANAGEMENT

C1 will provide Project Management Services to help you effectively manage the project and control risks during the deployment. C1 will designate a Project Manager who will act as the single point of accountability for all C1 contract deliverables for the duration of the Project. C1 follows the Project Management Body of Knowledge (PMBOK) for project delivery. The PMBOK is an adaptable approach that enables technology project success by aligning business and technology goals. Key elements include an iterative delivery process, clear project metrics, proactive risk management, and effective response to change.

5.1. Program Manager

The Cleburne ISD RFP project and its associated workstreams will be managed as part of the Cleburne Independent School District C1 Program. C1 will designate a Program Manager who will be responsible for incorporating the Cleburne ISD RFP objectives into the Cleburne Independent School District C1 Program and aligning them with current and future business needs.

The program manager will act as the single point of contact for issues not specifically related to project tasks and is accountable for project and program delivery. The C1 Program Manager will work closely with the customer's Program Manager, sponsor, and/or leadership. The C1 Program Manager is responsible for the following:

- Identify and organize overall Program goals and make recommendations toward realizing those goals
- Maintain effective communication among project and program stakeholders
- Manage overall program planning, including:
  - Multi-project forecasts and timelines
  - Overall budget and resource needs
  - Prioritization of projects and workstreams as agreed upon with the Customer
  - Coordination of vendors and any 3rd party resources spanning multiple projects
  - Change management across projects within the program
- Monitor each project or workstream to ensure that it is progressing as planned; ensure that project management and deliverables meet requirements
- Support, recommend, and oversee changes to the overall program direction, working with the Customer and the C1 team to adjust project scopes and priorities as needed
- Oversee escalations and management of major issues
- Onboard Project Managers and acclimate them to the goals of the project and program
- Provide regular executive program summary reports containing rollup status for active projects and program-level health assessments
- Maintain a Program-level Decisions, Actions, Issues, Risks (DAIR) log

5.2. Project Manager

C1 will designate a Project Manager (PM) responsible for overseeing the project. Once the contract is signed and accepted by C1, this individual will act as the Customer's

DRAFT

single point of contact for all planning and issues related to solution delivery. The C1 PM will work closely with the Customer to guide the implementation and work on a mutually agreed-upon schedule. The C1 Project Manager is responsible for the following:

- Conduct internal (C1) and joint C1/Customer meetings.
- Develop a project plan, including activities, milestones, roles, and responsibilities.
- Schedule and manage required C1 resources and partners.
- Conduct Issue and Risk Management.
- Provide agenda and meeting notes.
- Track Customer and C1 project deliverables.
- Manage change orders and any associated billing with the Customer.
- Manage project closeout process, punch list, and Customer acceptance.

6. CHANGE ORDER PROCESS

Despite good project planning, design, and review, project plans often require some degree of change at some point. These changes are handled using change order requests, which must be agreed upon by all parties to the contract before such work can be performed.

Either C1 or the Customer may initiate a change order for any deliverable, work requirement, assumption, or dependency that is part of the project. All requests must be in writing and handled by the C1 Project Manager. C1 will review the change and provide pricing as applicable before proceeding. The C1 Project Manager may also engage project team members to assess the impact of the change. Agreed changes must be approved in writing by an authorized representative of the Customer, via email, or a modified purchase order.

7. MILESTONE AND/OR PROJECT ACCEPTANCE

Upon completion of the services described in this SOW, C1 shall provide the Customer with an Acceptance Form. Upon delivery of the Acceptance Form, the Customer has (5) working days to review and accept. Failure to respond within the designated 5-day period signifies the completion of the milestone or project. To refuse acceptance, the Customer must both indicate non-acceptance with written notification to C1 within the (5) days period noted above and describe why it was not accepted. C1 shall have up to (10) days after the receipt

DRAFT

of such notice to correct the error given it is within C1's scope and control to do so. The period to correct the error may be extended by mutual consent.

8. CUSTOMER RESPONSIBILITIES

Provide a single point of contact that will be responsible for:

- Understanding the business process impact and technical requirements and who has the authority to make binding decisions on the Customer's behalf.
- Working with C1 Project Manager to develop mutually agreed project schedule, including outside of Normal Business Hours test and cutover windows (if applicable).
- Ensuring all Customer responsibilities are completed in accordance with the project schedule.
- Reasonable notification of schedule and changes for the installation work.
- Attending all project status meetings.

Ensure the availability of appropriate Customer resources that will:

- Assist in the development and execution of applicable test plans.
- Provide accurate documentation for all existing systems and networks.
- Provide all necessary IP addresses, subnet masks, and default gateways.
- Provide a qualified Network Administrator with working knowledge of Customer requirements.
- Provide information on planned changes in the network.

Site Preparation:

- Ensure the equipment room is ready, including all electrical, wiring, grounding, lighting, racks, and HVAC required to maintain equipment within operating conditions specified by the equipment manufacturer.
- Provide required cable/patch panels that meet all requirements for Category 5e, racks, and network connectivity.
- Accept receipt of equipment and store it in a secure area. Retain shipping documentation, and inventory shipments by box count, and report any apparent external damage to the C1 Project Manager.
- Provide floor plans for equipment room configuration and related locations if applicable.
- Ensure that the existing Customer network is configured, connected, and operating within the manufacturer's specifications.

DRAFT

- Customers will provide QOS on all their network equipment to the WAN based on the Supplier's guidelines and requirements if carrying voice.

9. PROFESSIONAL SERVICES ASSUMPTIONS

The following assumptions were made to create this Statement of Work. Should any of these assumptions prove to be incorrect or incomplete, C1 may modify the price, scope of work, or milestones. Any such modifications shall be managed by the Change Order Procedure.

9.1. General Assumptions

- All non-service impacting work described in this scope will be performed during U.S. normal business hours defined as 8:00 AM to 5:00 PM local time; Monday through Friday, excluding C1 designated holidays. "Cutover" for the sites will be completed during business hours unless otherwise stated in this scope of work.
- The Customer must identify any specific requirements for maintenance windows and change control. The Customer retains overall responsibility for any business process impact and any Customer-internal change management procedures and communications.
- All services, documentation, and project deliverables will be provided in English only.
- C1 will install specific software versions agreed upon at the time of project kickoff. Upgrades to the software are not included in the SOW. C1 may choose to install an upgrade if required by the manufacturer or to resolve a problem.
- The Customer is responsible for the underlying data infrastructure including network and virtualization. Systems must be capable of supporting the proposed solution. C1 can supply consulting and remediation services to ensure successful implementation, if not included in this scope, through a change order and billed at an additional fee.
- The Customer is responsible for all communications and scheduling of any contractors or vendors not managed by the C1 Project Manager.
- Any product or service delivery dates communicated outside of this SOW or the Project Plan, are not to be considered valid or binding.
- If the project extends beyond the timeline specified in the Project Plan due to delays caused by parties other than C1 and its subcontractors, C1 may invoice for service performed to date.

- The Customer is responsible to verify and arrange the installation of all applicable network connections and provide a functional network for application deployment.
- Projects requiring multiple site visits and/or intervals of inactivity between events must be noted as such prior to acceptance of this SOW.
- The Customer is responsible for relocation, removal, and disposal of any previously installed Customer-owned equipment or cabling unless specifically agreed otherwise herein.
- The Customer is responsible to notify C1 if the site requires any specialized access for personnel and/or Union trades for any tasks associated with this SOW. Notification of requirements must take place prior to the quote. Any and all additional costs for post-quote changes or additional site restrictions requiring specialized training or Union Labor shall be chargeable to the Customer.
- The Customer is responsible for managing all 3rd Parties not outlined in this SOW.
- Services not specifically called out in this SOW will be deemed out of scope.

9.2. Technical Assumptions

- Unless specifically called out above, no IP address changes are included in the SOW. If requested, additional charges may apply.
- The Customer is responsible for having current licensing, maintenance, and support on the components of the servers, database, storage, and network infrastructure including hardware, software (including operating systems), and any associated costs.
- The Customer is responsible for any operating system patches and anti-virus software installation and support.
- The Customer is responsible for ensuring the existing network is free of layer 3 protocol and broadcast errors.
- The Customer is responsible for the cost and acquisition of any 3rd party security certificates necessary for successful deployment. C1 can provide services for Security Audits and Certificate deployment which can be billed at an additional fee.
- The Customer is responsible for resolving interoperability issues with other vendors not acting as a sub-contractor to C1.
- The Customer is responsible for any firmware updates to re-used circuit packs, media modules, or cards not specifically identified within this SOW. C1 can provide services for firmware updates through a change order and is billed at an additional fee.

DRAFT

- C1 will provide port and protocol matrices as provided by the manufacturers for the equipment that is in this scope. If additional documentation is required for firewall configuration or security assessments, C1 can provide these services at an additional cost to the Customer upon request.
- VPN access will be provided to C1 resources to allow for work to be accomplished remotely when applicable. If unfettered remote access to the Customer network cannot be provided additional charges will be required.

10. PROFESSIONAL SERVICES PRICING AND BILLING SCHEDULE

Billing terms for this project supersede any MSA in place and are only applicable to the services stated in this scope of work. Invoices are due within thirty (30) days from the date of the invoice unless otherwise previously agreed between the Customer and C1 credit department. Any change to the Project Pricing and Payment schedule will be managed through the Change Order procedures specified herein. All stated prices are exclusive of any taxes, fees, duties, or other amounts, however, designated and including without limitation value added and withholding taxes which are levied or based upon such charges, or upon this SOW (other than taxes based on the net income of C1). The Customer shall pay any taxes related to services purchased or licensed pursuant to this SOW or the Customer shall present an exemption certificate acceptable to the taxing authorities. Applicable taxes shall be billed as a separate item on the invoice.

10.1. Project Pricing and Billing

The total price of this engagement is **$979,330.00** based on the number of devices in this scope.

10.2. Project Price and Billing

Total Price: $979,330.00

Billing will be done in compliance with E-Rate guidelines and occur at completion of each site or other progress milestones allowed. The distribution of dollars per site or milestone will be determined and agreed to after award between ConvergeOne and Customer and be no larger than the total price indicated above.

DRAFT

ConvergeOne E-Rate Sales Agreement

Agreement #

E-Rate Sales Agreement

Date: _____

SELLER: **CONVERGEONE, INC.**

10900 Nesbitt Avenue South
Bloomington, MN 55437

CUSTOMER: **Cleburne Independent School District**

_____
_____
_____

This E-RATE SALES AGREEMENT ("Agreement") is made and entered into as of the date indicated above ("Effective Date") by and between Seller and Customer and continues for one (1) year thereafter and may be renewed for one (1) year terms by mutual agreement of the Parties. Seller and Customer are each a "Party" to this Agreement and may collectively be referred to herein as the "Parties."

In consideration of the mutual undertakings herein contained, the Parties agree as follows:

1. Attachment A contains terms and provisions that are part of this Agreement and Attachment A is hereby herein incorporated by reference.

2. This Agreement shall apply to sales of the following to Customer:

   a) All hardware, third party software, and/or Seller software (collectively, "Products");
   b) All installation services, professional services, and/or third party provided support services that are generally associated with the
      Products and sold to customers by Seller ("Professional Services"); and/or
   c) All Seller-provided vendor management services, software release management services, remote monitoring services and/or, troubleshooting services (collectively, "Managed Services").

   For purposes of this Agreement, Professional Services and Managed Services may be referred to collectively as "Services."

3. Seller will provide the Products, and/or Services to Customer as more fully described on a sales order ("Solution Summary"). Each Solution Summary shall be accompanied by an itemized list of all Products and/or Services to be provided, together with the price to be charged therefor ("Solution Quote"). If Seller is to provide Professional Services and/or Managed Services to Customer, a Statement of Work ("Statement of Work" or "Scope of Work" or "SOW") shall accompany this Agreement. The Solution Summary shall reflect the price to be charged for such Professional Services and/or Managed Services.

4. Any amendment, supplement, or modification of any term or provision of this Agreement must be in a writing that is signed by authorized representatives of both Parties to this Agreement.

5. In lieu of an authorized representative of each Party signing a Solution Summary, the Parties agree that Customer may issue to Seller a purchase order to order Products, and/or Services from Seller. Such purchase order shall be deemed Customer's agreement to the terms and conditions of the corresponding Solution Summary. However, no pre-printed, additional, and/or alternate terms or provisions of the purchase order (other than the description of the Products, and/or Services and the quantity thereof) shall apply. Rather, only the terms and provisions of this Agreement shall apply to the sale of Products and/or Services.

6. **PURCHASE PRICE**: The purchase price of the Products and/or Services set forth in the Solution Summary, plus applicable tax and freight, shall be due thirty (30) days from the date of the invoice.

7. **FINANCING OPTION**: If Customer elects to lease the pertinent Products and/or Services, Customer

   a) Shall inform Seller of such election no later than the time that this Agreement is executed to avoid being liable for sales tax on the Products and/or Services provided under the Solution Summary; and

   b) May assign this Agreement to a financing company for the sole purpose of financing the Price, provided that Customer agrees that any such assignment shall not delay or relieve Customer of its duty to perform any of its

obligations under this Agreement (including, but not limited to, liability for amounts owed under this Agreement). Customer further agrees that it shall not take any action, or refuse to take any action, that delays Seller's receipt of payment from Customer's financing company.

8. **PRODUCT RETURNS**: All configured orders, including hardware and software, are non-returnable. All software, regardless of whether such software is part of a configured order, is non-returnable. All authorized returns may be assessed a twenty percent (20%) restocking charge; provided, however, that Product returns based on warranty claims will not be assessed such restocking charge.

IN WITNESS WHEREOF, the Parties have caused this Agreement to be executed and do each hereby warrant and represent that their respective signatory whose signature appears below has been and is on the date of this Agreement duly authorized by all necessary and appropriate corporate action to execute this Agreement.

ATTACHMENT A – TERMS AND CONDITIONS

ARTICLE I – GENERAL TERMS AND CONDITIONS OF THE AGREEMENT

1. **PRICE; PAYMENT; TAXES; COST ADJUSTMENT.**
   a) Customer agrees to pay the price of each of the Products and/or Services described in the Solution Summary or Statement of Work, together with freight, taxes, and any other itemized charges, fees, and costs in United States Dollars (the "Price").
   b) Except for material breach by Seller, termination of this Agreement shall not affect Customer's obligation to pay the Price.
   c) If Customer is exempt from tax, Customer shall provide to Seller a valid tax exemption certificate at the time that this Agreement is executed. Customer agrees to indemnify and hold harmless Seller (i) from any and all liens, actions, or claims made by or on behalf of any tax authority in connections with any payment made to Seller, and (ii) for all costs incurred by Seller in connection with the foregoing (including, but not limited to, reasonable attorneys' fees).
   d) Interest on any past due obligation shall accrue at the rate of one and one-half percent (1½%) per month or at the maximum rate allowed by law, whichever is lower. All prices are exclusive of applicable taxes or other charges imposed by law.
   e) For Managed Services that are provided for a term that exceeds twelve (12) months or are subject to renewal for any successive term(s), the Price shall be subject to annual increase as follows:
      i. Upon completion of the first year of the term, the Price specified in a Solution Summary or Statement of Work (as applicable) is subject to automatic annual increase by the lesser of: (A) five percent (5%), or (B) the CPI Adjustment (as defined below). The "CPI Adjustment" is a percentage equal to the amount of the increase in the unadjusted Consumer Price Index for all Urban Consumers as published in the Summary Data from the Consumer Price Index News Release by the Bureau of Labor Statistics, U.S. Department of Labor ("CPI"), reported in the month immediately preceding the month of completion of each annual period during the current term or renewal term (the "Current Period CPI") from the CPI reported for the same month twelve (12) months prior (the "Previous Period CPI"). The CPI Adjustment is calculated by: (1) subtracting the Previous Period CPI from the Current Period CPI to obtain the amount of the "Index Point Change", and (2) dividing the Index Point Change by the Previous Period CPI and multiplying that amount by 100.

2. **REMEDIES UPON DEFAULT.** In the event that Customer fails to pay according to the terms and provisions of this Agreement, or fails to perform any of its obligations pursuant to the terms and provisions of this Agreement, then Seller, at its option, may do any or all of the following: (i) upon notice to Customer, terminate this Agreement; (ii) regardless of whether this Agreement is terminated, suspend further performance under this Agreement; and (iii) retain, as an offset to Customer's liability for such default, all or a portion of the progress payments (if any) previously paid by Customer. Customer shall in any event remain fully liable for damages resulting from Customer's breach (including, but not limited to, all costs and expenses incurred by Seller on account of such breach, including costs of arbitration and reasonable attorneys' fees). The rights afforded Seller hereunder shall not be deemed to be exclusive but, instead, shall be in addition to any rights or remedies provided by law.

3. **INDEPENDENT CONTRACTOR.** Seller shall conduct its business as an independent contractor with respect to Customer. Seller will represent to third persons, to the public generally, and to all governmental bodies (including, but not

limited to, federal, state, and local authorities) that the business conducted by Seller with respect to Customer is that of an independent contractor and that such is the sole relationship between the Parties. It is expressly understood that Seller is in no way considered the legal representative of Customer for any purpose whatsoever with respect to this Agreement. Customer shall deduct no income tax or other withholdings whatsoever from payments due to Seller.

4. **CUSTOMER COOPERATION.** Customer shall cooperate fully with Seller to facilitate performance of Seller's obligations hereunder, including the rendition of Services and/or the installation of a Product. Customer shall dedicate such time, personnel, and resources as may be reasonably necessary to complete Seller's performance of Services. Cooperation shall include the following:

(a) Customer shall designate a coordinator at Customer's site with the knowledge and authority to make decisions with respect to all of Customer's operations in order for Seller to meet its obligations hereunder;

(b) Customer shall make available such data as is necessary to adequately test the Product(s) and/or Services;

(c) If Customer is purchasing an application software solution, Customer shall be responsible for the operation of each CPU, conducting a back-up, performing all program translation, contacting all third-party vendors to confirm that existing hardware and software will be compatible with the new software, and processing any necessary changes;

(d) Customer shall provide full, free, and safe access to Customer's facilities to allow Seller to meet its obligations hereunder; and

(e) Customer shall provide the telephone numbers, network addresses, and passwords necessary for Seller to gain remote access to Customer's systems when necessary in connection with the performance of Services.

(f) Customer shall provide (i) interface information for Managed Products (as defined in Article III, Section 1 of this Attachment A) and Supported Products (as defined in Article IV, Section 1 of this Attachment A), and (ii) any third-party consents and licenses needed by Seller to access such Managed Products.

(g)Customer expressly acknowledges that with respect to Seller's performance of the Services called for under this Agreement, such Services do not involve or in any way require Seller's access to Personal Data as defined herein. If, in the future, Customer requests additional services that require Seller access to Personal Data, those additional services, and the security requirements associated with Seller's access to Personal Data in order to perform those additional services, shall be subject to a separate written agreement between the parties. "Personal Data" is personal data of any employee, customer, or other individual.

(h) In order to mitigate any potential delays in the provision of Products and/or Services, Customer shall promptly perform all of its obligations set forth in this Agreement and the Solution Summary. However, in the event of any Customer delay(s) which reasonably impact Seller's provision of Products and/or Services, Customer agrees that Seller may invoice Customer, and Customer agrees to pay Seller, for each applicable milestone or other periodic payment upon the originally anticipated completion date mutually agreed to by the parties in the Solution Summary and/or as part of the project kick-off process.

5. **FORCE MAJEURE.** Seller shall not be liable for any loss, failure, or delay in furnishing a Product and/or providing Services, resulting from any of the following: fires; explosions; floods; storms; acts of God; governmental acts, orders, or regulations; hostilities; acts of terrorism; civil disturbances; strikes; labor difficulties; machinery breakdowns; transportation contingencies; difficulty in obtaining parts, supplies, or shipping facilities; delays of carriers; or any other cause beyond the control of Seller.

6. **ARBITRATION.** Seller and Customer agree to submit any and all disputes (of whatever kind or nature, whether in law or in equity) arising out of the terms and provisions of this Agreement (including, but not limited to, determining the validity, specific enforcement, breach, or interpretation of this Agreement) to binding arbitration only, such arbitration to be conducted pursuant to the then-current Commercial Arbitration Rules of the American Arbitration Association and to be held before a single arbitrator at a location mutually agreeable to the Parties. The Parties shall be entitled to limited discovery under the Federal Rules of Civil Procedure. Notwithstanding the foregoing, in the event that third parties are necessary to achieve a just adjudication of the issues, either Party may commence a civil action in a court of competent jurisdiction having jurisdiction over all parties involved. The prevailing Party shall be entitled to recover from the non-prevailing Party its costs and reasonable attorneys' fees incurred in connection with any action or proceeding that arises from the terms and provisions of this Agreement. The Parties further agree that any monetary award may be reduced to judgment and docketed in any court of competent jurisdiction without objection and execution had thereon. This provision shall survive the termination of this Agreement. No arbitration or action, regardless of form, arising out of the terms and provisions of this Agreement may be brought or commenced by either Party more than one (1) year after the dispute, claim, or cause of action arose.

7. **LIMITATION OF LIABILITY.** THE ENTIRE LIABILITY OF SELLER (AND SELLER'S OWNERS, OFFICERS, DIRECTORS, EMPLOYEES, AGENTS, AND AFFILIATES) AND CUSTOMER'S EXCLUSIVE REMEDIES FOR ANY DAMAGES CAUSED BY ANY PRODUCT DEFECT OR FAILURE, OR ARISING FROM THE PERFORMANCE OR NON-PERFORMANCE OF ANY SERVICES, REGARDLESS OF THE FORM OF ACTION (WHETHER IN CONTRACT, TORT, OR OTHERWISE), SHALL BE (I) FOR FAILURE OF PRODUCTS DURING THE WARRANTY PERIOD, THE REMEDIES STATED IN ARTICLE II, SECTION 3 OF THIS ATTACHMENT A; (II) FOR DELAYS IN DELIVERY OR INSTALLATION (WHICHEVER IS APPLICABLE) OF MORE THAN THIRTY (30) DAYS BY CAUSES ATTRIBUTABLE SOLELY TO SELLER, CUSTOMER'S SOLE REMEDY SHALL BE TO TERMINATE THIS AGREEMENT WITHOUT INCURRING CHARGES FOR SUCH TERMINATION AND, WITHIN THIRTY (30) DAYS AFTER SUCH TERMINATION, RECEIVE A REFUND OF ALL MONIES PAID UNDER THIS AGREEMENT; OR (III) FOR SELLER'S FAILURE TO PERFORM ANY OTHER MATERIAL TERM OF THIS AGREEMENT, IF SELLER DOES NOT CORRECT SUCH FAILURE WITHIN THIRTY (30) DAYS AFTER RECEIPT OF WRITTEN NOTICE ADDRESSING SUCH FAILURE, CUSTOMER'S SOLE REMEDY SHALL BE TO TERMINATE THIS AGREEMENT WITHOUT INCURRING CHARGES FOR SUCH TERMINATION AND, WITHIN THIRTY (30) DAYS AFTER SUCH TERMINATION, RECEIVE A REFUND OF ALL MONIES PAID UNDER THIS AGREEMENT. SELLER SHALL IN NO CASE BE LIABLE FOR PUNITIVE, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES

(INCLUDING, BUT NOT LIMITED TO, LOST PROFITS, LOST SAVINGS, OR LOST REVENUES OF ANY KIND; LOST, CORRUPTED, MISDIRECTED, OR MISAPPROPRIATED DATA; NETWORK DOWNTIME; INTERRUPTION OF BUSINESS ARISING OUT OF OR IN CONNECTION WITH PERFORMANCE OR NON-PERFORMANCE OF THE PRODUCTS OR USE BY CUSTOMER; CHARGES FOR COMMON CARRIER TELECOMMUNICATIONS SERVICES; COST OF COVER; OR CHARGES FOR FACILITIES ACCESSED THROUGH OR CONNECTED TO THE PRODUCTS ("TOLL FRAUD")). THE PREVIOUS SENTENCE APPLIES REGARDLESS OF WHETHER SELLER HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

8. **NON-SOLICITATION OF EMPLOYMENT.**

Customer shall not solicit for employment, either directly or indirectly, employees or subcontractors of Seller during the term of this Agreement, or for a period of twelve (12) months thereafter; provided, however, that Customer may hire employees or subcontractors of Seller if such employees or subcontractors initiate contact with Customer (e.g., a response to general employment advertisements of Customer). If Customer violates this provision, Customer will pay to Seller an amount equal to the amount of total potential compensation for the first twelve (12) months for the employee or subcontractor of Seller that has been hired. Customer shall pay such amount to Seller on the date that is thirty (30) days after the person accepts an offer of employment from Customer.

9. **MISCELLANEOUS.**

(a) **Merger.** This Agreement constitutes the entire agreement between Seller and Customer with respect to the subject matter described herein, superseding all prior and contemporaneous correspondence between the Parties.

(b) **No Assignment.** This Agreement shall not be assignable by either Party without the prior written consent of the other Party, which consent shall not be unreasonably withheld; provided, however, that in any assignment of this Agreement, both the assignor and the assignee are jointly and severally liable under this Agreement for any outstanding obligations of the assignor that are due as of the date of the assignment.

(c) **Notices.** Any notice required or permitted under this Agreement shall be in writing and delivered to the address of the other Party as set forth in this Agreement or to such other address as a Party shall designate and shall be: (i) delivered in person, (ii) sent by overnight courier service, properly addressed and prepaid, or (iii) sent by first class mail, properly addressed and with the correct postage.

(d) **Acknowledgment and Authority.** By execution hereof, the signers hereby certify that they have read this Agreement and these terms, understand them, and agree to all terms and provisions stated herein. In addition, Seller and Customer warrant to each other that each respective Party and its respective signatory have the full right, power, and authority to execute this Agreement.

(e) **Secrecy and Confidentiality.** Each Party (the "Receiving Party") covenants and agrees on behalf of itself, its officers, directors, employees, and agents as follows: (i) all information obtained from the other Party (the "Disclosing Party") (including, but not limited to, the terms and conditions of this Agreement, customer lists, customer-sensitive information, business practices and operations, pricing and financial information, product plans and designs, and configurations and layouts) is secret, proprietary, and confidential ("Confidential Information"); (ii) such Confidential Information shall be neither disclosed to any third party without the prior written approval of the Disclosing Party (except Seller may disclose Customer's Confidential Information to its subcontractors under this Agreement, but will ensure that such subcontractors are subject to the same confidentiality obligations set forth herein) nor used for any unauthorized purpose; and (iii) the Receiving Party shall use its best efforts to return such Confidential Information to the Disclosing Party upon termination of this Agreement. However, the Receiving Party shall have no obligation to preserve the confidentiality of any Confidential Information which (i) was known to the Receiving Party free of any obligation to keep it confidential; (ii) is or becomes publicly available by other than the authorized disclosure by the Receiving Party; (iii) is independently developed by or on behalf of the Receiving Party independent of any Confidential Information received from the Disclosing Party; (iv) is received by the Receiving Party from a third party whose disclosure does not violate any confidentiality obligation; or (v) is required by law to be disclosed by the Receiving Party, provided that the receiving party gives the Disclosing Party prompt written notice of such requirement prior to such disclosure and reasonable assistance, at the Disclosing Party's sole expense, in obtaining an order, if necessary, protecting the information from public disclosure. The Parties further acknowledge that the unauthorized use or disclosure of Confidential Information will create a risk of irreparable harm to the Disclosing Party, entitling the Disclosing Party to seek injunctive relief, without the necessity of posting a bond, against the receiving party to prevent such harm in addition to all other remedies at law, including monetary damages.

f) Intellectual Property Rights. Provisions pertaining to title and risk of loss in connection with the purchase of applicable Products and/or Services are set forth Article II, Section 1 of this Attachment A below. Additionally, each Party reserves all rights, including, but not limited to, ownership, title, intellectual property rights and all other rights and interest in and to any intellectual property that it makes available to the other Party as is necessary for such other Party's performance under this Agreement. Furthermore, Seller will own any intellectual property that it develops, creates, or otherwise acquires, excluding Customer's intellectual property, while performing the Services, unless otherwise mutually agreed to and expressly set forth in the applicable Order. For Services that are purchased, developed, or created under this Agreement, upon receipt of Customer's payment for such Services, Seller hereby grants Customer a perpetual, non-exclusive, non-transferable, fully-paid license to use and reproduce the Services as originally configured and deployed for the limited purpose of conducting Customer's internal business. Seller reserves all other intellectual property rights not expressly granted herein.

(g) No Resale. In the event that the Products contain manufacturer's software, Customer shall not resell the software or provide access to the software either directly or indirectly to third parties unless authorized to do so in an Order.

(h) Waiver. If either Party fails to enforce any right or remedy available under the terms and provisions of this Agreement, such failure shall not be construed as a waiver of any right or remedy with respect to that breach or any other breach or failure by the other Party. Rather, any waiver of a Party's rights or remedies available under the terms and provisions of this Agreement must be in a writing that is signed by the Party against whom enforcement is sought.

(i) Severability. In the event that any term or provision of this Agreement is held to be illegal, unenforceable, or invalid, the remaining terms and provisions hereof shall remain in full force and effect.
(j) Survival of Terms. Notwithstanding any termination or expiration of this Agreement, all rights and remedies available to the Parties and all terms and provisions of this Agreement that are not performed or cannot be performed during the term of this Agreement shall survive the termination or expiration of this Agreement.
(k) Governing Law. This Agreement shall be governed by and construed in accordance with the substantive laws of the State of Minnesota, without regard to its choice or conflicts of law principles.
(l) Counterparts and Electronic Signature. This Agreement may be executed in two (2) or more counterparts, each of which will be deemed an original, but all of which taken together shall constitute one (1) and the same Agreement. The counterparts of this Agreement may be executed and delivered by facsimile or other electronic signature by one (1) Party to the other Party. The receiving Party may rely on the receipt of such document so executed and delivered by facsimile or other electronic means as if the original had been received.
(m) Change-in-Control. In the event that Seller is acquired, sold, or dissolved (a "Change-In-Control"), Customer may cancel this Agreement, provided however, that Customer must: (i) pay all outstanding invoices and pay for all Product(s) delivered and not invoiced; (ii) pay for all Products ordered which orders cannot be cancelled at the time of notice of cancellation without cost or other liability; and (iii) pay for all Professional Services rendered up to and including the of date of notice of cancellation.
(n) Cancellation for Convenience. Customer shall have the right to cancel this Agreement for convenience, with no penalty, at any time prior to an order being placed by the Customer with Seller.
(o) E-Rate Program. In addition to all other terms and conditions of this Agreement, if Customer is an educational institution, library or other entity that qualifies as an applicant seeking reimbursement under the Federal Universal Service Fund Schools and Libraries Program (commonly referred to as the "E-Rate Program"), the E-Rate Program requirements of the Universal Service Administrative Company (USAC) will apply, which includes but are not limited to the following:
i. The Parties recognize that the E-Rate funding year commences on July 1 and continues through June 30 of each year (a "Funding Year").
ii. Products purchased by Customer pursuant to this Agreement may not shipped prior to April 1 and may not be invoiced prior to July 1 of the current Funding Year.
iii. Add on manufacturer warranty services (e.g., maintenance services) that run outside of the current Funding Year must either be applied to the next Funding Year or be 100% billable to the Customer.
iv. Receipt Acknowledgement Letters must be received and service substitutions must be completed before order processing can commence for shipments.
v. If requesting Service Provider Invoicing on a Form 474, order processing may commence only after a Form 486 has been approved by USAC.
vi. If purchasing multi-year contracts for manufacturer warranties, software subscriptions, etc., a Form 471 must be filed by Customer for each Funding Year occurring during the multi-year contract term.
vii. Manufacturer warranty services need to be listed as basic maintenance or an appeal will need to be filed to correct invoicing on approved Forms 471.
viii. If a Form 486 has not been timely filed by Customer within 120 days following receipt of USAC's Funding Commitment Decision Letter, Seller reserves the right to invoice Customer in full for the Products and Services purchased under this Agreement.
ix. If during USAC auditing process, USAC determines eligibility percentage has decreased, Seller reserves the right to invoice Customer for the difference between the originally approved percentage and the decreased percentage per USAC terms and conditions.

ARTICLE II – ADDITIONAL TERMS AND CONDITIONS SPECIFIC FOR PRODUCTS AND PROFESSIONAL SERVICES

1. TITLE; RISK OF LOSS. Title, ownership, and risk of loss of hardware sold pursuant to the terms and provisions of this Agreement shall pass to Customer upon delivery to Customer. Title and ownership of software delivered to Customer pursuant to the terms and provisions of this Agreement shall remain solely with its licensor. Risk of loss of software delivered to Customer pursuant to the terms and provisions of this Agreement shall pass to Customer upon delivery to Customer.
2. SECURITY INTEREST. Seller reserves a purchase money security interest in and to the Products (together with the cost of any Professional Services related thereto) sold hereunder as security for performance of Customer's obligations. Seller may file the Agreement (together with any attachments thereto) to perfect such interest.
3. WARRANTIES; DISCLAIMERS; SOFTWARE LICENSES. Seller represents and warrants that, immediately prior to the sale of a Product to Customer, Seller will be the lawful owner thereof, free and clear of any liens and encumbrances (other than those that may arise under the terms and provisions of this Agreement). In addition, Seller represents and warrants that Seller has the full right, power, and authority to sell, deliver, or provide the Product to Customer.
(a) **Product Warranties.** Products are warranted to Customer either directly by the original equipment manufacturer ("OEM") or by Seller.
1) **Direct OEM Warranty.** Customer receives the OEM's warranty in effect at the time of delivery with respect to hardware purchased and/or software licensed hereunder. Except for the warranties of title and rightful transfer, the OEM warranty is Customer's sole warranty with respect to such items. SELLER MAKES NO OTHER EXPRESS OR IMPLIED WARRANTIES WITH RESPECT TO OEM PRODUCTS.
2) **Indirect OEM Warranty.** If Customer does not receive the Product warranty directly from the OEM, then Seller warrants the Products to Customer to the same extent and term as the OEM warrants the Products to Seller. Upon request, Seller will provide such warranty information to Customer. Except for the warranties of title and rightful transfer, the OEM

warranty is Customer's sole warranty with respect to such items. SELLER MAKES NO OTHER EXPRESS OR IMPLIED WARRANTIES WITH RESPECT TO OEM PRODUCTS.

3) **Seller Warranty for Refurbished Products.**

i) Products refurbished by Seller are warranted for a term of one (1) year from either (i) the date of Product delivery if the Product is installed by Customer; or (ii) the date of Product installation if the Product is installed by Seller.

ii) This warranty does not extend to Products or Product components that have had their serial numbers, date of manufacturing, or OEM labels removed, defaced, or altered, nor does this warranty cover any of the following: counterfeit parts; repair for damages to Products or Product components; or malfunctions caused by (i) misuse, neglect, power failures, power surges, lightning, fire, flood, or accident; (ii) use of products or facilities supplied by others; (iii) failure to follow installation, operation, or maintenance instructions; (iv) failure to permit remote access; or (v) force majeure conditions specified in Article I, Section 5 of this Attachment A.

(b) **Professional Services Warranty.** Professional Services are warranted for thirty (30) days from the date on which such Professional Services are completed. Professional Services will be performed in a good and workmanlike manner by qualified personnel.

(c) **Warranty Procedures and Disclaimers.** The terms and provisions of this Article II, Section 3(c) apply to all Products and Replacement Products provided hereunder.

1) If a Product or a Replacement Product does not conform to the Product warranty during the warranty period, Customer shall promptly notify Seller in writing of such non-conformance, which shall be stated in detail sufficient to describe both the problem and its symptoms. Seller or the OEM (as the case may be), at its option, will either (i) repair the Product so that the Product conforms to the Product warranty; or (ii) replace the Product with a Product that conforms to the Product warranty ("Replacement Product"). Replacement Products are warranted as outlined above for the remainder of the original applicable Product warranty period. Replaced Products become the property of Seller. Seller will not charge Customer for the Replacement Product. Seller, however, may charge Customer for the time that is incurred to diagnose the problem and to repair or replace the Product, if the problem is not covered by the Product warranty.

2) THE EXPRESS WARRANTIES HEREIN CONTAINED ARE IN LIEU OF ANY AND ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING NON-INFRINGEMENT AND THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ALL OF WHICH SELLER DISCLAIMS AND ARE EXCLUDED. SELLER DOES NOT WARRANT UNINTERRUPTED OR ERROR-FREE OPERATION OF THE PRODUCTS OR SERVICES PROVIDED HEREUNDER. SELLER DOES NOT WARRANT THAT THE PRODUCTS ARE IMMUNE FROM OR WILL PREVENT EITHER FRAUDULENT INTRUSION OR UNAUTHORIZED USE. SELLER WILL NOT BE RESPONSIBLE FOR UNAUTHORIZED USE (OR CHARGES FOR SUCH USE) OF COMMON CARRIER TELECOMMUNICATIONS SERVICES OR FACILITIES ACCESSED THROUGH OR CONNECTED TO THE PRODUCTS (TOLL FRAUD). UNLESS OTHERWISE AGREED IN THIS AGREEMENT, CUSTOMER IS SOLELY RESPONSIBLE FOR ENSURING THAT CUSTOMER'S NETWORKS AND SYSTEMS ARE ADEQUATELY SECURED AGAINST UNAUTHORIZED INTRUSION.

3) If the Products are to be used either on or to support Telephony over Transmission Control Protocol/Internet Protocol (TCP/IP) facilities, Seller requires that a network assessment be performed prior to installation to determine network performance, reliability, and security. In the event that Customer either refuses to authorize a pre-installation network assessment or fails to follow Seller's reasonable recommendations after Seller performs the network assessment, and if performance problems are encountered and determined to be associated with network performance, reliability, or security issues, Customer shall be solely responsible for all costs associated with a post-installation network assessment and network reconfiguration.

(d) **Software Licenses.** Customer agrees that it has read, understood, and will abide by the terms and provisions of the software license(s) pertinent to the Products provided hereunder. Such software licenses may be found on the Internet at https://www.onec1.com/agreements. Seller Software licenses, as identified in the Solution Summary, may be found in the Statement of Work corresponding to the Solution Summary.

4. **PROFESSIONAL SERVICES AND TIMING.** Professional Services not specifically itemized are not provided. CUSTOMER IS SOLELY RESPONSIBLE FOR SYSTEM BACK-UP PRIOR TO COMMENCEMENT OF PROFESSIONAL SERVICES OR INSTALLATION OF A PRODUCT.

ARTICLE III – ADDITIONAL TERMS AND CONDITIONS SPECIFIC FOR MANAGED SERVICES

1. **DEFINED TERMS OF ARTICLE III.**

(a) "EULA" is an acronym used to refer to an End User License Agreement.

(b) "Managed Products" are all hardware and/or software identified on the Solution Summary for which the Managed Services are to be provided.

(c) "Managed Sites" are the locations specified on the Solution Summary.

2. **PROVISION AND SCOPE OF MANAGED SERVICES.**

(a) **Order Form and Provision of Managed Services.** Seller will provide the Managed Services for Managed Products at Managed Sites, as described further in the Solution Summary that references the Agreement. The Price set forth on the Solution Summary for Managed Services is based on the number of active Managed Products. Seller, at its discretion, will perform a true-up on a quarterly basis to reconcile future billing on any Managed Products that have been added (activated) or removed (deactivated) during the previous period.

(b) **Monitoring.** Seller may electronically monitor Managed Products for the following purposes: (i) to perform and analyze diagnostics from a remote location and to take corrective actions, if necessary; (ii) to determine system configuration and applicable charges; (iii) to verify compliance with applicable software license terms and restrictions; (iv) to assess Customer needs for additional products and/or Managed Services; and (v) as otherwise provided in the Solution Summary.

(c) **General Limitations.** Seller will not provide Managed Services for Managed Products that have been misused, used in breach of the terms and provisions of their respective license, improperly installed or configured, or that have had their serial numbers altered, defaced, or deleted.

3. **CUSTOMER RESPONSIBILITIES FOR MANAGED SERVICES.**

(a) **Provision of Managed Products.** Customer will provide all Managed Products and Managed Sites. Customer continuously represents and warrants that (i) Customer is either the owner of, or is authorized to access and use, each Managed Product and each Managed Site; and (ii) Seller and its suppliers and subcontractors are authorized to do the same to the extent necessary to provide the Managed Services in a timely manner.

(b) **Moves of Managed Products.** When Customer seeks to move any Managed Products, Customer will notify Seller. Only Seller or its authorized agent may move Managed Products. Seller may charge additional amounts to recover any additional costs incurred by Seller in providing the Managed Services that result from the move of Managed Products by a party other than Seller or its authorized agent.

(c) **Identification Tags.** Customer will not remove any identification tags or other markings from any Managed Product.

4. **TITLE AND RISK OF LOSS OF MANAGED PRODUCTS.** Except for Products provided by Seller to Customer under the terms and provisions of this Agreement, title to the Managed Products will have passed to Customer pursuant to the terms and provisions of a separate agreement under which Customer originally obtained the Managed Products. Customer will bear the risk of loss, theft, destruction, or damage to the Managed Products (each, a "Loss"), and Customer will promptly provide written notice to Seller of any Loss that occurs. Customer, at its expense, will maintain insurance against Losses to the Managed Products for the full replacement value of the Managed Products. Upon Seller's request, Customer will provide Seller with evidence of this insurance.

5. **SOFTWARE LICENSE FOR MONITORING SOFTWARE INCLUDED IN MANAGED SERVICES.** Customer understands that Seller may license software from a third party to provide the Managed Services for which Customer may have access to certain functionality. Customer may use such software in accordance with the terms and conditions of any end user license agreement accompanying such software, whether the terms and conditions of the end user license be in "shrinkwrap," "clickwrap," or some other form.

6. **TERM AND TERMINATION RIGHTS OF MANAGED SERVICES.**

(a) **Managed Services Term.** Unless a different term is specified on the Solution Summary, or in the Statement of Work corresponding to such Solution Summary, Seller will provide the applicable Managed Services for a term ("Managed Services Term") of one (1) year.

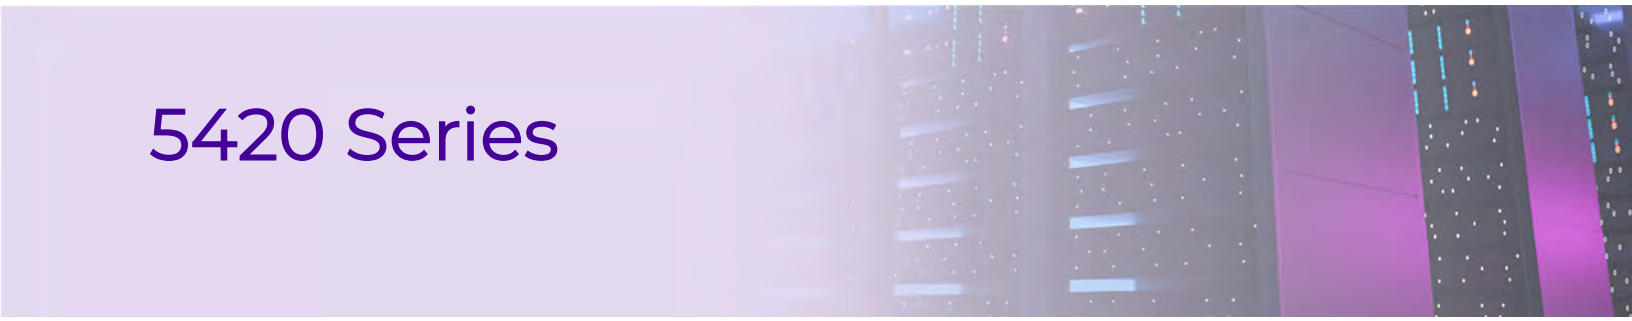
(b) **Termination Rights of Managed Services.**

1) **For Convenience.** Unless otherwise specified on the Solution Summary, or in the Statement of Work, Customer may terminate Managed Services, in whole or in part, upon providing Seller with thirty (30) days advance written notice; provided, however, that Customer shall be liable to Seller for the lesser amount due for Managed Services for (i) twelve (12) months; or (ii) the remainder of the Managed Services Term.

2) **For Cause.** Either Party may terminate the pertinent Managed Services included in a Solution Summary without liability to the other Party by providing written notice to such other Party if such other Party (a) fails to cure any material breach of the terms and provisions of the Agreement or the applicable Managed Services included in such Solution Summary within a thirty (30)-day period after it has received from the non-breaching Party a written notice that details the breach and requests that the breach be cured; or (b) becomes insolvent or insolvency proceedings are instituted against such other Party.

7. **MANAGED SERVICES WARRANTIES; DISCLAIMERS.**

(a) **Managed Services Warranty.** Seller represents and warrants to Customer that the Managed Services will be performed in a professional and workmanlike manner by qualified personnel and in accordance with the terms and provisions of the Agreement and the Solution Summary. If the Managed Services have not been so performed and if within thirty (30) days after the performance of the Managed Services Customer provides to Seller written notice of such non-compliance, then Seller, at its option, will re-perform the Managed Services, correct the deficiencies, or render a prorated refund based on the original charge for the deficient Managed Services. The warranty remedies expressly provided in this Section will be Customer's sole and exclusive remedies for breach of warranty claims only.

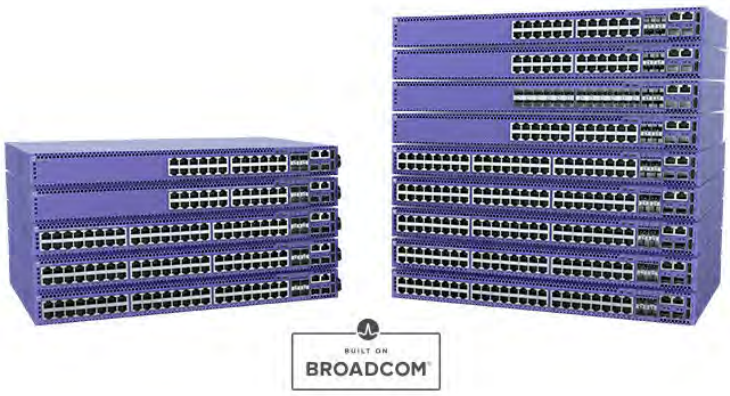


(b) EXCEPT AS REFERENCED AND LIMITED IN THIS ARTICLE III, SECTION 7 OF ATTACHMENT A, NEITHER SELLER NOR ITS LICENSORS OR SUPPLIERS MAKE ANY OTHER EXPRESS OR IMPLIED REPRESENTATIONS OR WARRANTIES WITH RESPECT TO THE MANAGED SERVICES. IN PARTICULAR, THERE IS NO WARRANTY THAT ALL SECURITY THREATS AND VULNERABILITIES WILL BE DETECTED OR THAT THE MANAGED SERVICES WILL RENDER ANY PRODUCT SAFE FROM SECURITY BREACHES. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, SELLER DISCLAIMS ALL OTHER EXPRESS, IMPLIED, AND STATUTORY WARRANTIES, INCLUDING, BUT NOT LIMITED TO, NON-INFRINGEMENT AND THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

Extreme networks

Data Sheet

5420 Series



Highlights

- Intuitive and centralized cloud-managed switching with ExtremeCloud™ IQ and ExtremeCloud IQ – Site Engine
- Fabric-enabled operations with Extreme Fabric Connect for simplified and secure network provisioning and automation
- Choice of operating system (OS) with universal dual-persona hardware

Key Hardware Features

- Fixed 24 and 48-port models with gigabit and multi-gigabit support
- 30W, 60W, and 90W PoE (Power over Ethernet) support for powering connected devices
- 4 x 1/10Gb SFP+ or 4 x 1/10/25Gb built-in uplink ports
- 80Gb per unit stacking of up to eight switches
- Secure link encryption with MACsec across both access and uplink ports
- Non-blocking wire speed design

Universal Edge Switch Platform

The 5420 Series is a family of high-performance, feature-rich, stackable edge switches designed for the next-generation digital enterprise. Available in 24 and 48-port models, the 5420 features both gigabit and multi-gigabit (1/2.5G) versions with up to 90W PoE enabling it to be deployed across a range of edge and wiring-closet environments. As a universal hardware platform, the 5420 also offers a user-selectable choice of Extreme's flagship switch operating systems for a uniquely flexible platform.

The 5420 Series consists of 5420M and 5420F families to address a variety of end-user needs and price points. 5420M models offer field-replaceable power supplies and fans as well as four 1/10/25Gb built-in uplink ports, while 5420F models offer fixed power supply (with support for a second field-replaceable power supply), fixed fans, and four 1/10Gb built-in uplink ports. All models provide 30/60/90W PoE capabilities making them an ideal wired back end for wireless APs or in support of Next Gen powered Ethernet devices, such as digital signage, pan-tilt-zoom cameras, smart lighting, or point-of-sale terminals.

Universal Hardware Platform

The 5420 comes with a dual-persona capability, allowing you to choose your OS. Either the Switch Engine (EXOS)[1] or Fabric Engine (VOSS)[2] OS can be selected at switch start-up or changed at a later stage. When selected, the switch assumes the features and capabilities of that OS.

5420 OS selection can also be automated with ExtremeCloud IQ so that the desired OS can be automatically loaded at switch start-up, facilitating remote OS enablement.

[1] Switch Engine is the new name for ExtremeXOS (EXOS) on all universal switch platforms, starting with Version 31.6.

[2] Fabric Engine is the new name for the VSP Operating System Software (VOSS) on all universal switch platforms, starting with Version 8.6.

Ethernet Fabric Services

The 5420 supports a variety of Ethernet Fabric services, including Extreme's Fabric Connect when running Fabric Engine and Extreme's IP Fabric when running Switch Engine. It also supports Fabric Attach for automated connection to either Layer 2 or Layer 3 Fabric services.

Extreme's Fabric Connect and IP Fabric enable the creation of virtualized networks that automate network operations, simplify network provisioning, and enhance security, all while reducing the strain on network and IT personnel.

Power over Ethernet (PoE)

All 5420 models support 30W, 60W, and 90W PoE that conforms with IEEE 802.3bt. This enables the 5420 to address the needs of powered edge devices, while eliminating the need for additional electrical cabling and circuits. In addition, 5420 PoE models support perpetual and fast PoE for even more efficient and reliable powered edge device operation

MACsec Link Encryption

IEEE 802.1AE MACsec* is supported on 5420 access and built-in uplink ports, enabling the encryption and decryption of packets between connected switches or devices. As a link-only encryption, 5420 switches can still apply services to the packet, such as policy or QoS, without compromising the security of packets across the link. With 128-bit and 256-bit Advanced Encryption Standard (AES) support, the 5420 provides the most secure link encryption.

* Supported on specific hardware revisions; please refer to the 5420 Hardware Installation Guide for details.

High-Performance Stacking

The 5420 Series supports high-speed stacking when running Switch Engine via its two built-in SFP-DD stacking ports. Up to eight switches can be stacked using qualified SFP+/SFP-DD direct attach cables and optical transceivers. Stacking is not supported when running Fabric Engine.

Audio Video Bridging

The 5420 Series supports IEEE 802.1 Audio Video Bridging (AVB) when running Switch Engine OS . This allows 5420 models to deliver reliable, real-time audio/ video transmission over Ethernet, meeting the quality of service required for today's high-definition, time-sensitive multimedia streams.

Cloud-Based Network Management

The 5420 can be managed by ExtremeCloud IQ and ExtremeCloud IQ Site Engine for centralized switch management, giving you a consolidated view of users, devices, and applications across wired and wireless networks for efficient inventory and network topology management. ExtremeCloud IQ enables zero touch provisioning, allowing you to quickly bring new 5420 switches online as well as select the OS persona.

Alternatively, 5420 on-box management can be done manually via a web-based GUI or generic command-line interface (CLI).

External Interfaces

Switch Model	Interfaces
5420F-24T-4XE	24 x 10/100/1000BASE-T ports • Full / Half-Duplex(autosensing) • MACsec-capable 4 x 1/10Gb SFP+ uplink ports(unpopulated) • MACsec-capable 2 x Stacking/SFP-DD ports* (unpopulated) 1 x Serial console port (RJ-45) 1 x 10/100/1000BASE-T out-of-band management port 2 x USB A ports for management or external USB flash 1 x USB Micro-B console port

* Notes on use of the 2 x Stacking/SFP-DD ports

1. With Switch Engine, the 2 x SFP-DD ports can used either for stacking or as Ethernet uplink ports (when not stacking).
2. With Fabric Engine, the 2 x SFP-DD ports can be used as Ethernet uplinks when in non-Fabric mode.
3. SFP-DD ports support either 10Gb or 20Gb data rates with the use of appropriate transceivers/cables.
4. When used as uplinks, 5420M models support up to 2 x 10Gb channels on each SFP-DD port
5. When used as uplinks, 5420F models support a single 10Gb channel on each SFP-DD port.

Ordering Notes

Customers ordering a 5420F Series switch receive the hardware switch along with Base software license, integrated power supply, fan modules and rack-mount kit. 5420M Series switch customers receive the same components, except for power supplies which are not included with the unit.

At least one Power Supply Unit (PSU) is required for 5420M operation. Additional power supplies (either for 5420For 5420M switches), transceiver/optics, power cords, as well as Premier and/or MACsec licenses must be ordered separately.

Base Software and Optional Premier License

The Base software included with each 5420 unit supports most available software features. Certain features, however, require a Premier License to operate.

For Switch Engine, a Premier License is required for:

5 or more OSPF interfaces

PIMDM/PIM SSM

Anycast RP (Rendezvous Point)

MultiSource Discovery Protocol (MSDP)

IS-IS/BGP4/MBGP*

GRE Tunneling

Ethernet VPN (EVPN)

For Fabric Engine, a Premier License is required for:

5 or more OSPF active interfaces

3 or more BGP Peers

Layer 3 Virtual Service Networks (L3 VSNs)

Part Number	Product Name	Description
5420F-24T-4XE	5420F 24-port Switch	5420 Universal Switch with 24 x 10/100/1000BASE-T Full / Half-Duplex ports, includes 4 x 1/10Gb SFP+ uplink ports,2 x Stacking/SFP-DD ports, 1 internal fixed PSU, one unpopulated PSU slot, fixed fan module, Base software license.
5420F-24P-4XE	5420F 24-port 30W PoE Switch	5420 Universal Switch with 24 x 10/100/1000BASE-T Full / Half-Duplex 802.3at 30W PoE ports, includes 4 x 1/10Gb SFP+ uplink ports, 2 x Stacking/SFP-DD ports, 1 internal fixed PSU, one unpopulated PSU slot, fixed fan module, Base software license.
5420F-24S-4XE	5420F 24-port SFP Switch	5420 Universal Switch with 24 x 100M/1Gb SFP ports, includes 4 x 1/10Gb SFP+ uplink ports, 2 x Stacking/SFP-DD ports, 1 internal fixed PSU, one unpopulated PSU slot, fixed fan module, Base software license.
5420F-48T-4XE	5420F 48-port Switch	5420 Universal Switch with 48 x 10/100/1000BASE-T Full / Half-Duplex ports, includes 4 x 1/10Gb SFP+ uplink ports,2 x Stacking/SFP-DD ports, 1 internal fixed PSU, one unpopulated PSU slot, fixed fan module, Base software license.
5420F-48P-4XE	5420F 48-port 30W PoE Switch	5420 Universal Switch with 48 x 10/100/1000BASE-T Full / Half-Duplex 802.3at 30W PoE ports, includes 4 x 1/10Gb SFP+ uplink ports, 2 x Stacking/SFP-DD ports, 1 internal fixed PSU, one unpopulated PSU slot, fixed fan module, Base software license

Part Number	Product Name	Description
5420F-48P-4XL	5420F 48-port 30W PoE Switch with LRM	5420 Universal Switch with 48 x 10/100/1000BASE-T Full / Half-Duplex 802.3at 30W PoE ports, includes 4 x 1/10Gb SFP+ LRM and uplink ports, 2 x Stacking/SFP-DD ports, 1 internal fixed PSU, one unpopulated PSU slot, fixed fan module, Base software license.
5420F-8W-16P-4XE	5420F 24-port Switch with 8 ports 90W and 16 ports 30W PoE	5420 Universal Switch with 8 x 10/100/1000BASE-T Full / Half-Duplex 802.3bt 90W PoE ports and 16 x10/100/1000BASE-T Full / Half-Duplex 802.3at 30W PoE ports, includes 4 x 1/10Gb SFP+ uplink ports, 2 x Stacking/SFP-DD ports, 1 internal fixed PSU, one unpopulated PSU slot, fixed fan module, Base software license.
5420F-16W-32P-4XE	5420F 48-port Switch with 16 ports 90W and 32 ports 30W PoE	5420 Universal Switch with 16 x 10/100/1000BASE-T Full / Half-Duplex 802.3bt 90W PoE ports and 32 x10/100/1000BASE-T Full / Half-Duplex 802.3at 30W PoE ports, includes 4 x 1/10Gb SFP+ uplink ports, 2 x Stacking/SFP-DD ports, 1 internal fixed PSU, one unpopulated PSU slot, fixed fan module, Base software license.
5420F-16MW-32P-4XE	5420F 48-port Switch with 16 ports 90W multi-rate and 32 ports 30W PoE	5420 Universal Switch with 16 x 100Mb/1Gb/2.5Gb 802.3bt 90W PoE ports plus 32 x 10/100/1000BASE-T Full / Half-Duplex 30W PoE ports, includes 4x 1/10Gb SFP+ uplink ports, 2 x Stacking/SFP-DD ports, 1 internal fixed PSU, one unpopulated PSU slot, fixed fan module, Base software license.
5420M-24T-4YE	5420M 24-port Switch	5420 Universal Switch with 24 x 10/100/1000BASE-T Full / Half-Duplex ports, includes 4 x 1/10/25Gb SFP28 uplink ports, 2 x Stacking/SFP-DD ports, two unpopulated PSU slots, modular fan module, Base software license.
5420M-24W-4YE	5420M 24-port 90W PoE Switch	5420 Universal Switch with 24 x 10/100/1000BASE-T 802.3bt 90W PoE Full / Half-Duplex ports, includes 4 x 1/10/25GbSFP28 uplink ports, 2 x Stacking/SFP-DD ports, two unpopulated PSU slots, modular fan module, Base software license.
5420M-48T-4YE	5420M 48-port Switch	5420 Universal Switch with 48 x 10/100/1000BASE-T Full / Half-Duplex ports, includes 4 x 1/10/25Gb SFP28 uplink ports, 2 x Stacking/SFP-DD ports, two unpopulated PSU slots, modular fan module, Base software license.
5420M-48W-4YE	5420M 48-port 90W PoE Switch	5420 Universal Switch with 48 x 10/100/1000BASE-T 802.3bt 90W PoE Full / Half-Duplex ports, includes 4 x 1/10/25GbSFP28 uplink ports, 2 x Stacking/SFP-DD ports, two unpopulated PSU slots, modular fan module, Base software license.
5420M-16MW-32P-4YE	5420M 48-port Switch with 16 ports 90W multi-rate and 32 ports PoE	5420 Universal Switch with 16 x 100Mb/1Gb/2.5Gb 802.3bt 90W PoE ports plus 32 x 10/100/1000BASE-T Full / Half-Duplex 30W PoE ports, includes 4 x 1/10/25Gb SFP28 uplink ports, 2 x Stacking/SFP-DD ports, two unpopulated PSU slots,modular fan module, Base software license.

Warranty

All 5420 Series models are covered under Extreme's Universal LLW policy. For warranty details, visit our Policies and Warranties page.

Optics/Transceivers

For a list of the optics and transceivers supported on the 5420 Series hardware, refer to our Extreme Optics Compatibility Tool.

Power Cords

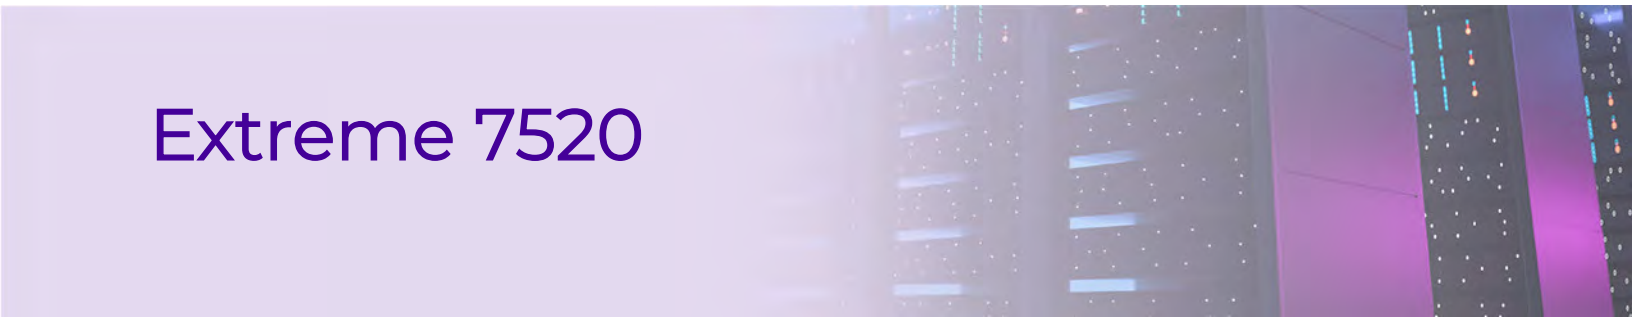
Power cords are not included with the 5420 in support of our green initiatives but can be ordered separately.

Maintenance Services

Extreme's maintenance and support services are provided 100% by in-house engineering experts. We have a rate of over 90% first-person resolution, ensuring efficient operation of your business-essential network.

With 24x7x365 phone support, advanced parts replacement, and on-site support, we augment your staff with expert resources to help you mitigate critical network issues fast. Visit our ExtremeWorks Maintenance Services for more information.

Certifications



For information on Industry, Security, and Government certifications for 5420 Series models, contact your Sales Representative.

Extreme networks

Data Sheet

Extreme 7520

Highlights

- High-performance, fixed-form switches for leaf, spine, aggregation, or core applications
- Universal dual-persona hardware allows user choice of switch operating systems
- ExtremeCloud™ IQ and ExtremeCloud IQ - Site Engine for powerful, secure and easy to use cloud-based network management.
- Fabric Connect for automated network operations, simplified network provisioning and enhanced security

Key Hardware Features

- Three models – two models with no MACsec and one model with MACsec in a fixed 1U form factor
- AC and DC power options
- Back-to-front and front-to-back airflow options
- Up to 8-unit stacking
- Integrated Application Hosting enables 3rd-party applications without impacting switch performance
- Non-blocking, wire-speed design

Universal Aggregation/Core Switch Platform

The Extreme 7520 are purpose-built 48-port 10Gb and 48-port 25Gb switches designed for high-performance aggregation and core applications. As a universal hardware platform, the 7520 provides end-to-end secure network segmentation, in addition to advanced policy capabilities, with a user-selectable choice of Extreme's flagship switch operating systems. This makes the 7520 a uniquely flexible platform that can be deployed in a variety of aggregation and core environments.

The Extreme 7520 network hardware platform enables organizations to design networks that accommodate a variety of applications and east-west traffic patterns. With its high-density scale-out architecture, leading power efficiency, and airflow options, the 7520 platform delivers a cost-effective solution that optimizes power, cooling, and equipment room space, wherever your network operating center might be.

Three models of the 7520 are available.

7520-48XT-6C

48 x 1Gb/10Gb 10GBaseT copper ports (no MACsec)
6 x 40Gb/100Gb QSFP28 fiber ports (no MACsec)

7520-48Y-8C

48 x 1Gb/10Gb/25Gb SFP28 fiber ports (no MACsec)
8 x 40Gb/100Gb QSFP28 fiber ports (no MACsec)

7520-48YE-8CE

48 x 10/25Gb SFP28 fiber ports with MACsec support
8 x 100Gb QSFP28 fiber ports with MACsec support
Note: This model does not support stacking

Universal Hardware Platform

The 7520 Series comes with a dual-persona capability allowing user choice of the switch operating system (OS). Either the Switch Engine (EXOS) or Fabric Engine (VOSS) persona can be enabled on 7520 hardware models. The desired persona can be selected at start-up or changed at a later stage. Once selected, the 7520 assumes the features/capabilities of the selected OS.

7520 persona activation can be done manually at boot-up, including via the system CLI. Or, it can be automated by pre-provisioning the 7520 persona in ExtremeCloud IQ. When first booted, the 7520 automatically connects to ExtremeCloud IQ to find its persona. The pre-provisioned OS persona is then remotely enabled on the 7520 system – eliminating the need for manual selection.

Ethernet Fabric Services

The 7520 supports a variety of Ethernet Fabric services, including Extreme's Fabric Connect when running Fabric Engine (VOSS) and Extreme's IP Fabric when running Switch Engine (EXOS). It also supports Fabric Attach for automated connection to either Layer 2 or Layer 3 fabric services. Extreme's Fabric Connect and IP Fabric on the 7520 enable the creation of virtualized networks that automate network operations, simplify network provisioning, and enhance security, all while reducing the strain on network and IT personnel.

High-Performance Stacking

Two of the 7520's QSFP28 uplink ports can be used for high-speed 400Gb stacking when running Switch Engine (EXOS). Up to eight systems can be stacked using qualified direct attach cables and/or optical transceivers. (Note: Stacking is not supported on the 7520-48YE -8CE model or when running Fabric Engine (VOSS)).

Management

The 7520 can be managed by ExtremeCloud IQ and ExtremeCloud IQ-Site Engine for comprehensive unified management with a consolidated view of users, devices and applications across wired and wireless networks.

Zero-touch provisioning from ExtremeCloud IQ lets one quickly bring new 7520 switches online as well as enable the selection of the operating system (OS) persona. Alternatively, 7520 on-box management can be done manually via a web-based GUI or generic CLI.

Switch Specifications

Model	7520-48Y-8C 7520-48YE-8CE	7520-48XT-6C
Ports	• 48 x 1/10/25GbE SFP28 ports (48Y/8C) • 48 x 10/25GbE SFP28 ports (48YE-8CE) • 8 x 40/100GbE QSFP28 ports • 1 x Serial console port RJ-45 • 1 x 10/100/1000BASE-T out-of-band management port • USB Type A storage port	• 48 x 1/10GbE 10GBaseT ports • 6 x 40/100GbE QSFP28 ports • 1 x Serial console port RJ-45 • 1 x 10/100/1000BASE-T out-of-band management port • USB Type A storage port
Power Supplies	• Modular 800W AC power supply (up to two PSUs) • Modular 800W DC power supply (up to two PSUs) • Front to Back and Back to Front airflow option	• Modular 800W AC power supply (up to two PSUs) • Modular 800W DC power supply (up to two PSUs) • Front to Back and Back to Front airflow options
Fan Modules	• 6 fan modules • Front-Back and Back-Front airflow options	• 6 fan modules • Front-Back and Back-Front airflow options
Dimensions	• 17.3in W/21.24in D/1.7in H (44.0cm/53.95cm/4.3cm) (48Y-8C) • 17.31in W/21.69in D/1.71in H (44.0cm/53.95cm/4.3cm) (48YE-8CE)	• 17.3in W/20.9in D/1.7in H (44.0cm/53.2cm/4.3cm)
Weight	• 16.71 lb (7.58 kg) empty chassis (48Y-8C) • 22.29 lb (10.11 kg) with two AC PSUs (-F and -R models) (48Y-8C) • 20.35 lb (9.23 kg) empty chassis (48YE-8CE) • 26.23 lb (11.90 kg) with two AC PSUs (-F and -R models) (48YE-8CE)	• 16.34 lb (7.41 kg) no PSU • 20.88 lb (9.47 kg) with two AC PSUs (-F and -R models)
Performance	• Line rate 4 Tbps Switching Capacity (2 Tbps ingress, 2 Tbps egress) • Typical Latency: 800 ns • Forwarding rate: 1000 Mpps	• Line rate 2.16 Tbps Switching Capacity (1.08 Tbps ingress, 1.08 Tbps egress) • Typical Latency: 2,400 ns • Forwarding rate: 1000 Mpps
CPU/Memory	• 8-core Processor • 16GB DDR4 ECC memory • 128GB SSD memory	• 8-core Processor • 16GB DDR4 ECC memory • 128GB SSD memory
Packet Buffers	32MB	32MB
Environmental Operating Conditions	AC/DC, one fan failed, front-to-back: • 0°C (32°F) to 50°C (122°F) at sea level; • 0°C (32°F) to 40°C (104°F) up to 3000 m (10,000 ft) AC/DC, one fan failed, back-to-front: • 0°C (32°F) to 45°C (113°F) at sea level; • 0°C (32°F) to 40°C (104°F) up to 3000 m (10,000 ft)	AC/DC, one fan failed, front-to-back: • 0°C (32°F) to 50°C (122°F) at sea level; • 0°C (32°F) to 40°C (104°F) up to 3000 m (10,000 ft) AC/DC, one fan failed, back-to-front: • 0°C (32°F) to 45°C (113°F) at sea level; • 0°C (32°F) to 40°C (104°F) up to 3000 m (10,000 ft)

Ordering Notes

Customers ordering an AC-bundled version of the 7520 Series switch receive the hardware switch along with a Base software license, integrated power supply, fan modules, and rack-mount kit.

Customers ordering a non-bundled version of the 7520 Series switch customers will only receive the hardware switch, Base software license, and rackmount kit. Customers in this case, must order Power Supply Units (PSU) and fan modules separately.

At least one Power Supply Unit (PSU) is required for 7520 operations. Additional power supplies, transceiver/optics, power cords, as well as Premier license, must be ordered separately.

Base Software and Optional Premier License

The Base software included with each 7520 unit supports most available software features. Certain features, however, require a Premier License to operate:

For Switch Engine, a Premier License is required for:

5 or more OSPF interfaces
PIM DM/PIM SSM
Anycast RP (Rendezvous Point)
MultiSource Discovery Protocol (MSDP)
IS-IS/BGP4/MBGP*
GRE Tunneling
Ethernet VPN (EVPN)

* Up to 2 BGP interfaces included in Base software

For Fabric Engine, a Premier License is required for :

Layer 3 Virtual Services Networks (VSNs)
Distributed Virtual Routing Controller
VXLAN Gateway
5 or more active OSPF interfaces
17 or more BGP peers
Insight Architecture/Integrated Application Hosting (IAH)

Power Supplies for Use with Your Switch

Each 7520 Series switch runs with two replaceable internal power supply modules that provide all of the power needed for the switch to operate. You can remove one power supply module without interrupting the switch's operation. Supported power supply configurations include two 800W AC power supply modules, two 800W DC power supply modules, or one 800W AC and one 800W DC power supply module. Power supply modules have integrated cooling fans that operate independently of the switch fans and are available with front-to-back or back-to-front airflow. The direction of the airflow in both power supply modules must be in the same direction and must also be in the same direction of the airflow in the fan modules.

Ordering Information

Part Number	Product Name	Description
7520-48XT-6C	7520-48XT Base System	Extreme 7520-48XT Switch - Ships with two empty power supply slots, six empty fan slots, one 4-post rack mount kit. Supports 48 x 1G/10G copper ports and 6 x 40G/100G fiber ports
7520-48XT-6C-AC-F	7520-48XT with front-to-back airflow	Extreme 7520-48XT Switch - Ships with two AC front-to-back airflow power supplies, six front- to-back airflow fans, one 4-post rack mount kit. Supports 48 x 1G/10G copper ports and 6 x 40G/100G fiber ports
7520-48XT-6C-AC-R	7520-48XT with back-to-front airflow	Extreme 7520-48XT Switch - Ships with two AC back-to-front airflow power supplies, six back- to-front airflow fans, one 4-post rack mount kit. Supports 48 x 1G/10G copper ports and 6 x 40G/100G fiber ports
7520-48Y-8C*	7520-48Y Base System	Extreme 7520-48Y Switch with two empty power supply slots, six empty fan slots, Ships with one 4-post rack mount kit. Supports 48 x 1G/10G/25G fiber ports and 8 x 40G/100G fiber ports
7520-48YE-8CE*	7520-48YE Base System	Extreme 7520-48YE Switch with two empty power supply slots, six empty fan slots, Ships with one 4-post rack mount kit. Supports 48 x 10G/25G fiber ports and 8 x 40G/100G fiber ports. Includes embedded MACsec capabilities.
7520-48Y-8C-AC-F*	7520-48Y with front- to-back airflow	Extreme 7520-48Y Switch - Ships with two AC front-to-back airflow power supplies, six front- to-back airflow fans, one 4-post rack mount kit. Supports 48 x 1G/10G/25G fiber ports and 8 x 40G/100G fiber ports
7520-48YE-8CE-AC-F*	7520-48YE with front-to-back airflow	Extreme 7520-48YE Switch - Ships with two AC front-to-back airflow power supplies, six front- to-back airflow fans, one 4-post rack mount kit. Supports 48 x 10G/25G fiber ports and 8 x 40G/100G fiber ports. Includes embedded MACsec capabilities.

Part Number	Product Name	Description
7520-48Y-8C-AC-R*	7520-48Y with back- to-front airflow	Extreme 7520-48Y Switch - Ships with two AC back-to-front airflow power supplies, six back- to-front airflow fans, one 4-post rack mount kit. Supports 48 x 1G/10G/25G fiber ports and 8 x 40G/100G fiber ports
7520-48YE-8CE-AC-R*	7520-48YE-8CE- AC-R with back-to- front airflow	Extreme 7520-48YE Switch - Ships with two AC back-to-front airflow power supplies, six back- to-front airflow fans, one 4-post rack mount kit. Supports 48 x 10G/25G fiber ports and 8 x 40G/100G fiber ports. Includes embedded MACsec capabilities.

* When running Fabric Engine on the 7520, 2 of the 7520 uplink ports are blocked in support of Ethernet Fabric Connect (SPB) functionality.

Accessories

Part Number	Product Name	Description
XN-ACPWR-800W-F	800W AC PSU (Front-to-Back)	AC800W PSU, Front to Back Airflow for use in 7520, 7720

XN-FAN-001-R	Fan Module (Back-to-Front)	Single fan module Back to Front Airflow (also used in X695, VSP 7400, SLX 9150, SLX 9250, 7720, 8520, and 8720)
XN-2P-RKMT299	Two-post rack mount kit	Two-post rack mount kit for 7520 and 7720 switches
XN-4P-RKMT298	Four-post rack mount kit	Four-post rack mount kit for 7520-48Y, 7520-48XT, and 7720 switches
XN-4P-RKMT302	Four-post rack mount kit	Four-post rack mount kit for 7520-48YE switches

Software Licenses

Part Number	Product Name	Description
7000-PRMR-LIC-P	Premier License for 7000 Series	Perpetual Premier License for Extreme 7000 series (Includes Integrated Application Hosting)
7000-MACSEC-LIC-P	MACsec License for 7000 Series	Perpetual MACsec License for Extreme 7000 series

Warranty

All 7520 Series models are covered under Extreme's Universal LLW policy. For warranty details, visit: http://www.extremenetworks.com/support/policies

Maintenance Services

Extreme's maintenance and support services with 100% in-sourced engineering experts and over 90% first-person resolution ensure efficient operation of your business-essential network. 24x7x365 phone support, advanced parts replacement, and on-site support augment your staff with experienced resources that help you mitigate critical network issues fast. Visit our ExtremeWorks Maintenance Services page for more information.

Optics/Transceivers

For a list of the optics/transceivers supported on the 7520 Series, refer to our Extreme Optics Compatibility Tool.

Power Cords

In support of Extreme Networks green initiatives, power cords are not included with the 7520 but can be ordered separately. They should be specified at time of ordering.

Letter of Transmittal

Cleburne Independent School District
505 N. Ridgeway Drive Suite 100
Cleburne, Tx 76033-5118

Ms. Voight,

Cleburne Independent School District (Cleburne ISD) is seeking a qualified vendor to provide E-Rate eligible equipment. United Data Technologies, Inc. (UDT), a leading provider of E-Rate eligible technology solutions to K12 schools and libraries, is pleased to present this response for Category 2 Infrastructure Equipment Request for Bids.

As a proven technology partner to educational institutions nationwide, UDT is repeatedly recognized by our clients, industry colleagues, and communities served for our commitment to excellent service, innovation, and best-in-class IT solutions. While we appreciate the accolades, we take greatest pride in the long-term relationships we have forged with our valued clients, which include a majority of America's largest school districts.

Serving 7 of the 10 largest K12 school districts in the nation

Indeed, beyond our consistent record of delivering effective education technology solutions, the long-term relationships we enjoy are part of the reason UDT continues to rank annually within the top 20 (and recently, top ten) as a national E-Rate provider.

Further evidence of the UDT leadership, the following are some of the reasons our clients cited when asked why they continue to choose UDT as their trusted E-Rate Service Provider:

UDT's Category 2 Rankings

#19	#17	#7	#8
2020	2021	2022	2023

Now expanding into Category 1 solutions.

With over a decade of experience delivering full-coverage technology and IT solutions to K12 districts around the nation, we at UDT pride ourselves on providing professionalism, ethics, reliability, accuracy,

discernment, and comprehension of the E-Rate procurement and program process—and we hope to serve you, too.
If you have any questions concerning this RFP response , the following people are authorized to represent UDT related to this response:

UDT is committed to the success of Cleburne ISD, and we look forward to supporting you. Thank you for your consideration.

Respectively Submitted,

Karrie Henderson
VP of Sales- SLG, HED, & Commercial

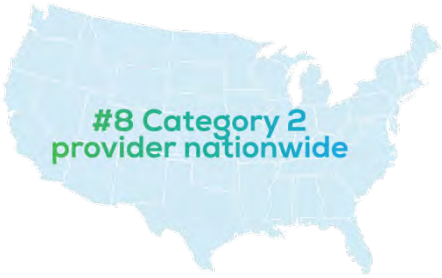
About Us

UDT has received national and regional recognition including from Inc. 500, CRN's Top 150, and the South Florida Business Journal as one of the 50 fastest-growing private companies in South Florida. UDT's continued emphasis on delivering end-to-end technology solutions and a customer-centric service model have enabled UDT to become the largest privately held technology company with a Florida headquarters.

Since 1995, UDT has helped K12 and Higher Ed institutions, State & Local governments, and commercial enterprises achieve their top education, technology, and business objectives through custom, scalable IT solutions in Managed Services, Lifecycle Management, Cybersecurity, Data Center, and Cloud.

When the FCC established its E-Rate program in 1996, only 14% of the United States' K12 classrooms had access to the Internet. Today, 67% of school districts across the country now meet the bandwidth target of 1 Mbps per student. Of course, 23.5 million students still lack the improved Internet access they need.

As a seasoned, national provider of education technology solutions to hundreds of clients (including 7 of the 10 largest school districts in the nation), UDT is working hard to close the gap in connectivity coverage. We've been doing this for a long time, so we understand the financial, procurement, logistical, technical, operational, and governance challenges and compliance requirements of effectively deploying technology to K12 school districts.



That's why—in addition to delivering industry-leading technology products—UDT offers a complete line of professional and managed services in support of end-to-end lifecycle management, including innovative managed IT, cybersecurity, and fleet management solutions designed expressly for sustainable education technology deployments.

Why UDT for E-Rate?

You want the E-Rate process to be easy—and UDT knows E-Rate. Enjoy a stress-free process and secure funding around your unique needs with our dedicated team of E-Rate experts. We help our clients maximize the value of the E-Rate program not just for obtaining hardware, but as a catalyst for transforming their educational landscape.

Beyond financial aid, the E-Rate program provides the means to create digital learning environments that foster academic growth, innovation, and community engagement if optimized effectively and in alignment with your specific technology stack and strategy.

As a seasoned, one-stop provider for all your E-Rate needs, UDT can ensure that optimization, assisting you with securing the maximum funding and allocating it effectively. We support your eligible equipment with the services required to keep it functioning without disruption and at its best, also advising you on solutions to further strengthen your IT ecosystem so you can focus on what matters most—your teachers and students.

A prime example of the broader benefits offered by the E-Rate Program is Managed Internal Broadband Services (MIBS), a specialization of UDT's and a currently underutilized area for E-Rate applicants.

- Different from Basic Maintenance of Internal Connections (BMIC) which covers the repair and upkeep of eligible internal connections with specific requirements for support.

- MIBS encompasses the services (like Managed Wi-Fi) provided by a third party for the operation, management, and monitoring of eligible broadband internal connections components including cabling, data networking equipment, firewalls, and caching devices, for example.

MIBS empowers schools and libraries to manage and maintain reliable networks that facilitate efficient communication, collaborative learning, and resource-sharing, directly driving educational outcomes.

MIBS can be purchased with or without equipment on the E-Rate application; of course, benefiting from MIBS requires eligible organizations to know how to factor it into their Form 470 when applying for E-Rate.

E-Rate provides schools and libraries with the opportunity to gain access to reliable, high-speed connectivity and maintain and manage it effectively. When utilized appropriately and with the right partner, it can empower institutions to create seamless digital experiences. UDT's capabilities, expertise, and approach make us uniquely equipped to help organizations like yours navigate the nuances of the E-Rate program and optimize your use of funding around specific digital learning and connectivity priorities.

UDT E-Rate Experience

UDT has been an E-Rate provider for over 20 years and has served over 100 school districts nationwide. Below are a few of the districts that we have provided E-Rate Services for:

UDT Recently Awarded E-RATE Funding Request Totals by Year	
Funding Year	471 Award Amount
2020	$18,207,226.18
2021	$25,142,068.93
2022	$65,705,067.68
Grand Total	$109,054,362.79

The UDTHub: Your Custom Dashboard

To aid in quoting and purchasing products for this effort, UDT will provide Cleburne ISD with a user-friendly, state-of-the-art electronic ordering system, available through our online UDTHub (*Figure 1*). The site will be tailored to your needs and will include a custom landing page showing your assigned team, as well as your specific products and pricing.

Our sites are among the best in the industry for rich product content including images, technical specifications, long descriptions, brochures, and related products. All users identified by the district will be able to log in to the site directly and create quotes as needed. Orders can also be placed online or via punch-out. Your users can browse the online catalog showing rich content descriptions and photos with complete technical specifications. The site is available 24/7.

- Create and save carts to generate a UDT quote number. Allow users to search for all quotes created either by UDT ASR or an end user within the online 'Activity' section.
- Create and print quotes directly from the UDTXchange online storefront (*Figure 2*; see *Figure 3* for a sample quote).
- Quick turnaround: if quotes are requested from the Account Support representative, they will be turned around within four to eight hours. For large projects and/or special configurations, quotes may take up to 48 to 72 hours depending on manufacturer response times.

UDT quote templates include a product image (when available), part number, description, list price, percentage of list, unique quote number, date of quote, and contact information for the sales representative who generated the quote. The storefront will provide details on product availability.

Pricing – UDT Quote

Please see UDT quotes in the following pages.

Tariff Statement

The prices and delivery times quoted in this response are based and reflect current international trade taxes, duties, tariffs, and fees ("Tariffs") required by a government or taxing authority. Any future changes to Tariffs may have a direct impact on the price and/or delivery time of a UDT product and/or service and, in the event that there are changes to existing Tariffs, or new Tariffs are implemented, after UDT's submission of this RFP, UDT reserves the right to adjust our prices or delivery times accordingly to reflect these changes. Any such adjustments will be communicated promptly and will be based on the actual impact of the new or modified tariffs

Statement of Work

Please see Statement of Word (SOW) in the next page

Statement of Work

ERATE RFP CLEBURNE

PREPARED FOR: CLEBURNE ISD

Agreement AGR-00013919-1.0

UDT Confidential - Copyright UDT, Inc. 2025 All Rights Reserved

UDT Confidential - *Copyright UDT, Inc. 2025 All Rights Reserved*

This Statement of Work ("SOW"), effective as of 1/16/2025, by and between **United Data Technologies, Inc. ("UDT")** with its registered office address at 2900 Monarch Lakes Blvd, Ste. 300, Miramar, FL 33027 and **Cleburne ISD ("Client")** with its registered office address at 505 N. Ridgeway Suite 100 Cleburne, TX 76033-5118 United States (each a "Party" and together the "Parties").

WORKING WITH UDT

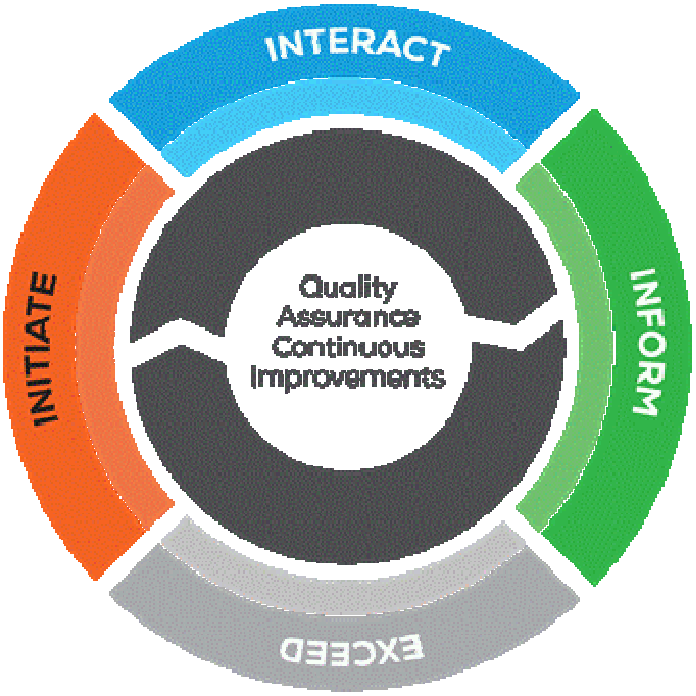
OBJECTIVE

- To document the responsibilities of all parties taking part in the Agreement.
- To define the services to be delivered by UDT and the level of service that can be expected by the Client.
- To ensure that UDT achieves a high quality of service for end users with the full support of the Client.
- To define the commencement of the Agreement, its initial term, and the provision for renewals.

WORKING WITH UDT

UDT is a privately-owned minority business headquartered in Miramar, Florida, with thirteen locations across five states. We focus on delivering advanced technical solutions to small, mid-market, and enterprise Clients. UDT is recognized as an industry-leader in the technology solutions arena.

Founded in 1995, UDT quickly established its reputation as the technological resource of choice for its clients. Our organization subscribes to a Total Solutions Approach that includes traditional Consulting, Design, and Engineering Services; as well as a unique approach to Managing Infrastructure, Security, Cloud, and Device Lifecycles for our Clients.



UDT Confidential - *Copyright UDT, Inc. 2025 All Rights Reserved*

PROJECT MANAGEMENT

UDT follows our proven "i3e project management framework" and focuses efforts on providing an exceptional customer experience.

UDT capabilities run the full gamut, from providing on-demand and remote project management for lighter touch projects; to on-site, full-time project managers for complete lifecycle management. Our project management professionals leverage years of experience and knowhow to bring successful outcomes to our customers.

AGILE FRAMEWORK

AGILE FRAMEWORK

UDT helps customers address complex adaptive problems, achieve high productivity, and ensure quality results using the SCRUM approach.

- SCRUM Kick-Offs
- Sprint Planning
- Managing Product Backlog
- Sprint Backlog
- Daily Stand-Ups / Increments
- Sprint Review
- Sprint Retrospective

CERTIFICATION

UDT staffs in-house Project Coordinators, Project Managers, SCRUM Masters and SCRUM Product Owners - specializing in:

- Infrastructure
- Cloud
- Risk Management
- Advanced Application Development

The team holds the following industry certifications:

- Project Management Professional (PMP)
- Certified Scrum Master (CSM)
- Certified Scrum Product Owner (CSPO)
- ITIL v3
- Six Sigma Green Belt (SSGB)
- Project +

UDT Confidential - *Copyright UDT, Inc. 2025 All Rights Reserved*

PROJECT OVERVIEW

UDT is pleased to participate in Cleburne ISD's E-Rate RFP #250008635 to enhance the district's network infrastructure. We will provide and deploy Juniper networking equipment, including (2) EX4650 switches, (822) AP47 access points, (4) EX4400-48T switches, and (25) EX4100-48MP switches, all integrated with Juniper MIST for network management.
Our scope includes mounting access points, racking and stacking switches, and configuring them using existing campus configurations provided by Cleburne ISD's Technology Department. The setup will maintain current VLAN and ACL structures for network consistency.
Additionally, UDT will install, terminate, label, and test 649 new Cat 6A cables per the RFP-provided diagram. After installation, we will perform testing to validate connectivity and ensure optimal performance.
UDT is committed to delivering a high-quality, scalable network solution, leveraging Juniper technology to enhance performance, simplify management, and future-proof the district's infrastructure.

TECHNOLOGIES

The following items will be implemented as part of this project:

Qty	Model	Description
2	Juniper EX4650	Switches
822	Juniper AP47	Indoor APs
62	Juniper AP 63	Outdoor APs
4	Juniper EX4400-48T	Switches
25	Juniper EX4100	Mgig Switches

UDT Confidential - *Copyright UDT, Inc. 2025 All Rights Reserved*

PROJECT PHASES

This project will consist of the following phases:

- Kickoff Phase
- Planning Phase
- Staging Phase
- Implementation Phase
- Closeout Phase

KICKOFF

In order to introduce the appropriate stakeholders from CLEBURNE and **UDT**, a project kickoff meeting will be held. The purpose of the kickoff meeting is to formally notify all team members, clients, and stakeholders that the project has begun and make sure everyone has a common understanding of the project goals. The content of this SOW will be reviewed to ensure that there is a clear understanding between **UDT** and CLEBURNE as it relates to roles and responsibilities for this project.

UDT Responsibilities:

- Create Project Portal in Connectwise.
- Understand Project Prerequisites & Risks.
- Conduct project Kickoff meeting with the CLEBURNE project team.
- Clearly Review Defined Roles, Responsibilities, Prerequisites, Risks, and PM Tools.
- Establish Communication Plan.
- Communicate High Level Timeline.

CLEBURNE Responsibilities:

- Participate in the project kickoff meeting.
- Provide relevant diagrams and documentation on existing Architecture.

Required Resources:

- **UDT** Project Manager.
- **UDT** Lead Engineer.
- CLEBURNE Project Sponsor.
- CLEBURNE Project Lead.
- Other CLEBURNE Technical Representative(s).

Deliverables:

- Project Plan and Timeline

UDT Confidential - *Copyright UDT, Inc. 2025 All Rights Reserved*

PLANNING

The purpose of the planning phase is to allow the lead engineer and project manager from **UDT** to fully understand the CLEBURNE technical and business requirements for this project. **UDT** will conduct a Design Workshop with CLEBURNE IT staff to obtain all the information required to configure, test, and implement the solution. The Design Workshop will also allow CLEBURNE IT staff to give their input on the design.

UDT will create a Design Document that will detail all aspects of the installation. **UDT** will also create a rollout schedule and detailed runbooks for each cutover. Runbooks will detail, step-by-step, the procedure to be followed during each rollout, the actions to be taken if problems arise, and a risk assessment. These runbooks will be strictly followed, and any deviation will require approval from the **UDT** and CLEBURNE Project Managers.

UDT Responsibilities:

- Hold Design Workshop with CLEBURNE staff.
- Create Design Document.
- Present Design Document to CLEBURNE for approval.
- Create project runbooks for each cutover.
- Create Post-Implementation Test Plan.

CLEBURNE Responsibilities:

- Sign off on the Design Document and device configurations.
- Participate in project runbook and rollout schedule review.

Required Resources:

- **UDT** lead engineer.
- **UDT** Project Manager.
- CLEBURNE project lead.
- CLEBURNE technical representative(s).

Deliverables:

- Design Document - to be signed by CLEBURNE before rollout begins.
- Project Runbooks.
- Rollout Schedule.

UDT Confidential - *Copyright UDT, Inc. 2025 All Rights Reserved*

STAGING

During the staging phase, **UDT** will pre-configure and test the new equipment that has been purchased as part of this project. If there is any Dead-on-Arrival (DOA) equipment or if any equipment fails during the staging period, **UDT** will obtain Return Merchandise Authorization (RMA) for the equipment and secure a replacement from the manufacturer.

UDT Responsibilities:

- Inspect all Juniper equipment to ensure accuracy and functionality.
- Pre-configure switches and access points based on provided campus configurations.
- Label and organize all equipment for streamlined deployment.
- Conduct initial software updates and firmware upgrades.
- Perform bench testing to validate device performance before installation.
- Prepare documentation and configuration backups for implementation.

CLEBURNE Responsibilities:

- Provide secure staging area for **UDT** to un-box, pre-configure and test equipment.
- Provide Asset Tags if required.
- Document Asset Tag assignment in appropriate the CLEBURNE database.
- Provide & validate existing network configuration

Required Resources:

- **UDT** lead engineer.
- CLEBURNE project lead.
- CLEBURNE technical representative(s).

Deliverables:

- IOS revision report and options.

UDT Confidential - *Copyright UDT, Inc. 2025 All Rights Reserved*

IMPLEMENTATION

During the Implementation phase, **UDT** will move the solution into production. Cutover windows will be scheduled by CLEBURNE and **UDT** will provide post-cutover support after each maintenance window to troubleshoot any anomalies. At the end of each window, **UDT** will perform a series of system functionality tests as identified in the Post-cutover Test Plan to determine success. If these system functionality tests fail and cannot be resolved before the maintenance window expires, **UDT** will rollback changes to the last known good state.

UDT Responsibilities:

- Deploy and install all pre-configured switches and access points at designated locations.
- Mount and secure access points as per the provided network design.
- Rack and stack network switches in appropriate networking closets.
- Connect and integrate new devices into the existing network infrastructure.
- Implement network configuration based on existing configurations provided by CLEBURNE ISD.
- Install, terminate, label, and test 649 new Cat 6A cabling drops as per the provided diagram.
- Conduct post-installation testing to ensure connectivity and performance.
- Troubleshoot and resolve any deployment issues.

CLEBURNE Responsibilities:

- Handle all internal change control processes and approvals.
- Schedule Cutover windows in a timely manner.
- Validate Switch & AP Placement
- Sign off on a successful test scenario(s).

Required Resources:

- **UDT** lead engineer.
- Other **UDT** resources required to accommodate deployment schedule.
- CLEBURNE project lead.
- CLEBURNE technical representative(s).

Deliverables:

- Post cutover test results (to be signed by CLEBURNE).

UDT Confidential - *Copyright UDT, Inc. 2025 All Rights Reserved*

CLOSEOUT

Once all project phases have been completed, the **UDT** project manager will pull together the appropriate resources from CLEBURNE and **UDT** to conduct a closeout meeting. The purpose of this meeting is to review the project with CLEBURNE. In addition, this will provide CLEBURNE the opportunity to raise any open issues that need to be addressed either as part of this SOW, a change order, or as a new SOW.

UDT Responsibilities:

- Conduct Project Closeout meeting.
- Address Any Outstanding Issues/Tasks.
- Conduct Lessons Learned Workshop.
- Obtain Client Acceptance.
- Distribute Customer Satisfaction Survey.
- Close Project Portal and Archive Documents.

CLEBURNE Responsibilities:

- Attend Lessons Learned Workshop.
- Attend Closeout Meeting.
- Provide Feedback.

Required Resources:

- **UDT** Project Manager.
- **UDT** Lead Engineer.
- CLEBURNE Project Sponsor.
- CLEBURNE Project Lead.
- Other the CLEBURNE Technical Representative(s).

Deliverables:

- Last milestone sign-off sheet.

UDT Confidential - *Copyright UDT, Inc. 2025 All Rights Reserved*

CLIENT RESPONSIBILITIES

- Participate in the project kickoff meeting.
- Provide relevant diagrams and documentation on existing Architecture.
- Sign off on the Design Document and device configurations.
- Participate in project runbook and rollout schedule review.
- Provide secure staging area for **UDT** to un-box, pre-configure and test equipment.
- Provide Asset Tags if required.
- Document Asset Tag assignment in appropriate database.
- Identify change windows for deployment.
- Handle all internal change control processes and approvals.
- Sign off on a successful test scenario(s).
- Provide office area for on-site engineer to work.
- Attend knowledge transfer and lessons learned meetings.
- Attend Closeout Meeting.
- Provide Feedback.

OUT OF SCOPE

UDT is responsible only for performing the Services described in this SOW. Services outside the scope of this SOW include but are not limited to:

- Additional required tasks discovered after the execution of this SOW that are not mentioned in this SOW will require a change order.
- Defective equipment provided by Client utilized for this solution that require **UDT** additional hours of troubleshooting will require a change order.
- Troubleshooting issues due to Client's configuration changes after milestone signoff will require a change order.
- No redesign or restructuring of the existing network architecture.
- No configuration or troubleshooting of any equipment not included in this RFP.
- No post-implementation technical support beyond manufacturer-provided support unless explicitly purchased.
- No additional cabling beyond the 649 new Cat 6A drops specified in the RFP.
- Any modifications or changes to the defined scope of work will require a formal change order and additional cost approval.

GENERAL ASSUMPTIONS

UDT made the assumptions that follow in the preparation of the cost, resource estimates and schedule reflected in this SOW. Any changes to the assumptions may result in changes to **UDT** pricing and/or Project schedule.

UDT Confidential - *Copyright UDT, Inc. 2025 All Rights Reserved*

- **UDT** will be provided all required physical access to the Clients' facilities (identification badge, escort, parking decal, etc.) as required by the Client's policies.
- Some of the Services provided may be performed during the night shift and weekends. Client will provide the required access to systems and resources.
- Client is responsible for all transport of equipment from receiving area(s) to the data center(s) and/or equipment rooms where it will be installed.
- Client is responsible for the condition and readiness of the electrical power distribution plant and the correction of any anomalies and/or deficiencies.
- Client is responsible for providing all patch cables (copper and fiber optic) unless specifically indicated in the bill of materials.
- Client is responsible for providing adequate rack space, power, environmental controls, data wiring, engineering/staging workspace and any other access required for completion of this project.
- Some activities on this project may be performed on **UDT's** premises.
- **UDT** may engage subcontractors and third parties in performing a portion of this work.
- **UDT** will not make changes to the configuration of any network equipment after it has been installed and tested.
- Client's technical resources will be made available to the **UDT** project team for planning purposes and to answer questions about the existing environment.
- Client's staff resources will participate in the acceptance and ready for use (RFU) testing associated with this solution and sign off on those tests upon successful completion.
- Client will provide **UDT** admin access on appropriate devices for the success of this project.

UDT Confidential - *Copyright UDT, Inc. 2025 All Rights Reserved*

PROJECT DELAYS

Any delays caused by site non-readiness that could require return visits and additional time are subject to billing. Examples:

- Power Issues.
- Cabling Delays.
- Personnel Availability.
- Delays in Receiving Required Client Provided Documentation.

PROJECT SCHEDULE

Below is the Project Schedule and high-level timeline.

Milestone	Timeline
Kickoff	1 Day
Implementation	TBD 20+Days
Closeout	1 Day

The above Project Schedule is dependent upon CLEBURNE carrying out the responsibilities defined in this SOW. Delays to the Project Schedule may require a Change Order.

CHANGE REQUEST PROCESS

If the Parties wish to change or modify an existing Statement of Work, they shall execute a written statement that references the specific Statement of Work by date, purchase order number, or other identifier, and describes the requested changes using the form set forth in Exhibit A (a "Change Order"). No changes to a SOW shall become effective until both Parties have mutually agreed upon and executed the Change Order Form. When charges are necessary to analyze a change, **UDT** will provide a written estimate and begin the analysis on written authorization from Client. The terms of a mutually agreed upon Change Request will prevail over those of this SOW or any previous Change Request Form.

UDT Confidential - *Copyright UDT, Inc. 2025 All Rights Reserved*

BILLING SCHEDULE AND PAYMENT TERMS

Pricing is effective for the 60 days following 1/16/2025

FIXED PRICE SERVICES

These services will be delivered on a fixed price basis regardless of the actual number of engineers or hours reasonably required to complete the work.

Milestone Name	Price
Network Implementation	$689,341.11
Total	**$689,341.11**

SIGNATURES

This SOW may be executed by the Parties in counterparts which together shall constitute one and the same SOW among the Parties. A facsimile and/or electronic signature shall constitute an original signature for all intent and purposes.

THE PARTIES HERETO HAVE CAUSED THIS SOW TO BE EXECUTED BY THEIR RESPECTIVE DULY AUTHORIZED REPRESENTATIVES AS OF THE EFFECTIVE DATE HEREOF.

By signing below, each party acknowledges that it has read and understood the terms of this SOW and agrees to be bound by these terms.

Cleburne ISD	UNITED DATA TECHNOLOGIES, INC.

TERMINATION

This Statement of Work "SOW" may be terminated by either Party if the other Party breaches any of its material obligations under this SOW and fails to cure such breach within thirty (30) days after receipt of written notice of such breach. The termination of this Agreement will not affect Client's obligation to make payments as a result of events that occurred prior to termination. To the extent that the Services include the hosting, maintaining or otherwise managing of any Client data where Client does not otherwise have the ability to download a copy of such Client data, UDT shall provide Client with a copy of such Client data within thirty (30) days after the effective date of termination in a standard, electronic format to be mutually agreed upon by the parties. UDT has no obligation to retain, and reserves the right to dispose of, all Client data after such time period.

MANUFACTURER PRODUCT DEFECTS

UDT is neither a manufacturer of hardware nor a publisher of computer software. Because of this, UDT cannot be held responsible for a functionality or performance defects of any products associated with this engagement. Manufacturer warranties, where extended by the manufacturer, for products sold or otherwise provided by or licensed through UDT (or UDT product partners) are set forth in the end user license agreements and manufacturer warranty statements, and such warranties, if any, are solely those of the manufacturer. UDT will take reasonable measures to work, on behalf of the engagement, with vendors to escalate problems and take corrective action, based on the vendor's recommendations. Any delays caused by support calls due to manufacturer defects that will require additional time are subject to billing.

EMPLOYEE NON-SOLICITATION

During the term of the Agreement and for a period of twelve (12) months thereafter, neither Party will solicit for employment any employee or contractor of the other who was directly involved in the provision or receipt of the Services. A general advertisement or a request for employment initiated exclusively by the employee is not considered a solicitation. In the event either Party violates this provision and subsequently retains an employee of the other, the Party in breach will pay to the other, as liquidated damages and not as a penalty, an amount equal to twelve (12) month's base salary at the rate provided to that employee by the Party in breach of this provision.

NOTICES

Legal notices shall be sent via electronic mail and First-Class Mail to the individuals named in the SOW, and copied to:

To UDT:
United Data Technologies, Inc.
2900 Monarch Lakes Blvd. Ste 300, Miramar, FL 33027

To Client:
Cleburne ISD
505 N. Ridgeway Suite 100 Cleburne, TX 76033-5118 United States

Non-legal notices in the ordinary course of business; e.g., notice to postpone a shipment, shall be sent via electronic mail to the Designated Representative of the other Party or to such other designee as may be

UDT Confidential - *Copyright UDT, Inc. 2025 All Rights Reserved*

set forth herein. Notices shall be effective as of the day sent via email, or if that day is not a Business Day or the first Business Day that follows the day sent.

WARRANTY

UDT warrants that the Services will be performed diligently by qualified personnel and will be of the kind and quality described in the Statement of Work. In performing its obligations, UDT may give advice to Client based on information supplied to UDT by Client or third parties who have expertise or knowledge not held by UDT with regard to Services or products necessary for UDT to complete Services, but not originating or endorsed by UDT. UDT will be entitled to rely on that information without assuming responsibility for decisions made by Client based on that advice. Products provided to Client under a Statement of Work that are neither manufactured nor designed by UDT will carry the warranty provided by the manufacturer, if any, and UDT makes no independent warranty with respect to those Products. UDT specifically disclaims any and all warranties and liability related to any Third Party Technology and Hardware. Client's exclusive remedy for breach of this warranty is the correction of defective Services by UDT. UDT will take reasonable measures to work, on behalf of the engagement, with vendors to escalate problems and take corrective action, based on the vendor's recommendations. Any delays caused by support calls due to manufacturer defects that will require additional time are subject to billing.

SUPPORT AND SECURITY

Unless otherwise expressly provided in this SOW, UDT is not responsible for any information stored or transferred via the Services, for backing up or maintaining copies of any data (including, without limitation, Client data, or for the removal or disposal of any confidential, proprietary, or personal information. Unless otherwise expressly provided in this SOW, UDT is not responsible for managing Client's network environment. UDT shall not attempt to access Client's secure network(s) or other information systems without Client's prior consent, either via its personnel performing Services onsite, or remotely. To the extent reasonably required for the provision of the Services, Client hereby grants UDT the right to use Client Data subject to this SOW.

For the term of this SOW, UDT shall implement and maintain any applicable access security protocols set forth in this SOW. Notwithstanding the foregoing, Client acknowledges that (i) neither those protocols nor any security software guarantees the security of Client's network, (ii) Client is responsible for all other aspects of security, including without limitation, correctly configured security policies, selection of hardware and software (including network security tools), correct installation, configuration, and maintenance of the hardware and software, the interoperability of the various components of Client's network, and a physically and electronically secure operating environment and (iii) Client is responsible for any claims, damages, costs, expenses, losses or the like resulting from the failure or breach of such access security protocols, unless such claims, damages, costs, expenses, losses or the like resulting from the failure or breach of such access security protocols were caused by UDT's gross negligence or intentional misconduct.

LIMITATION OF LIABILITY

TO THE FULLEST EXTENT POSSIBLE UNDER APPLICABLE LAW, NEITHER PARTY (NOR ITS EMPLOYEES, AGENTS, SUPPLIERS OR AFFILIATES) SHALL BE LIABLE TO THE OTHER FOR ANY INDIRECT, SPECIAL, INCIDENTAL, PUNITIVE, OR CONSEQUENTIAL LOSS OR DAMAGE OF ANY KIND, INCLUDING WITHOUT LIMITATION ARISING IN CONNECTION WITH THE STATEMENT OF WORK, HOWEVER CAUSED AND ON ANY

UDT Confidential - *Copyright UDT, Inc. 2025 All Rights Reserved*

THEORY OF LIABILITY, EVEN IF THE PARTY HAS BEEN ADVISED OR SHOULD BE AWARE OF THE POSSIBILITY OF SUCH DAMAGES. IN NO EVENT WILL UDT (OR ITS EMPLOYEES, AGENTS, SUPPLIERS OR AFFILIATES) BE LIABLE FOR ANY LOST PROFITS, REVENUE, SALES, SAVINGS, OR VALUE AS WELL AS LOSS OF DATA OR INABILITY TO ACCESS DATA.

EXCEPT FOR CLAIMS ARISING FROM A PARTY'S BREACH OF ITS CONFIDENTIALITY OBLIGATIONS OR BREACH OF UDT'S INTELLECTUAL PROPERTY RIGHTS UNDER THIS SOW, EACH PARTY'S ENTIRE LIABILITY ARISING OUT OF OR RELATED TO THIS SOW SHALL BE LIMITED TO THE AMOUNT OF SERVICE FEES PAID OR PAYABLE UNDER THE SOW WHERE THE CLAIM AROSE IN THE SIX (6) MONTH PERIOD PRIOR TO THE DATE OF THE CLAIM. THE PARTIES AGREE TO HOLD EACH OTHER HARMLESS FOR ANY INJURIES TO PERSONS OR PROPERTY CAUSED BY THE INTENTIONAL AND WILLFUL ACTS OR GROSS NEGLIGENCE OF EACH PARTY IN THE PERFORMANCE OF SERVICES IN THIS SOW. NOTHING HEREIN SHALL PREVENT EITHER PARTY FROM OBTAINING INJUNCTIVE RELIEF.

INDEMNIFICATION

Each Party will defend the other, and each of their respective directors, officers, agents, and employees against any unaffiliated third party claim based on that Party's gross negligence or intentional misconduct, and indemnify each of them from the resulting losses, damages, and costs and expenses (including reasonable attorney fees) finally awarded to the third party by a court of competent jurisdiction or pursuant to a settlement agreement. The indemnifying party may settle, at its sole expense, any claim for which it is responsible under this Section. The indemnifying party shall control the defense and/or settlement of any claim covered by this subsection, provided that the indemnified party reserves the right to employ counsel at its own expense and participate in the defense. Client will defend UDT, and each of its respective directors, officers, agents, and employees (collectively, the "UDT Indemnitee"), against any unaffiliated third party claim arising out of, resulting from or otherwise in connection with any security breach of Client's network and any failure or breach of the access security protocols set forth in this SOW, and indemnify the UDT Indemnitee from all resulting damages provided that UDT shall promptly notify Client in writing of the claim, provide Client sole control over the defense and/or settlement of such claim with Client's choice of counsel, and at Client's request and expense, provide full information and reasonable assistance to Client with respect to such claim. Notwithstanding the prior sentence, (a) UDT's failure to give prompt notice of the claim shall not relieve Client of its obligations under this Section except to the extent such failure prejudices Client's defense of the matter and (b) Client shall not be obligated to defend or be liable in any manner under this Section to the extent any such unaffiliated third party claim arises out of UDT's gross negligence or intentional misconduct.

INSURANCE

At all times during the terms of this SOW, UDT shall procure and maintain, at its sole cost and expense, at least the following types and amounts of insurance coverage:

1. Commercial General Liability with limits no less than $1,000,000 per occurrence and $2,000,000 in the aggregate including bodily injury and property damage and products and completed operations and advertising liability, which policy will include contractual liability coverage insuring the activities of UDT under this SOW;
2. Worker's Compensation with limits no less than the minimum amount required by applicable law; and
3. Errors and Omissions/Professional Liability with limits no less than $1,000,000 per

UDT Confidential - *Copyright UDT, Inc. 2025 All Rights Reserved*

occurrence and $2,000,000 in the aggregate.

Upon the written request of client, UDT shall provide Client with copies of the certificates of insurance for all insurance coverage required under this Section.

CONFIDENTIALITY

The following information is "Confidential Information": (i) as to both parties, the terms of this SOW, and all information exchanged by the parties during negotiations culminating in this SOW and during the Term of this SOW, any information related to a Party's performance of, or failure to perform, this SOW, and any information that is marked or designated as "Confidential" or with like notice; (ii) as to the Party disclosing the information, any information related to that Party's assets, liabilities, financial results, financing plans, business strategies, product development plans, operations, source code, technology, know-how, trade secrets, clients, vendors, contractors, personnel, and all other information that a reasonable person would understand to be confidential; and (iii) as to Client, data center locations, data center designs (including non-graphic information observed at Client's data center), Client data but excluding in all cases any information which is independently developed by the other Party as shown by such Party's written business records, or information that becomes generally available to the public other than through breach of this SOW, or violation of law or other agreement. Each Party agrees not to disclose the other Party's Confidential Information to any third party except to its agents and representatives who need to know the information to represent or advise it with respect to the subject matter of this SOW and who are bound by written non-disclosure obligations at least as stringent as those stated in this SOW; provided, however, that a Party will not be liable for disclosure of the other Party's Confidential Information if it is required by law or regulation to be disclosed and the disclosing party gives advance written notice of the disclosure to the other Party at the earliest possible time, or the Party discloses the information as part of a bona fide legal proceeding to enforce its rights under this SOW. Each Party agrees to use at least a reasonable degree of care to protect the other Party's Confidential Information. Each Party agrees not to use the other Party's Confidential Information except in connection with the performance of its obligations or exercise of its rights under this SOW. Each Party shall return or destroy the other Party's Confidential Information on completion of the Services, or earlier on request of the other Party, provided that a Party may retain the other Party's Confidential Information in backup medium where return or deletion is not commercially reasonable, or otherwise as required by law. On request of a Party, an officer of the other Party shall certify its compliance with the preceding sentence.

TRADEMARKS AND INTELLECTUAL PROPERTY

Neither Party may use the other Party's name, logo, trade or service marks, or similar indicia (each a "Trademark") without the other Party's prior written consent. Any authorized use shall be subject to the Trademark owner's mark usages guidelines provided to the other or published on its website. All right, title, and interest in the intellectual property (including all copyrights, patents, trademarks, trade secrets, and trade dress) embodied in the Services, Technology and Hardware, as well as the methods by which the Services is performed and the processes that make up the Services, shall belong solely and exclusively to UDT or the applicable suppliers or licensors, and Client shall have no rights whatsoever in any of the above, except as expressly granted in this SOW. The Services are protected pursuant to intellectual property laws and treaties. Client may not modify, remove, delete, augment, add to, publish, transmit, adapt, translate, participate in the transfer or sale of, create derivative works from, or in any way exploit any of the Services, in whole or in part.

OWNERSHIP AND LICENSES

UDT Confidential - *Copyright UDT, Inc. 2025 All Rights Reserved*

Upon UDT's receipt of payment in full with regard to a particular Deliverable, Client shall own all right, title and interest in and to such Deliverable, including any derivative or modification rights to the Deliverable, excluding any Technology embedded within such Deliverable. A Deliverable is deemed to be a "Work Made for Hire" as set forth in the United States Copyright Act of 1976 or if for any reason held not to be a work made for hire, UDT hereby assigns all of its right, title, and interest in such Deliverable to Client.

To the extent that any UDT Technology is intangible and embedded within any of the Deliverables, UDT hereby grants Client a royalty-free, fully paid-up, worldwide, perpetual, irrevocable, nonexclusive, non-transferable license to use such UDT Technology solely in connection with the Deliverables; provided, however, that the UDT Technology is still subject to any use restrictions specified in this SOW and UDT may revoke any use of the UDT Technology, which is outside the license grant as set forth herein. UDT has the right and title to grant all such licenses necessary for Client to own and/or use the Deliverables as set forth herein.

The UDT Technology is personal property of UDT, and the Third Party Technology is personal property of the Third Party Technology provider. No title, equity, ownership or right (including any license right) in or to the UDT Technology or the Third Party Technology in whole or in part shall pass to Client except as otherwise expressly provided by this SOW. Client agrees that it may not pass any right or interest in the UDT Technology or Third Party Technology to any third party and Client shall ensure it takes all necessary steps to protect UDT's and the applicable Third Party Technology providers' rights under this SOW such that neither the UDT Technology nor the Third Party Technology can be construed as a fixture nor shall it become a fixture on the Premises or any other location.

RELATIONSHIP OF THE PARTIES

Each Party is an independent contractor of the other and nothing in this SOW shall be construed to create an association, trust, partnership, joint venture, or agency relationship between the Parties. Although the Parties may refer to each other colloquially as "partners" they do not intend to create a partnership, and neither Party has any fiduciary duty, obligation, or liability to the other or any obligation to share profits and losses. Neither Party will have any rights, power, or authority to act or create an obligation, express or implied, on behalf of another Party except as expressly specified in this SOW.

ASSIGNMENT

Client may not assign this SOW without UDT's prior written consent, not to be unreasonably withheld. Any attempted assignment in violation of the preceding sentence shall be void. This SOW shall inure to the benefit of the Parties permitted successors and assigns. UDT has the right to assign, subcontract, or delegate in whole or in part this SOW, or any rights, duties, obligations or liabilities under this SOW, by operation of law or otherwise.

NON-WAIVER

The failure to exercise or delay in exercising a right or remedy under this SOW shall not constitute a waiver of the right or remedy or a waiver of any other or subsequent right or remedy. Specifically, but without limitation, Client's payment of fees is not a waiver of any claims for breach of this SOW.

FORCE MAJEURE

UDT will not be liable for any failure of performance hereunder due to causes beyond its reasonable control, including, but not limited to, acts of God, pandemics, epidemics, environmental conditions at

UDT Confidential - *Copyright UDT, Inc. 2025 All Rights Reserved*

Premises, suppliers, fire, vandalism, cable cut, power outage, Client's third party contractors, non-performance of Third Party Technology providers specified by Client, storm or other similar occurrences; any law, order, regulation, action or request of any government, including state and local governments having jurisdiction over either of the parties, or of any instrumentality thereof, or of any civil or military authority; wars; or strikes or other labor difficulties.

CONTROLLING LAW, VENUE, AND COSTS OF SUITS

With respect to disputes which may arise as a result of this SOW in the US, the laws of the State of Florida (exclusive of its choice of law principles) govern this SOW and the Parties agree to submit to the exclusive jurisdiction of, and venue in, the courts in the State of Florida, Broward County, in any dispute arising out of or relating to this SOW. If any action is brought to enforce this SOW, the prevailing party shall be entitled to collect its reasonable attorney fees and costs of suit. This choice of jurisdiction does not prevent either party from seeking injunctive relief with respect to a violation of intellectual property rights or confidentiality obligations in any appropriate jurisdiction. The U.N. Convention on the International Sale of Goods shall not apply to this SOW.

ENTIRE AGREEMENT

This SOW is the complete and exclusive agreement between the Parties regarding its subject matter and supersedes and replaces any prior or contemporaneous agreement or understanding, written or oral.

Technical Specifications – Datasheets

Juniper Mist and E-Rate

Maximize your E-Rate project with AI-Native Network digital learning

For K-12 education, the digital transformation is critically dependent on scalable, secure, reliable broadband connections. Unfortunately, weak, complex, and difficult to manage networks threaten this transition. For students and educators experiencing dropped or poor connections, digital learning and online assessments can suffer, causing learning outcomes to not be met. For many district network administrators, overly complex workflows and tools that focus primarily on network health rather than the end-user experience make troubleshooting and resolving these access issues exceedingly difficult.

AI-Native Digital Learning-Ready Networks from Juniper

Thankfully, districts no longer need to compromise nor invest valuable school district and E-Rate funds in networks built on outdated architectures. Unique to the industry, the Juniper AI-Native Platform addresses and greatly enhances E-Rate infrastructure projects with a modern, scalable, secure, and reliable network built with an integrated solution stack from Juniper. By empowering IT team members with proactive operations, the solution automatically identifies and fixes wired/wireless/device problems using machine learning. E-Rate applicants can now benefit from Juniper's:

- Proven and trusted enterprise-class, automated, and self-forming switch fabrics
- Mist wireless LAN solution, the first cloud-based WLAN that leverages AI and machine learning to make Wi-Fi predictable, reliable, and measurable to ensure a great digital learning experience
- Reduced complexity, simplifying network operational and management workflow for the IT staff

Whether your district is planning an E-Rate Category One project that requires upgrading network equipment to boost broadband connection capacity, or an E-Rate Category Two project to modernize your data distribution, wireless data distribution, and data protection infrastructure, Juniper has the right E-Rate-eligible solutions to fulfill the needs of institutions ranging from single-school campuses to large school districts. Juniper E-Rate-eligible solutions are also easy on the applicant's budget, offering lower estimated five-year TCO than the leading competitive brand.

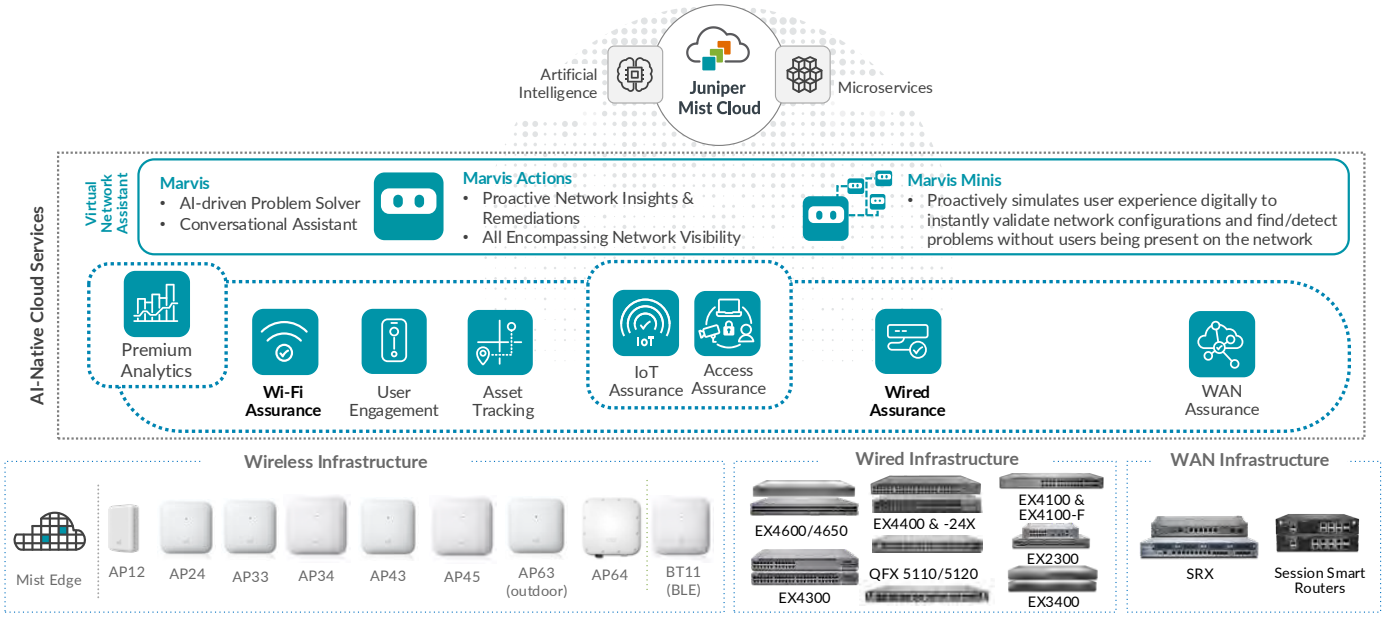

Figure 1: The Juniper Mist™ digital learning network solution

Network Switches

Juniper Networks® EX Series Switches: Designed for the converged school district campus and data center to address demands for high availability, unified communications, and virtualization, EX Series switches are cloud-ready, and they offer high-performance, scalable, fixed-configuration 1GbE, and multigigabit platforms. The fixed configuration 10GbE aggregation switches are ideal for high-density campus deployments, and the modular core switches are optimized for high-density, mission-critical applications. With the EX Series, wired access networks don't have to be complex and difficult to manage. Network administrators can easily onboard, configure, and manage the switches and operate campus fabrics at scale with Juniper Mist Cloud. When the EX Series is combined with the Juniper Wi-Fi portfolio for a unified wired and wireless solution, driven by Mist AI, school districts gain simple and secure connectivity at scale. Juniper solutions reduce network complexities while addressing scalability by managing multiple devices as one. School districts can design end-to-end campus fabric architectures using Virtual Chassis technology or open, standards-based Ethernet VPN–Virtual Extensible LAN (EVPN-VXLAN) to avoid costly rip-and-replace upgrades.

Juniper Networks QFX Series Switches: QFX Series Switches, ideally suited for district traffic aggregation points and data centers, improve the efficiency of district fiber networks by aggregating traffic for WAN and Internet access transport. The QFX5100 line of Switches consists of scalable Layer 2/Layer 3 switches that are optimized for application delivery and contain a powerful feature set for virtualized data centers. The QFX10000 line of Switches offers a highly scalable, high-density network foundation for supporting today's most demanding data center and cloud environments, including midsize to large data centers, private clouds, and public clouds.

Junos® Operating System: All Juniper switches, security platforms, and routers run Junos OS—the networking operating system that defines carrier-grade. With best-in-class protocol support, Junos OS offers the most flexible and capable CLI, including automation capabilities, open programmability for automation, and extensive libraries for Ansible, Python, Ruby, PowerShell, and others. Every Juniper device with Junos OS includes configuration management. For example, the district's network administrator can work on the switching infrastructure during the school day, writing configurations and testing, then when ready, "commit" the changes to the devices. This can even be done safely during the day since the device will not accept an incorrectly formed configuration. Junos OS can automatically recover in the event of a fat-fingered IP address or similar human error. With other network operating systems, such errors would result in significant downtime and be difficult to diagnose and resolve, often requiring a device reboot. Each Juniper device holds up to 50 previous configurations and the district gets a full audit trail of changes made for easy comparison and for rollback to a previous configuration if needed for resolving problems quickly.

Wireless Access Points

Juniper Series of High-Performance Access Points: Designed for the demands of digital learning, Juniper makes Wi-Fi predictable, reliable, and measurable by providing unprecedented visibility into the user experience. Wi-Fi, Bluetooth Low Energy (BLE), and IoT are merged with our enterprise-grade access points. They work in conjunction with the Juniper Mist Cloud architecture and Mist AI so school districts can easily customize Wi-Fi service levels, easily provide guest services, quickly identify compliant and noncompliant devices for assessment readiness, replace frustrating, time-consuming manual IT tasks with proactive automation, gain insights through detailed analytics, and leverage location-based services to support functions such as contact tracing and locating valuable assets.

Juniper Mist AI and Cloud Services

Mist AI and Cloud Family of Services: District network administrators save time and money with faster problem resolution and fewer onsite campus visits. Educators, students, and staff benefit from a network infrastructure that is more predictable, reliable, and measurable. Mist AI uses a combination of artificial intelligence, machine learning, and data science techniques to optimize user experiences and simplify operations across the wireless access, wired access, and SD-WAN domains. Key capabilities include automated event correlation, root cause identification, Self-Driving Network™ operations, network assurance, and proactive anomaly detection.

Additionally available are:

- **Marvis Virtual Network Assistant**, the first virtual network assistant purpose-built with Mist AI for enterprise WLANs, LANs, and WANs. It fundamentally transforms network operations from reactive troubleshooting to proactive remediation through self-driving actions.
- **Juniper Mist Access Assurance** cloud service delivers zero-trust, identity-based network access control in a flexible yet simple policy framework for onboarding guest, IoT, BYOD, and corporate devices.
- **Juniper Mist Premium Analytics**, **User Engagement**, **Asset Visibility**, and **IoT Assurance**

Routers

Juniper Networks MX Series Universal Routing Platforms: The Juniper portfolio of high-performance, software-centric physical and virtual routers delivers all of the performance, features, and functionality school district applications need, including private WAN for multisite connectivity through a private backbone; data center interconnect for connecting multiple data centers for disaster recovery; geo clustering and virtualization; and Internet edge to act as the school district's Internet gateway.

Security

Juniper Networks SRX Series Firewalls: SRX Series Firewalls[1] are rightsized for multiple district applications. These next-generation firewalls[1] reduce risk of attack and safeguard users, applications, and devices through identity-based policies, microsegmentation, VPN connectivity, and validated threat prevention. SRX Series Firewalls also help districts achieve compliance certification for the Children's Internet Protection Act (CIPA) and the Family Educational Rights and Privacy Act (FERPA).

Maintenance

Juniper Care Services: This comprehensive and flexible portfolio of support services delivers mission-critical support for Juniper hardware and software products around the clock, 365 days a year. Tailored offerings help keep your network running reliably, reduce network risk, decrease operational costs, and protect network investment.

[1] Firewall services and firewall components are E-Rate eligible. Security services beyond basic stateful firewall such as UTM, intrusion prevention system (IPS), application security, and advanced threat prevention (ATP) are not considered E-Rate eligible.

"Wired Assurance and Wi-Fi Assurance are compelling. Having wired and wireless all in one dashboard makes it easier for our support technicians because they have a single place to find and troubleshoot a problem..." Ashland School District - **Steve Mitzel**, Director of IT	*"We chose Mist because of the visibility into the user experience. Before Mist, our network engineers were always chasing ghosts in the wireless. Now, Mist provides visibility so we can see what the issue is. Mist is tremendous for troubleshooting."* COPPELL ISD - **Stephen McGilvray**, Executive Director of Technology
"Wireless needs to be like the lights, always on and always perfect. That's how our Mist Wi-Fi is. The Marvis Actions dashboard has even diagnosed issues for us with our LAN where a VLAN tag configuration was missing from one of our core switches. We are excited about how AI is transforming our IT operations and student experiences." Wadsworth City Schools - **Phil Luthman**, Director of Technology	*It used to take hours or days tracing data and doing manual packet captures to fix wireless issues. Now solving client issues takes just minutes with Mist. In addition, with a single glance I can see exactly what level of service we are delivering to every student, teacher, administrator, and guest. We really value this new level of visibility into the user experience.* NORTH CANTON CITY SCHOOLS - **John Fano**, System Admin at NCCS

Simplify Your E-Rate Project

Several special E-Rate offerings from Juniper are now available to applicants to build their E-Rate network infrastructure project. These special offerings represent many of the most popular solutions adopted by K-12 customers. All these offers are E-Rate eligible with the wired and wireless offerings summarized below with the exception where the offerings tabulated on Tables 2, 3, and 4, which include Marvis Virtual Network Assistant. These offerings are partially, but mostly, eligible. E-Rate eligibility factors for these SKUs can be obtained from the Juniper Networks Products and Services E-Rate Eligibility guide https://www.juniper.net/content/dam/www/assets/faqs/us/en/products-and-services-e-rate-eligibility.pdf.

Offering	E-Rate Product Type	See Table

Table 1 Notes: For the switches listed in Table 1, to continue the same support level after year three, Juniper Care Next-Day Delivery Service is available for purchase which is partially E-Rate eligible under Category 2 Basic Maintenance of Internal Connections (BMIC). Alternately, Juniper Care Core is available, which is 100% E-Rate eligible under BMIC. Enhanced Limited Lifetime Warranty (ELLW) terms are detailed at **www.juniper.net/support/warranty/990240.pdf**.

Juniper EX Wired Assurance/VNA Switch Bundles

Table 2 provides a list of available part numbers for the EX-Series Wired Assurance/VNA Switches. When ordered, these switch bundles provides a corresponding EX Series Ethernet base switch hardware, support, and Wired Assurance and Marvis VNA Mist cloud service subscription. They are available in three- or five-year terms.

Juniper EX E-Rate Flex Term Licenses

Table 3 provides a list of available Juniper EX E-Rate Flex Term Licenses. They provide a common, simple, and flexible licensing model for separately ordered EX Series switches, enabling the selection of features based on the needs of the applicant's network. When ordered for a corresponding Juniper EX switch base system hardware, Juniper EX E-Rate Flex Term Licenses includes the combination of the following 3 capabilities:

1. Standard, Advanced, or Premium tiered Junos OS features.
2. A single Juniper Mist service (Wired Assurance) or two Juniper Mist Services (Wired Assurance + Marvis Virtual Network Assistant (VNA)) options.
3. CORE, Next Day or Same Day support options.

These switch licenses are offered as a one-, three-, five-, or seven-year-year term and are switch class based, determined by the number of access ports on the switch. Class 1 (C1) switches have 12 ports, Class 2 (C2) switches have 24 Ports, and Class 3 (C3) switches have 32 or 48 Ports. Seven-year term licenses are only applicable to EX4100, EX4400, and EX4650 Series switches.

Table 4 Notes: Wi-Fi Assurance is E-Rate eligible under internal connections. Marvis Virtual Network Assistant is not E-Rate eligible under internal connections. Mist Wireless Gigabit and Multigigabit Wi-Fi Access Point with Support and Cloud Subscription includes the Wi-Fi access point hardware, cloud subscription license, 24x7 technical support, unlimited access to all new cloud features and product documentation, and is available in 1-year, 3-year, or 5-year license terms. AP33, AP43, AP43E, AP45, AP63, and AP63E support dynamic virtual Bluetooth® LE (vBLE) antenna array. AP12, AP24, AP32, AP32E, AP34, and AP64 support 2.4GHz BLE with Omni Antenna. For use cases requiring 7-year terms, separately quote the access point hardware and SUB-1S-7Y-E or SUB-2S-7Y-E subscription.

Summary

Improving student achievement and outcomes while equipping students with 21st century skills is key to the education industry's digital transformation. The digital curriculum is driving unprecedented demand for bandwidth and connecting soaring numbers of learning devices. With Juniper E-Rate-eligible offerings, schools and libraries now have attractive options for delivering an extraordinary learning experience to students while creating cutting-edge connected classrooms for educators and staff, deploying reliable networks that offer more scalability, better security, less complexity, and lower TCO.

Next Steps

Contact your Juniper Networks representative or Juniper Networks partner to learn how we can help your school, school district, or library improve your broadband connections for digital learning, protect your network investments, and provide an attractive option for your E-Rate infrastructure project. Send your inquiries by e-mail to **erate@juniper.net** or visit the Juniper E-Rate Resource Center at **www.juniper.net/e-rate** to learn more.

About Juniper Networks

Juniper Networks believes that connectivity is not the same as experiencing a great connection. Juniper's AI-Native Networking Platform is built from the ground up to leverage AI to deliver exceptional, highly secure, and sustainable user experiences from the edge to the data center and cloud. Additional information can be found at **juniper.net** or connect with Juniper on **X** (formerly Twitter), **LinkedIn**, and **Facebook**.

Product Overview

The Juniper AP47 is Juniper's flagship Wi-Fi 7 access point with built-in advanced location services and Juniper Mist integration.

AP47 benefits
- Maximizes 6 GHz band, providing increased channel width and enabling multigigabit speeds
- Tri-band with dedicated fourth radio for supporting growing mobility demands
- Patented vBLE technology delivers industry-leading indoor location services accuracy and ease of use

Juniper Mist benefits
- Fast and reliable deployment and ease of ongoing management
- Centralized control and visibility
- Quick access to new features and functionality with no disruption to services
- Agility to scale as network needs grow

AP47 ACCESS POINT DATASHEET

Product description

The Juniper® AP47 indoor Wi-Fi 7 access point (AP) delivers multigigabit speeds, enhanced security, and more resilient Wi-Fi and IoT connectivity for demanding enterprise environments. Designed as a tri-band device with a dedicated fourth scanning radio, the AP47 offers increased capacity and wider channels with less interference. It provides unparalleled support for growing mobility demands and digital transformation while ensuring exceptional user experiences.

Combining enterprise-grade Wi-Fi with patented virtual BLE (vBLE) technology, the AP47 further enhances wireless networks through support for personalized location services, including user engagement, asset visibility, and contact tracing. The unique engineering of the AP47 eliminates the need for battery-powered BLE beacons or manual calibration. By providing one-to-three-meter accuracy, the AP47 sets a new standard in location services while ensuring business continuity and operational efficiency.

While wired and wireless networks are business critical, without the right architecture they can be harder to operate given the sheer number of mobile and IoT devices—not to mention the extensive variety of hardware, operating systems, and applications currently in use. Traditional architectures—highly manual and network-centric—lack the scale, flexibility, and end-to-end visibility required to support modern mobility requirements and the IT departments that manage them.

Juniper AI-Native Network

Juniper Mist brings true innovation to wireless networking with the world's first AI-Native wireless LAN (WLAN). The Juniper AI-Native Networking Platform makes Wi-Fi predictable, reliable, and measurable, offering unprecedented visibility into the user experience through unique service-level expectation (SLE) metrics.

Proactive, AI-driven automation and a self-healing network replace time- consuming manual tasks, lowering Wi-Fi operational costs and saving substantial time and money. All operations are managed using the open and programmable microservices that are based on the Juniper Mist Cloud architecture.

The Juniper Mist Cloud architecture

The Juniper Mist cloud-native, AI-driven microservices architecture delivers unparalleled agility, scale, and resiliency to your network. It lowers OpEx and delivers unprecedented insights into network performance, behaviors, traffic patterns, and potential trouble spots by using data science to analyze large amounts of rich metadata collected by the Juniper access points. Juniper AI solutions for Wi-Fi optimize operator and user experiences with secure client-to-cloud automation, insight, and AI-driven actions. With Juniper's AI-Native Networking Platform, purpose-built to leverage AIOps, the AP47 harnesses the faster speed, power, and performance of Wi-Fi 7 and assures an excellent experience for all users and devices and the best end-to-end operator experiences.

Juniper access point family

The real-time microservices in Juniper Mist Cloud manage the Juniper access point (AP) family.

Services available for the Juniper AP47

Wi-Fi cloud services

Juniper Mist Wi-Fi Assurance

For IT and NOC teams

- Predictable and measurable Wi-Fi
- Service-Level Expectations (SLEs) support
- WxLAN policy fabric for role-based access
- Customizable guest Wi-Fi portal
- Radio Resource Management (RRM), driven by AI

Marvis™ Virtual Network Assistant

For IT helpdesk teams

- AI-powered virtual network assistant
- Natural language processing interface
- Anomaly detection
- Client SLE visibility and enforcement
- Data science-driven root-cause analysis

Bluetooth cloud services

Juniper Mist Mobile Engagement

For digital experience teams

- Accurate (1-3m) turn-by-turn navigation
- Sensor fusion with dead reckoning
- Unsupervised machine learning
- Virtual beacons with custom notifications
- Mobile SDK for iOS and Android

Juniper Mist Asset Visibility

For process and resource improvement teams

- Identification of assets by name and location visibility
- Zonal/Room accuracy for third-party tags
- Historical analytics for asset tags
- Telemetry for asset tags (temperature, motion, and other data)
- APIs for viewing assets and analytics

Analytics cloud services

Juniper Mist Premium Analytics

For network teams

- Baseline analytics features come included with Wi-Fi Assurance, User Engagement, and Asset Visibility subscriptions
- End-to-end network visibility
- Orchestrated networking and application performance queries
- Simplified network transparency

For business teams

- Baseline analytics features come included with Wi-Fi Assurance, User Engagement, and Asset Visibility subscriptions
- Customer segmentation and reporting based on visitor telemetry
- Customized1 Dwell and third-party reporting for traffic and trend analysis
- Correlation of customer-guest traffic and trend analysis
- Correlated customer-guest traffic and trend analysis

Access Point Features

High-Performance Wi-Fi

The AP47 Series is a four-radio, 802.11be Wi-Fi 7 access point. Three four-spatial stream data serving radios with maximum data rates of 11528 Mbps in the 6 GHz band, 5764 Mbps in the 5 GHz band, and 1376 Mbps in the 2.4 GHz band. A dedicated fourth tri-band scanning radio providing WIDS/WIPS, spectrum analysis, sensor and location analytics. With 802.11be Multi-Link Operation (MLO), Orthogonal Frequency Division Multiple Access (OFDMA), Multi-User Multiple Input Multiple Output (MU-MIMO), and BSS Coloring technologies, the AP47 Series offers performance at unprecedented levels to support new bandwidth-hungry applications and soaring device densities.

Wi-Fi 7 Amendment

The new 802.11be amendment (Wi-Fi 7) expands the capabilities of Wi-Fi 6E, including the use of up to 1200 MHz of the 6 GHz band for higher throughput and improved application performance. New capabilities include 320 MHz channels which provides double the throughput, Multi-Link Operation (MLO) for more efficient load balancing and failover, Multi-Resource Units (Multi-RU), preamble puncturing, and 4K QAM for higher transmission rates and better user experiences. Only Wi-Fi 7 and 6E client devices can use the 6 GHz band so there is no interference due to IoT or legacy devices.

AP Redundancy

Automation in Juniper Mist helps simplify the validation of AP placements and AP-switch uplinks for highly-redundant coverage in mission-critical deployments. In addition, the AP47 provides high availability with two 10 Gbps Ethernet ports for seamless failover for both data and power. The dual ports provide business continuity for mission-critical applications.

AI for AX

Juniper automates and optimizes Wi-Fi 7 features with AI for AX capabilities to optimize BSS Coloring, improve data transmission scheduling within OFDMA and MU-MIMO, and assign clients to the best radio to boost the overall performance of the network.

Improved IoT Operations

The AP47 Series extends network monitoring and insights to vBLE, Thread*, Zigbee*, or Matter* to increase IoT capabilities with dual 802.15.4 radios for concurrent location services and electronic shelf labels (ESL). Ultra-wideband (UWB) ready.

*future

Greater Spectral Efficiency

OFDMA improves spectral efficiency so that an increasing density of devices can be supported on the network. Density has become an issue with the rapid growth of IoT devices that often utilize smaller data packets than mobile devices and, hence, increase the burden and contention on the network. Additionally, BSS Coloring improves the coexistence of overlapping BSSs and allows spatial reuse within a given channel by reducing packet collisions.

Automatic RF Optimization

Reliable RF optimization is even more critical with the addition of 6GHz spectrum. Radio Resource Management uses a dedicated sensor radio to automate dynamic channel and power assignments, thus avoiding Wi-Fi and external sources of interference. The AI engine continuously monitors coverage and capacity SLE metrics to learn and optimize the RF environment. A learning algorithm uses hysteresis on a 24-hour window to conduct a sitewide rebalancing for optimal channel and power assignment.

The Automatic Frequency Coordination (AFC) mandated by the FCC specifies that when using the 6 GHz band (in the US) with either an access point that has a removable external antenna or a weatherized access point, it must operate in Standard Power (SP) mode. The AP47E-US access point will operate in SP mode on 6 GHz in the US, while the AP47 and AP47D access points will initially operate in Lower Power Indoor (LPI) mode, with the future

opportunity to enable SP mode. The AP47E-WW will be able to operate in LPI in many regulatory domains around the world.

Built-in GPS/GNNS receiver is utilized in support of AFC, as well as other scenarios such as automatic geo-location and more.

Proactive Insight and Action

A dedicated, tri-band fourth radio collects data for Juniper Mist, which uses machine learning to analyze user experiences, correlate problems, and automatically detect their root causes. These metrics are used to monitor SLEs and provide proactive recommendations to ensure problems don't occur (or are fixed as quickly as possible when they do).

Improved IoT Battery Efficiency

By incorporating the 802.11ax target wake time (TWT) capability and Bluetooth 5.4, AP47 access points help extend the battery life of IoT devices, particularly as additional ones join the network.

Dynamic Debugging

Constantly monitor services running on the AP47 and send alerts whenever a service behaves abnormally. Dynamic debugging relieves IT of having to worry about an AP going offline or any services running on it becoming unavailable.

Dynamic Packet Capture and Dynamic Spectrum Capture

The Juniper Mist platform automatically captures packets and radio frequency spectrum and streams them to the cloud when major issues are detected. AI-Native dynamic packet capture and dynamic spectrum capture enables "network rewind" to identify and resolve wireless interference issues more efficiently. Both features save IT time and effort and eliminate the need for truck rolls with sniffers to reproduce and capture data for troubleshooting.

Marvis Virtual Network Assistant

Marvis is a natural language processing (NLP)-based assistant with a conversational interface who helps the understanding of user intent and goals, simplifies troubleshooting, and collects network insights. Marvis uses AI and data science to proactively identify issues, determine the root causes and scope of impact, and gain insights into your network and user experiences. Marvis eliminates the need to manually hunt through endless dashboards and CLI commands.

Effortless, Cloud-Based Setup and Updates

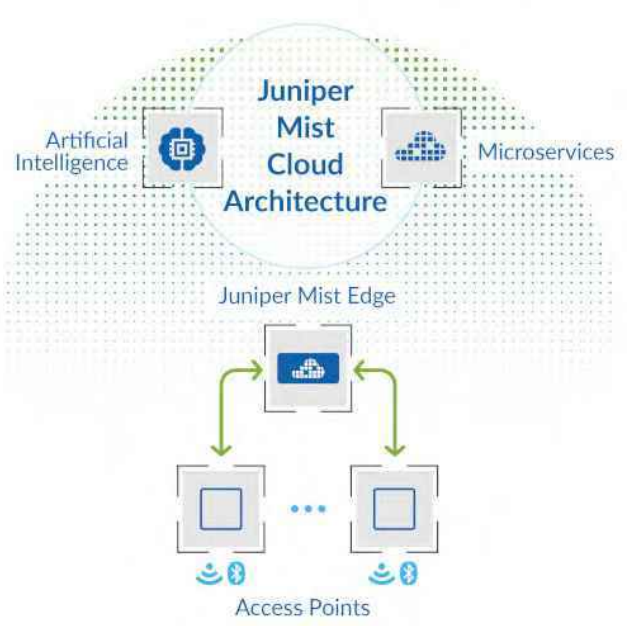
The AP47 automatically connects to the Juniper Mist Cloud, downloads its configuration, and joins the appropriate network. Firmware updates are retrieved and installed automatically, ensuring that the network is always up to date with new features, bug fixes, and security updates.

Premium Analytics

Juniper Mist Wireless Assurance, User Engagement, and Asset Visibility services include a base analytics capability for analyzing up to 30 days of data, which enables you to simplify the process of extracting network insights across your enterprise. If you require dynamic insights like motion paths[1] and other third-party[1] data and would like the option of customized reports, the Juniper Mist Premium Analytics service is available as an additional subscription.

High-Accuracy Indoor Location

The AP47 has a patented vBLE antenna array controlled from the Juniper Mist Cloud. Passive antennas enhance the power of a single transmitter and produce directional beams (or can be combined to act as an omnidirectional radio) to accurately detect distance and location with 1-3-meter accuracy. With Juniper's patented vBLE technology, you can deploy an unlimited number of virtual beacons in your physical environment with no need to install battery-powered physical BLE beacons. Support for Bluetooth 5.1 boosts IoT device range and battery life.



Patented vBLE Technology

In addition to the industry-leading Wi-Fi technology at the heart of the AP47 access point, our next-generation, patented, and dynamic vBLE antenna array combines with machine learning to eliminate the need for battery-powered beacons. This maximizes scalability and optimizes your deployment investment in location-based services.

vBLE enables businesses to provide rich location-based experiences that are engaging, accurate, real-time, and scalable.

Juniper Mist Edge

Juniper APs offer a flexible data plane. Juniper Mist Edge is an on-premises appliance that runs a tunnel termination service. Traffic can be broken out locally or tunneled to Juniper Mist Edge.

Juniper Mist Edge use cases include seamless mobility in large campus environments, tunneling of guest traffic to a DMZ, IoT segmentation, and teleworker services.

Specifications

Wi-Fi Standard	Wi-Fi 7 802.11be Backwards compatibility with 802.11a/b/g/n/ac/ax
Wi-Fi Radios	2.4/5/6 GHz 802.11a/b/g/n/ac/ax/be radio 5 GHz 802.11a/n/ac/axbe radio 6 GHz 802.11ax/be
Combined Highest Supported Data Rates	Tri-Band: 28.8 Gbps - Dual 6 GHz + 5 GHz
2.4 GHz	4x4:4 802.11be up to 1,376 Mbps data rate
5 GHz	4x4:4 802.11be up to 5764 Mbps data rate
6 GHz	4x4:4 802.11be up to 11528 Mbps data rate
MIMO Operation	• Four spatial stream SU-MIMO for up to 11,528 Mbps wireless data rate to individual 4x4 EHT320 • Four spatial stream MU-MIMO for up to 11,528 Mbps wireless data rate to up to four MU-MIMO capable client devices simultaneously
Dedicated Fourth Radio	2.4 GHz, 5 GHz, and 6 GHz tri-band WIDS/WIPS, spectrum analysis, sensor and location analytics radio
AP47 Internal Omni Antennas	Four 2.4 GHz omnidirectional antennas with 4 dBi peak gain Four 5 GHz omnidirectional antennas with 6 dBi peak gain Four 6 GHz omnidirectional antennas with 6 dBi peak gain
AP47D Internal Directional Antennas	Pattern approximately 60 x 60 degrees Four 2.4 GHz directional antennas with 6 dBi peak gain Four 5 GHz directional antennas with 8 dBi peak gain Four 6 GHz directional antennas with 8 dBi peak gain
IoT Radios	Dual Multi Personality 802.15.4 radios and dual omnidirectional antennas, vBLE Directional Antenna Array, Bluetooth 5.4 Ultra-wideband (UWB)
Beam Forming	Transmit Beamforming and Maximal Ratio Combining
Power Options	Dual Hitless PoE PD support via Eth0 + Eth1 • 802.3bt (Class 6): Full function, tri radio 4x4, scan, BLE, eth0 10 Gbps, eth1 10 Gbps, USB • 802.3at: Reduced functionality. • 802.3af: Radios disabled, cloud connectivity only.
Dimensions	AP47, AP47E : 254 mm x 254 mm x 60 mm / 10” x 10” x 2.36” AP47D : 254 mm x 254 mm x 66 mm / 10” x 10” x 2.6”
Shipping Box	315 mm x 292 mm x 90 mm / 12.4” x 11.5” x 3.54”
Weight	AP47, AP47D, AP47E - 2.0 kg / 4.41 lbs
Operating Temperature	AP47, AP47D - 0° to 40°C (32° – 104°F), AP47E -20° to 50°C (-4°F – 122°F)
Operating Humidity	10% to 90% maximum relative humidity, non-condensing
Operating Altitude	3,048 m (10,000 ft)
Trusted Platform Module (TPM)	Includes a TPM for infrastructure security

Supported Frequency Bands (Country-Specific Restrictions Apply)	2.400 to 2.4835 GHz ISM 5.150 to 5.250 GHz U-NII-1 5.250 to 5.350 GHz U-NII-2A 5.470 to 5.725 GHz U-NII-2C 5.725 to 5.850 GHz U-NII-3/ISM 5.850 to 5.895 GHz U-NII-4 5.925 to 6.425 GHz U-NII-5 6.425 to 6.525 GHz U-NII-6 6.525 to 6.875 GHz U-NII-7 6.875 to 7.125 GHz U-NII-8

I/O and Indicators

IoT Sensors	Pressure, Temperature, Accelerometer
USB	USB 2.0 support interface, 900 mA output
Eth0	100/1000/2500/5000/10000Base-T (802.3bz); RJ45; PoE PD
Eth1	100/1000/2500/5000/10000Base-T (802.3bz); RJ45; PoE PD
AP47E External Antenna	Three pluggable antenna connectors; 2.4/5/6 GHz (6 pin), 6 GHz + Scan (6 pin), 5 GHz (4 pin)
Reset	Reset to the factory default settings
Indicators	One multicolor status LED
Traffic Forwarding Options	Eth0, Eth1, Juniper Mist Edge

Mounting Brackets

APBR-U[2]	Universal bracket
APBR-ADP-M16	16mm threaded rod (M16-2)
APBR-ADP-T58	3/8" Threaded Rod
APBR-ADP-CR9	9/16" T-Rail, Channel Rail
APBR-ADP-RT15	15/16" T-Rail
APBR-ADP-WS15	1-1/2" T-Rail
APBR-ADP-T12	1/2" threaded rod

[2]The AP package includes one Universal Bracket.

AP63 ACCESS POINT DATASHEET

Product Overview

The Wi-Fi 6 (802.11ax) AP63 Series access points driven by Mist AI™ offer high-performance Wi-Fi that ensures business continuity and operational efficiency in outdoor environments.

Product Description

The Juniper® AP63 is a ruggedized and weather-resistant outdoor Wi-Fi 6 (802.11ax) access point that delivers fast and reliable Wi-Fi experiences in extremely harsh environments. The AP63 integrates AI for AX capabilities and dynamic virtual Bluetooth LE (vBLE) antenna array to automate network operation and boost Wi-Fi performance while providing real-time network insights and location services. Managed by the Juniper Mist™ cloud architecture, the outdoor AP63 is ideal for retail curbside, enterprise campus, public venue, outdoor station, and industrial environments.

While wired and wireless networks are business critical, without the right architecture they can be harder to operate given the sheer number of mobile and IoT devices—not to mention the extensive variety of hardware, operating systems, and applications currently in use. Traditional architectures—highly manual and network-centric—lack the scale, flexibility, and end-to-end visibility required to support modern mobility requirements and the IT departments that manage them.

Juniper AI-Native Network

Juniper Mist brings true innovation to wireless networking with the world's first AI-Native wireless LAN (WLAN). The Juniper AI-Native Networking Platform makes Wi-Fi predictable, reliable, and measurable, offering unprecedented visibility into the user experience through the use of unique SLE metrics. Proactive, AI-driven automation and a self-healing network replace time-consuming manual tasks, lowering Wi-Fi operational costs and saving substantial time and money.

All operations are managed using the open and programmable microservices that are based on the Juniper Mist™ cloud architecture. The system delivers maximum network scalability and performance while also bringing DevOps agility to wireless networking and location services.

The Juniper Mist Cloud Architecture

The Juniper Mist cloud-native, AI-driven microservices architecture delivers unparalleled agility, scale, and resiliency to your network. It lowers OpEx and delivers unprecedented insights into network performance, behaviors, traffic patterns, and potential trouble spots by using data science to analyze large amounts of rich metadata collected by the Juniper Access Points.

Juniper Access Point Family

The Juniper enterprise-grade access point family consists of:

- Wi-Fi 6E: AP45, AP34, AP24, and AP64
- Wi-Fi 6: AP43 Series, AP33, AP32, AP12, and AP63 Series

The real-time microservices in Juniper Mist cloud manage all these access points.

Table 1 compares the supported major functions of the Juniper Wi-Fi 6E and Wi-Fi 6 access points to help in selecting the most appropriate model(s).

Services Available for the Juniper AP63

Wi-Fi Cloud Services

Juniper Mist Wi-Fi Assurance

For IT and NOC Teams

- Predictable and Measurable Wi-Fi
- Service-Level Expectations (SLEs) Support
- WxLAN Policy Fabric for Role-Based Access
- Customizable Guest Wi-Fi Portal
- Radio Resource Management (RRM) Driven by AI

Marvis™ Virtual Network Assistant

For IT Helpdesk Teams

- AI-Powered Virtual Network Assistant
- Natural Language Processing Interface
- Anomaly Detection
- Client SLE Visibility and Enforcement
- Data Science-Driven Root-Cause Analysis

Bluetooth Cloud Services

Juniper Mist Mobile Engagement

For Digital Experience Teams

- Accurate (1-3m) Turn-by-Turn Navigation
- Sensor Fusion with Dead Reckoning
- Unsupervised Machine Learning
- Virtual Beacons with Custom Notifications
- Mobile SDK for iOS and Android

Juniper Mist Asset Visibility

For Process and Resource Improvement Teams

- Identification of Assets by Name and Location Visibility
- Zonal/Room Accuracy for Third-Party Tags
- Historical Analytics for Asset Tags
- Telemetry for Asset Tags (temperature, motion, and other data)
- APIs for Viewing Assets and Analytics

Analytics Cloud Services

Juniper Mist Premium Analytics

For Network Teams

- Baseline Analytics Features Come Included with Wi-Fi Assurance, Mobile Engagement, and Asset Visibility Subscriptions
- End-to-End Network Visibility
- Orchestrated Networking and Application
- Performance Queries
- Simplified Network Transparency

For Business Teams

- Baseline Analytics Features Come Included with Wi-Fi Assurance, Mobile Engagement, and Asset Visibility Subscriptions
- Customer Segmentation and Reporting Based on Visitor Telemetry
- Customized[1] Dwell and Third-Party Reporting for Traffic and Trend Analysis
- Correlation of Customer-Guest Traffic and Trend Analysis

Access Point Features

High-Performance Wi-Fi

The outdoor AP63 Series comprises tri-radio 4x4 802.11ax access points with maximum data rates of 2,400 Mbps in the 5 GHz band and 1,148 Mbps in the 2.4 GHz band. The third radio functions as a network, location, and security sensor, a synthetic test client radio, as well as a spectrum monitor.

With 802.11ax Orthogonal Frequency Division Multiple Access (OFDMA), Multi-User Multiple Input Multiple Output (MU-MIMO), and BSS Coloring technologies, the AP63 Series offers performance at unprecedented levels to support new bandwidth-hungry applications and soaring device densities.

AI for AX

With the new features that 802.11ax (Wi-Fi 6) introduces to boost performance and efficiency, configuring and operating an access point has grown far more complex. Juniper automates and optimizes these features with AI for AX capabilities to optimize BSS Coloring, improve data transmission scheduling within OFDMA and MU-MIMO, and assign clients to the best radio to boost the overall performance of the network.

Greater Spectral Efficiency

OFDMA improves spectral efficiency so that an increasing density of devices can be supported on the network. Density has become an issue with the rapid growth of IoT devices, which often utilize smaller data packets than mobile devices and hence increase the burden and contention on the network. Additionally, BSS Coloring improves the coexistence of overlapping BSSs and allows spatial reuse within a given channel by reducing packet collisions.

Automatic RF Optimization

Radio Resource Management automates dynamic channel and power assignment, taking Wi-Fi and external sources of interference into account with a dedicated sensor radio. The AI engine continuously monitors coverage and capacity SLE metrics to learn and optimize the RF environment. A learning algorithm uses hysteresis on a 24-hour window to conduct a sitewide rebalancing for optimal channel and power assignment.

Proactive Insight and Action

A dedicated, dual-band third radio collects data for Juniper's patent-pending Proactive Analytics and Correlation Engine (PACE), which uses machine learning to analyze user experiences, correlate problems, and automatically detect their root cause. These metrics are used to monitor SLEs and provide proactive recommendations to ensure problems don't occur (or are fixed as quickly as possible when they do). This radio also functions as a synthetic test client to proactively detect and mitigate network anomalies.

Improved IoT Battery Efficiency

By incorporating the 802.11ax target wake time (TWT) capability and Bluetooth 5.0, AP63 access points help extend the battery life of IoT devices, particularly as additional ones join the network.

Dynamic Debugging

Constantly monitor services running on the AP63 and send alerts whenever a service behaves abnormally. Dynamic debugging relieves IT of having to worry about an AP going offline or any services running on it becoming unavailable.

Dynamic Packet Capture

The Juniper Mist platform automatically captures packets and streams them to the cloud when major issues are detected. This saves IT time and effort and eliminates the need for truck rolls with sniffers to reproduce and capture data for troubleshooting.

Marvis Virtual Network Assistant

Marvis is a natural language processing (NLP)-based assistant with a conversational interface that helps with understanding user intent

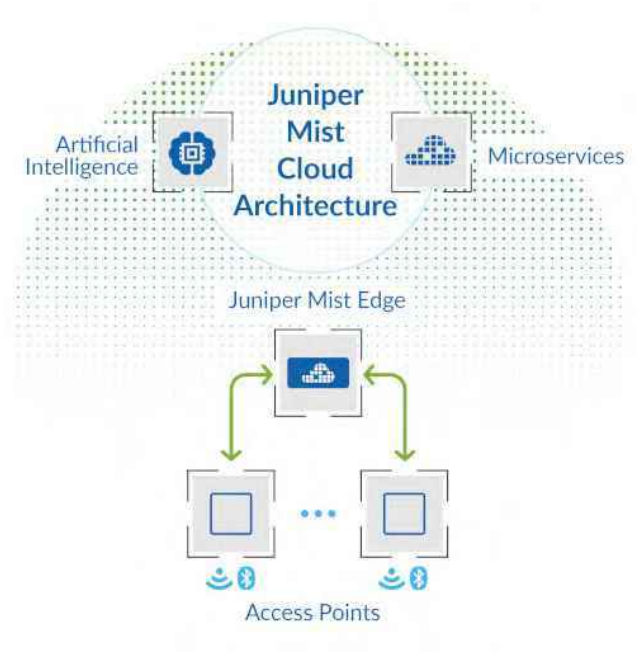
and goals, simplifies troubleshooting, and collects network insights. It uses AI and data science to proactively identify issues, determine the root causes and scope of impact, and gain insights into your network and user experiences. It eliminates the need to manually hunt through endless dashboards and CLI commands.

Effortless, Cloud-Based Setup and Updates

The AP63 automatically connects to the Juniper Mist cloud, downloads its configuration, and joins the appropriate network. Firmware updates are retrieved and installed automatically, ensuring that the network is always up to date with new features, bug fixes, and security updates.

Premium Analytics

Juniper Mist Wireless Assurance, User Engagement, and Asset Visibility services include a base analytics capability for analyzing up to 30 days of data, which enables you to simplify the process of extracting network insights across your enterprise. If you require dynamic insights like motion paths1 and other third-party1 data and would like the option of customized reports, the Juniper Mist Premium Analytics service is available as an additional subscription.



High-Accuracy Indoor Location

The AP63 has a 16-element vBLE antenna array controlled from the Juniper Mist cloud. Passive antennas enhance the power of a single transmitter and produce directional beams (or can be combined to act as an omnidirectional radio) to accurately detect distance and location with 1-3 meter accuracy. With Juniper's patented vBLE technology, you can deploy an unlimited number of virtual beacons in your physical environment with no need to install battery-powered physical BLE beacons. Support for Bluetooth5.0 boosts IoT device range and battery life.

Patented vBLE Technology

In addition to the industry-leading Wi-Fi technology at the heart of the AP63 access point, our second-generation, patented, and dynamic, 16-element vBLE antenna array combines with machine learning to eliminate the need for battery-powered beacons. This maximizes scalability and optimizes your deployment investment in location-based services.

vBLE enables businesses to provide rich location-based experiences that are engaging, accurate, real-time, and scalable.

Juniper Mist Edge

Juniper APs offer a flexible data plane. Juniper Mist Edge is an on-premises appliance that runs a tunnel termination service. Traffic can be broken out locally or tunneled to Juniper Mist Edge.

Juniper Mist Edge use cases include: seamless mobility in large campus environments, tunneling of guest traffic to a DMZ, IoT segmentation, and teleworker services.

[1]Juniper Mist Premium Analytics service subscription is needed

Specifications

Wi-Fi Standard	802.11ax (Wi-Fi 6), including support for OFDMA, 1024-QAM, MU-MIMO, Target Wake Time (TWT), Spatial Frequency Reuse (BSS Coloring). Backwards compatibility with 802.11a/b/g/n/ac
Combined Highest Supported Data Rates	Dual-Band: 3.5 Gbps Dual-5 GHz (internal antenna model): 4.8 Gbps
2.4 GHz	4x4:4 802.11ax up to 1,148 Mbps data rate
5 GHz	4x4:4 802.11ax up to 2,400 Mbps data rate
MIMO Operation	Four spatial stream SU-MIMO for up to 2,400 Mbps wireless data rate to individual 4x4 HE80 Four spatial stream MU-MIMO for up to 2,400 Mbps wireless data rate to up to four MU-MIMO capable client devices simultaneously
Dedicated Third Radio	2/2:2 SS, dual-band WIDS/WIPS, spectrum analysis, synthetic client and location analytics radio
Internal Antennas	Four 2.4 GHz omnidirectional antennas with 4 dBi peak gain Four 5 GHz omnidirectional antennas with 6 dBi peak gain
Bluetooth 5.0	vBLE 16-element Directional Antenna Array + Omni Bluetooth Antenna
Beam Forming	Transmit Beamforming and Maximal Ratio Combining
Power Options	802.3at PoE (no PoE out), 802.3bt PoE
Dimensions	285 x 285 x 86 mm (11.2 x 11.2 x 3.4 in)
Weight	AP63: 3.4 kg (7.5 lbs) excluding mount and accessories AP63E: 3.9 kg (8.6 lbs) excluding mount and accessories
Operating Temperature	-40° to 55° C with solar loading -40° to 65° C without solar loading
Operating Humidity	10% to 90% maximum relative humidity, non-condensing
Enclosure	IP67 / NEMA 4 compliant
Electromagnetic Emission	FCC Part 15 Class B
Operating Altitude	3,048 m (10,000 ft)
Mean Time Between Failures (MTBF)	Indoor MTBF in hours is 999,958* Outdoor MTBF in hours is 265,318*
Trusted Platform Module (TPM)	Includes a TPM for infrastructure security
Certification	Class 1, Division 2 for hazardous locations

*Based on Telcordia SR-332 issue 3, Method I, Case 3 and measured at temperature of 25°C (77°F) for indoor access points, and 65°C (149°F) for outdoor access points.

I/O and Indicators

Eth0	100/1000Base-T, 2.5GBase-T (802.3bz); RJ45; PoE PD (requires 802.3bt)
Eth1	10/100/1000Base-T; RJ45 optional 802.3af PoE PSE mode (requires 802.3bt on Eth0)
External Antennas (AP63E)	Six N-type female connectors (four dual-band for client radios; two dual-band for the third radio)
Reset	Reset to the factory default settings
Indicators	One multicolor status LED
Compliance Standards	CSA/UL 62368-1 FCC Part 15.247, 15.407, 15.107, and 15.109 RSS247 ICES003 (Canada)

Mounting Brackets

APOUTBR-KIT	Contains Flush Mount and Articulating Mount Brackets

[2]The AP package includes one Universal Bracket. APBR-U is available separately as an accessory.

EX4100 LINE OF ETHERNET SWITCHES DATASHEET

Product Overview

The EX4100 line of Ethernet access switches offers secure, cloud-ready access for enterprise campus, branch, and data center networks in the AI era and optimized for the cloud. These platforms boost network performance and visibility, meeting the security demands of today—as well as for networks of the next decade.
As part of the underlying infrastructure for Juniper Mist Wired Assurance, the EX4100 line is purpose-built for, and managed by, the cloud. The switches leverage Mist AI to simplify operations and provide better visibility into the experience of connected devices, delivering a refreshing, experience-first approach to access layer switching.

Product Description

The Juniper Networks® EX4100 line of Ethernet Switches offers a secure, cloud-ready portfolio of access switches ideal for enterprise branch, campus, and data center networks. The EX4100 switches combine the simplicity of the cloud, the power of Mist AI™, and a robust hardware foundation with best-in-class security and performance to deliver a differentiated approach to access switching in the cloud, mobile, and IoT era. With Juniper® Mist™ Wired Assurance, the EX4100 line of Switches can be effortlessly onboarded, configured, and managed from the cloud. This simplifies operations, improves visibility, and ensures a much better experience for connected devices.

Key features of the EX4100 include:

- Cloud-ready, driven by Mist AI with Juniper Mist Wired Assurance and Marvis Virtual Network Assistant
- Ethernet VPN–Virtual Extensible LAN (EVPN-VXLAN) to the access layer
- Standards-based microsegmentation using group-based policies (GBPs)
- Switch-to-switch encryption using Media Access Control Security (MACsec) AES256
- IEEE 802.3bz Multigigabit
- IEEE 802.3bt Power over Ethernet Plus (PoE++)
- Flow-based telemetry to monitor traffic flows for anomaly detection, ability to measure packet delays and report drop reasons
- Precision Timing Protocol–Transparent Clock
- 10-member Virtual Chassis support

Offering a full suite of Layer 2 and Layer 3 capabilities, the EX4100 enables multiple deployments, including campus, branch, and data center top-of-rack deployments. As scale requirements increase, Juniper's Virtual Chassis technology allows up to 10 EX4100 switches to be seamlessly interconnected and managed as a single device, delivering a scalable, pay-as-you-grow solution for expanding network environments.

The EX4100 family of Ethernet switches consists of the following models:

- The EX4100-48MP, which offers 16 x 100 MB/1GbE/2.5GbE and 32 x 10 MB/100 MB/1GbE Power over Ethernet (PoE++) access ports, delivering up to 90 W per PoE port with an overall total 1620 W of PoE power budget (using two power supplies)
- The EX4100-24MP, which offers 8 x 100 MB/1GbE/2.5GbE/5GbE/10GbE and 16 x 10 MB/100 MB/1GbE PoE++ access ports, delivering up to 90 W per port with an overall total 1620 W of PoE power budget (using two power supplies)
- The EX4100-24T, which offers 24 x 1GbE non-PoE access ports
- The EX4100-24P, which offers 24 x 1GbE PoE+ access ports, delivering up to 30 W per port with an overall total 1440 W of PoE power budget (using two power supplies)
- The EX4100-48T, which offers 48 x 1GbE non PoE-access ports
- The EX4100-48P, which offers 48 x 1GbE PoE+ access ports, delivering up to 30 W per port with an overall total 1440 W of PoE power budget (using two power supplies)

Each EX4100 model offers 4 x 1/10GbE small form-factor pluggable plus transceiver (SFP+) fixed uplink ports. The EX4100 switches include 4 x 10GbE/25GbE SFP28 ports to support Virtual Chassis connections, which can be reconfigured for use as Ethernet ports for uplink connectivity. EX4100 switches also include high availability (HA) features such as redundant, hot-swappable power supplies and field-replaceable fans to ensure maximum uptime. In addition, -24 port and -48 port Multi-Gigabit Ethernet EX4100 switch models offer standards-based 802.3af/at/bt (PoE/PoE+/PoE ++) for delivering up to 90 watts on any access port. The EX4100 switches can be configured to deliver fast PoE capability, which enables the switches to deliver PoE power to connected PoE devices within a few seconds of power being applied to the switches.

Architecture and Key Components

Cloud Management with Juniper Mist Wired Assurance Driven by Mist AI

EX4100 switches can be quickly and easily onboarded (Day 0), provisioned (Day 1), and managed (Day 2+) from the cloud with Juniper Mist Wired Assurance, which brings AI-powered automation and insights that optimize experiences for end users and connected devices. The EX4100 provides rich Junos® operating system telemetry data for Mist AI, which helps achieve simpler operations, shorter mean time to repair (MTTR), and streamlined troubleshooting. For more information, read the Juniper Mist Wired Assurance datasheet.

In addition to Juniper Mist Wired Assurance, Marvis Virtual Network Assistant—a key part of The Self-Driving Network™—makes the Mist AI engine interactive. A digital extension of the IT team, Marvis offers automatic fixes or recommended actions, allowing IT teams to streamline how they troubleshoot and manage their network operations.

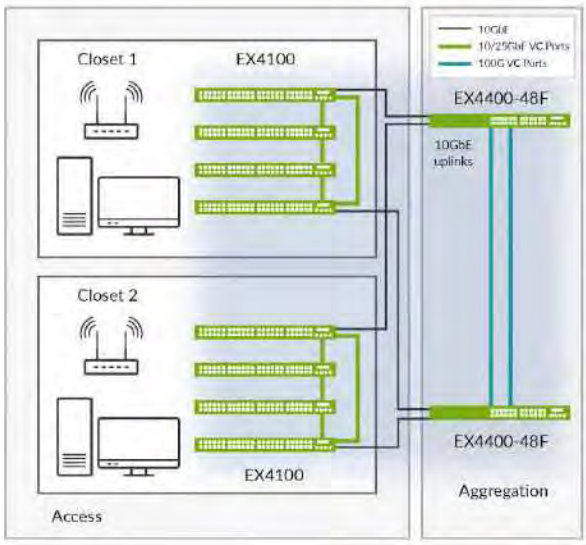

Figure 1: EX4100 Virtual Chassis configuration interconnected via dedicated front-panel 25GbE ports

EVPN-VXLAN Technology

Most traditional campus networks have a single-vendor, chassis-based architecture that worked well for smaller, static campuses with few endpoints. However, this approach is too rigid to support the changing needs of modern campus networks. The EX4100 supports EVPN-VXLAN, extending an end-to-end fabric from campus core to distribution to the access layer.

An EVPN-VXLAN fabric is a simple, programmable, highly scalable architecture built on open standards. This technology can be applied in both data centers and campuses for architectural consistency. A campus EVPN-VXLAN architecture uses a Layer 3 IP-based underlay network and an EVPN-VXLAN overlay network. A flexible overlay network based on a VXLAN overlay with an EVPN control plane efficiently provides Layer 2 and/or Layer 3 connectivity throughout the network. EVPN-VXLAN also offers a scalable way to build and interconnect multiple campus sites, delivering:

- Greater consistency and scalability across all network layers
- Multivendor deployment support
- Reduced flooding and learning
- Location-agnostic connectivity
- Consistent network segmentation
- Simplified management

Virtual Chassis Technology

Juniper's Virtual Chassis technology allows multiple interconnected switches to operate as a single, logical unit, enabling users to manage all platforms as one virtual device. Up to 10 EX4100 switches can be interconnected as a Virtual Chassis using 4 x 25GbE SFP28 dedicated front-panel ports. Although configured as Virtual Chassis ports by default, the 4 x 25GbE SFP28 uplinks can also be configured as uplink ports. The EX4100 switches can form a Virtual Chassis with any other models within the EX4100 product line.

Microsegmentation Using Group-Based Policy

GBP leverages underlying VXLAN technology to provide location-agnostic endpoint access control. This allows network administrators to implement consistent security policies across the enterprise network domains. The EX4100 supports a standards-based GBP solution, allowing different levels of access control for endpoints and applications even within the same VLAN. Customers can simplify their network configuration by using GBP, avoiding the need to configure large numbers of firewall filters on all their switches. GBP can block lateral threats by ensuring consistent application of security group policies throughout the network, regardless of the location of endpoints and/or users.

Flow-Based Telemetry

Flow-based telemetry enables flow-level analytics, allowing network administrators to monitor thousands of traffic flows on the EX4100 without burdening the CPU. This improves network security by monitoring, baselining, and detecting flow anomalies. For example, if predefined flow thresholds are breached due to an attack, IP Flow Information Export (IPFIX) alerts can be sent to an external server to quickly identify the attack. Network administrators can also automate specific workflows, such as further examining the traffic or quarantining a port, to triage the issue. In addition to DOS attacks, Flow-Based Telemetry on EX4100 switches can measure packet delays at ingress, chip, and egress points, as well as report drop reasons.

Features and Benefits

Simplified Operations with Juniper Mist Wired Assurance

The EX4100 is fully cloud onboarded, provisioned, and managed by Juniper Mist Wired Assurance. The EX4100 is designed from the ground up to deliver the rich telemetry that enables AI for IT Operations (AIOps) with simplified operations from Day 0 to Day 2 and beyond. Juniper Mist Wired Assurance provides detailed switch insights for easier troubleshooting and improved time to resolution by offering the following features:

- **Day 0 operations**—Onboard switches seamlessly by claiming a greenfield switch or adopting a brownfield switch with a single activation code for true plug-and-play simplicity.
- **Day 1 operations**—Implement a template-based configuration model for bulk rollouts of traditional and campus fabric deployments, while retaining the flexibility and control required to apply custom site- or switch-specific attributes. Automate provisioning of ports via Dynamic Port Profiles.
- **Day 2 operations**—Leverage the AI in Juniper Mist Wired Assurance to meet service-level expectations such as throughput, successful connects, and switch health with key pre- and post-connection metrics (see Figure 1). Add the self-driving capabilities in Marvis Actions to detect loops, add missing VLANs, fix misconfigured ports, identify bad cables, isolate flapping ports, and discover persistently failing clients (see Figure 2). And perform software upgrades easily through Juniper Mist Cloud.

Figure 2: Juniper Mist Wired Assurance service-level expectations screen

Figure 3: Marvis Actions for wired switches

The complimentary addition of Marvis Virtual Network Assistant, driven by Mist AI, lets you start building a Self-Driving Network that simplifies network operations and streamlines troubleshooting via automatic fixes for Juniper Networks EX Series Switches or recommended actions for external systems.

For more information, see Juniper Mist Wired Assurance.

Campus Fabric Deployments

EVPN-VXLAN for Campus Core, Distribution, and Access

The main advantages of EVPN-VXLAN in campus networks are:

- Flexibility of consistent VLANs across the network: Endpoints can be placed anywhere in the network and remain connected to the same logical L2 network, enabling a virtual topology to be decoupled from the physical topology.
- Microsegmentation: The EVPN-VXLAN-based architecture lets you deploy a common set of policies and services across campuses with support for L2 and L3VPNs.
- Scalability: With an EVPN control plane, enterprises can scale out easily by adding more core, aggregation, and access layer devices as the business grows without having to redesign the network or perform a forklift upgrade. Using an L3 IP-based underlay coupled with an EVPN-VXLAN overlay, campus network operators can deploy much larger and more resilient networks than would otherwise be possible with traditional L2 Ethernet-based architectures.

Juniper offers complete flexibility in choosing any of the following validated EVPN-VXLAN campus fabrics that cater to networks of different sizes, scale, and segmentation requirements:

EVPN multihoming (on collapsed core or distribution): A collapsed core architecture combines the core and distribution layers into a single layer, turning the traditional three-tier hierarchal network into a two-tier network. EVPN Multihoming on a collapsed core eliminates the need for Spanning Tree Protocol (STP) across campus networks by providing link aggregation capabilities from the access layer to the core layer. This topology is best suited for small to medium distributed enterprise networks and allows for consistent VLANs across the network. This topology uses ESI (Ethernet Segment Identifier) LAG (Link Aggregation) and is a standards-based protocol.

Campus Fabric Core distribution: When EVPN VXLAN is configured across core and distribution layers, it becomes a campus Fabric Core Distribution architecture, which can be configured in two modes: centrally or edge routed bridging overlay. This architecture provides an opportunity for an administrator to move towards campus-fabric IP Clos without fork-lift upgrade of all access switches in the existing network, while bringing in the advantages of moving to a campus fabric and providing an easy way to scale out the network.

Campus Fabric IP Clos: When EVPN VXLAN is configured on all layers including access, it is called the campus fabric IP Clos architecture. This model is also referred to as “end-to-end,” given that VXLAN tunnels are terminated at the access layer. Due to the availability of VXLAN at access, it provides us with the opportunity to bring policy enforcement to the access layer (closest to the source) using Group Based Policy (GBP). Standards-based GBP tags bring the unique option to segment traffic both at a micro and macro level. GBP tags are assigned dynamically to clients as part of Radius transaction by Mist Cloud NAC. This topology works for small-medium and large campus architectures that need macro and micro segmentation.

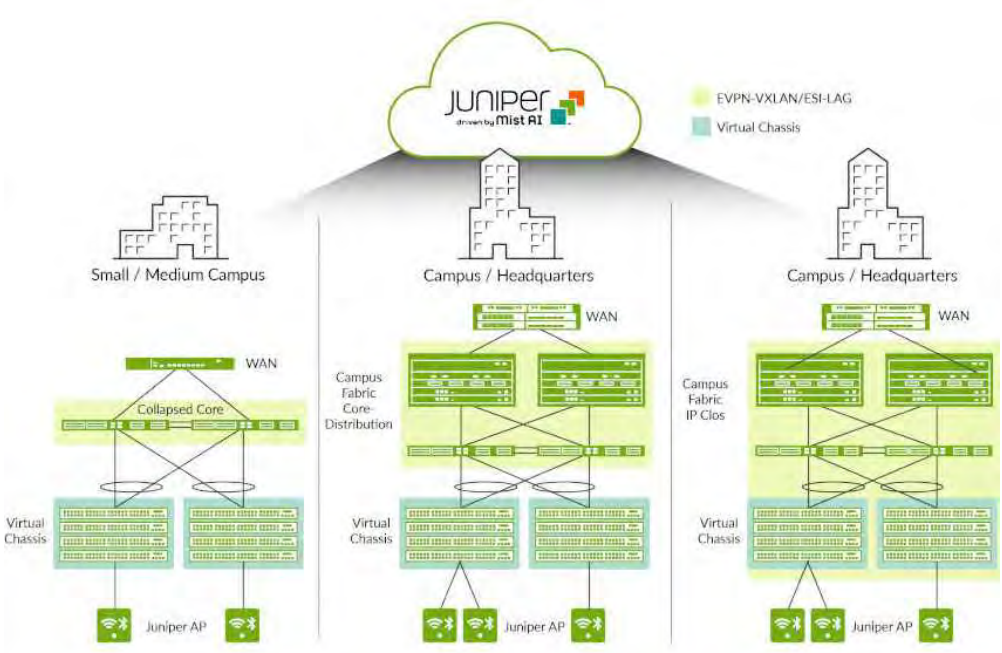

Figure 4: Campus fabrics showing Virtual Chassis and EVPN-VXLAN-based architectures

All three topologies are standards-based and interoperable with third-party vendors.

The EX4100 switches can be deployed in campus and branch access layer networks in the EVPN-VXLAN architectures shown in Figure 4.

Managing AI-Driven Campus Fabric with the Juniper Mist Cloud

Juniper Mist Wired Assurance brings cloud management and Mist AI to the campus fabric. It sets a new standard that moves away from traditional network management towards AI-driven operations, while delivering better experiences to connected devices. Juniper Mist Cloud streamlines deployment and management of campus fabric architectures by allowing:

- Automated deployment and zero-touch deployment (ZTD)
- Anomaly detection
- Root cause analysis

Figure 5: EVPN multihoming configuration via the Juniper Mist cloud

Chassis-Class Availability

The EX4100 switches deliver high availability through redundant power supplies and fans, graceful Routing Engine switchover (GRES), and nonstop bridging and routing when deployed in a Virtual Chassis configuration.

In a Virtual Chassis configuration, each EX4100 switch is capable of functioning as a Routing Engine (RE). When two or more EX4100 switches are interconnected, a single control plane is shared among all Virtual Chassis member switches. Junos OS automatically initiates an election process to assign a primary (active) and backup (hot-standby) RE. An integrated L2 and L3 GRES feature maintains uninterrupted access to applications, services, and IP communications in the unlikely event of a primary RE failure.

When more than two switches are interconnected in a Virtual Chassis configuration, the remaining switch elements act as line cards and are available to assume the backup RE position should the designated primary RE fail. Primary, backup, and line card priority status can be assigned to dictate the order of ascension; this N+1 RE redundancy, coupled with the GRES, nonstop active routing (NSR), and nonstop bridging (NSB) capabilities of Junos OS, assures a smooth transfer of control plane functions following unexpected failures.

The EX4100 implements the same slot/module/port numbering scheme as other Juniper chassis-based products when numbering Virtual Chassis ports, providing true chassis-like operations. By using a consistent operating system and a single configuration file, all switches in a Virtual Chassis configuration are treated as a single device, greatly simplifying overall system maintenance and management.

Individually, the EX4100 offers a number of HA features that are typically associated with modular chassis-based switches. When combined with the field-proven Junos OS and L2/L3 failover capabilities, these features provide the EX4100 with true carrier-class reliability.

- **Redundant power supplies**: The EX4100 line of switches supports redundant, load-sharing, hot-swappable, and field-replaceable power supplies to maintain uninterrupted operations. Thanks to its compact footprint, the EX4100 requires significantly less power than chassis-based switches delivering equivalent port densities.
- **Hot-swappable fans**: The EX4100 includes hot-swappable fans, providing sufficient cooling (for a short duration) even if one of the fans were to fail.
- **Nonstop bridging and nonstop active routing**: NSB and NSR on the EX4100 ensure that control plane protocols, states, and tables are synchronized between primary and standby REs to prevent protocol flaps or convergence issues following an RE failover.
- **Redundant trunk group (RTG)**: To avoid the complexities of STP without sacrificing network resiliency, the EX4100 employs redundant trunk groups to provide the necessary port redundancy and simplify switch configuration.
- **Cross-member link aggregation**: Cross-member link aggregation allows redundant link aggregation connections between devices in a single Virtual Chassis configuration, providing an additional level of reliability and availability.
- **IPv4 and IPv6 routing support**: IPv4 and IPv6 Layer 3 routing (OSPF and BGP) is available with a Flex license, enabling highly resilient networks.

MACsec AES256

The EX4100 switches support IEEE 802.1ae MACsec with AES-256-bit encryption to increase security of point-to-point traffic communications. MACsec provides encrypted communication at the link layer that is capable of identifying and preventing threats from denial of service (DoS) and other intrusion attacks, as well as man-in-the-middle, masquerading, passive wiretapping, and playback attacks launched from behind the firewall. When MACsec is deployed on ports, the traffic is encrypted on the wire, but the traffic inside the switch is not. This allows the switch to apply network policies such as quality of service (QoS) or deep packet inspection (DPI) to each packet without compromising the security of packets on the wire.

PoE/PoE+/PoE++ Power, Perpetual and Fast PoE

The EX4100 delivers PoE for supporting connected devices such as phones, surveillance cameras, IoT devices, and 802.11AX/Wi-Fi 6 access points, offering a PoE power budget of up to 1620W and supporting up to 90W per port based on the IEEE 802.3bt PoE standard.

EX4100 switches support perpetual PoE, which provides uninterrupted power to connected PoE powered devices (PDs) even when the EX4100 switch is rebooting.

The EX4100 switches also support a fast PoE capability that delivers PoE power to connected endpoints during a switch power-up, even before the switch is fully operational. This is especially beneficial in situations where the endpoint only needs the power and is not necessarily dependent on network connectivity.

Junos Telemetry Interface

The EX4100 supports Junos telemetry interface (JTI), a modern telemetry streaming feature designed for switch health and performance monitoring. Sensor data can be streamed to a management system at configurable periodic intervals, enabling network administrators to monitor individual link and node utilization as well as troubleshoot issues such as network congestion in real time. JTI delivers the following features:

- Performance management by provisioning sensors to collect and stream data and analyze application and workload flow paths through the network
- Capacity planning and optimization by proactively detecting hotspots and monitoring latency and microbursts
- Troubleshooting and root cause analysis via high-frequency monitoring and correlation of overlay and underlay networks

Junos Operating System

The EX4100 switches run Junos OS, Juniper's powerful and robust network operating system that powers all Juniper switches, routers, and firewalls. By utilizing a common operating system, Juniper delivers a consistent implementation and operation of control plane features across all products. To maintain that consistency, Junos OS adheres to a highly disciplined development process that uses a single source code and employs a highly available modular architecture to prevent isolated failures from bringing down an entire system.

These attributes are fundamental to the core value of the software, enabling all Junos OS-powered products to be updated simultaneously with the same software release. All features are fully regression tested, making each new release a true superset of the previous version. Customers can deploy the software with complete confidence that all existing capabilities are maintained and operate in the same way.

Flex Licensing

Juniper Flex licensing offers a common, simple, and flexible licensing model for EX Series access switches, enabling customers to purchase features based on their network and business needs. Flex licensing is offered in Standard, Advanced, and Premium tiers. Standard tier features are available with the Junos OS image that ships with EX Series switches. Additional features can be unlocked with the purchase of a Flex Advanced or Flex Premium license.

The Flex Advanced and Flex Premium licenses for the EX Series platforms are class-based, determined by the number of access ports on the switch. Class 1 (C1) switches have 12 ports, Class 2 (C2) switches have 24 ports, and Class 3 (C3) switches have 32 or 48 ports.

The EX4100 switches support both subscription and perpetual Flex licenses. Subscription licenses are offered for three- and five-year terms. In addition to Junos OS features, the Flex Advanced and Flex Premium subscription licenses include Juniper Mist Wired Assurance. Flex Advanced and Flex Premium subscription licenses also allow portability across the same tier and class of switches, ensuring investment protection for the customer.

For a complete list of features supported by the Flex Standard, Advanced, and Premium tiers, or to learn about Junos OS EX Series licenses, please visit: https://www.juniper.net/documentation/us/en/software/license/licensing/topics/concept/flex-licenses-for-ex.html.

Enhanced Limited Lifetime Warranty

The EX4100 includes an enhanced limited lifetime hardware warranty that provides return-to-factory switch replacement for as long as the original purchaser owns the product. The warranty includes lifetime software updates, advanced shipping of spares within one business day, and 24x7 Juniper Networks Technical Assistance Center (JTAC) support for 90 days after the purchase date. Power supplies and fan trays are covered for a period of five years. For complete details, please visit https://support.juniper.net/support/pdf/warranty/990240.pdf.

Product Options

Available EX4100 models are listed in Table 1.

Table 1. EX4100 Line of Ethernet Switches

Model/Product SKU	Access Port Configuration	PoE/PoE +Ports	PoE+ +Ports	PoE Budget 1 PSU/2 PSU	10GbE Ports	25GbE Ports	Power Supply Rating	Cooling
EX4100-24T	24-port 10/100/1000BASE-T	0	0	N/A	4	4	150 W AC	AFO (front-to-back airflow)
EX4100-48T	48-port 10/100/1000BASE-T	0	0	N/A	4	4	150 W AC	AFO (front-to-back airflow)
EX4100-48T-AFI	48-port 10/100/1000BASE-T	0	0	N/A	4	4	150 W AC	AFI (back-to-front airflow)
EX4100-24T-DC	24-port 10/100/1000BASE-T	0	0	N/A	4	4	150 W DC	AFO (front-to-back airflow)
EX4100-48T-DC	48-port 10/100/1000BASE-T	0	0	N/A	4	4	150 W DC	AFO (front-to-back airflow)
EX4100-24P	24-port 10/100/1000BASE-T	24	0	740 W/1440 W	4	4	920 W AC	AFO (front-to-back airflow)
EX4100-48P	48-port 10/100/1000BASE-T	48	0	740 W/1440 W	4	4	920 W AC	AFO (front-to-back airflow)
EX4100-24MP	8x 100 MB/1GbE/2.5GbE/5GbE/10GbE + 16x 10 MB/100 MB/1GbE	0	24	740W/1620 W	12	4	920 W AC	AFO (front-to-back airflow)
EX4100-48MP	16x 100 MB/1GbE/2.5GbE + 32x 10 MB/100 MB/1GbE	0	48	740 W/1620 W	4	4	920 W AC	AFO (front-to-back airflow)

The EX4100 also offers spare chassis options without power supplies or fans, providing customers with the flexibility to stock SKUs (see Table 2). See the Ordering Information section for additional details.

Table 2. EX4100 Spare Chassis SKUs

Spare Chassis SKU	Description	JPSU-150-AC-AFO + EX4100-FAN-AFO	JPSU-150-AC-AFI + EX4100-FAN-AFI	JPSU-150-DC-AFO + EX4100-FAN-AFO	JPSU-920-AC-AFO + EX4100-FAN-AFO
EX4100-24T-CHAS	Spare chassis, 24-port 10/100/1000BASE-T	Y	X	Y	X

Figure 6: EX4100 line of Switches

EX4100 Line Specifications

Physical Specifications

Backplane

- 200 Gbps Virtual Chassis interconnect to combine up to 10 units as a single logical device

Power Options

- Power supplies: Autosensing; 100-120 V/200-240 V; 150 W, 920 W AC AFO, and 150 W AC AFI dual load sharing hot-swappable internal redundant power supplies
- Maximum current inrush: 30 amps
- DC power supply: 150 W DC AFO; input voltage range 48-60 V max; dual load-sharing hot-swappable internal redundant power supplies
- Minimum number of PSUs required for fully loaded chassis: 1 per switch

Dimensions (W x H x D)

- Base Unit: 17.36 x 1.72 x 13.78 in (44.1 x 4.37 x 35 cm)
- With power supply installed: 17.36 x 1.72 x 15.05 in (44.1 x 4.37 x 38.24 cm)
- Height: 1 U

System Weight

- EX4100-24T switch (with no power supply or fan module): 9.72 lb (4.41 kg)
- EX4100-24P switch (with no power supply or fan module): 10 lb (4.54 kg)
- EX4100-48T switch (with no power supply or fan module): 10 lb (4.54 kg)
- EX4100-48P switch (with no power supply or fan module): 10.27 lb (4.66 kg)
- EX4100-24MP switch (with no power supply or fan module): 10.06 lb (4.57 kg)
- EX4100-48MP switch (with no power supply or fan module): 10.41 lb (4.72 kg)
- 150 W AC power supply: 1.43 lb (0.65 kg)
- 150 W DC power supply: 1.43 lb (0.65 kg)
- 920 W AC power supply: 1.87 lb (0.85 kg)
- Fan module: 0.16 lb (0.07 kg)

Environmental Ranges

- Operating temperature: 32° to 113° F (0° to 45° C)
- Storage temperature: -40° to 158° F (-40° to 70° C)
- Operating altitude: Up to 5000 ft at 40° C (1828.8 m)
- Nonoperating altitude: Up to 16,000 ft (4877 m)
- Relative humidity operating: 5% to 90% (noncondensing)
- Relative humidity non-operating: 0% to 90% (noncondensing)

Cooling [CFM] - Total maximum airflow with two power supplies and fans

- Field-replaceable fans: 2
- EX4100-24MP : 60.9
- EX4100-48MP : 61.7
- EX4100-24T : 65.6
- EX4100-24T-DC : 64.8
- EX4100-24P : 61.6
- EX4100-48T : 65.8
- EX4100-48T-DC : 66.2
- EX4100-48T-AFI : 61.8
- EX4100-48P : 64.1

Hardware Specifications Switching Engine Mode

- Store and forward

Memory

- DRAM: 4 GB with Error Correcting Code (ECC) on all models
- Storage: 8 GB on all models

CPU

- 1.7 GHz ARM CPU on all models

GbE Port Density per System

- EX4100-24P/24T: 32 (24 1GbE host ports + 4 10GbE/25GbE ports + 4 1GbE/10GbE ports)
- EX4100-48P/48T: 56 (48 1GbE host ports + 4 10GbE/25GbE ports + 4 1GbE/10GbE ports)
- EX4100-24MP: 32 (8 10GbE host ports + 16 1GbE host ports + 4 10GbE/25GbE ports + 4 1GbE/10GbE ports)
- EX4100-48MP: 56 (16 2.5GbE host ports + 32 1GbE host ports + 4 10GbE/25GbE ports + 4 port 1GbE/10GbE ports)

Physical Layer

- Time domain reflectometry (TDR) for detecting cable breaks and shorts: EX4100-24P/T and EX4100-48P/T, EX4100-24MP and EX4100-48MP

- Auto medium-dependent interface/medium-dependent interface crossover (MDI/MDIX) support: EX4100-24P/T, EX4100-48P/T, EX4100-24MP and EX4100-48MP
- Port speed downshift/setting maximum advertised speed on
  - 10/100/1000BASE-T ports on EX4100-24P/T and EX4100-48P/T
  - 100/1000BASE-T/2.5GBASE-T/5GBASE-T/10GBASE-T on EX4100-24MP
  - 100/1000BASE-T/2.5GBASE-T on EX4100-48MP

Packet Switching Capacities (Maximum with 64 Byte Packets)

- EX4100-24P/24T: 164 Gbps (unidirectional)/328 Gbps (bidirectional)
- EX4100-48P/48T: 188 Gbps (unidirectional)/376 Gbps (bidirectional)
- EX4100-24MP: 236 Gbps (unidirectional)/472 Gbps (bidirectional)
- EX4100-48MP: 212 Gbps (unidirectional)/424 Gbps (bidirectional)

Software Specifications

Layer 2/Layer 3 Throughput (Mpps) (Maximum with 64 Byte Packets)

- EX4100-48P/T 279 Mpps
- EX4100-24P/T 244 Mpps
- EX4100-48MP 315 Mpps
- EX4100-24MP 351 Mpps

Security

- Media Access Control (MAC) limiting (per port and per VLAN)
- Allowed MAC addresses: 64,000
- Dynamic Address Resolution Protocol (ARP) dynamic ARP inspection (DAI)
- IP source guard
- Local proxy ARP
- Static ARP support
- Dynamic Host Configuration Protocol (DHCP) snooping
- Captive portal
- Persistent MAC address configurations
- Distributed denial of service (DDoS) protection (CPU control path flooding protection)

Layer 2 Switching

- Maximum MAC addresses per system: 64,000
- Jumbo frames: 9216 bytes
- Range of possible VLAN IDs: 1 to 4094
- Virtual Spanning Tree (VST) instances: 253
- Port-based VLAN
- Voice VLAN
- Physical port redundancy: Redundant trunk group (RTG)
- Compatible with Per-VLAN Spanning Tree Plus (PVST+)
- Routed VLAN interface (RVI)
- Uplink failure detection (UFD)
- ITU-T G.8032: Ethernet Ring Protection Switching
- IEEE 802.1AB: Link Layer Discovery Protocol (LLDP)
- LLDP-MED with VoIP integration
- Default VLAN and multiple VLAN range support
- MAC learning deactivate
- Persistent MAC learning (sticky MAC)
- MAC notification
- Private VLANs (PVLANs)
- Explicit congestion notification (ECN)
- Layer 2 protocol tunneling (L2PT)
- IEEE 802.1ak: Multiple VLAN Registration Protocol (MVRP)
- IEEE 802.1p: Class of service (CoS) prioritization
- IEEE 802.1Q: VLAN tagging
- IEEE 802.1X: Port Access Control
- IEEE 802.1ak: Multiple Registration Protocol
- IEEE 802.3: 10BASE-T
- IEEE 802.3u: 100BASE-T
- IEEE 802.3ab: 1000BASE-T
- IEEE 802.3z: 1000BASE-X
- IEEE 802.3bz: 2.5GBASE-T and 5GBASE-T
- IEEE 802.3ae: 10-Gigabit Ethernet
- IEEE 802.3by: 25-Gigabit Ethernet
- IEEE 802.3af: Power over Ethernet
- IEEE 802.3at: Power over Ethernet Plus
- IEEE 802.3bt: 90 W Power over Ethernet
- IEEE 802.3x: Pause Frames/Flow Control
  - IEEE 802.3ah: Ethernet in the First Mile

Spanning Tree

- IEEE 802.1D: Spanning Tree Protocol
- IEEE 802.1s: Multiple Spanning Tree Protocol (MSTP)
- Number of MST instances supported: 64
- Number of VLAN Spanning Tree Protocol (VSTP) instances supported: 253
- IEEE 802.1w: Rapid reconfiguration of Spanning Tree Protocol

Link Aggregation

- IEEE 802.3ad: Link Aggregation Control Protocol
- 802.3ad (LACP) support:

- Number of LAGs supported: 128
  - Maximum number of ports per LAG: 8
- LAG load-sharing algorithm bridged or routed (unicast or multicast) traffic:
  - IP: S/D IP
  - TCP/UDP: S/D IP, S/D Port
  - Non-IP: S/D MAC
  - Tagged ports support in LAG

Layer 3 Features: IPv4

- Maximum number of ARP entries: 32,000
- Maximum number of IPv4 unicast routes in hardware: 32,650 prefixes; 32,150 host routes
- Maximum number of IPv4 multicast routes in hardware: 16,100 multicast routes
- Routing protocols: RIPv1/v2, OSPF, BGP, IS-IS
- Static routing
- Routing policy
- Bidirectional Forwarding Detection (BFD)
- L3 redundancy: Virtual Router Redundancy Protocol (VRRP)
- VRF-Lite: 1000

Layer 3 Features: IPv6

- Maximum number of neighbor discovery (ND) entries: 16,000
- Maximum number of IPv6 unicast routes in hardware: 16,200 prefixes; 16,050 host routes
- Maximum number of IPv6 multicast routes in hardware: 8000 multicast routes
- Routing protocols: RIPng, OSPFv3, IPv6, IS-IS
- Static routing

Access Control Lists (ACLs) (Junos OS Firewall Filters)

- ACL entries (ACE) in hardware per system:
  - Port-based ACL (PACL) ingress: 4092
  - VLAN-based ACL (VACL) ingress: 4092
  - Router-based ACL (RACL) ingress: 4092
  - Port-based ACL (PACL) egress: 1022
  - VLAN-based ACL (VACL) egress: 511
  - Egress across RACL: 1022
  - ACL counter for denied packets
- ACL counter for permitted packets
- Ability to add/remove/change ACL entries in middle of list (ACL editing)
- L2-L4 ACL

Access Security

- 802.1X port-based
- 802.1X multiple supplicants
- 802.1X with VLAN assignment
- 802.1X with authentication bypass access (based on host MAC address)
- 802.1X with VoIP VLAN support
- 802.1X dynamic ACL based on RADIUS attributes
- 802.1X Supported Extensible Authentication Protocol (EAP) types: Message Digest 5 (MD5), Transport Layer Security (TLS), Tunneled TLS (TTLS), Protected Extensible Authenticated Protocol (PEAP)
- MAC authentication (RADIUS)
- Control plane DoS protection
- Radius functionality over IPv6 for authentication, authorization, and accounting (AAA)
- DHCPv6 snooping
- IPv6 neighbor discovery
- IPv6 source guard
- IPv6 router advertisement (RA) guard
- IPv6 Neighbor Discovery Inspection
- MACsec

High Availability

- Redundant, hot-swappable power supplies
- Redundant, field-replaceable, hot-swappable fans
- GRES for Layer 2 hitless forwarding and Layer 3 protocols on RE failover
- Graceful protocol restart (OSPF, BGP)
- Layer 2 hitless forwarding on RE failover
- Nonstop bridging: LACP, xSTP
- Nonstop routing: PIM, OSPF v2 and v3, RIP v2, RIPng, BGP, BGPv6, IS-IS, IGMP v1, v2, v3

Quality of Service

- L2 QoS
- L3 QoS
- Ingress policing: 1 rate 2 color
- Hardware queues per port: 12 (8 unicast + 4 multicast)
- Scheduling methods (egress): Strict priority (SP), weighted deficit round-robin (WDRR)
- 802.1p, DiffServ code point (DSCP)/IP precedence trust and marking
- L2-L4 classification criteria: Interface, MAC address, Ethertype, 802.1p, VLAN, IP address, DSCP/IP precedence, TCP/UDP port numbers, and more

- Congestion avoidance capabilities: Tail drop, weighted random early detection (WRED)

Multicast

- IGMP: v1, v2, v3
- IGMP snooping
- Multicast Listener Discovery (MLD) snooping
- Protocol Independent Multicast-Sparse Mode (PIM-SM), PIM Source-Specific Mode (PIM-SSM), PIM Dense Mode (PIM-DM)

Management and Analytics Platforms

- Juniper Mist Wired Assurance for campus
- Junos Space® Network Director for campus
- Junos Space Management Applications

Device Management and Operations

- Junos OS CLI
- Out-of-band management: Serial; 10/100/1000BASE-T Ethernet
- Rescue configuration
- Configuration rollback
- Image rollback
- RMON (RFC2819) groups 1, 2, 3, 9
- Remote performance monitoring
- SNMP: v1, v2c, v3
- Network Time Protocol (NTP)
- DHCP server
- DHCP client and DHCP proxy
- DHCP relay and helper
- DHCP local server support
- RADIUS
- TACACS+
- SSHv2
- Secure copy
- HTTP/HTTPs
- Domain Name System (DNS) resolver
- System logging
- Temperature sensor
- Configuration backup via FTP/secure copy

Supported RFCs

- RFC 768 UDP
- RFC 783 TFTP
- RFC 791 IP
- RFC 792 ICMP
- RFC 793 TCP
- RFC 826 ARP
- RFC 854 Telnet client and server
- RFC 894 IP over Ethernet
- RFC 903 RARP
- RFC 906 TFTP Bootstrap
- RFC 951, 1542 BootP
- RFC 1027 Proxy ARP
- RFC 1058 RIP v1
- RFC 1112 IGMP v1
- RFC 1122 Host Requirements
- RFC 1195 Use of OSI IS-IS for Routing in TCP/IP and Dual Environments (TCP/IP transport only)
- RFC 1256 IPv4 ICMP Router Discovery (IRDP)
- RFC 1492 TACACS+RFC 1519 CIDR
- RFC 1587 OSPF NSSA Option
- RFC 1591 DNS
- RFC 1812 Requirements for IP Version 4 Routers
- RFC 1981 Path MTU Discovery for IPv6
- RFC 2030 SNTP, Simple Network Time Protocol
- RFC 2068 HTTP server
- RFC 2080 RIPng for IPv6
- RFC 2131 BOOTP/DHCP relay agent and DHCP server
- RFC 2138 RADIUS Authentication
- RFC 2139 RADIUS Accounting
- RFC 2154 OSPF w/Digital Signatures (password, MD-5)
- RFC 2236 IGMP v2
- RFC 2267 Network Ingress Filtering
- RFC 2328 OSPF v2 (edge-mode)
- RFC 2338 VRRP
- RFC 2362 PIM-SM (edge-mode)
- RFC 2370 OSPF Opaque LSA Option
- RFC 2453 RIP v2
- RFC 2460 Internet Protocol, Version 6 (IPv6) Specification
- RFC 2461 Neighbor Discovery for IP Version 6 (IPv6)
- RFC 2463 Internet Control Message Protocol (ICMPv6) for the Internet Protocol Version 6 (IPv6) Specification
- RFC 2464 Transmission of IPv6 Packets over Ethernet Networks
- RFC 2474 DiffServ Precedence, including 12 queues/port
- RFC 2475 DiffServ Core and Edge Router Functions
- RFC 2526 Reserved IPv6 Subnet Anycast Addresses
- RFC 2597 DiffServ Assured Forwarding (AF)
- RFC 2598 DiffServ Expedited Forwarding (EF)
- RFC 2740 OSPF for IPv6
- RFC 2925 MIB for Remote Ping, Trace
- RFC 3176 sFlow
- RFC 3376 IGMP v3

- RFC 3484 Default Address Selection for Internet Protocol Version 6 (IPv6)
- RFC 3513 Internet Protocol Version 6 (IPv6) Addressing Architecture
- RFC 3569 draft-ietf-ssm-arch-06.txt PIM-SSM PIM Source Specific Multicast
- RFC 3579 RADIUS EAP support for 802.1x
- RFC 6614 RadSec
- RFC 3618 Multicast Source Discovery Protocol (MSDP)
- RFC 3623 OSPF Graceful Restart
- RFC 4213 Basic Transition Mechanisms for IPv6 Hosts and Routers
- RFC 4291 IPv6 Addressing Architecture
- RFC 4443 ICMPv6 for the IPv6 Specification
- RFC 4541 IBMP and MLD snooping services
- RFC 4552 OSPFv3 Authentication
- RFC 4861 Neighbor Discovery for IPv6
- RFC 4862 IPv6 Stateless Address Autoconfiguration
- RFC 4915 MT-OSPF
- RFC 5095 Deprecation of Type 0 Routing Headers
- RFC 5176 Dynamic Authorization Extensions to RADIUS
- RFC 5798 VRRPv3 for IPv6
- Draft-ietf-bfd-base-05.txt Bidirectional Forwarding Detection
- Draft-ietf-idr-restart-10.txt Graceful Restart Mechanism
- Draft-ietf-isis-restart-02 Restart Signaling for IS-IS
- Draft-ietf-isis-wg-multi-topology-11 Multi Topology (MT) Routing in IS-IS for BGP
- Internet draft-ietf-isis-ipv6-06.txt, Routing IPv6 with IS-IS
- LLDP Media Endpoint Discovery (LLDP-MED), ANSI/TIA-1057, draft 08
- PIM-DM Draft IETF PIM Dense Mode draft-ietf-idmr-pimdm-05.txt, draft-ietf-pim-dm-new-v2-04.txt

Supported MIBs

- RFC 1155 SMI
- RFC 1157 SNMPv1
- RFC 1212, RFC 1213, RFC 1215 MIB-II, Ethernet-Like MIB and TRAPs
- RFC 1493 Bridge MIB
- RFC 1643 Ethernet MIB
- RFC 1657 BGP-4 MIB
- RFC 1724 RIPv2 MIB
- RFC 1850 OSPFv2 MIB
- RFC 1905 RFC 1907 SNMP v2c, SMIv2 and Revised MIB-II
- RFC 2011 SNMPv2 for Internet Protocol using SMIv2
- RFC 2012 SNMPv2 for transmission control protocol using SMIv2
- RFC 2013 SNMPv2 for user datagram protocol suing SMIv2
- RFC 2096 IPv4 Forwarding Table MIB
- RFC 2287 System Application Packages MIB
- RFC 2570–2575 SNMPv3, user based security, encryption, and authentication
- RFC 2576 Coexistence between SNMP Version 1, Version 2, and Version 3
- RFC 2578 SNMP Structure of Management Information MIB
- RFC 2579 SNMP Textual Conventions for SMIv2
- RFC 2665 Ethernet-like interface MIB
- RFC 2787 VRRP MIB
- RFC 2819 RMON MIB
- RFC 2863 Interface Group MIB
- RFC 2863 Interface MIB
- RFC 2922 LLDP MIB
- RFC 2925 Ping/Traceroute MIB
- RFC 2932 IPv4 Multicast MIB
- RFC 3413 SNMP Application MIB
- RFC 3414 User-based Security model for SNMPv3
- RFC 3415 View-based Access Control Model for SNMP
- RFC 3621 PoE-MIB (PoE switches only)
- RFC 4188 STP and Extensions MIB
- RFC 4363 Definitions of Managed Objects for Bridges with Traffic Classes, Multicast Filtering, and VLAN extensions
- RFC 5643 OSPF v3 MIB support
- Draft – blumenthal – aes – usm - 08
- Draft – reeder - snmpv3 – usm - 3desede -00
- Draft-ietf-bfd-mib-02.txt
- Draft-ietf-idmr-igmp-mib-13
- Draft-ietf-idmr-pim-mib-09
- Draft-ietf-idr-bgp4-mibv2-02.txt – Enhanced BGP-4 MIB
- Draft-ietf-isis-wg-mib-07

Troubleshooting

- Debugging: CLI via console, Telnet, or SSH
- Diagnostics: Show and debug command, statistics
- Traffic mirroring (port)
- Traffic mirroring (VLAN)
- IP tools: Extended ping and trace
- Juniper Networks commit and rollback

Traffic Monitoring

- ACL-based mirroring
- Mirroring destination ports per system: 4
  - LAG port monitoring
  - Multiple destination ports monitored to 1 mirror (N:1)
- Maximum number of mirroring sessions: 4
- Mirroring to remote destination (over L2): 1 destination VLAN

Safety and Compliance

Electromagnetic Compatibility (EMC) Requirements

- FCC 47 CFR Part 15
- ICES-003 / ICES-GEN
- EN 300 386 V1.6.1
- EN 300 386 V2.1.1
- EN 55032
- CISPR 32
- EN 55024
- CISPR 24
- EN 55035
- CISPR 35
- IEC/EN 61000 Series
- AS/NZS CISPR 32
- VCCI-CISPR 32
- BSMI CNS 13438
- KN 32 and KN 35
- KN 61000 Series
- TEC/SD/DD/EMC-221/05/OCT-16
- TCVN 7189
- TCVN 7317

Safety Requirements Chassis and Optics

- CAN/CSA-C22.2 No. 62368-1 and 60950-1
- UL 62368-1 and 60950-1
- IEC 62368-1 and 60950-1 (All country deviations): CB Scheme report
- IEC 62368-3 for USB and PoE: CB Scheme report
- CFR, Title 21, Chapter 1, Subchapter J, Part 1040
- REDR c 1370 OR CAN/CSA-E 60825-1-Part 1
- IEC 60825-1
- IEC 60825-2

Energy Efficiency

- AT&T TEER (ATIS-06000015.03.2013)
- ECR 3.0.1
- ETSI ES 203 136 V.1.1.1
- Verizon TEEER (VZ.TPR.9205)

Environmental

- Reduction of Hazardous Substances (ROHS) 6/6

Telco

- CLEI code

Noise Specifications

- Noise measurements based on operational tests taken from bystander position (front) and performed at 23° C in compliance with ISO 7779.

Table 3: Acoustic in dBA

Model Number	Acoustics Noise (dBA) – Typical (1 PSU)	Acoustics Noise (dBA) – Maximum (2 PSU)
EX4100-24T	NA	38.0
EX4100-48T	NA	39.2
EX4100-24T-DC	NA	37.6
EX4100-48T-DC	NA	37.7
EX4100-48T-AFI	NA	38.2
EX4100-24P	39.4	50.1
EX4100-48P	38.7	48.2
EX4100-24MP	38.9	51.1
EX4100-48MP	36.8	54.3

Typical: Acoustics measurement at 50% PoE load with 1 Power Supply Unit installed.
Maximum: Acoustics measurement at 100% PoE load with 2 Power Supply Units installed.

Juniper Networks Services and Support

Juniper Networks is the leader in performance-enabling services that are designed to accelerate, extend, and optimize your high-performance network. Our services allow you to maximize operational efficiency while reducing costs and minimizing risk, achieving a faster time to value for your network. Juniper Networks ensures operational excellence by optimizing the network to maintain required levels of performance, reliability, and availability. For more details, please visit https://www.juniper.net/us/en/products.html.

Table 4: EX4100 Power Supply Ratings

Product	Power Supply Rating
EX4100-24T	150 W AC AFO
EX4100-48T	150 W AC AFO
EX4100-48T-AFI	150 W AC AFI
EX4100-24T-DC	150 W DC AFO
EX4100-48T-DC	150 W DC AFO
EX4100-24P	920 W AC AFO
EX4100-48P	920 W AC AFO
EX4100-24MP	920 W AC AFO
EX4100-48MP	920 W AC AFO

Ordering Information

Product	Description
EX4100-48MP	Multigigabit 48 port, PoE++ (up to 90 W) switch with 16x100 MB/1GbE/2.5GbE + 32x10 MB/100 MB/1GbE, 4x10GbE uplinks, 4x25GbE stacking/uplink ports, MACsec AES256, redundant fans, 1x JPSU-920-AC-AFO included with Standard SW, optics sold separately.
EX4100-48MP-TAA	Multigigabit 48 port, PoE++ (up to 90 W) switch with 16x100 MB/1GbE/2.5GbE + 32x10 MB/100 MB/1GbE, 4x10GbE uplinks, 4x25GbE stacking/uplink ports, MACsec AES256, redundant fans, 1x JPSU-920-AC-AFO included with Standard SW, optics sold separately, TAA-compliant.
EX4100-24MP	Multigigabit 24 port, PoE++(up to 90 W) switch with 8x100 MB/1GbE/2.5GbE/5GbE/10GbE + 16x10 MB/100 MB/1GbE, 4x10GbE uplinks, 4x25GbE stacking/uplink ports, MACsec AES256, redundant fans, 1x JPSU-920-AC-AFO included with Standard SW, optics sold separately.
EX4100-24MP-TAA	Multigigabit 24 port, PoE++(up to 90 W) switch with 8x100 MB/1GbE/2.5GbE/5GbE/10GbE + 16x10 MB/100 MB/1GbE, 4x10GbE uplinks, 4x25GbE stacking/uplink ports, MACsec AES256, redundant fans, 1x JPSU-920-AC-AFO included with Standard SW, optics sold separately, TAA-compliant.
EX4100-48P	48-port 10/100/1000BASE-T PoE+ switch, 4x10GbE uplinks, 4x25GbE stacking/uplink ports, MACsec AES256, redundant fans, 1x JPSU-920-AC-AFO included with Standard SW. optics sold separately.
EX4100-48P-TAA	48-port 10/100/1000BASE-T PoE+ switch, 4x10GbE uplinks, 4x25GbE stacking/uplink ports, MACsec AES256, redundant fans, 1x JPSU-920-AC-AFO included with Standard SW. optics sold separately, TAA-compliant.
EX4100-24P	24-port 10/100/1000BASE-T PoE+ switch, 4x10GbE uplinks, 4x25GbE stacking/uplink ports, MACsec AES256, redundant fans, 1x JPSU-920-AC-AFO included with Standard SW, optics sold separately.
EX4100-24P-TAA	24-port 10/100/1000BASE-T PoE+ switch, 4x10GbE uplinks, 4x25GbE stacking/uplink ports, MACsec AES256, redundant fans, 1x JPSU-920-AC-AFO included with Standard SW, optics sold separately, TAA-compliant.
EX4100-48T	48-port 10/100/1000BASE-T switch, 4x10GbE uplinks, 4x25GbE stacking/uplink ports, MACsec AES256, redundant fans, 1x JPSU-150-AC-AFO included with Standard SW, optics sold separately.
EX4100-48T-TAA	48-port 10/100/1000BASE-T switch, 4x10GbE uplinks, 4x25GbE stacking/uplink ports, MACsec AES256, redundant fans, 1x JPSU-150-AC-AFO included with Standard SW, optics sold separately, TAA-compliant.
EX4100-24T	24-port 10/100/1000BASE-T switch, 4x10GbE uplinks, 4x25GbE stacking/uplink ports, MACsec AES256, redundant fans, 1x JPSU-150-AC-AFO included with Standard SW, optics sold separately.
EX4100-24T-TAA	24-port 10/100/1000BASE-T switch, 4x10GbE uplinks, 4x25GbE stacking/uplink ports, MACsec AES256, redundant fans, 1x JPSU-150-AC-AFO included with Standard SW, optics sold separately, TAA-compliant.
EX4100-48T-AFI	48-port 10/100/1000BASE-T switch, 4x10GbE uplinks, 4x25GbE stacking/uplink ports, MACsec AES256, redundant fans, back-to-front airflow, 1x JPSU-150-AC-AFI included with Standard SW, optics sold separately.
EX4100-48T-AFI-TAA	48-port 10/100/1000BASE-T switch, 4x10GbE uplinks, 4x25GbE stacking/uplink ports, MACsec AES256, redundant fans, back-to-front airflow, 1x JPSU-150-AC-AFI included with Standard SW, optics sold separately, TAA-compliant.
EX4100-48T-DC	48-port 10/100/1000BASE-T switch, 4x10GbE uplinks, 4x25GbE stacking/uplink ports, MACsec AES256, redundant fans, 1x JPSU-150-DC-AFO included with Standard SW, optics sold separately.
EX4100-48T-DC-TAA	48-port 10/100/1000BASE-T switch, 4x10GbE uplinks, 4x25GbE stacking/uplink ports, MACsec AES256, redundant fans, 1x JPSU-150-DC-AFO included with Standard SW, optics sold separately, TAA-compliant.
EX4100-24T-DC	24-port 10/100/1000BASE-T switch, 4x10GbE uplinks, 4x25GbE stacking/uplink ports, MACsec AES256, redundant fans, 1x JPSU-150-DC-AFO included with Standard SW, optics sold separately.
EX4100-24T-DC-TAA	24-port 10/100/1000BASE-T switch, 4x10GbE uplinks, 4x25GbE stacking/uplink ports, MACsec AES256, redundant fans, 1x JPSU-150-DC-AFO included with Standard SW, optics sold separately, TAA-compliant.
Perpetual Licenses	
S-EX-A-C2-P	Software, EX Series Advanced license, Class 2 (24 ports), Perpetual license for EX4100 24-port switches
S-EX-P-C2-P	Software, EX Series Premium license, Class 2 (24 ports), Perpetual license for EX4100 24-port switches
S-EX-A-C3-P	Software, EX Series Advanced license, Class 3 (32 or 48 ports), Perpetual license for EX4100 48-port switches
S-EX-P-C3-P	Software, EX Series Premium license, Class 3 (32 or 48 ports), Perpetual license for EX4100 48-port switches
S-EX-MACSEC-C2-P	Software, EX Series MACsec license, Class 2 (24 ports), Perpetual license for EX4100 24-port switches
S-EX-MACSEC-C3-P	Software, EX Series MACsec license, Class 3 (48 ports), Perpetual license for EX4100 48-port switches
S-EX4100-FBT-P	Software, EX Series Flow Based Telemetry License. Perpetual license for all EX4100 switches.
Subscription Licenses	
S-EX-A-C2-1	Software, EX Series Advanced license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches, 1 year
S-EX-A-C2-3	Software, EX Series Advanced license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches, 3 year
S-EX-A-C2-5	Software, EX Series Advanced license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches, 5 year
S-EX-P-C2-1	Software, EX Series Premium license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches, 1 year
S-EX-P-C2-3	Software, EX Series Premium license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches, 3 year
S-EX-P-C2-5	Software, EX Series Premium license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches, 5 year
S-EX-A-C3-1	Software, EX Series Advanced license, Class 3 (32 or 48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches, 1 year
S-EX-A-C3-3	Software, EX Series Advanced license, Class 3 (32 or 48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches, 3 year
S-EX-A-C3-5	Software, EX Series Advanced license, Class 3 (32 or 48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches, 5 year
S-EX-P-C3-1	Software, EX Series Premium license, Class 3 (32 or 48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches, 1 year
S-EX-P-C3-3	Software, EX Series Premium license, Class 3 (32 or 48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches, 3 year
S-EX-P-C3-5	Software, EX Series Premium license, Class 3 (32 or 48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches, 5 year
S-EX-A-C2-1-COR	Software, EX Series Advanced license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches with SVC CORE support, 1 year
S-EX-A-C2-3-COR	Software, EX Series Advanced license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches with SVC CORE support, 3 year

Product	Description

EX4100-48T-CHAS	Spare chassis, 48-port 10/100/1000BASE-T (optics, power supplies, and fans sold separately)

About Juniper Networks

Juniper Networks believes that connectivity is not the same as experiencing a great connection. Juniper's AI-Native Networking Platform is built from the ground up to leverage AI to deliver the best and most secure user experiences from the edge to the data center and cloud. Additional information can be found at Juniper Networks (www.juniper.net) or connect with Juniper on X (Twitter), LinkedIn, and Facebook.

EX4400 LINE OF ETHERNET SWITCHES DATASHEET

Product overview

The EX4400 line of Ethernet access switches offers secure, cloud-ready access for enterprise campus, branch, and data center networks for the AI era. The platforms, which deliver up to 3600W of PoE power, boost network performance and visibility in support of ongoing security needs.
As part of the underlying infrastructure for Juniper Mist Wired Assurance, the EX4400 is purpose-built for, and managed by, the cloud. The switch leverages Mist AI to simplify operations and provide better visibility into the experience of connected devices, delivering a refreshing, user experience-first approach to access layer switching.

Product description

The Juniper Networks® EX4400 line of Ethernet switches offers a secure, cloud-ready portfolio of access switches ideal for enterprise branch, campus, and data center networks. The EX4400 switches combine the simplicity of the cloud, the power of Mist AI™, and a robust hardware foundation with best-in-class security and performance to deliver a differentiated approach to access switching in the cloud, mobile, and IoT era. With Juniper Mist™ Wired Assurance, you can effortlessly onboard, configure, and manage the EX4400 from the cloud. This simplifies operations, improves visibility, and optimizes experiences for connected devices and users.

Key features:

- Cloud-ready, driven by Mist AI with Juniper Mist Wired Assurance and Marvis Virtual Network Assistant
- Ethernet VPN–Virtual Extensible LAN (EVPN-VXLAN) to the access layer
- End-to-end encryption using Media Access Control Security (MACsec) AES256
- IEEE 802.3bz Multigigabit
- IEEE 802.3bt Power over Ethernet (PoE++)
- WiFi 7-ready switches, delivering up to 3600W of PoE power per switch
- Standards-based microsegmentation using group-based policies (GBP)
- Flow-based telemetry to monitor traffic flows for anomaly detection
- Precision Timing Protocol–Transparent clock
- 10-member Virtual Chassis support

Offering a full suite of Layer 2 and Layer 3 capabilities, the EX4400 enables a variety of deployments, including campus, branch, and data center top-of-rack deployments. As requirements grow, Juniper's Virtual Chassis technology allows up to 10 EX4400 switches to be seamlessly interconnected and managed as a single device, delivering a scalable, pay-as-you-grow solution for expanding network environments. The EX4400 models deliver up to 3600W of PoE power, making them ideal for Wi-Fi 7 deployments, smart buildings including lighting, IoT sensors, HVAC, and management systems or supporting other power-hungry PoE endpoints.

The EX4400 line consists of 10 ten base SKUs:

- The EX4400-48MXP, offering 12 x 100M/1/2.5/5/10GbE and 36 x 100M/1/2.5GbE PoE access ports, delivering up to 90 W per PoE port with an overall total 3600 W of PoE power budget (using two power supplies)
- The EX4400-48MP, offering 12 x 100M/1/2.5/5/10GbE and 36 x 100M/1/2.5GbE PoE access ports, delivering up to 90 W per PoE port with an overall total 2200 W of PoE power budget (using two power supplies)
- The EX4400-24MP, offering 24 x 100M/1/2.5/5/10GbE PoE access ports, delivering up to 90 W per port with an overall total 1776 W of PoE power budget (using two power supplies). A total PoE budget of 2160 W can be achieved with two optional 1600 W power supplies

- The EX4400-24T, offering 24 x 1GbE non-PoE access ports
- The EX4400-24P, offering 24 x 1GbE PoE access ports, delivering up to 90 W per port with an overall total 1806 W of PoE power budget (using two power supplies). A total PoE budget of 2160 W can be achieved with two optional 1600 W power supplies
- The EX4400-48XP, offering 48 x 1GbE PoE access ports, delivering up to 90 W per port with an overall total 3600 W of PoE power budget (using two power supplies)
- The EX4400-48P, offering 48 x 1GbE PoE access ports, delivering up to 90 W per port with an overall total 2200 W of PoE power budget (using two power supplies)
- The EX4400-24X, offering 24 x 10GbE SFP+ fiber access/ distribution ports
- The EX4400-48F, offering 12 x 10GbE SFP+ and 36 x 1GbE SFP fiber access ports

Note: EX4400-24X can be used as an access or a distribution layer switch.

Each EX4400 model offers a choice of optional 4 x 1/10GbE SFP+, a 4 x 1/10/25GbE SFP28 and a 1 x 100GbE QSFP28 extension module. The EX4400 switches include two dedicated 100GbE ports to support virtual chassis connections that can be reconfigured to be used as Ethernet ports for uplink connectivity. The 100GbE ports can also accept 40GbE optics for virtual chassis connection or uplink connectivity. EX4400 switches also include high availability (HA) features such as redundant, hot-swappable power supplies, and field-replaceable fans to ensure maximum uptime. In addition, PoE-enabled EX4400 switch models offer standards-based 802.3af/at/bt (PoE/PoE+/PoE++) for delivering up to 90 watts on any access port. The EX4400 switches can be configured to deliver fast PoE capability that enables the switches to deliver PoE power to connected PoE devices within a few seconds of power being applied to the switches. In addition, the EX4400 switches support perpetual PoE that provides uninterrupted power to connected PoE powered devices (PDs), even when the switch is rebooting.

Architecture and key components

Cloud management with Juniper Mist Wired Assurance, driven by Mist AI

EX4400 switches can be quickly and easily onboarded (Day 0), provisioned (Day 1), and managed (Day 2+) from the cloud with Juniper Mist Wired Assurance, which brings AI-powered automation and insights that optimize experiences for end users and connected devices. The EX4400 provides rich Junos® operating system telemetry data for Mist AI, helping achieve simpler operations, shorter mean time to repair (MTTR), and streamlined troubleshooting. For more information, read the Juniper Mist Wired Assurance datasheet.

In addition to Juniper Mist Wired Assurance, Marvis Virtual Network Assistant—a key part of The Self-Driving Network™—makes the Mist AI engine interactive. A digital extension of the IT team, Marvis offers automatic fixes or recommended actions, allowing IT teams to streamline how they troubleshoot and manage their network operations.

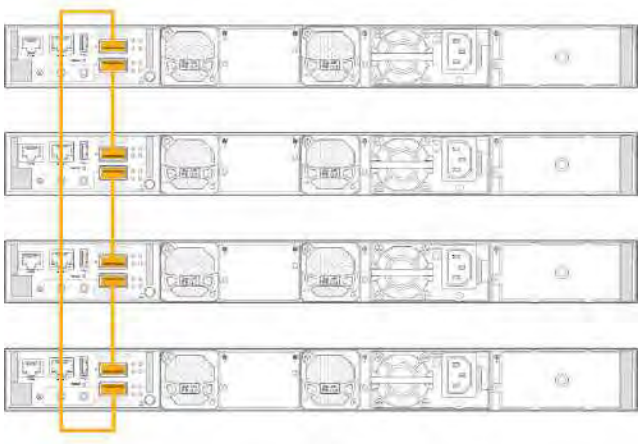

Figure 1: EX4400 Virtual Chassis configuration interconnected via dedicated rear-panel 100GbE ports

EVPN-VXLAN technology

Most traditional campus networks have used a single-vendor, chassis-based architecture that worked well for smaller, static campuses with few endpoints. However, this approach is too rigid to support the changing needs of modern campus networks. The EX4400 supports EVPN-VXLAN, extending an end-to-end fabric from campus core to distribution to the access layer.

An EVPN-VXLAN fabric is a simple, programmable, highly scalable architecture built on open standards. This technology can be applied in both data centers and campuses for architectural consistency. A campus EVPN-VXLAN architecture uses a Layer 3 IP-based underlay network and an EVPN-VXLAN overlay network. A flexible overlay network based on a VXLAN overlay with an EVPN control plane efficiently provides Layer 2 and/or Layer 3 connectivity throughout the network.

The main advantages of EVPN-VXLAN in campus networks are:

- **Flexibility of consistent VLANs across the network**: Endpoints can be placed anywhere in the network and remain connected to the same logical L2 network, enabling a virtual topology to be decoupled from the physical topology.
- **Microsegmentation using group-based policy**: Group-based policies (GBP) with EVPN-VXLAN-based architecture let you deploy a common set of policies and services across campuses with support for L2 and L3VPNs.

- **Scalability**: With an EVPN control plane, enterprises can scale out easily by adding more core, aggregation, and access layer devices as the business grows without having to redesign the network or perform a forklift upgrade. Using an L3 IP-based underlay coupled with an EVPN-VXLAN overlay, campus network operators can deploy much larger and more resilient networks than would otherwise be possible with traditional L2 Ethernet-based architectures.

Virtual Chassis technology

Juniper's Virtual Chassis technology allows multiple interconnected switches to operate as a single, logical unit, enabling users to manage all platforms as one virtual device.

Up to 10 EX4400 switches can be interconnected as a Virtual Chassis using two 100GbE ports. These ports are located on the front-panel for EX4400-24X and on the rear-panel for the remaining EX4400 switches. They accept 100G and 40G optics and are configured as Virtual Chassis ports by default (except for EX4400-24X).

As 100GbE uplinks, these ports can also be channelized as 4 x 10GbE/25GbE Ethernet uplink ports.

The EX4400 switches support HiGig as well as HiGig over Ethernet (HGoE) protocols for forming a virtual chassis. However, the EX4400-24X supports only HGoE protocol for virtual chassis formation. A virtual chassis consisting of EX4400 switches (except EX4400-24X) may use either the HiGig protocol (default) or the HGoE protocol. A virtual chassis consisting of only EX4400-24X switches or a mix of any EX4400 and EX4400-24X switches, must use HGoE protocol to form a virtual chassis.

Flow-based telemetry

Flow-based telemetry enables flow-level analytics, allowing network administrators to monitor thousands of traffic flows on the EX4400 without burdening the CPU. This improves network security by monitoring, baselining, and detecting flow anomalies. For example, if predefined flow thresholds are breached due to an attack, IP Flow Information Export (IPFIX) alerts can be sent to an external server so the attack can be quickly identified. Network administrators can also automate specific workflows, such as further examining the traffic or quarantining a port, to triage the issue.

Features and benefits

Simplified operations with Juniper Mist Wired Assurance

The EX4400 is fully cloud onboarded, provisioned, and managed by Juniper Mist Wired Assurance. The EX4400 is designed from the ground up to deliver the rich telemetry that enables AI for IT operations (AIOps) with simplified operations from Day 0 to Day 2 and beyond. Juniper Mist Wired Assurance provides detailed switch insights for easier troubleshooting and improved time to resolution by offering the following features:

- **Day 0 operations**: Onboard switches seamlessly by claiming a greenfield switch or all purchased switches with a single activation code for true plug-and-play simplicity. You may also onboard brownfield switches with the adopt switch process.
- **Day 1 operations**: Implement a template-based configuration model for bulk rollouts of traditional and campus fabric deployments while retaining the flexibility and control required to apply custom site- or switch-specific attributes. Automate provisioning of ports via Dynamic Port Profiles.
- **Day 2 operations**: Leverage the AI in Juniper Mist Wired Assurance to meet service-level expectations such as throughput, successful connects, switch health, and switch bandwidth with key pre- and post-connection metrics (see Figure 2). Add the self-driving capabilities in Marvis Actions to detect needle in the haystack issues such as missing VLANs, DHCP failure scopes, wired authentication failures, bad cables, port negotiation mismatches, persistently failing clients, detection of L2 loops, misconfigured ports, and traffic loops (see Figure 3). Perform software upgrades easily through Juniper Mist cloud. EX4400 switches also support secure packet capture (pcap) and export to an external collector (in the cloud) to aid in monitoring and troubleshooting poor network experience.

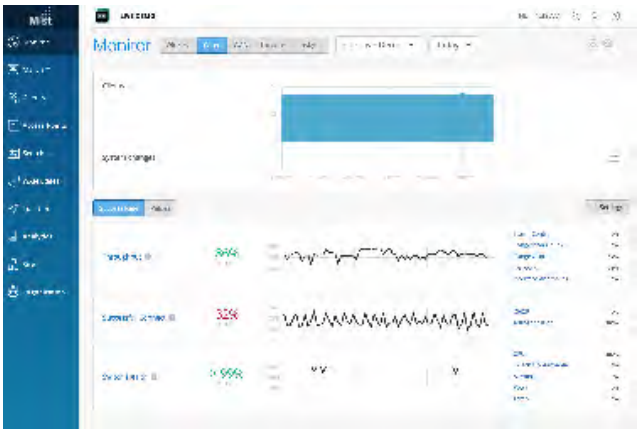

Figure 2: Juniper Mist Wired Assurance service-level expectations screen

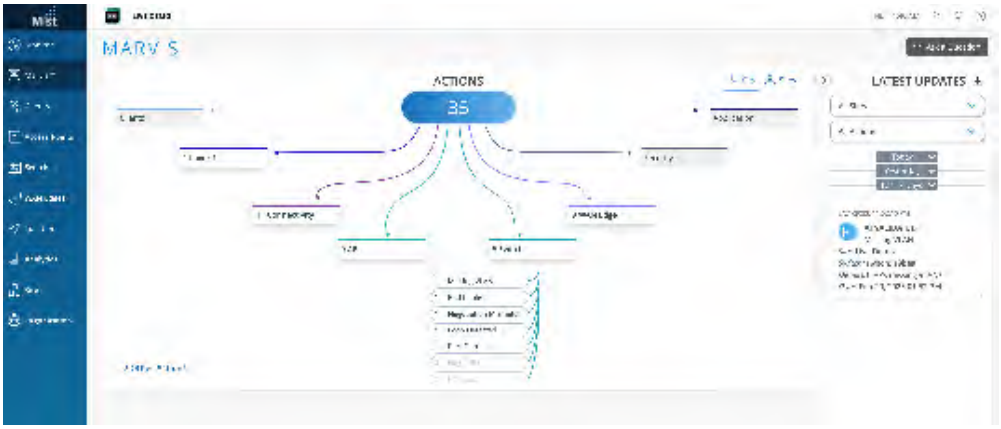

Figure 3: Marvis Actions for wired switches

The addition of Marvis lets you start building a self-driving network that simplifies network operations and streamlines troubleshooting via automatic fixes for EX Series switches or recommended actions for external systems.

For more information, see Juniper Mist Wired Assurance.

EX4400 deployments

The EX4400 switches can be deployed in branch and campus access/distribution layer networks or as top-of-rack switches in data center environments. 10GbE/25GbE/40GbE/100GbE uplinks support technologies such as EVPN multihoming etc.

EVPN-VXLAN for campus core, distribution, and access

Juniper offers complete flexibility in choosing any of the following validated EVPN-VXLAN campus fabrics that cater to networks of different sizes, scale, and segmentation requirements:

- **EVPN multihoming (collapsed core or distribution)**: A collapsed core architecture combines the core and distribution layers into a single switch, turning the traditional three-tier hierarchal network into a two-tier network. EVPN multihoming on a collapsed core eliminates the need for Spanning Tree Protocol (STP) across campus networks by providing link aggregation capabilities from the access layer to the core layer. This topology is best suited for small to medium distributed enterprise networks and allows for consistent VLANs across the network. This topology uses ESI (Ethernet Segment Identifier) LAG (Link Aggregation) and is a standards-based protocol.
- **Campus Fabric Core distribution**: When EVPN VXLAN is configured across core and distribution layers, it becomes a campus Fabric Core Distribution architecture that can be configured in two modes: centrally or edge routed bridging overlay. This architecture provides an opportunity for an administrator to move toward campus-fabric IP Clos without a forklift upgrade of all access switches in the existing network while bringing in the advantages of moving to a campus fabric and providing an easy way to scale out the network.
- **Campus fabric IP Clos**: When EVPN VXLAN is configured on all layers, including access, it is called the campus fabric IP Clos architecture. This model is also referred to as “end-to-end,” given that VXLAN tunnels are terminated at the access layer. The availability of VXLAN at access layer provides the opportunity to bring policy enforcement and microsegmentation to the access layer (closest to the source) using standards-based Group Based Policy (GBP) to segment traffic even within a VLAN. GBP tags are assigned dynamically to clients as part of Radius transaction by Juniper Mist Cloud NAC. This topology works for small, medium, and large campus architectures that need macro and microsegmentation.

In all these EVPN-VXLAN deployment modes, EX4400 switches can be used in standalone or Virtual Chassis configurations. All three topologies are standards-based and interoperable with third-party vendors.

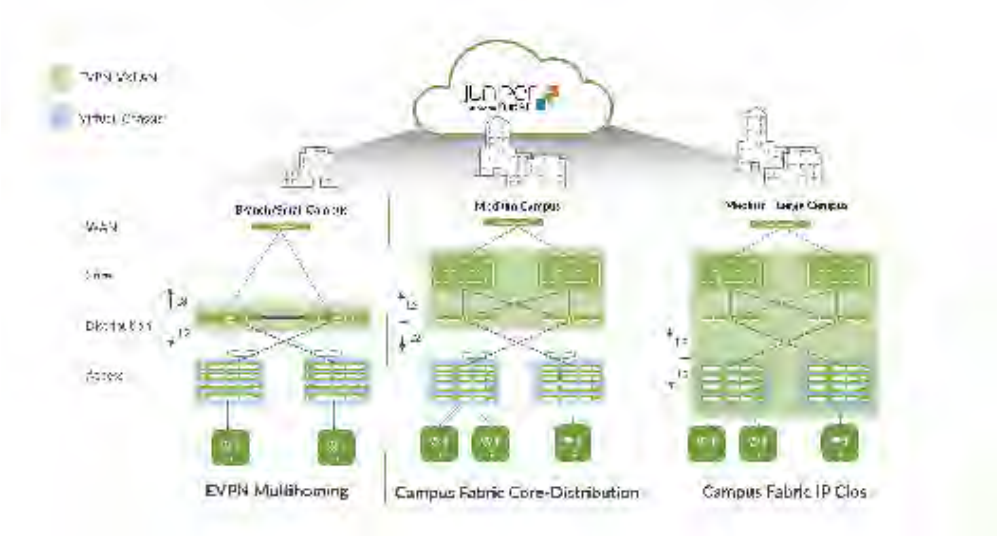

Figure 4: Campus fabrics showing Virtual Chassis and EVPN-VXLAN-based architectures

Managing AI-driven Campus Fabric with the Juniper Mist Cloud

Juniper Mist Wired Assurance brings cloud management and Mist AI to campus fabrics. It sets a new standard that moves away from traditional network management toward AI-Native operations, while delivering better experiences to connected devices. The Juniper Mist Cloud streamlines deployment and management of campus fabric architectures by allowing:

- Automated deployment and zero touch deployment (ZTD)
- Anomaly detection
- Root cause analysis

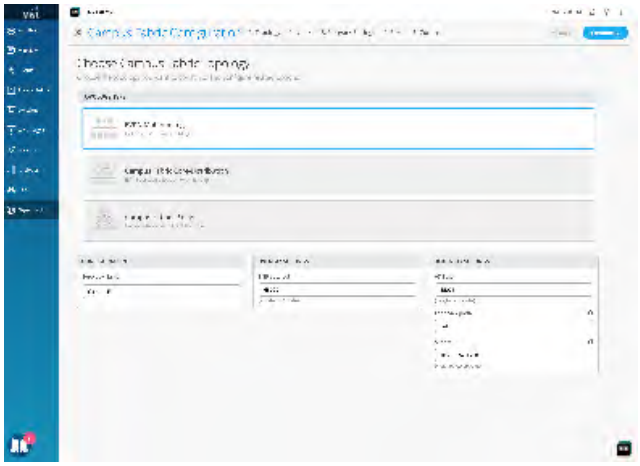

Figure 5: EVPN multihoming configuration via the Juniper Mist Cloud

Chassis class availability

The EX4400 switches deliver high availability through redundant power supplies and fans, graceful Routing Engine switchover (GRES), and nonstop bridging and routing when deployed in a Virtual Chassis configuration.

In a Virtual Chassis configuration, each EX4400 switch is capable of functioning as a Routing Engine (RE). When two or more EX4400 switches are interconnected, a single control plane is shared among all Virtual Chassis member switches. Junos OS automatically initiates an election process to assign a master (active) and backup (hot-standby) RE. An integrated L2 and L3 GRES feature maintains uninterrupted access to applications, services, and IP communications in the unlikely event of a primary RE failure.

When more than two switches are interconnected in a Virtual Chassis configuration, the remaining switch elements act as line cards and are available to assume the backup RE position should the designated master fail. Master, backup, and line card priority status can be assigned to dictate the order of ascension. This N+1 RE redundancy, coupled with the GRES, nonstop active routing (NSR), and nonstop bridging (NSB) capabilities of Junos OS, assures a smooth transfer of control plane functions following unexpected failures.

The EX4400 implements the same slot/module/port numbering schema as other Juniper Networks chassis-based products when numbering Virtual Chassis ports, providing true chassis-like operations. By using a consistent operating system and a single configuration file, all switches in a Virtual Chassis configuration are treated as a single device, simplifying overall system maintenance and management.

Individually, the EX4400 offers a number of HA features that are typically associated with modular chassis-based switches. When combined with the field-proven Junos OS and L2/L3 failover capabilities, these features provide the EX4400 with true carrier-class reliability.

- **Redundant power supplies**: The EX4400 line of Ethernet switches supports redundant, load-sharing, hot-swappable, and

field-replaceable power supplies to maintain uninterrupted operations. Thanks to its compact footprint, the EX4400 requires significantly less power than chassis-based switches delivering equivalent port densities.

- **Hot-swappable fans**: The EX4400 includes hot-swappable fans, providing sufficient cooling (for a short duration), even if one of the fans were to fail.
- **Nonstop bridging and nonstop active routing**: NSB and NSR on the EX4400 ensure that control plane protocols, states, and tables are synchronized between primary and standby REs to prevent protocol flaps or convergence issues following a Routing Engine failover.
- **Redundant trunk group (RTG)**: To avoid the complexities of Spanning Tree Protocol (STP) without sacrificing network resiliency, the EX4400 employs redundant trunk groups to provide the necessary port redundancy and simplify switch configuration.
- **Cross-member link aggregation**: Cross-member link aggregation allows redundant link aggregation connections between devices in a single Virtual Chassis configuration, providing an additional level of reliability and availability.
- **IPv4 and IPv6 routing support**: IPv4 and IPv6 Layer 3 routing (OSPF and BGP) is available with an Enhanced license, enabling highly-resilient networks.

MACsec AES256

The EX4400 switches support IEEE 802.1ae MACsec with AES-256-bit encryption to increase security of point-to-point traffic communications. MACsec provides encrypted communication at the link layer that is capable of identifying and preventing threats from denial of service (DoS) and other intrusion attacks, as well as man-in-the-middle, masquerading, passive wiretapping, and playback attacks launched from behind the firewall. When MACsec is deployed on all ports, the traffic is encrypted on the wire, but the traffic inside the switch is not. This allows the switch to apply network policies such as quality of service (QoS) or deep packet inspection (DPI) to each packet without compromising the security of packets on the wire. On the EX4400 switches, the MACsec AES-256 encryption capability is supported on all user-facing interfaces and the 25GbE and 100GbE extension modules. EX4400-24X supports MACsec AES256 on the native front-panel 100GbE ports as well.

PoE/PoE+/Poe++ power, perpetual and fast PoE

The EX4400 delivers PoE for supporting connected devices such as phones, surveillance cameras, IoT devices, and 802.11AX/Wi-Fi 6/Wi-Fi 7 access points, offering a PoE power budget of up to 360036 W and supporting up to 90 W per port based on the IEEE 802.3bt PoE standard. With their higherhigher PoE budget, EX4400 switches can can support building lighting and IOT sensors in new buildings, helping to simplify the power cabling infrastructure.

The EX4400 switches support perpetual PoE, which provides uninterrupted power to connected PoE powered devices (PDs) even when the switch is rebooting.

The EX4400 switches also support a fast PoE capability that delivers PoE power to connected endpoints during a switch reboot, even before the switch is fully operational. This is especially beneficial in situations where the endpoint only needs the power and is not necessarily dependent on network connectivity.

Junos Telemetry Interface

The EX4400 supports Junos Telemetry Interface (JTI), a modern telemetry streaming feature designed for switch health and performance monitoring. Sensor data can be streamed at configurable periodic intervals to a management system, enabling network administrators to monitor individual link and node utilization as well as troubleshoot issues such as network congestion in real time. JTI delivers the following features:

- Performance management by provisioning sensors to collect and stream data and analyze application and workload flow paths through the network
- Capacity planning and optimization by proactively detecting hotspots and monitoring latency and microbursts
- Troubleshooting and root cause analysis via high-frequency monitoring and correlation of overlay and underlay networks

Junos Operating System

The EX4400 switches run Junos OS, Juniper's powerful and robust network operating system that powers all Juniper switches, routers, and firewalls. By utilizing a common operating system, Juniper delivers a consistent implementation and operation of control plane features across all products. To maintain that consistency, Junos OS adheres to a highly-disciplined development process that uses a single source code and employs a highly available modular architecture that prevents isolated failures from bringing down an entire system.

These attributes are fundamental to the core value of the software, enabling all Junos OS-powered products to be updated simultaneously with the same software release. All features are fully regression tested, making each new release a true superset of the previous version. Customers can deploy the software with

complete confidence that all existing capabilities are maintained and operate in the same way.

Flex licensing

Juniper Flex licensing offers a common, simple, and flexible licensing model for EX Series access switches, enabling customers to purchase features based on their network and business needs.

Flex licensing is offered in Standard, Advanced, and Premium tiers. Standard tier features are available with the Junos OS image that ships with EX Series switches. Additional features can be unlocked with the purchase of a Flex Advanced or Flex Premium license.

The Flex and Premium licenses for the EX Series platforms are class-based, determined by the number of access ports on the switch. Class 1 (C1) switches have 12 ports, Class 2 (C2) switches have 24 ports, and Class 3 (C3) switches have 32 or 48 ports.

The EX4400 switches support both subscription and perpetual Flex licenses. Subscription licenses are offered for three- and five-year terms. In addition to Junos OS features, the Flex Advanced and Premium subscription licenses include Juniper Mist Wired Assurance. Flex Advanced and Premium subscription licenses also allow portability across the same tier and class of switches, ensuring investment protection for the customer.

For a complete list of features supported by the Flex Standard, Advanced, and Premium tiers, or to learn about Junos OS EX Series licenses, please visit: https://www.juniper.net/documentation/us/en/software/license/juniper-licensing-user-guide/topics/concept/licenses-for-ex.html.

Enhanced limited lifetime warranty

The EX4400 switches include an enhanced limited lifetime hardware warranty that provides return-to-factory switch replacement for as long as the original purchaser owns the product. The warranty includes lifetime software updates, advanced shipping of spares within one business day, and 24x7 Juniper Networks Technical Assistance Center (JTAC) support for 90 days after the purchase date. Power supplies and fan trays are covered for a period of five years. For complete details, please visit https://support.juniper.net/support/pdf/warranty/enhanced-limited-lifetime-warranty-ex-series.pdf.

Product options

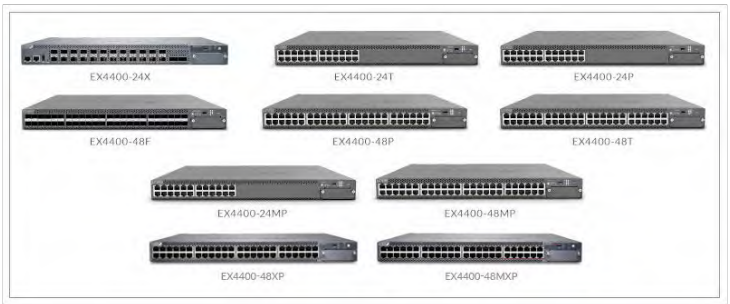
Available EX4400 models are listed in Table 1.

Table 1. EX4400 Line of Ethernet Switches

Model/Product SKU	Access/Revenue Port Configuration	PoE++ Ports	PoE++ Budget 1 PSU/2 PSU		10GbE Ports (max. with module)	25GbE Ports (max. with module)	100GbE/ 40GbE Ports (max with module)	Power Supply Rating	Cooling
			220 V	110 V					
EX4400-48XP	48-port 10/100/1000BASE-T	48	1650 W/ 3600 W	724 W/ 1748 W	0(4)	0(4)	2(3)	2000 W AC	AFO (front-to-back airflow)
EX4400-48P	48-port 10/100/1000BASE-T	48	1310 W/ 2200 W	773 W/ 1796 W	0(4)	0(4)	2(3)	1600 W AC	AFO (front-to-back airflow)
EX4400-24P	24-port 10/100/1000BASE-T	24	783 W/ 1806 W	783 W/ 1806 W	0(4)	0(4)	2(3)	1050 W AC	AFO (front-to-back airflow)
EX4400-24P	24-port 10/100/1000BASE-T	24	1320 W/ 2160 W	783 W/ 1806 W	0(4)	0(4)	2(3)	1600 W AC (optional)	AFO (front-to-back airflow)
EX4400-48T	48-port 10/100/1000BASE-T	0	N/A	N/A	0(4)	0(4)	2(3)	550 W AC	AFO (front-to-back airflow)
EX4400-24T	24-port 10/100/1000BASE-T	0	N/A	N/A	0(4)	0(4)	2(3)	550 W AC	AFO (front-to-back airflow)
EX4400-24X	24-Port 1/10GbE SFP+	0	N/A	N/A	24 (28)	0(4)	2(3)	550 W AC	AFO (front-to-back airflow)
EX4400-48F	12-port 1000/10000BASE-X + 36-port 100/1000BASE-X	0	N/A	N/A	12(16)	0(4)	2(3)	550 W AC	AFO (front-to-back airflow)
EX4400-24MP	24x-port 100M/1/2.5/5/10GbE	24	753 W/ 1776 W	753 W/ 1776 W	24(28)	0(4)	2(3)	1050 W AC	AFO (front-to-back airflow)
EX4400-24MP	24x-port 100M/1/2.5/5/10GbE	24	1290 W/ 2160 W	753 W/ 1776 W	24(28)	0(4)	2(3)	1600 W AC (optional)	AFO (front-to-back airflow)
EX4400-48MXP	48-port GbE (12x100M/1/2.5/5/10GbE + 36x100M/1/2.5GbE	48	1650 W/ 3600 W	724 W/ 1748 W	12(16)	0(4)	2(3)	2000 W AC	AFO (front-to-back airflow)

Model/Product SKU	Access/Revenue Port Configuration	PoE++ Ports	PoE++ Budget 1 PSU/2 PSU		10GbE Ports (max. with module)	25GbE Ports (max. with module)	100GbE/ 40GbE Ports (max with module)	Power Supply Rating	Cooling
			220 V	110 V					
EX4400-48MP	48-port GbE (12x100M/1/2.5/5/10GbE + 36x100M/1/2.5GbE	48	1260 W/ 2200 W	723 W/ 1746 W	12(16)	0(4)	2(3)	1600 W AC	AFO (front-to-back airflow)
EX4400-48T-AFI	48-port 10/100/1000BASE-T	0	N/A	N/A	0(4)	0(4)	2(3)	550 W AC	AFI (back-to-front airflow)
EX4400-24T-AFI	24-port 10/100/1000BASE-T	0	N/A	N/A	0(4)	0(4)	2(3)	550 W AC	AFI (back-to-front airflow)
EX4400-48T-DC	48-port 10/100/1000BASE-T	0	N/A	N/A	0(4)	0(4)	2(3)	550 W DC	AFO (front-to-back airflow)
EX4400-48T-DC-AFI	48-port 10/100/1000BASE-T	0	N/A	N/A	0(4)	0(4)	2(3)	550 W DC	AFI (back-to-front airflow)
EX4400-24T-DC	24-port 10/100/1000BASE-T	0	N/A	N/A	0(4)	0(4)	2(3)	550 W DC	AFO (front-to-back airflow)
EX4400-24T-DC-AFI	24-port 10/100/1000BASE-T	0	N/A	N/A	0(4)	0(4)	2(3)	550 W DC	AFI (back-to-front airflow)
EX4400-24X-AFI	24-Port 1/10GbE SFP+	0	N/A	N/A	24 (28)	0 (4)	2(3)	550 W AC	AFI (back-to-front airflow)
EX4400-24X-DC	24-Port 1/10GbE SFP+	0	N/A	N/A	24 (28)	0 (4)	2(3)	550 W DC	AFO (front-to-back airflow)
EX4400-24X-DC-AFI	24-Port 1/10GbE SFP+	0	N/A	N/A	24 (28)	0 (4)	2(3)	550 W DC	AFI (back-to-front airflow)
EX4400-48F-AFI	12-port 1000/10000BASE-X + 36-port 100/1000BASE-X	0	N/A	N/A	12(16)	0(4)	2(3)	550 W AC	AFI (back-to-front airflow)
EX4400-48F-DC-AFI	12-port 1000/10000BASE-X + 36-port 100/1000BASE-X	0	N/A	N/A	12(16)	0(4)	2(3)	550 W DC	AFI (back-to-front airflow)
EX4400-48F-DC	12-port 1000/10000BASE-X + 36-port 100/1000BASE-X	0	N/A	N/A	12(16)	0(4)	2(3)	550 W DC	AFO (front-to-back airflow)

[1]The POE budget numbers in the table above are supported from Junos release 22.3R1 onwards'



The EX4400 also offers spare chassis options without power supplies or fans, providing customers with the flexibility to stock SKUs (see Table 2). See the Ordering Information section for additional details.

Table 2. EX4400 Spare Chassis SKUs

Spare Chassis SKU	Description	JPSU-550-C-AC-AFO + EX4400-FAN	JPSU-550-C-AC-AFI + EX4400-FAN-AFI	JPSU-550-C-DC-AFO + EX4400-FAN	JPSU-550-C-DC-AFI + EX4400-FAN-AFI	JPSU-1050-C-AC-AFO + EX4400-FAN	JPSU-1600-C-AC-AFO + EX4400-FAN	JPSU-2000-C-AC-AFO + EX4400-FAN
EX4400-48P-S	Spare chassis, 48-port 10/100/1000BASE-T	X	X	X	X	X	Y	X
EX4400-24P-S	Spare chassis, 24-port 10/100/1000BASE-T	X	X	X	X	Y	Y	X
EX4400-48T-S	Spare chassis, 48-port 10/100/1000BASE-T	Y	Y	Y	Y	X	X	X
EX4400-24T-S	Spare chassis, 24-port 10/100/1000BASE-T	Y	Y	Y	Y	X	X	X
EX4400-24X-S	Spare chassis, 24-port 1/10GbE SFP +	Y	Y	Y	Y	X	X	X
EX4400-48F-S	Spare chassis, 12-port 1000/10000BASE-X + 36-port 100/1000BASE-X	Y	Y	Y	Y	X	X	X
EX4400-24MP-S	Spare chassis, 24x100M/ 1/2.5/5/10GbE ports	X	X	X	X	Y	Y	X
EX4400-48MP-S	Spare chassis, 12 x 100M/1/2.5/5/10GbE + 36x100M/1/2.5GbE ports	X	X	X	X	X	Y	X
EX4400-48MXP-S	Spare chassis, 12 x 100M/1/2.5/5/10GbE + 36x100M/1/2.5GbE ports	X	X	X	X	X	X	Y

Spare Chassis SKU	Description	JPSU-550-C-AC-AFO + EX4400-FAN	JPSU-550-C-AC-AFI + EX4400-FAN-AFI	JPSU-550-C-DC-AFO + EX4400-FAN	JPSU-550-C-DC-AFI + EX4400-FAN-AFI	JPSU-1050-C-AC-AFO + EX4400-FAN	JPSU-1600-C-AC-AFO + EX4400-FAN	JPSU-2000-C-AC-AFO + EX4400-FAN

Y = supported; X = not supported

EX4400 line specifications

Physical specifications

Backplane

- 400 Gbps Virtual Chassis interconnect to combine up to 10 units as a single logical device

Extension module options

- EX4400-EM-4S, 4 port SFP+
- EX4400-EM-4Y, 4 port SFP28
- EX4400-EM-1C, 1 port QSFP28

Power options

- Power supplies: Autosensing; 100-120 V/200-240 V; 550 W, 1050 W, 1600 W, 2000 W AC AFO and 550 W AC AFI dual load sharing hot-swappable internal redundant power supplies
- Maximum current inrush: 30 amps
- DC power supply: 550 W DC AFO and 550 W DC AFI, input voltage range 48-60 V max, dual load-sharing hot-swappable internal redundant power supplies
- Minimum number of PSUs required for fully loaded chassis: 1 per switch

Dimensions (W x H x D)

- With power supply and fans installed: 17.39 x 1.72 x 16.93 in. (44.17 x 4.37 x 43 cm)
- Height: 1 U

System weight

- EX4400 switch and EX4400 Multigigabit switch (with no power supply or fan module): 13.01 lb (5.9 kg)
- 550 W AC power supply: 1.76 lb (0.8 kg)
- 550 W DC power supply: 1.65 lb (0.75 kg)
- 1050 W AC power supply: 1.98 lb (0.9 kg)
- 1600 W AC power supply: 2.0 lb (0.91 kg)
- 2000 W AC power supply: 2.05 lb (0.93 kg)
- EX4400-EM-4S: 0.2 lb (0.09 kg)
- EX4400-EM-4Y: 0.29 lb (0.13kg)
- EX4400-EM-1C: 0.26 lb (0.11kg)
- Fan module: 0.26 lb (0.12 kg)

Environmental ranges

- Operating temperature: 32° to 113° F (0° to 45° C)
- Storage temperature: -40° to 158° F (-40° to 70° C)
- Operating altitude: up to 6000 ft at 40° C (1828.8m)
- Nonoperating altitude: up to 16,000 ft (4,877 m)
- Relative humidity operating: 5% to 90% (noncondensing)
- Relative humidity non-operating: 0% to 90% (noncondensing)

Cooling

- Field-replaceable fans: 2
- Total maximum airflow throughput with two power supplies: 61 CFM

Hardware specifications

Switching engine mode

- Store and forward

Memory

- DRAM: 4 GB with Error Correcting Code (ECC) on all models
- Storage: 20 GB on all models

CPU

- All models: 2.2 GHz Quad-Core Intel x86 CPU

Physical layer

- Time domain reflectometry (TDR) for detecting cable breaks and shorts: EX4400-24P/T/MP and EX4400-48XP/P/T/MXP/MP
- Auto medium-dependent interface/medium-dependent interface crossover (MDI/MDIX) support: EX4400-24P/T/MP and EX4400-48XP/P/T/MXP/MP
- Port speed downshift/setting maximum advertised speed on 10/100/1000BASE-T ports: EX4400-24P/T and EX4400-48XP/P/T only
- Digital optical monitoring for optical ports

Packet switching capacities (maximum with 64 Byte Packets)

- EX4400-24P/24T: 324 Gbps (unidirectional)/648 Gbps (bidirectional)
- EX4400-48XP/48T: 348 Gbps (unidirectional)/696 Gbps (bidirectional)
- EX4400-24X: 540 Gbps (unidirectional)/ 1080 Gbps (bidirectional)
- EX4400-48F: 456 Gbps (unidirectional)/912 Gbps (bidirectional)
- EX4400-24MP: 540 Gbps (unidirectional)/1080 Gbps (bidirectional)
- EX4400-48MXP/48MP: 510 Gbps (unidirectional)/1020 Gbps (bidirectional)

Software specifications

Layer 2/Layer 3 throughput (Mpps) (maximum with 64 Byte Packets)

- EX4400-48XP/48P/T 517Mpps
- EX4400-24P/T 482Mpps
- EX4400-24X 803 Mpps
- EX4400-48F 678 Mpps
- EX4400-48MXP/48MP 758 Mpps
- EX4400-24MP 803 Mpps

Security

- MAC limiting (per port and per VLAN)
- Allowed MAC addresses: 112,000
- Dynamic Address Resolution Protocol (ARP) inspection (DAI)
- IP source guard
- Local proxy ARP
- Static ARP support
- Dynamic Host Configuration Protocol (DHCP) snooping
- Captive portal
- Persistent MAC address configurations
- Distributed denial of service (DDoS) protection (CPU control path flooding protection)
- Simple Certificate Enrollment Protocol (SCEP)

Layer 2 switching

- Maximum MAC addresses per system: 112,000
- Jumbo frames: 9216 Bytes
- Number of VLANs supported: 4093
- Range of possible VLAN IDs: 1 to 4094
- Virtual Spanning Tree (VST) instances: 510
- Port-based VLAN
- Voice VLAN
- Physical port redundancy: Redundant trunk group (RTG)
- Compatible with Per-VLAN Spanning Tree Plus (PVST+)
- Routed VLAN interface (RVI)
- Uplink failure detection (UFD)
- ITU-T G.8032: Ethernet Ring Protection Switching
- IEEE 802.1AB: Link Layer Discovery Protocol (LLDP)
- LLDP-MED with VoIP integration
- Default VLAN and multiple VLAN range support
- MAC learning deactivate
- Persistent MAC learning (sticky MAC)
- MAC notification
- Private VLANs (PVLANs)
- Explicit congestion notification (ECN)
- Layer 2 protocol tunneling (L2PT)
- IEEE 802.1ak: Multiple VLAN Registration Protocol (MVRP)
- IEEE 802.1p: CoS prioritization
- IEEE 802.1Q: VLAN tagging
- IEEE 802.1X: Port Access Control
- IEEE 802.1ak: Multiple Registration Protocol
- IEEE 802.3: 10BASE-T
- IEEE 802.3u: 100BASE-T
- IEEE 802.3ab: 1000BASE-T

- IEEE 802.3z: 1000BASE-X
- IEEE 802.3bz: 2.5GBASE-T and 5GBASE-T
- IEEE 802.3ae: 10-Gigabit Ethernet
- IEEE 802.3by: 25-Gigabit Ethernet
- IEEE 802.3af: Power over Ethernet
- IEEE 802.3at: Power over Ethernet Plus
- IEEE 802.3bt: 90 W Power over Ethernet
- IEEE 802.3x: Pause Frames/Flow Control
- IEEE 802.3ah: Ethernet in the First Mile

Spanning Tree

- IEEE 802.1D: Spanning Tree Protocol
- IEEE 802.1s: Multiple instances of Spanning Tree Protocol (MSTP)
- Number of MST instances supported: 64
- Number of VLAN Spanning Tree Protocol (VSTP) instances supported: 510
- IEEE 802.1w: Rapid reconfiguration of Spanning Tree Protocol

Link Aggregation

- IEEE 802.3ad: Link Aggregation Control Protocol
- 802.3ad (LACP) support:
  - Number of LAGs supported: 128
  - Maximum number of ports per LAG: 16
- LAG load-sharing algorithm bridged or routed (unicast or multicast) traffic:
  - IP: S/D IP
  - TCP/UDP: S/D IP, S/D Port
  - Non-IP: S/D MAC
- Tagged ports support in LAG

Layer 3 features: IPv4

- Maximum number of ARP entries: 24,000
- Maximum number of IPv4 unicast routes in hardware: 130,048 prefixes; 81,000 host routes
- Maximum number of IPv4 multicast routes in hardware: 40,000 multicast routes
- Routing protocols: RIPv1/v2, OSPF, BGP, IS-IS
- Static routing
- Routing policy
- Bidirectional Forwarding Detection (BFD)
- L3 redundancy: Virtual Router Redundancy Protocol (VRRP)
- VRF-Lite: 1000

Layer 3 features: IPv6

- Maximum number of Neighbor Discovery (ND) entries: 12,000
- Maximum number of IPv6 unicast routes in hardware: 87,000 prefixes; 40,000 host routes
- Maximum number of IPv6 multicast routes in hardware: 20,000 multicast routes
- Routing protocols: RIPng, OSPFv3, IPv6, ISIS
- Static routing

Access Control Lists (ACLs) (Junos OS Firewall Filters)

- ACL entries (ACE) in hardware per system:
  - Port-based ACL (PACL) ingress: 2048
  - VLAN-based ACL (VACL) ingress: 2048
  - Router-based ACL (RACL) ingress: 2048
  - Egress shared across PACL and VACL:
    - Port-based ACL (PACL) egress: 1024
    - Vlan based ACL (VACL) egress: 512
  - Egress shared across PACL and VACL: 512
  - Egress across RACL: 1024
- ACL counter for denied packets
- ACL counter for permitted packets
- Ability to add/remove/change ACL entries in middle of list (ACL editing)
- L2-L4 ACL

Access security

- 802.1X port-based
- 802.1X multiple supplicants
- 802.1X with VLAN assignment
- 802.1X with authentication bypass access (based on host MAC address)
- 802.1X with VoIP VLAN support
- 802.1X dynamic ACL based on RADIUS attributes
- 802.1X Supported Extensible Authentication Protocol (EAP) types: Message Digest 5 (MD5), Transport Layer Security (TLS), Tunneled TLS (TTLS), Protected Extensible Authenticated Protocol (PEAP)
- MAC authentication (RADIUS)
- Control plane DoS protection
- Radius functionality over IPv6 for authentication, authorization, and accounting (AAA)
- DHCPv6 snooping
- IPv6 neighbor discovery
- IPv6 source guard
- IPv6 RA guard

- IPv6 Neighbor Discovery Inspection
- MACsec

High availability

- Redundant, hot-swappable power supplies
- Redundant, field-replaceable, hot-swappable fans
- GRES for Layer 2 hitless forwarding and Layer 3 protocols on RE failover
- Graceful protocol restart (OSPF, BGP)
- Layer 2 hitless forwarding on RE failover
- Nonstop bridging: LACP, xSTP
- Nonstop routing: PIM, OSPF v2 and v3, RIP v2, RIPng, BGP, BGPv6, ISIS, IGMP v1, v2, v3
- Online insertion and removal (OIR) uplink module

Quality of service

- L2 QoS
- L3 QoS
- Ingress policing: 1 rate 2 color
- Hardware queues per port: 12 (8 unicast + 4 multicast)
- Scheduling methods (egress): Strict priority (SP), weighted deficit round-robin (WDRR)
- 802.1p, DiffServ code point (DSCP)/IP precedence trust and marking
- L2-L4 classification criteria: Interface, MAC address, Ethertype, 802.1p, VLAN, IP address, DSCP/IP precedence, TCP/UDP port numbers, and more
- Congestion avoidance capabilities: Tail drop, weighted random early detection (WRED)

Multicast

- IGMP: v1, v2, v3
- IGMP snooping
- Multicast Listener Discovery (MLD) snooping
- Protocol Independent Multicast-Sparse Mode (PIM-SM), PIM Source-Specific Mode (PIM-SSM), PIM Dense Mode (PIM-DM)

Management and analytics platforms

- Juniper Mist Wired Assurance for Campus
- Junos Space Network Director for Campus
- Junos Space® Management

Device management and operations

- Junos OS CLI
- Out-of-band management: Serial; 10/100/1000BASE-T Ethernet
- Rescue configuration
- Configuration rollback
- Image rollback
- RMON (RFC2819) groups 1, 2, 3, 9
- Remote performance monitoring
- SNMP: v1, v2c, v3
- Network Time Protocol (NTP)
- DHCP server
- DHCP client and DHCP proxy
- DHCP relay and helper
- DHCP local server support
- RADIUS
- TACACS+
- SSHv2
- Secure copy
- HTTP/HTTPs
- Domain Name System (DNS) resolver
- System logging
- Temperature sensor
- Configuration backup via FTP/secure copy

Supported RFCs

- RFC 768 UDP
- RFC 783 TFTP
- RFC 791 IP
- RFC 792 ICMP
- RFC 793 TCP
- RFC 826 ARP
- RFC 854 Telnet client and server
- RFC 894 IP over Ethernet
- RFC 903 RARP
- RFC 906 TFTP Bootstrap
- RFC 951, 1542 BootP
- RFC 1027 Proxy ARP
- RFC 1058 RIP v1
- RFC 1112 IGMP v1
- RFC 1122 Host Requirements
- RFC 1195 Use of OSI IS-IS for Routing in TCP/IP and Dual Environments (TCP/IP transport only)
- RFC 1256 IPv4 ICMP Router Discovery (IRDP)
- RFC 1492 TACACS+RFC 1519 CIDR
- RFC 1587 OSPF NSSA Option
- RFC 1591 DNS
- RFC 1812 Requirements for IP Version 4 Routers
- RFC 1981 Path MTU Discovery for IPv6
- RFC 2030 SNTP, Simple Network Time Protocol

- RFC 2068 HTTP server
- RFC 2080 RIPng for IPv6
- RFC 2131 BOOTP/DHCP relay agent and DHCP server
- RFC 2138 RADIUS Authentication
- RFC 2139 RADIUS Accounting

- Draft-ietf-isis-wg-mib-07

Troubleshooting

- Debugging: CLI via console, Telnet, or SSH
- Diagnostics: Show and debug command, statistics
- Traffic mirroring (port)
- Traffic mirroring (VLAN)
- IP tools: Extended ping and trace
- Juniper Networks commit and rollback

Traffic monitoring

- ACL-based mirroring
- Mirroring destination ports per system: 4
  - LAG port monitoring
  - Multiple destination ports monitored to 1 mirror (N:1)
- Maximum number of mirroring sessions: 4
- Mirroring to remote destination (over L2): 1 destination VLAN

Safety and compliance

Electromagnetic Compatibility (EMC) requirements

- FCC 47 CFR Part 15
- ICES-003 / ICES-GEN
- EN 300 386 V1.6.1
- EN 300 386 V2.1.1
- EN 55032
- CISPR 32
- EN 55024
- CISPR 24
- EN 55035
- CISPR 35
- IEC/EN 61000 Series
- AS/NZS CISPR 32
- VCCI-CISPR 32
- BSMI CNS 13438
- KN 32 and KN 35
- KN 61000 Series
- TEC/SD/DD/EMC-221/05/OCT-16
- TCVN 7189
- TCVN 7317

Safety requirements Chassis and optics:

- CAN/CSA-C22.2 No. 62368-1 and 60950-1
- UL 62368-1 and 60950-1
- IEC 62368-1 and 60950-1 (All country deviations): CB Scheme report
- IEC 62368-3 for USB and PoE: CB Scheme report
- CFR, Title 21, Chapter 1, Subchapter J, Part 1040
- REDR c 1370 OR CAN/CSA-E 60825-1- Part 1
- IEC 60825-1
- IEC 60825-2

Energy efficiency

- AT&T TEER (ATIS-06000015.03.2013)
- ECR 3.0.1
- ETSI ES 203 136 V.1.1.1
- Verizon TEEER (VZ.TPR.9205)

Environmental

- Reduction of Hazardous Substances (ROHS) 6/6

Telco

- CLEI code

Noise specifications

- Noise measurements based on operational tests taken from bystander position (front) and performed at 23° C in compliance with ISO 7779.

Juniper Networks services and support

Juniper Networks is the leader in performance-enabling services that are designed to accelerate, extend, and optimize your high-performance network. Our services allow you to maximize operational efficiency while reducing costs and minimizing risk, achieving a faster time to value for your network. Juniper Networks ensures operational excellence by optimizing the network to maintain required levels of performance, reliability, and availability. For more details, please visit https://www.juniper.net/us/en/products.html.

Table 4: EX4400 power supply consumption at incremental load levels

Model/Product SKU	PSU Type	PSU (W)	Idle 0% (W)	10% Traffic (W)	30% Traffic (W)	50% Traffic (W)	100% Max (W)

Ordering information

Product	Description
EX4400-48P	48-port 10/100/1000BASE-T PoE++ power + 1600 W AC PS (provides 1310/2200W PoE++ power with single/dual PS) (DAC for Virtual Chassis ordered separately
EX4400-48XP	48-port 10/100/1000BASE-T PoE++ power + 2000 W AC PS (provides 1650/3600W PoE++ power with single/dual PS) (DAC for Virtual Chassis ordered separately)
EX4400-48MP	12x100M/1/2.5/5/10GbE + 36x100M/1/2.5GbE ports PoE++ power + 1600 W AC PS (provides 1260/2200W PoE++ power with single/dual PS) (DAC for Virtual Chassis ordered separately)
EX4400-48MXP	12x100M/1/2.5/5/10GbE + 36x100M/1/2.5GbE ports PoE++ power + 2000 W AC PS (provides 1650/3600W PoE++ power with single/dual PS) (DAC for Virtual Chassis ordered separately)
EX4400-24P	24-port 10/100/1000BASE-T PoE++ power + 1050 W AC PS (provides 783/1806W PoE++ power with single/dual PS) (DAC for Virtual Chassis ordered separately)
EX4400-24MP	24x100M/1/2.5/5/10GbE ports PoE++ power + 1050 W AC PS (provides 753/1776W PoE++ power with single/dual PS) (DAC for Virtual Chassis ordered separately)
EX4400-48T	48-port 10/100/1000BASE-T + 550 W AC PS (DAC for Virtual Chassis ordered separately)
EX4400-24T	24-port 10/100/1000BASE-T + 550 W AC PS (DAC for Virtual Chassis ordered separately)
EX4400-24X	24-port 1/10GbE SFP+ + 550W AC PSU (front-to-back airflow) (optics ordered separately)
EX4400-48F	12-port 1000/10000BASE-X SFP+ + 36-port 100/1000BASE-X SFP + 550 W AC PS (optics sold separately)
EX4400-48T-AFI	48-port 10/100/1000BASE-T + 550 W AC PS (back-to-front airflow) (DAC for Virtual Chassis ordered separately)
EX4400-24T-AFI	24-port 10/100/1000BASE-T + 550 W AC PS (back-to-front airflow) (DAC for Virtual Chassis ordered separately)
EX4400-48T-DC	48-port 10/100/1000BASE-T + 550 W DC PS (DAC for Virtual Chassis ordered separately)
EX4400-48T-DC-AFI	48-port 10/100/1000BASE-T + 550 W DC PS (back-to-front airflow) (DAC for Virtual Chassis ordered separately)
EX4400-24T-DC	24-port 10/100/1000BASE-T + 550 W DC PS (DAC for Virtual Chassis ordered separately)
EX4400-24T-DC-AFI	24-port 10/100/1000BASE-T + 550 W DC PS (back-to-front airflow) (DAC for Virtual Chassis ordered separately)
EX4400-24X-AFI	24-port 1/10GbE SFP+ + 550W AC PSU (back-to-front airflow) (optics ordered separately)
EX4400-24X-DC	24-port 1/10GbE SFP+ + 550W DC PSU (front-to-back airflow) (optics ordered separately)
EX4400-24X-DC-AFI	24-port 1/10GbE SFP+ + 550W DC PSU (back-to-front airflow) (optics ordered separately)
EX4400-48F-AFI	12-port 1000/10000BASE-X SFP+ + 36-port 100/1000BASE-X SFP + 550 W AC PS (back-to-front airflow) (optics sold separately)
EX4400-48F-DC-AFI	12-port 1000/10000BASE-X SFP+ + 36-port 100/1000BASE-X SFP + 550 W DC PS (back-to-front airflow) (optics sold separately)
EX4400-48F-DC	12-port 1000/10000BASE-X SFP+ + 36-port 100/1000BASE-X SFP + 550 W DC PS (optics sold separately)
Perpetual Licenses	
S-EX-A-C2-P	Software, EX Series Advanced license, Class 2 (24 ports), Perpetual license for EX4400 24-port switches
S-EX-P-C2-P	Software, EX Series Premium license, Class 2 (24 ports), Perpetual license for EX4400 24-port switches
S-EX-A-C3-P	Software, EX Series Advanced license, Class 3 (32 or 48 ports), Perpetual license for EX4400 48-port switches
S-EX-P-C3-P	Software, EX Series Premium license, Class 3 (32 or 48 ports), Perpetual license for EX4400 48-port switches
S-EX-MACSEC-C2-P	Software, EX Series MACsec license, Class 2 (24 ports), Perpetual license for EX4400 24-port switches
S-EX-MACSEC-C3-P	Software, EX Series MACsec license, Class 3 (48 ports), Perpetual license for EX4400 48-port switches
S-EX-FBT-P	Software, EX Series Flow Based Telemetry license, Perpetual license for all EX4400 switches
Subscription Licenses	
S-EX-A-C2-1	Software, EX Series Advanced license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches, 1 year
S-EX-A-C2-3	Software, EX Series Advanced license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches, 3 year
S-EX-A-C2-5	Software, EX Series Advanced license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches, 5 year
S-EX-P-C2-1	Software, EX Series Premium license, Class 2 (24 ports), includes), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches, 1 year
S-EX-P-C2-3	Software, EX Series Premium license, Class 2 (24 ports), includes), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches, 3 year
S-EX-P-C2-5	Software, EX Series Premium license, Class 2 (24 ports), includes), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches, 5 year
S-EX-A-C3-1	Software, EX Series Advanced license, Class 3 (48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches, 1 year
S-EX-A-C3-3	Software, EX Series Advanced license, Class 3 (48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches, 3 year
S-EX-A-C3-5	Software, EX Series Advanced license, Class 3 (48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches, 5 year
S-EX-P-C3-1	Software, EX Series Premium license, Class 3 (48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches, 1 year
S-EX-P-C3-3	Software, EX Series Premium license, Class 3 (48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches, 3 year
S-EX-P-C3-5	Software, EX Series Premium license, Class 3 (48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches, 5 year
S-EX-A-C2-1-COR	Software, EX Series Advanced license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches with SVC CORE support, 1 year
S-EX-A-C2-3-COR	Software, EX Series Advanced license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches, 3 year with SVC CORE support, 3 year
S-EX-A-C2-5-COR	Software, EX Series Advanced license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches with SVC CORE support, 5 year
S-EX-P-C2-3-COR	Software, EX Series Premium license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches with SVC CORE support, 3 year
S-EX-P-C2-5-COR	Software, EX Series Premium license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches with SVC CORE support, 5 year
S-EX-A-C3-1-COR	Software, EX Series Advanced license, Class 3 (32 or 48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches with SVC CORE support, 1 year
S-EX-A-C3-3-COR	Software, EX Series Advanced license, Class 3 (48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches, 3 year with SVC CORE support, 3 year
S-EX-A-C3-5-COR	Software, EX Series Advanced license, Class 3 (48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches, 3 year with SVC CORE support, 5 year
S-EX-P-C3-1-COR	Software, EX Series Premium license, Class 3 (32 or 48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches with SVC CORE support, 1 year

Product	Description
S-EX-P-C3-3-COR	Software, EX Series Premium license, Class 3 (48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches, 3 year with SVC CORE support, 3 year
S-EX-P-C3-5-COR	Software, EX Series Premium license, Class 3 (48 ports), includes Juniper Mist Wired Assurance subscription for EX Series 48-port switches, 3 year with SVC CORE support, 5 year
S-EX-A-C2-1-ND	Software, EX Series Advanced license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches with SVC NEXT DAY support, 1 year
S-EX-A-C2-3-ND	Software, EX Series Advanced license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches with SVC NEXT DAY support, 3 year
S-EX-A-C2-5-ND	Software, EX Series Advanced license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches with SVC NEXT DAY support, 5 year
S-EX-P-C2-1-ND	Software, EX Series Premium license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches with SVC NEXT DAY support, 1 year
S-EX-P-C2-3-ND	Software, EX Series Premium license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches with SVC NEXT DAY support, 3 year
S-EX-P-C3-5-COR	Software, EX Series Premium license, Class 3 (32 or 48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches with SVC CORE support, 5 year
S-EX-A-C2-1-ND	Software, EX Series Advanced license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches with SVC NEXT DAY support, 1 year
S-EX-A-C2-3-ND	Software, EX Series Advanced license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches with SVC NEXT DAY support, 3 year
S-EX-A-C2-5-ND	Software, EX Series Advanced license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches with SVC NEXT DAY support, 5 year
S-EX-P-C2-1-ND	Software, EX Series Premium license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches with SVC NEXT DAY support, 1 year
S-EX-P-C2-3-ND	Software, EX Series Premium license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches with SVC NEXT DAY support, 3 year
S-EX-P-C2-5-ND	Software, EX Series Premium license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches with SVC NEXT DAY support, 5 year
S-EX-A-C3-1-ND	Software, EX Series Advanced license, Class 3 (32 or 48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches with SVC NEXT DAY support, 1 year
S-EX-A-C3-3-ND	Software, EX Series Advanced license, Class 3 (32 or 48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches with SVC NEXT DAY support, 3 year
S-EX-A-C3-5-ND	Software, EX Series Advanced license, Class 3 (32 or 48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches with SVC NEXT DAY support, 5 year
S-EX-P-C3-1-ND	Software, EX Series Premium license, Class 3 (32 or 48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches with SVC NEXT DAY support, 1 year
S-EX-P-C3-3-ND	Software, EX Series Premium license, Class 3 (32 or 48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches with SVC NEXT DAY support, 3 year
S-EX-P-C3-5-ND	Software, EX Series Premium license, Class 3 (32 or 48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches with SVC NEXT DAY support, 5 year
S-EX-A-C2-1-SD	Software, EX Series Advanced license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches with SVC SAME DAY support, 1 year
S-EX-A-C2-3-SD	Software, EX Series Advanced license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches with SVC SAME DAY support, 3 year
S-EX-A-C2-5-SD	Software, EX Series Advanced license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches with SVC SAME DAY support, 5 year
S-EX-P-C2-1-SD	Software, EX Series Premium license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches with SVC SAME DAY support, 1 year
S-EX-P-C2-3-SD	Software, EX Series Premium license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches with SVC SAME DAY support, 3 year
S-EX-P-C2-5-SD	Software, EX Series Premium license, Class 2 (24 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 24-port switches with SVC SAME DAY support, 5 year
S-EX-A-C3-1-SD	Software, EX Series Advanced license, Class 3 (32 or 48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches with SVC SAME DAY support, 1 year
S-EX-A-C3-3-SD	Software, EX Series Advanced license, Class 3 (32 or 48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches with SVC SAME DAY support, 3 year
S-EX-A-C3-5-SD	Software, EX Series Advanced license, Class 3 (32 or 48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches with SVC SAME DAY support, 5 year
S-EX-P-C3-1-SD	Software, EX Series Premium license, Class 3 (32 or 48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches with SVC SAME DAY support, 1 year
S-EX-P-C3-3-SD	Software, EX Series Premium license, Class 3 (32 or 48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches with SVC SAME DAY support, 3 year
S-EX-P-C3-5-SD	Software, EX Series Premium license, Class 3 (32 or 48 ports), includes Juniper Mist Wired Assurance and VNA subscription for EX Series 48-port switches with SVC SAME DAY support, 5 year
Extension Modules	
EX4400-EM-4S	EX4400 4-port 1GbE/10GbE SFP+ Extension Module
EX4400-EM-4Y	EX4400 4-port 1/10/25GbE SFP28 Extension module
EX4400-EM-1C	EX4400 1-port 100GbE QSFP28 Extension Module
Power Supplies	
JPSU-550-C-AC-AFO	EX4400 550 W AC power supply (power cord needs to be ordered separately) (front-to-back airflow)
JPSU-550-C-AC-AFI	EX4400 550 W AC power supply (power cord needs to be ordered separately) (back-to-front airflow)
JPSU-550-C-DC-AFO	EX4400 550 W DC power supply (power cord needs to be ordered separately) (front-to-back airflow)
JPSU-550-C-DC-AFI	EX4400 550 W DC power supply (power cord needs to be ordered separately) (back-to-front airflow)
JPSU-1050-C-AC-AFO	EX4400 1050 W AC power supply (power cord needs to be ordered separately) (front-to-back airflow)
JPSU-1600-C-AC-AFO	EX4400 1600 W AC power supply (power cord needs to be ordered separately) (front-to-back airflow)
Fans	
EX4400-FAN	Spare fan with front-to-back airflow
EX4400-FAN-AFI	Spare fan with back-to-front airflow
Mounting Options	
EX-4PST-RMK	Adjustable 4-post rack-mount kit for EX4400
EX-WMK	Wall-mount kit for EX4400
EX-RMK	Rack-mount kit for EX4400
Spare Chassis	
EX4400-48P-S	Spare chassis, 48-port 10/100/1000BASE-T PoE++ (optics, power supplies, and fans sold separately)
EX4400-24P-S	Spare chassis, 24-port 10/100/1000BASE-T PoE++ (optics, power supplies, and fans sold separately)
EX4400-48T-S	Spare chassis, 48-port 10/100/1000BASE-T (optics, power supplies, and fans sold separately)

Product	Description
EX4400-24T-S	Spare chassis, 24-port 10/100/1000BASE-T (optics, power supplies, and fans sold separately)
EX4400-24X-S	Spare chassis, 24-port 1/10GbE SFP+ (optics, power supplies, and fans sold separately)
EX4400-48F-S	Spare chassis, 12-port 10000BASE-X SFP+ + 36-port 1000BASE-X SFP, (optics, power supplies, and fans sold separately)
EX4400-24MP-S	Spare chassis, 24x100M/1/2.5/5/10GbE ports PoE++ (optics, power supplies, and fans sold separately)
EX4400-48MP-S	Spare chassis, 12x100M/1/2.5/5/10GbE + 36x100M/1/2.5GbE ports PoE++ (optics, power supplies, and fans sold separately)

About Juniper Networks

Juniper Networks believes that connectivity is not the same as experiencing a great connection. Juniper's AI-Native Networking Platform is built from the ground up to leverage AI and automation to deliver exceptional, highly secure, and sustainable user experiences from the edge to the data center and cloud. From real-time fault isolation to proactive anomaly detection and self-driving corrective actions, it provides campus, branch, data center, and WAN operations with next-level predictability, reliability, and security.

Additional information can be found at Juniper Networks (www.juniper.net) or connect with Juniper on X (Twitter), LinkedIn, and Facebook.

EX4650 ETHERNET SWITCH DATASHEET

Product Overview

The EX4650 line of Ethernet switches delivers high scale, high availability, and high performance for campus distribution deployments. The EX4650 offers fixed 1GbE/10GbE/25GbE ports with 40GbE/100GbE uplinks that support advanced campus environments, allowing them to provide the onramp to multicloud, to deploy cutting edge cloud applications, and to embrace IoT technology. It is also flexible enough for use in enterprise on-premises top-of-rack and service provider aggregation deployments. The EX4650 is onboarded, provisioned, and managed in the Juniper Mist Cloud Architecture. Mist Wired Assurance delivers better experiences for connected devices through AI-powered automation and service levels.

Product Description

The Juniper Networks® EX4650 Ethernet Switch delivers 4 Tbps of Layer 2 and Layer 3 connectivity to networked devices such as secure routers, servers, and other switches. Featuring 48 wire-speed 10GbE/25GbE small form-factor pluggable and pluggable plus transceiver (SFP/SFP+/SFP28) ports and 8 wire-speed 40GbE/100GbE quad SFP+ transceiver (QSFP+/QSP28) ports in a compact 1 U platform, the EX4650 provides the flexibility to support mixed 1GbE, 10GbE, 25GbE, 40GbE, and 100GbE environments. Four models are available: two featuring AC power supplies with front-to-back or back-to-front airflow, and two featuring DC power supplies with front-to-back or back-to-front airflow. All models include dual power supplies.

Key Components

The EX4650 switch includes native 25GbE (fiber only) and either 40GbE or 100GbE fixed-configuration options with rich L2, L3, Ethernet VPN (EVPN), and MPLS features. The EX4650 switches run the same reliable, high-performance Juniper Networks Junos® operating system used by Juniper Networks EX Series and QFX Series Ethernet Switches, SRX Series Services Gateways, and Juniper routers, ensuring a consistent control plane feature implementation and user experience across the entire Juniper infrastructure.

EX4650 Switch Models

The EX4650 switch is a compact, 1 U platform that provides high throughput, very low latency, and a rich set of Junos OS features. The performance of the EX4650's control plane is further enhanced with a powerful 2.3 GHz quad-core Intel CPU with 16 GB of memory and 64 GB SSD storage.

The EX4650-48Y is a 25GbE/100GbE campus distribution switch offering 48 SFP28 transceiver ports and eight QSFP28 ports that can be configured as 8x40GbE or 8x100GbE ports, with an aggregate throughput of 4 Tbps or 2.98 Bpps per switch. For added flexibility, each QSFP28 port can also be configured as 4x25GbE ports using breakout cables, increasing the total number of supported 25GbE ports to 80 per switch.

EX4650-48Y Highlights

The EX4650-48Y switch features the following:

- Support for high-density, multispeed 1GbE/10GbE/25GbE downlinks and 40GbE/100GbE uplinks for access and aggregation configurations, with up to 48 25GbE ports and up to eight 100GbE uplink ports in a 1 U platform
- Throughput of up to 4 Tbps L2 and L3 performance, with latency as low as 550 nanoseconds
- A 2.3 GHz quad-core Intel CPU with 16 GB memory and 64 GB SSD storage
- Feature-rich automation capabilities with support for Python and Zero Touch Provisioning (ZTP)

- Support for virtualization protocols such as Virtual Extensible LAN (VXLAN)
- Advanced Junos OS features such as EVPN, BGP add-path, MPLS, L3 VPN, and IPv6 6PE

Architecture and Key Components

Cloud Management with Juniper Mist Wired Assurance

Juniper Mist Wired Assurance, a cloud-based service driven by Mist AI to claim, configure, manage, and troubleshoot the EX4650, delivers AI-powered automation and service levels to ensure a better experience for connected devices. Wired Assurance leverages rich Junos switch telemetry data to simplify operations, reduce mean time to repair, and improve visibility. Wired Assurance offers the following features:

- **Day 0 operations**—Onboard switches seamlessly by claiming a greenfield switch or adopting a brownfield switch with a single activation code for true plug-and-play simplicity.
- **Day 1 operations**—Implement a template-based configuration model for bulk rollouts of traditional and campus fabric deployments, while retaining the flexibility and control required to apply custom site- or switch-specific attributes. Automate provisioning of ports via Dynamic Port Profiles.
- **Day 2 operations**—Leverage the AI in Juniper Mist Wired Assurance to meet service-level expectations such as throughput, successful connects, and switch health with key pre- and post-connection metrics (see Figure 1). Add the self-driving capabilities in Marvis Actions to detect loops, add missing VLANs, fix misconfigured ports, identify bad cables, isolate flapping ports, and discover persistently failing clients (see Figure 2). And perform software upgrades easily through Juniper Mist cloud.

Figure 1: Juniper Mist Wired Assurance service-level expectations

Figure 2: Marvis Actions for wired switches

The addition of Marvis, a complementary Virtual Network Assistant driven by Mist AI, lets you start building a self-driving network that simplifies network operations and streamlines troubleshooting via automatic fixes for EX Series switches or recommended actions for external systems.

For more information see Juniper Mist Wired Assurance.

EVPN-VXLAN Technology

The EX4650 embraces open standards and extends the industry-standard EVPN-VXLAN technology already supported in both the data center and campus. With enterprise applications moving to the cloud, it has become necessary to deploy IP fabrics as enterprise fabrics with L2 extensions using VXLAN. The EX4650 is capable of both L2 and L3 VXLAN gateway services, allowing customers to deploy networks that provide L2 adjacencies for applications over L3 fabrics. EVPN-VXLAN offers a scalable way to build and interconnect multiple campuses, data centers, and public clouds, delivering the following benefits:

- Greater network efficiency
- Based on industry standards
- Scalable at all network layers
- Faster convergence
- Flexible and secure architecture

Junos OS

The high-performance EX4650 runs Junos OS, Juniper's powerful and robust network operating system that powers all Juniper switches, routers, and firewalls. Key Junos OS features that enhance the functionality and capabilities of the EX4650 include:

- Software modularity, with process modules running independently in their own protected memory space and with the ability to do process restarts
- Commit and rollback functionality that ensures error-free network configurations
- A powerful set of scripts for on-box problem detection, reporting, and resolution

Junos OS Software License

The software features supported on the EX4650-48Y switch are categorized in three tiers: Base, Premium, and Advanced.

- Base software features include basic L2 switching, basic L3 routing, multicast, automation, programmability, ZTP, and basic monitoring. A Base software feature license comes with the purchase of the hardware and does not require any explicit license keys.
- Premium software features include all Base license functionality, plus BGP, IS-IS, and EVPN-VXLAN to explicitly address the needs of enterprise customers. To enable these features, customers must purchase the EX4650-PFL license, generate unique license keys, and install them on the switch. The license is not portable across devices.
- Advanced software features include all Premium license functionality plus MPLS to explicitly address the needs of enterprise interconnect and edge use cases. To enable these features, customers must purchase the EX4650-AFL license, generate unique license keys, and install them on the switch. The license is not portable across devices.

The Premium and Advanced software licenses are offered as perpetual licenses. Please see the Ordering Information section for license SKU descriptions.

EX4650 Campus Deployment Options

The EX4650 switch is designed primarily for the following use cases:

- **Virtual Chassis Technology**: The EX4650 supports Juniper Networks unique Virtual Chassis technology, which enables up to four interconnected switches to operate as a single, logical device with a single IP address. Virtual Chassis technology allows enterprises to separate physical topology from logical groupings of endpoints, ensuring more efficient resource utilization. When deployed in a Virtual Chassis configuration, EX4650 switches can be connected using up to four of the 40GbE or 100GbE ports in link aggregation groups (LAGs) across 40GbE/1000GbE ports, providing an aggregate backplane capacity of up to 1.04 Tbps.

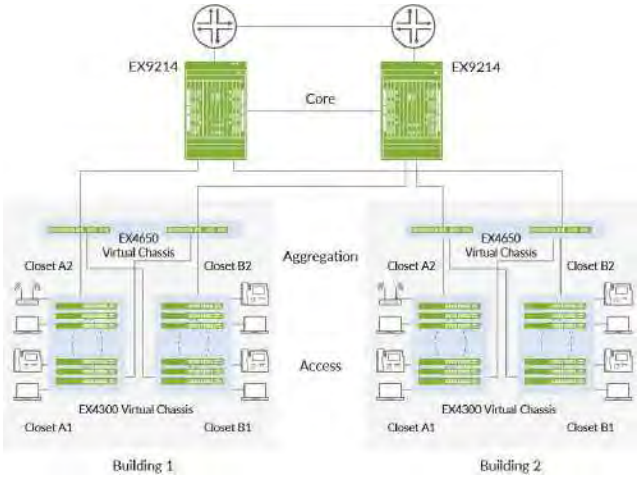

Figure 3: EX4650 as an enterprise distribution switch in a Virtual Chassis configuration

- **Campus Fabric Technology**: Juniper Networks campus fabrics provide a single, standards-based Ethernet VPN-Virtual Extensible LAN (EVPN-VXLAN) solution that can be deployed in any campus, whether a two-tier network with a collapsed core distribution or a campus-wide system that involves multiple buildings with separate distribution and core layers. Juniper's campus fabrics support the following validated architectures:
  - **EVPN Multihoming (Collapsed Core/Distribution)**: A pair of interconnected EX4650 switches can be deployed to provide EVPN multihoming (ESI-LAG) in a collapsed core/distribution configuration. This eliminates the need for Spanning Tree Protocol (STP) across the campus network by providing multihoming capabilities from the access to the distribution layer, while distribution to core is an L3 IP fabric. ESI-LAG also supports horizontal scaling with more than two devices in the distribution layer and can extend EVPN to the core.

- **Campus Fabric or Core Distribution**: A pair of interconnected EX4650 switches can provide EVPN L2 and L3 VXLAN gateway support. This eliminates the need for STP across the campus network by providing a multihoming capability from the access to the distribution layer, while distribution to the core is an L3 IP fabric using EVPN technology. The IP fabric can also extend to connect multiple enterprise buildings, while VXLAN allows stretching L2 across buildings. An IP Clos network between the distribution and the core layers can exist in two modes, both of which are supported by the EX4650:
  - Centrally routed bridging overlay: Integrated Routing and Bridging (IRB) interface placed at a central location in the fabric (in this case, a core device)
  - Edge routed bridging overlay: IRB interface placed at the edge of the fabric (in this case, a distribution device)
- **Campus Fabric IP Clos**: The Campus Fabric IP Clos architecture pushes VXLAN Layer 2/3 gateway functionality to the access layer. In this architecture, EX4650 acts as an IP fabric distribution switch.

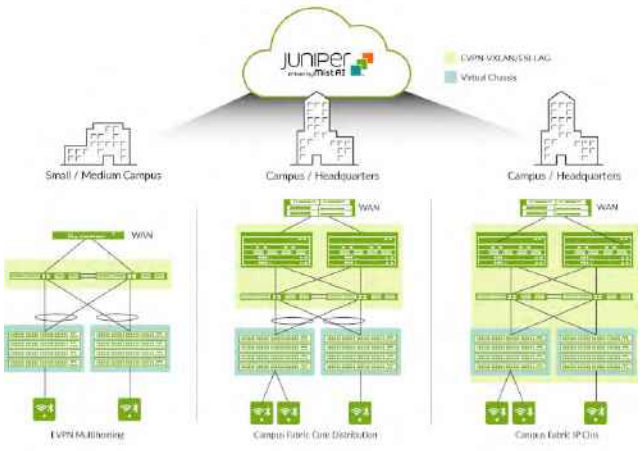

Figure 4: Campus fabrics architectures showing EX4650 in the distribution

Managing AI-Driven Campus Fabric with the Juniper Mist Cloud

Juniper Mist Wired Assurance brings cloud management and Mist AI to campus fabric. It sets a new standard moving away from traditional network management towards AI-driven operations, while delivering better experiences to connected devices. The Juniper Mist cloud streamlines deployment and management of campus fabric architectures by allowing:

- Automated deployment and zero touch deployment
- Anomaly detection
- Root cause analysis

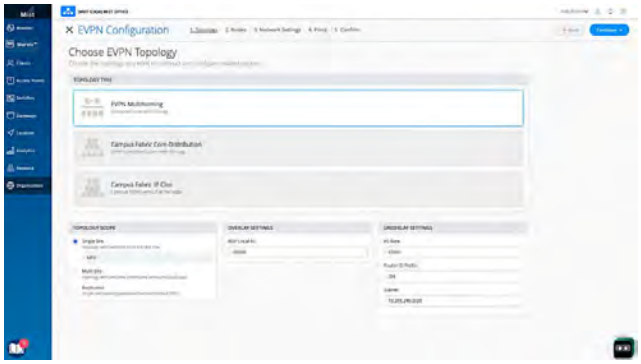

Figure 5: EVPN multihoming configuration via the Juniper Mist cloud

Enterprise On-Premises Server Connectivity: Data centers are demanding more high-speed, low-latency, storage- and I/O-converged networking solutions to maximize the performance of their physical servers, virtual servers, and storage. The EX4650 addresses these needs with low-latency, lossless, high-density 10GbE and 25GbE interfaces, as well as 100GbE uplinks to the core network. Furthermore, the EX4650 offers EVPN-VXLAN L2 and L3 gateway support, making it an ideal solution for overlay deployments in the enterprise on-premises data center.

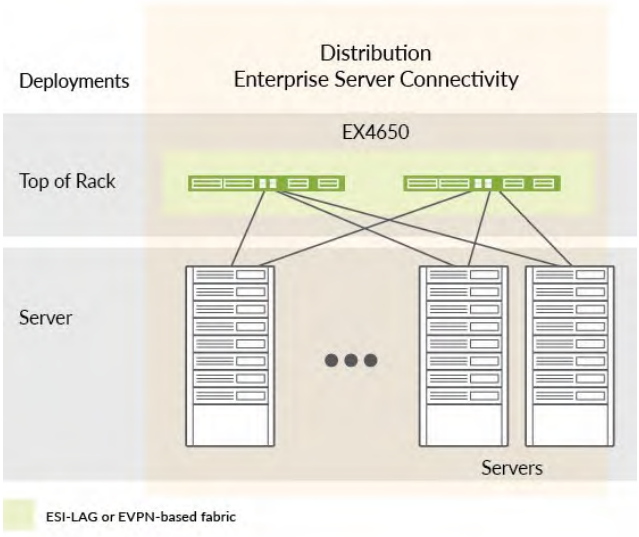

Figure 6: EX4650 for enterprise on-premises server connectivity

The EX4650 also offers flexible airflow options, enabling them to support back-to-front and front-to-back cooling to ensure consistency with server designs for hot-aisle or cold-aisle deployments. Support for tri-speed 1GbE/10GbE/25GbE make the EX4650 ideal for enterprise server access; 48 ports of native 10GbE/25GbE for server connectivity and up to eight 40GbE or 100GbE ports for uplink connectivity provide very low oversubscription of 1.5:1 from access to aggregation. Each 40GbE port can be broken out into four 10GbE ports, providing additional options for server connectivity.

The EX4650 operates in both cut-through and store-and-forward modes, delivering sustained wire-speed switching with sub-microsecond latency and low jitter for any packet size (including jumbo frames) in both modes. With features such as EVPN multihoming (ESI-LAG) and MC-LAG, the EX4650 supports active/active server dual homing and can utilize full bisectional bandwidth from server to switch.

Features and Benefits

Wired Service Level Expectations

The Wired Assurance feature provides operational visibility into the wired experience with service-level expectations (SLEs) for EX Series Switches. Pre- and post-connection performance metrics help you monitor successful connects and switch health throughout the system, using Mist AI to measure and manage networks and simplify troubleshooting.

Automation

The EX4650 supports a number of network automation and plug-and-play features, including ZTP and event scripts, automatic rollback, and Python scripting.

Flexible Forwarding Table

The EX4650 includes a Unified Forwarding Table (UFT), which allows the hardware table to be divided into configurable partitions of L2 media access control (MAC), L3 host, and longest prefix match (LPM) tables. In a pure L2 environment, the EX4650 supports up to 288,000 MAC addresses; in L3 mode, the table can support up to 168,000 host entries; in LPM mode, the table can support up to 360,000 prefixes. Junos OS provides configurable options through a CLI to optimize the EX4650 for various deployment scenarios.

Intelligent Buffer Management

The EX4650 features a total of 32 MB of shared buffers. While 25% of the total buffer space is dedicated, the rest is shared among all ports and is user configurable. The intelligent buffer mechanism in the EX4650 effectively absorbs traffic bursts while providing deterministic performance, significantly increasing performance over static allocation.

MPLS

A broad set of MPLS features, including L3 VPN, IPv6 provider edge router (6PE), RSVP traffic engineering, and LDP, support standards-based network segmentation and virtualization, allowing the EX4650 to be deployed as a low-latency MPLS label-switching router (LSR).

VXLAN Overlays

The EX4650 is capable of both L2 and L3 VXLAN gateway services. Customers can deploy overlay networks to provide L2 adjacencies for applications over L3 fabrics. The overlay networks utilize VXLAN in the data plane and EVPN for programming the overlays,

which can operate without a controller or be orchestrated with an SDN controller like OpenContrail.

Junos OS

Running Junos OS, which features the most advanced and robust routing capabilities in the industry, the EX4650 supports RIP and OSPF for both IPv4 and IPv6, as well as advanced routing capabilities such as IS-IS and BGP. With additional capabilities such as 64-way equal-cost multipath (ECMP) and BGP add path, the EX4650 is an ideal building block for deploying the most robust L3 underlay for SDN.

EVPN-VXLAN

Many proprietary campus architectures are built on traditional L2 Ethernet-based architectures that address the desire to eliminate Spanning Tree Protocol (STP). With the increase of IoT devices in the enterprise, these networks will be expected to scale rapidly without adding complexity and resources. Some of these IoT devices, however, have limited networking capabilities and require L2 adjacency across buildings or campuses. To address this problem, traditional solutions extend VLANs across buildings and campuses using data plane flood-and-learn. Unfortunately, this solution is inefficient and difficult to manage. The increasing number of network endpoints, coupled with rapidly changing business needs, demands an open, standards-based network that is simple, scalable, and programmable across both the campus and the data center.

Modern enterprise networks need a campus architecture that decouples the overlay network from the underlay network with technologies such as VXLAN, which enables network administrators to create logical L2 networks across different L3 networks. The EX4650 satisfies these requirements by supporting EVPN-VXLAN L2 and L3 gateway capabilities, providing the following benefits:

- Improved network and host mobility efficiency
  - Control plane MAC learning to reduce unknown-unicast flooding
  - Reduced Address Resolution Protocol (ARP) flooding due to MAC-to-IP binding in control plane
  - Multipath traffic over multiple core switches (VXLAN entropy)
  - Multipath traffic to active/active dual-homed access layer switches
- Fast convergence
  - Faster reconvergence when linked to dual-homed access switches fail (aliasing)
  - Faster reconvergence when endpoints move
- Scalability
  - Scalable BGP-based control plane
  - Seamless expansion of the core, distribution, and access layers as business needs grow
  - Seamless expansion of campuses as business needs grow
- Flexibility
  - Easy integration with L3 and L2 VPNs
  - BGP-based control plane functionality that allows application of fine-grained policies
- Nonproprietary
  - Standards-based protocols that support multivendor core, distribution, and access layers

Junos Telemetry Interface

The EX4650 supports Junos Telemetry Interface (JTI), a modern telemetry streaming tool designed for performance monitoring in enterprise networks. Streaming data to a performance management system enables network administrators to measure trends in link and node utilization, and troubleshoot such issues as network congestion in real time. JTI delivers the following features:

- Application visibility and performance management by provisioning sensors to collect and stream data and analyze application and workload flow paths through the network
- Capacity planning and optimization by proactively detecting hotspots and monitoring latency and microbursts
- Troubleshooting and root cause analysis via high-frequency monitoring

EX4650 Switch Specifications

Hardware

Switching Capacity

- 2 Tbps (unidirectional)/4 Tbps (bidirectional)
- Layer 2/Layer 3 throughput (maximum with 64 byte packets): 2976 Mpps (wire speed)

Weight

- 23.7 lb (10.75 kg)

Dimensions (HxWxD)

- 1.72 x 17.36 x 20.48 in (4.37 x 44.09 x 52.02 cm)
- Switching mode: Cut-through and store-and-forward
- Front-to-back (airflow out) for hot aisle deployment
- Back-to-front (airflow in) for cold aisle deployment
- Management and console port connections

Power Consumption

- Max load 450 W; typical load 260 W; idle load 160 W

Interface Options

- 1GbE SFP: 48 (48 copper 1GbE)
- 10GbE SFP+: 48/80 (with breakout cable)
- 25GbE SFP28: 48/80 (with breakout cable)
- 40GbE QSFP+: 8
- 100GbE QSFP28: 8
- Each QSFP+ port can be configured as a 4 x 10GbE interface or as a 40 Gbps port
- Each QSFP28 port can be configured as a 4 x 25GbE interface or as a 100 Gbps port
- 1 USB 2.0 port
- 1 RS-232 console port
- 2 management ports: 2 x RJ-45 ports
- Supported transceiver and direct attach cable (DAC)
- SFP 1GbE optical and copper module
- SFP+ 10GbE optical modules
- SFP+ DAC cables: 1/3 m twinax copper and 1/3/5/7 m active twinax copper
- SFP28 DAC cables: 1 m twinax copper
- SFP28 optics: SR, LR
- QSFP+ DAC cables: 1/3 m twinax copper
- QSFP+ optics: SR4, LX4, ESR4, ER4, LR4
- QSFP+ to SFP+ 10GbE direct attach breakout copper (1/3 m twinax copper cable)
- QSFP28 to SFP28 25GbE direct attach breakout copper (1 m twinax copper cable)
- QSFP28 optics: SR4, ER4, PSM4, CWDM4, LR4

Virtual Chassis

- 100GbE and 40GbE as Virtual Chassis port
- Virtual Chassis Routing Engine (RE) election
- Virtual Chassis pre-provisioning (plug-and-play)
- Auto-LAG formation of Virtual Chassis ports
- FCoE transit across Virtual Chassis members
- QoS on Virtual Chassis ports
- Local designated forwarding
- Graceful RE switchover (GRES)
- Nonstop routing (NSR)
- Nonstop bridging (NSB)
- Monitor distributed aggregate interface
- Control plane protection for virtual RE

Rack Installation Kit

- Versatile four-post mounting options for 19-in server rack or datacom rack

Airflow

- Redundant (N+1) and hot-pluggable fan modules for front-to-back and back-to-front airflow
- Redundant variable-speed fans to reduce power draw

Power Supply and Fan Modules

- Dual redundant (1+1) and hot-pluggable 650 W AC/DC power supplies
- 110-240 V single phase AC power
- -44 to -72 V DC power supply
- Redundant (4+1) and hot-pluggable fan modules for front-to-back or back-to-front airflow

Performance Scale (Unidimensional)

- Layer 2
  - MAC addresses per system: 288,000
  - VLAN IDs: 4093
  - Number of link aggregation groups (LAGs): 80
  - Number of ports per LAG: 64
  - Multiple Spanning Tree Protocol (MSTP) instances: 64
  - VLAN Spanning Tree Protocol (VSTP) instances: 509
  - Jumbo frame: 9216 bytes
- Firewall filters
  - Ingress filters: 1500
  - Egress filters: 512
- Layer 3
  - IPv4 unicast prefixes: 360,000
  - IPv4 unicast routes: 208,000
  - IPv4 multicast routes: 104,000
  - ECMP paths: 64
  - IPv6 unicast prefixes: 170,000
  - IPv6 unicast routes: 104,000
  - IPv6 multicast routes: 52,000

  - ARP entries: 64,000
- Traffic mirroring
  - Mirroring destination ports per switch: 4
  - Maximum number of mirroring sessions: 4
  - Mirroring destination VLANs per switch: 4

Software Features Supported

Layer 2 Features

- STP—IEEE 802.1D (802.1D-2004)
- Rapid Spanning Tree Protocol (RSTP) (IEEE 802.1w); MSTP (IEEE 802.1s)
- Redundant Trunk Group (RTG)
- Bridge protocol data unit (BPDU) protect
- Loop protect
- Root protect
- RSTP and VSTP running concurrently
- VLAN—IEEE 802.1Q VLAN trunking
- The Routed VLAN Interface (RVI)
- Port-based VLAN
- Private VLAN (PVLAN)
- VLAN translation
- Static MAC address assignment for interface
- Per VLAN MAC learning (limit)
- MAC learning deactivate
- Link Aggregation and Link Aggregation Control Protocol (LACP) (IEEE 802.3ad)

Link Aggregation

- Multichassis link aggregation (MC-LAG)
- EVPN Multihoming (ESI-LAG)
- LAG load-sharing algorithm—bridged or routed (unicast or multicast) traffic:
  - IP: SIP, Dynamic Internet Protocol (DIP), TCP/UDP source port, TCP/UDP destination port
  - L2 and non-IP: MAC SA, MAC DA, Ethertype, VLAN ID, source port

Layer 3 Features (IPv4)

- Static routing
- Routing protocols (RIP, OSPF, IS-IS, BGP)
- Virtual Router Redundancy Protocol (VRRP)
- Bidirectional Forwarding Detection (BFD) protocol
- Virtual router
- Dynamic Host Configuration Protocol (DHCP) relay
- Proxy Address Resolution Protocol (ARP)

Multicast Features

- Internet Group Management Protocol (IGMP): v1, v2, v3
- IGMP snooping: v1, v2, and v3 (L2 only)
- IGMP Filter
- PIM-SM, PIM-SSM, PIM-DM
- Multicast Source Discovery Protocol (MSDP)

Security and Filters

- Secure interface login and password
- RADIUS
- TACACS+
- Ingress and egress filters: Allow and deny, port filters, VLAN filters, and routed filters, including management port filters
- Filter actions: Logging, system logging, reject, mirror to an interface, counters, assign forwarding class, permit, drop, police, mark
- SSH v1, v2
- Static ARP support
- Storm control, port error deactivate, and autorecovery
- Sticky MAC address
- DHCP snooping

Quality of Service (QoS)

- L2 and L3 QoS: Classification, rewrite, queuing
- Rate limiting:
  - Ingress policing: Single-rate two-color policer, two-rate three-color policer
  - Egress policing: Policer, policer mark down action
  - Egress shaping: Per queue on each port
- 10 hardware queues per port (8 unicast and 2 multicast)
- Strict-priority queuing (PQ), shaped-deficit weighted round-robin (SDWRR), weighted random early detection (WRED), weighted tail drop
- FCoE Initialization Protocol (FIP) snooping
- 802.1p remarking
- L2 classification criteria: Interface, MAC address, Ethertype, 802.1p, VLAN
- Congestion avoidance capabilities: WRED
- Trust IEEE 802.1p (ingress)
- Remarking of bridged packets

Data Center Bridging (DCB)

- Priority-based flow control (PFC)—IEEE 802.1Qbb
- Data Center Bridging Capability Exchange (DCBX), DCBx FCoE, and iSCSI type, length, and value (TLVs)

High Availability

- Bidirectional Forwarding Detection (BFD)
- Uplink failure detection
- Dynamic Load Balancing

MPLS

- Static label-switched paths (LSPs)
- RSVP-based signaling of LSPs
- LDP-based signaling of LSPs
- LDP tunneling (LDP over RSVP)
- MPLS class of service (CoS)
- MPLS LSR support
- IPv6 tunneling (6PE) (via IPv4 MPLS backbone)
- IPv4 L3 VPN (RFC 2547, RFC 4364)

Server Virtualization Management and SDN-Related Protocols

- VXLAN OVSDB
- EVPN-VXLAN

Management and Analytics Platforms

- Juniper Mist Wired Assurance for Campus
- Junos Space® Network Director for Campus
- Junos Space® Management

Device Management and Operations

- Role-based CLI management and access
- CLI via console, telnet, or SSH
- Extended ping and traceroute
- OpenConfig for Junos OS to support the YANG data models
- Junos OS configuration rescue and rollback
- Image rollback
- SNMP v1/v2/v3
- Junos XML management protocol
- sFlow v5
- Beacon LED for port and system
- Zero Touch Provisioning (ZTP)
- OpenStack Neutron Plug-in
- Python
- Junos OS event, commit, and OP scripts
- Junos Telemetry Interface (JTI)

Traffic Mirroring

- Port-based
- LAG port
- VLAN-based
- Filter-based
- Mirror to local
- Mirror to remote destinations (L2 over VLAN)

Standards Compliance

IEEE Standard

- IEEE standard
- IEEE 802.1D
- IEEE 802.1w
- IEEE 802.1
- IEEE 802.1Q
- IEEE 802.1p
- IEEE 802.1ad
- IEEE 802.3ad
- IEEE 802.1AB
- IEEE 802.3x
- IEEE 802.1Qbb
- IEEE 802.1Qaz

T11 Standards

- INCITS T11 FC-BB-5

Supported RFCs

- RFC 768 UDP
- RFC 783 Trivial File Transfer Protocol (TFTP)
- RFC 791 IP
- RFC 792 ICMP
- RFC 793 TCP
- RFC 826 ARP
- RFC 854 Telnet client and server
- RFC 894 IP over Ethernet
- RFC 903 RARP
- RFC 906 TFTP Bootstrap
- RFC 951 1542 BootP
- RFC 1058 Routing Information Protocol
- RFC 1112 IGMP v1
- RFC 1122 Host requirements
- RFC 1142 OSI IS-IS Intra-domain Routing Protocol
- RFC 1256 IPv4 ICMP Router Discovery (IRDP)

- RFC 1492 TACACS+
- RFC 1519 Classless Interdomain Routing (CIDR)
- RFC 1587 OSPF not-so-stubby area (NSSA) Option
- RFC 1591 Domain Name System (DNS)
- RFC 1745 BGP4/IDRP for IP—OSPF Interaction
- RFC 1772 Application of the Border Gateway Protocol in the Internet
- RFC 1812 Requirements for IP Version 4 routers
- RFC 1997 BGP Communities Attribute
- RFC 2030 SNTP, Simple Network Time Protocol
- RFC 2068 HTTP server
- RFC 2131 BOOTP/DHCP relay agent and Dynamic Host
- RFC 2138 RADIUS Authentication
- RFC 2139 RADIUS Accounting
- RFC 2154 OSPF w/Digital Signatures (Password, MD-5)
- RFC 2236 IGMP v2
- RFC 2267 Network ingress filtering
- RFC 2328 OSPF v2 (edge mode)
- RFC 2338 VRRP
- RFC 2362 PIM-SM (edge mode)
- RFC 2370 OSPF Opaque link-state advertisement (LSA) Option
- RFC 2385 Protection of BGP Sessions via the TCP Message Digest 5 (MD5) Signature Option
- RFC 2439 BGP Route Flap Damping
- RFC 2453 RIP v2
- RFC 2474 Definition of the Differentiated Services Field in the IPv4 and IPv6 Headers
- RFC 2597 Assured Forwarding PHB (per-hop behavior) Group
- RFC 2598 An Expedited Forwarding PHB
- RFC 2697 A Single Rate Three Color Marker
- RFC 2698 A Two Rate Three Color Marker
- RFC 2796 BGP Route Reflection—An Alternative to Full Mesh IBGP
- RFC 2918 Route Refresh Capability for BGP-4
- RFC 3065 Autonomous System Confederations for BGP
- RFC 3376 IGMP v3 (source-specific multicast include mode only)
- RFC 3392 Capabilities Advertisement with BGP-4
- RFC 3446, Anycast RP
- RFC 3569 SSM
- RFC 3618 MSDP
- RFC 3623 Graceful OSPF Restart
- RFC 4271 Border Gateway Protocol 4 (BGP-4)
- RFC 4360 BGP Extended Communities Attribute
- RFC 4456 BGP Route Reflection: An Alternative to Full Mesh Internal BGP (IBGP)
- RFC 4486 Subcodes for BGP Cease Notification Message
- RFC 4724 Graceful Restart Mechanism for BGP
- RFC 4812 OSPF Restart Signaling
- RFC 4893 BGP Support for Four-octet AS Number Space
- RFC 5176 Dynamic Authorization Extensions to RADIUS
- RFC 5396 Textual Representation of Autonomous System (AS) Numbers
- RFC 5668 4-Octet AS Specific BGP Extended Community
- RFC 5880 Bidirectional Forwarding Detection (BFD) Dynamic Host Configuration Protocol (DHCP) server

Supported MIBs

- RFC 1155 SMI
- RFC 1157 SNMPv1
- RFC 1212, RFC 1213, RFC 1215 MIB-II, Ethernet-Like MIB and TRAPs
- RFC 1850 OSPFv2 MIB
- RFC 1901 Introduction to Community-based SNMPv2
- RFC 2011 SNMPv2 for Internet protocol using SMIv2
- RFC 2012 SNMPv2 for transmission control protocol using SMIv2
- RFC 2013 SNMPv2 for user datagram protocol using SMIv2
- RFC 2233, The Interfaces Group MIB Using SMIv2
- RFC 2287 System Application Packages MIB
- RFC 2570 Introduction to Version 3 of the Internet-standard Network Management Framework
- RFC 2571 An Architecture for describing SNMP Management Frameworks (read-only access)
- RFC 2572 Message Processing and Dispatching for the SNMP (read-only access)
- RFC 2576 Coexistence between SNMP Version 1, Version 2, and Version 3
- RFC 2578 SNMP Structure of Management Information MIB
- RFC 2579 SNMP Textual Conventions for SMIv2
- RFC 2580 Conformance Statements for SMIv2
- RFC 2665 Ethernet-like interface MIB
- RFC 2787 VRRP MIB
- RFC 2790 Host Resources MIB
- RFC 2819 RMON MIB
- RFC 2863 Interface Group MIB
- RFC 2932 IPv4 Multicast MIB
- RFC 3410 Introduction and Applicability Statements for Internet Standard Management Framework
- RFC 3411 An architecture for describing SNMP Management Frameworks
- RFC 3412 Message Processing and Dispatching for the SNMP
- RFC 3413 Simple Network Management Protocol (SNMP) (all MIBs are supported except the Proxy MIB)

- RFC 3414 User-based Security Model (USM) for version 3 of SNMPv3
- RFC 3415 View-based Access Control Model (VACM) for the SNMP
- RFC 3416 Version 2 of the Protocol Operations for the SNMP
- RFC 3417 Transport Mappings for the SNMP
- RFC 3418 Management Information Base (MIB) for the SNMP
- RFC 3584 Coexistence between Version 1, Version 2, and Version 3 of the Internet-standard Network Management Framework
- RFC 3826 The Advanced Encryption Standard (AES) Cipher Algorithm in the SNMP User-based Security Model
- RFC 4188 Definitions of Managed Objects for Bridges
- RFC 4318 Definitions of Managed Objects for Bridges with Rapid Spanning Tree Protocol
- RFC 4363b Q-Bridge VLAN MIB

Environmental Ranges

- Operating temperature: 32° to 104° F (0° to 40° C)
- Storage temperature: -40° to 158° F (-40° to 70° C)
- Operating altitude: Up to 6000 ft (1829 m)
- Relative humidity operating: 5% to 90% (noncondensing)
- Relative humidity nonoperating: 0% to 95% (noncondensing)

Juniper Networks Services and Support

Juniper Networks is the leader in performance-enabling services that are designed to accelerate, extend, and optimize your high-performance network. Our services allow you to maximize operational efficiency while reducing costs and minimizing risk, achieving a faster time to value for your network. Juniper Networks

ensures operational excellence by optimizing the network to maintain required levels of performance, reliability, and availability.

For more information, please visit https://www.juniper.net/us/en/products.html.

Installation and Implementation Service

Juniper Professional Services offers an Enterprise Switching QuickStart program to ensure that your solution is operational and you have a complete understanding of areas such as configuration and ongoing operations. The QuickStart service provides an onsite consultant who works with your team to quickly develop the initial configuration and deployment of a small Juniper Networks data center switching environment. A knowledge transfer session, which is intended as a review of local implementation and configuration options, is also included, but is not intended as a substitute for formalized training.

Ordering Information

Product	Description
Switch Hardware	
EX4650-48Y-AFI	48 25GbE/10GbE/GbE SFP28/SFP+/SFP ports, 8 100GbE/40GbE QSFP28/QSFP+ ports, redundant fans, 2 AC power supplies, 2 power cords, 4-post rack mount kit, and back to front airflow
EX4650-48Y-AFO	48 25GbE/10GbE/GbE SFP28/SFP+/SFP ports, 8 100GbE/40GbE QSFP28/QSFP+ ports, redundant fans, 2 AC power supplies, 2 power cords, 4-post rack mount kit, and front to back airflow
EX4650-48Y-DC-AFI	48 25GbE/10GbE/GbE SFP28/SFP+/SFP ports, 8 100GbE/40GbE QSFP28/QSFP+ ports, redundant fans, 2 DC power supplies, 2 power cords, 4-post rack mount kit, and back to front airflow
EX4650-48Y-DC-AFO	48 25GbE/10GbE/GbE SFP28/SFP+/SFP ports, 8 100GbE/40GbE QSFP28/QSFP+ ports, redundant fans, 2 DC power supplies, 2 power cords, 4-post rack mount kit, and front to back airflow
JPSU-650W-AC-AFO	Juniper 650 W AC power supply (port-side to FRU-side airflow)
JPSU-650W-AC-AFI	Juniper 650 W AC power supply (FRU-side to port-side airflow)
JPSU-650W-DC-AFO	Juniper 650 W DC power supply (port-side to FRU-side airflow)
JPSU-650W-DC-AFI	Juniper 650 W DC power supply (FRU-side to port-side airflow)
QFX5110-FANAFI	FANAFI fan model, back-to-front airflow
QFX5110-FANAFO	FANAFO fan model, front-to-back airflow
EX-4PST-RMK	4 post rack mount kit
Optics and Transceivers	
EX-SFP-1GE-T	SFP 1000BASE-T copper transceiver module for up to 100 m transmission on Category 5
EX-SFP-1GE-SX	SFP 1000BASE-SX GbE optics, 850 nm for up to 550 m transmission on multimode fiber
EX-SFP-1GE-LX	SFP 1000BASE-LX GbE optics, 1310 nm for 10 km transmission on single-mode fiber
EX-SFP-10GE-USR	SFP+ 10GbE ultra short reach optics, 850 nm for 10 m on OM1, 20 m on OM2, 100 m on OM3 multimode fiber
EX-SFP-10GE-SR	SFP+ 10GBASE-SR 10GbE optics, 850 nm for up to 300 m transmission on multimode fiber
EX-SFP-10GE-LR	SFP+ 10GBASE-LR 10GbE optics, 1310 nm for 10 km transmission on single-mode fiber
EX-SFP-10GE-ER	SFP+ 10GBASE-ER 10GbE optics, 1550 nm for 40 km transmission on single-mode fiber
EX-SFP-10GE-ZR	SFP+ 10GBASE-ZR 10GbE optics, 1550 nm for 80 km transmission on single-mode fiber
EX-SFP-DAC-1M	SFP+ 10GbE Direct Attach Copper (twinax copper cable), 1 m
EX-SFP-DAC-3M	SFP+ 10GbE Direct Attach Copper (twinax copper cable), 3 m
QFX-SFP-DAC-1MA	SFP+ 10GbE Direct Attach Copper (active twinax copper cable), 1 m
QFX-SFP-DAC-3MA	SFP+ 10GbE Direct Attach Copper (active twinax copper cable), 3 m
QFX-SFP-DAC-5MA	SFP+ 10GbE Direct Attach Copper (active twinax copper cable), 5 m
QFX-SFP-DAC-7MA	SFP+ 10GbE Direct Attach Copper (active twinax copper cable), 7 m
JNP-SFPP-10GE-T	SFP+ transceiver provides 100/1000/10000BASE-TX throughput up to 30m over a copper connection via an RJ-45 connector
JNP-25G-SR	SFP28 25GBASE-SR optics for up to 100 m transmission over serial multimode fiber-optic (MMF) OM4 fiber
JNP-25G-LR	SFP28 25GBASE-SR optics for up to 10 km transmission over serial single-mode fiber-optic (SMF)
JNP-25G-DAC-1M	25GbE SFP28 to SFP28 copper cable, 1 m
JNP-25G-DAC-3M	25GbE SFP28 to SFP28 copper cable, 3 m
EX-QSFP-40G-LX4	40GbE QSFP+ LX4 optics
EX-QSFP-40G-SR4	QSFP+ 40GBASE-SR4 40GbE optics, 850 nm for up to 150 m transmission on multimode fiber
QFX-QSFP-40G-ESR4	QSFP+ 40GBASE-SR4 40GbE optics, 850 nm for up to 300 m transmission on multimode fiber
QSFPP-40GBASE-ER4	40GBASE-ER4 QSFP+ pluggable transceiver
EX-QSFP-40G-LR4	40GbE QSFP+ LR4
QFX-QSFP-DAC-1M	QSFP+ to QSFP+ Ethernet Direct Attach Copper (twinax copper cable), 1 m passive
QFX-QSFP-DAC-3M	QSFP+ to QSFP+ Ethernet Direct Attach Copper (twinax copper cable), 3 m passive
QFX-QSFP-DACBO-1M	QSFP+ to SFP+ 10GbE Direct Attach Breakout Copper (twinax copper cable), 1 m
QFX-QSFP-DACBO-3M	QSFP+ to SFP+ 10GbE Direct Attach Breakout Copper (twinax copper cable), 3 m
EX-QSFP-100G-SR4	QSFP28 100GbE, SR4, 100 m
JNP-QSFP-100G-PSM4	QSFP28 100GBASE-PSM4 optics for up to 500 m transmission over parallel SMF
JNP-QSFP-100G-CWDM	QSFP28 100GbE, CWDM4, 2 km
EX-QSFP-100G-LR4	QSFP28 100GbE, LR4, 10 km
JNP-100G-DAC-1M	QSFP28 to QSFP28 Ethernet Direct Attach Copper (twinax copper cable) 1 m
JNP-100G-DAC-3M	QSFP28 to QSFP28 Ethernet Direct Attach Copper (twinax copper cable) 3 m
JNP-100G-4X25G-1M	QSFP28 to SFP+ 25GbE Direct Attach Breakout Copper (twinax copper cable) 1 m
JNP-100G-4X25G-3M	QSFP28 to SFP+ 25 GbE Direct Attach Breakout Copper (twinax copper cable) 3 m
EX-SFP-GE80KCW1470	SFP, Gigabit Ethernet CWDM optics, 1470 nm for 80 km transmission on SMF
EX-SFP-GE80KCW1490	SFP, Gigabit Ethernet CWDM optics, 1490 nm for 80 km transmission on SMF
EX-SFP-GE80KCW1530	SFP, Gigabit Ethernet CWDM optics, 1530 nm for 80 km transmission on SMF
EX-SFP-GE80KCW1550	SFP, Gigabit Ethernet CWDM optics, 1550 nm for 80 km transmission on SMF
EX-SFP-GE80KCW1570	SFP, Gigabit Ethernet CWDM optics, 1570 nm for 80 km transmission on SMF

Product	Description
EX-SFP-GE80KCW1590	SFP, Gigabit Ethernet CWDM optics, 1590 nm for 80 km transmission on SMF
EX-SFP-GE80KCW1610	SFP, Gigabit Ethernet CWDM optics, 1610 nm for 80 km transmission on SMF

About Juniper Networks

At Juniper Networks, we are dedicated to dramatically simplifying network operations and driving superior experiences for end users. Our solutions deliver industry-leading insight, automation, security and AI to drive real business results. We believe that powering connections will bring us closer together while empowering us all to solve the world's greatest challenges of well-being, sustainability and equality.

ACORD

CERTIFICATE OF LIABILITY INSURANCE

DATE (MM/DD/YYYY): 10/28/2024

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

IMPORTANT: If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).

UDT Tax Certification

Form **W-9**
(Rev. October 2018)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

▶ Go to *www.irs.gov/FormW9* for instructions and the latest information.

Give Form to the requester. Do not send to the IRS.

Print or type. See Specific Instructions on page 3.

1 Name (as shown on your income tax return). Name is required on this line; do not leave this line blank.
United Data Technologies, Inc.

2 Business name/disregarded entity name, if different from above
UDT; UDT Financial Services

3 Check appropriate box for federal tax classification of the person whose name is entered on line 1. Check only **one** of the following seven boxes.

☐ Individual/sole proprietor or single-member LLC ☐ C Corporation ☒ S Corporation ☐ Partnership ☐ Trust/estate

☐ Limited liability company. Enter the tax classification (C=C corporation, S=S corporation, P=Partnership) ▶ _____

Note: Check the appropriate box in the line above for the tax classification of the single-member owner. Do not check LLC if the LLC is classified as a single-member LLC that is disregarded from the owner unless the owner of the LLC is another LLC that is **not** disregarded from the owner for U.S. federal tax purposes. Otherwise, a single-member LLC that is disregarded from the owner should check the appropriate box for the tax classification of its owner.

☐ Other (see instructions) ▶

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):
Exempt payee code (if any) _____
Exemption from FATCA reporting code (if any) _____
(Applies to accounts maintained outside the U.S.)

5 Address (number, street, and apt. or suite no.) See instructions.
2900 Monarch Lakes Boulevard, Suite 300

Requester's name and address (optional)

6 City, state, and ZIP code
Miramar, FL 33027

7 List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN*, later.

Note: If the account is in more than one name, see the instructions for line 1. Also see *What Name and Number To Give the Requester* for guidelines on whose number to enter.

Social security number
[ ][ ][ ] - [ ][ ] - [ ][ ][ ][ ]

or

Employer identification number
6 5 - 0 5 6 6 1 3 8

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

Sign Here Signature of U.S. person ▶ _____ Date ▶ 1/23/23

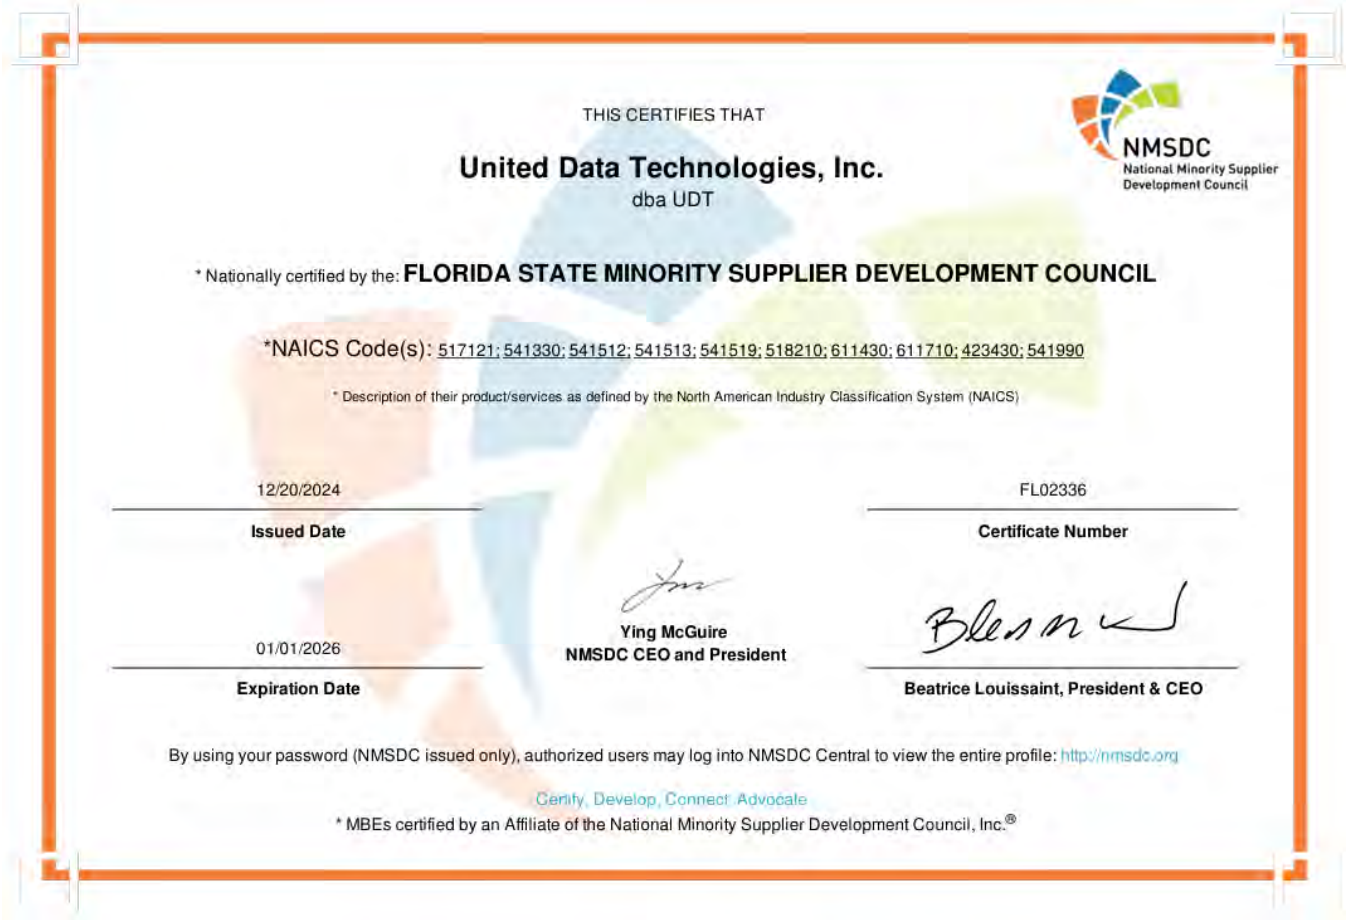
General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9*.

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) which may be your social security number (SSN), individual taxpayer identification number (ITIN), adoption taxpayer identification number (ATIN), or employer identification number (EIN), to report on an information return the amount paid to you, or other amount reportable on an information return. Examples of information returns include, but are not limited to, the following.



- Form 1099-INT (interest earned or paid)
- Form 1099-DIV (dividends, including those from stocks or mutual funds)
- Form 1099-MISC (various types of income, prizes, awards, or gross proceeds)
- Form 1099-B (stock or mutual fund sales and certain other transactions by brokers)
- Form 1099-S (proceeds from real estate transactions)
- Form 1099-K (merchant card and third party network transactions)
- Form 1098 (home mortgage interest), 1098-E (student loan interest), 1098-T (tuition)
- Form 1099-C (canceled debt)
- Form 1099-A (acquisition or abandonment of secured property)

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN.

If you do not return Form W-9 to the requester with a TIN, you might be subject to backup withholding. See What is backup withholding, *later.*

Cat. No. 10231X Form **W-9** (Rev. 10-2018)

Professional Services for Core Network

The selected vendor will be responsible for providing all necessary professional services to design, implement, and configure a new network solution. These services include, but are not limited to:

Network Design: Develop a detailed network design that aligns with our specific requirements, including topology, device selection, and configuration specifications.

Hardware Procurement: Source and procure all required network hardware, including switches, routers, firewalls, and wireless access points.

Network Implementation: Install and configure all network devices according to the approved design and specifications.

Network Configuration: Configure all network devices to meet our specific requirements, including IP addressing, routing protocols, security policies, and quality of service (QoS) settings.

Network Cabling: Provide and cable all required cabling and SFP modules to industry standards.

Existing Network Cabling: Remove existing network cabling and return to CISD.

Testing and Validation: Thoroughly test the entire network solution to ensure it meets performance, security, and reliability standards.

Documentation: Provide comprehensive documentation of the network design, implementation, and configuration.

Project Management: Manage the entire project, including planning, scheduling, and communication with all stakeholders.

Pricing

The vendor must provide a detailed breakdown of all costs associated with the professional services, including:

Professional Services Fees: Hourly rates for network engineers, project managers, and other technical staff.

Hardware Costs: Costs for all network hardware, including switches, routers, firewalls, and wireless access points.

Software Licenses: Costs for any required network software licenses.

Travel and Expenses: Costs for travel, lodging, and other expenses incurred during the project.

Solution Delivery

The delivered network solution must be:

100% Configured: All network devices must be fully configured to our specifications, including IP addressing, routing protocols, security policies, and QoS settings.

Fully Functional: The network solution must be fully functional and perform to our required standards.

Documented: The vendor must provide comprehensive documentation of the network design, implementation, and configuration.

Professional Services for Wireless Network Implementation

The selected vendor will be responsible for providing all necessary professional services to design, implement, and configure a new wireless network solution. These services include, but are not limited to:
Network Design: Develop a detailed wireless network design that aligns with our specific requirements, including topology, access point selection, and RF channel planning.
Hardware Procurement: Source and procure all required wireless hardware, including access points, controllers, and antennas.
Network Implementation: Install and configure all wireless devices according to the approved design and specifications.
Network Cabling: Install, run, terminate, use J-hooks, and use conduit for all outdoor runs and in interior locations as needed. No cabling will be exposed.
Network Cabling: Supply Cat6a patch cables for each new drop.
Network Cabling: Use the existing cabling and patch cables.

Wireless Configuration: Configure all wireless devices to meet our specific requirements, including SSID, security settings, QoS, and roaming policies.
Testing and Validation: Thoroughly test the entire wireless network solution to ensure it meets performance, security, and reliability standards.
Maps & Heat Maps: Import building floor maps into the system and create heat maps for each location AP's are deployed.
Documentation: Provide comprehensive documentation of the wireless network design, implementation, and configuration.
Project Management: Manage the entire project, including planning, scheduling, and communication with all stakeholders.

Pricing

The vendor must provide a detailed breakdown of all costs associated with the professional services, including:

Professional Services Fees: Hourly rates for network engineers, RF engineers, project managers, and other technical staff.
Hardware Costs: Costs for all wireless hardware, including access points, controllers, and antennas.
Software Licenses: Costs for any required wireless network software licenses.
Travel and Expenses: Costs for travel, lodging, and other expenses incurred during the project.

Solution Delivery

The delivered wireless network solution must be:
100% Configured: All wireless devices must be fully configured to our specifications, including SSID, security settings, QoS, and roaming policies.
Fully Functional: The wireless network solution must be fully functional and perform to our required standards, providing reliable and secure wireless connectivity.
Documented: The vendor must provide comprehensive documentation of the wireless network design, implementation, and configuration.

Professional Services for Firewall Implementation

Professional Services Cost $ 6,499.44

The selected vendor will be responsible for providing all necessary professional services to design, implement, and configure a new firewall solution. These services include, but are not limited to:
Security Needs Assessment: Conduct a thorough assessment of our security requirements to identify potential threats and vulnerabilities.
Firewall Configuration: Configure the firewall to implement security policies, including firewall rules, intrusion prevention, VPN, and other security features.
Network Integration: Integrate the firewall into our existing network infrastructure, ensuring seamless communication and optimal performance.
Network Cabling: Provide and cable all required cabling and SFP modules to industry standards.
Testing and Validation: Thoroughly test the firewall configuration to ensure it meets our security requirements and does not impact network performance.
Documentation: Provide comprehensive documentation of the firewall design, implementation, and configuration.
Project Management: Manage the entire project, including planning, scheduling, and communication with all stakeholders.

Pricing

The vendor must provide a detailed breakdown of all costs associated with the professional services unless professional services are reflected in the recurring expense, including:
Professional Services Fees: Hourly rates for network security engineers, project managers, and other technical staff.
Hardware Costs: Costs for the firewall hardware.
Software Licenses: Costs for any required firewall software licenses.
Travel and Expenses: Costs for travel, lodging, and other expenses incurred during the project.

Solution Delivery

The delivered firewall solution must be:

100% Configured: The firewall must be fully configured to our specifications, including firewall rules, intrusion prevention, VPN, and other security features.
Fully Functional: The firewall must be fully functional and perform to our required standards, providing robust security protection.
Documented: The vendor must provide comprehensive documentation of the firewall design, implementation, and configuration.

Total Site cost	$ 113,671.62

Professional Services for Core Network

The selected vendor will be responsible for providing all necessary professional services to design, implement, and configure a new network solution. These services include, but are not limited to:
Network Design: Develop a detailed network design that aligns with our specific requirements, including topology, device selection, and configuration specifications.
Hardware Procurement: Source and procure all required network hardware, including switches, routers, firewalls, and wireless access points.
Network Implementation: Install and configure all network devices according to the approved design and specifications.
Network Configuration: Configure all network devices to meet our specific requirements, including IP addressing, routing protocols, security policies, and quality of service (QoS) settings.
Network Cabling: Provide and cable all required cabling and SFP modules to industry standards.
Existing Network Cabling: Remove existing network cabling and return to CISD.
Testing and Validation: Thoroughly test the entire network solution to ensure it meets performance, security, and reliability standards.
Documentation: Provide comprehensive documentation of the network design, implementation, and configuration.
Project Management: Manage the entire project, including planning, scheduling, and communication with all stakeholders.

Pricing

The vendor must provide a detailed breakdown of all costs associated with the professional services, including:
Professional Services Fees: Hourly rates for network engineers, project managers, and other technical staff.
Hardware Costs: Costs for all network hardware, including switches, routers, firewalls, and wireless access points.
Software Licenses: Costs for any required network software licenses.
Travel and Expenses: Costs for travel, lodging, and other expenses incurred during the project.

Solution Delivery

The delivered network solution must be:
100% Configured: All network devices must be fully configured to our specifications, including IP addressing, routing protocols, security policies, and QoS settings.
Fully Functional: The network solution must be fully functional and perform to our required standards.
Documented: The vendor must provide comprehensive documentation of the network design, implementation, and configuration.

Replace Degraded Exposed Structured Cabling

Campus	Cabling	Drop Length	Drop Qty	$245,938.69
Coleman	Cat6a	100 meters	200	
Cooke	Cat6a	100 meters	300	

Network Cabling: Install, run, terminate, use J-hooks, and use conduit for all outdoor runs and in interior locations as needed. No cabling will be exposed.
Network Cabling: Supply Cat6a patch cables for each new drop.
Network Cabling: Use the existing cabling and patch cables.

Professional Services for structured cabling

The selected vendor will be responsible for providing all necessary professional services to design, implement, and configure a new network solution. These services include, but are not limited to:
Network Design: Develop a detailed network design that aligns with our specific requirements, including topology, device selection, and configuration specifications.
Hardware Procurement: Source and procure all required network hardware, including switches, routers, firewalls, and wireless access points.
Network Implementation: Install and configure all network devices according to the approved design and specifications.
Network Configuration: Configure all network devices to meet our specific requirements, including IP addressing, routing protocols, security policies, and quality of service (QoS) settings.
Network Cabling: Provide and cable all required cabling and SFP modules to industry standards.
Existing Network Cabling: Remove existing network cabling and return to CISD.
Testing and Validation: Thoroughly test the entire network solution to ensure it meets performance, security, and reliability standards.
Documentation: Provide comprehensive documentation of the network design, implementation, and configuration.
Project Management: Manage the entire project, including planning, scheduling, and communication with all stakeholders.

Pricing

The vendor must provide a detailed breakdown of all costs associated with the professional services, including:
Professional Services Fees: Hourly rates for network engineers, project managers, and other technical staff.
Hardware Costs: Costs for all network hardware, including switches, routers, firewalls, and wireless access points.
Software Licenses: Costs for any required network software licenses.
Travel and Expenses: Costs for travel, lodging, and other expenses incurred during the project.

Solution Delivery

The delivered network solution must be:
100% Configured: All network devices must be fully configured to our specifications, including IP addressing, routing protocols, security policies, and QoS settings.
Fully Functional: The network solution must be fully functional and perform to our required standards.
Documented: The vendor must provide comprehensive documentation of the network design, implementation, and configuration.

RE: CDW Government's Response to Cleburne Independent School District's 470# 250008635

Dear Mike Wallace,

Cleburne Independent School District is seeking to identify a reliable and experienced IT partner capable of managing your E-Rate initiative. Our response demonstrates CDW Government's unique ability to contribute to the overall success of this initiative.

CDW Government LLC (CDW•G) is a global systems integrator, impacting 75 million students across 34 countries. With over 30 years of experience, we are a trusted partner to more than 15,000 school districts nationwide. Benefits of partnering with us include:

- **History of Success**: CDW•G is a leading E-Rate provider with extensive experience and expertise in supporting K-12 customers since 1998. To date we have managed more than 19,550 E-Rate projects for schools and libraries nationwide.
- **Strong Partnerships**: We maintain strong relationships with more than 1,000 vendor partners to provide the best products, services, and support to our customers, including leading networking partners well-versed in Internal Connections (IC).
- **In-House Expertise:** We can support you on your E-Rate journey from beginning to end with our dedicated in-house resources and technical experts. Our E-Rate teams ensure contract compliance and expert handling of specialized E-Rate invoicing, as well as offer expert advice. Additionally, our presales IT specialists, can provide you with invaluable, ongoing consult.
- **Dedicated Account Team**: With CDW•G, you are supported by a highly trained and experienced account team, including a dedicated account manager, who serves as your primary point of contact, and is responsible for coordinating all your needs.

Please contact your Executive Account Manager, **Laura Clark**, at **(312) 705-0328 or laurcla@cdwg.com** with any questions. We thank you for the opportunity to participate in the 470 response process and are confident you will find our response advantageous from both a strategic and budgetary standpoint.

Sincerely,

Justin Schwier

RFP 250008635 - Cleburne ISD

RFP Number:
250008635

Posted Date:
12/12/2024 10:00:00 AM CST

Close Date:
2/11/2025 10:00:00 AM CST

Q&A Close Date:
1/9/2025 10:00:00 AM CST

Bid Criteria

Purchasing decisions will be based on the following criteria:

Criteria	Points
Price of Eligible service/product	20
Past relationship, references, and reputation of vendor and vendor's service/product	13
Quality of vendor's service/product	15
Service/product meets the district's needs as defined in the RFP	15
Service Reliability	10
Total cost to the district (E-Rate ineligible recurring and one-time costs)	17
Completeness of the bid for products and services	10

RFP Requirements

Addendum #2: (1/9/2025) The Q&A for this RFP has closed and the final Q&A transcript has been uploaded into EPC as of **1/9/2025.**

Addendum #1: (1/7/2025): The Q&A Transcripts from the Site Visits on **12/20/2024** has been attached along with a map for vendor reference.

Site Visit: The district will have a site visit **Friday, December 20, 2024** with a start time of **10 AM CST**. Vendors should report to **Cleburne ISD Central Office Annex (Technology Building)**, located at **513 N Ridgeway Drive, Cleburne TX, 76033**. The District would like to limit the site visit to two individuals per company/service provider. Attendance is not mandatory but highly encouraged. Please RSVP to Michael Wallace via email: **techrfp@c-isd.com**.

All proposals need to be submitted through this system to be accepted. No phone calls concerning this application will be accepted. All communication about this RFP will only be provided via the Q&A section of this RFP in which questions and answers will be posted publicly. Responses received after the stated deadline may be deemed non-responsive. All vendors must comply with Texas Education Agency Financial Accountability Guidelines found in Module 5: Purchasing.

Specific Requirements:

- All proposals should be received by the Bid Close Date. Any offer, modification, revision, or withdrawal of an offer received after this Close Date may not be considered unless it is determined that an untimely submission was due to circumstances beyond the vendors control, a consideration of the offer would be in the best interest of the applicant, or the offer is the only proposal received.
- For all of the items/services listed in this Request for Proposal, please consider services that are equivalent, more/less in quantity, better

and/or more cost effective when submitting proposals.

- If installation is requested, then installation must be included with the equipment and/or service requested. Otherwise, the bid may be considered non-responsive.
- All equipment on this request is for owned equipment. Unless otherwise stated, any leased equipment responses may be deemed non-responsive.
- In the event that no bids are received in a certain service category, we may solicit cost-effective bids after the Bid Close Date.
- If special construction charges apply, please include the option for installment payments of up to 4 years for the applicants non-discounted share.
- All contracts are contingent upon funding by the Schools and Libraries Division (SLD) of the Universal Services Administrative Company (USAC) unless otherwise agreed upon by district.
- All pricing provided in the proposal should be in accordance with the Lowest Corresponding Price rule.
- Service providers may include contingency fees in their bid responses if they deem it a necessary item and the fees are reasonable and a regular business practice. These fees should be included based on the situation/circumstances to provide the service/products. These charges should be separate from any other charges and clearly listed in the proposal. The fees will only be paid if the service/products are completed.
- Proposers should separate the cost of eligible services/products from non-eligible services/products and clearly indicate this separation on the proposal.
- Proposer must be in good standing with the Federal Communications Commission (FCC) and does not have a red-light status. If there is a red-light status, the contract will become null and void without penalty to the applicant.
- Proposers will be held responsible for complying with all E-Rate program rules. No gifts shall be offered or accepted by the applicant at any time.
- All submitted bids should include contracts and the contracts should also include the option for voluntary extensions unless they are month to month services.
- Submitted bids should include scalability of bandwidth during the terms of the contract.
- A manufacturer's multi-year warranty for a period up to three years that is provided as an integral part of an eligible component, without a separately identifiable cost, may be included in the cost of the component.

Requested Services and/or Equipment

Internal Connections

Function	Mfg or Equivalent	Model	Quantity	Unit	Install & Config	Campus
Switches, Components, and Software & Licenses	Cisco Catalyst or Equivalent	C9500-48Y4C-EDU	2	Each	Yes	District Wide
Approximately (2) or more Cisco Catalyst C9500-48Y4C-EDU, Catalyst 9500 48-port x 1/10/25G and 4-port 40/100G EDU, or equivalent switches, located at the Cleburne ISD Admin (DMARC) for district wide use, each configured with related components as follows: (2) x C9500-DNA-48Y4C-A, C9500 DNA Advantage, Term License-- (2) x C9500-DNA-A-5Y, DNA Advantage 5 Year License-- (4) x CAB-9K12A-NA, Power Cord, 125VAC 13A NEMA 5-15 Plug, North America-- (2) x C9K-PWR-650WAC-R, 650W AC Config 4 Power Supply front to back cooling-- (2) x C9K-F1-SSD-BLANK, Cisco pluggable SSD storage-- (4) x C9K-T1-FAN TRAY, Catalyst 9500 Type 4 front to back cooling Fan-- (2) x C9500-NW-A, C9500 Network Stack, Advantage-- (2) x S9500UK9-1712, Cisco Catalyst 9500 XE 17.12 UNIVERSAL-- (2) x C9500-SSD-NONE-- (2) x C9500-RFID-- (2) x NETWORK-PNP-LIC, Network Plug-n-Play Connect for zero-touch device deployment-- ***And any other parts as required and all relevant components including installation, implementation, configuration, and software and licenses. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on a 5 year license if a license is required.						
Switches, Components, and Software & Licenses	Cisco Catalyst or Equivalent	C9300-48T-EDU	4	Each	Yes	District Wide

Function	Mfg or Equivalent	Model	Quantity	Unit	Install & Config	Campus
Approximately (4) or more Cisco Catalyst C9300-48T-EDU, Catalyst 9300 48-port or equivalent switches, located at the Cleburne ISD Admin (DMARC) for district wide use, each configured with related components as follows: (4) x C9300-DNA-E-48, C9300 DNA Essentials, 48-Port Term Licenses-- (4) x C9300-DNA-E-48-5Y, C9300 DNA Essentials, 48-Port, 5 Year Term License-- (4) x C9300-NW-E-48, C9300 Network Essentials, 48-port license-- (4) x SC9300UK9-1712, Cisco Catalyst 9300 XE 17.12 UNIVERSAL-- (4) x PWR-C1-350WAC-P, 350W AC 80+ platinum Config 1 Power Supply-- (8) x CAB-TA-NA, North America AC Type A Power Cable-- (4) x C9300-SSD-NONE-- (4) x C9K-ACC-RBFT, RUBBER FEET FOR TABLE TOP SETUP 9200 and 9300-- (4) x C9K-ACC-SCR-4, 12-24 and 10-32 SCREWS FOR RACK INSTALLATION, QTY 4-- (4) x CAB-GUIDE-1RU, 1RU CABLE MANAGEMENT GUIDES 9200 and 9300-- (4) x NETWORK-PNP-LIC, Network Plug-n-Play Connect for zero-touch device deployment-- ***And any other parts as required and all relevant components including installation, implementation, configuration, and software and licenses. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on a 5 year license if a license is required.						
Switches, Components, and Software & Licenses	Cisco Catalyst or Equivalent	C9300-NM-2Y	4	Each	Yes	District Wide
Approximately (4) or more Cisco Catalyst C9300-NM-2Y, Catalyst 9300 2 x 25GE Network Module or equivalent, located at the Cleburne ISD Admin (DMARC) for district wide use, each configured with any related components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
UPS, Components, and Software & Licenses	Cisco Catalyst or Equivalent	C9K-PWR-650WAC-R/2	2	Each	Yes	District Wide
Approximately 2 or more Cisco Catalyst C9K-PWR-650WAC-R/2, 650W AC Config 4 Power Supply front to back cooling, UPS/Battery Backups or equivalent and all related components including software and licenses for the following locations: 2 more or less located at the Cleburne ISD Admin (DMARC) for district wide use. *Please bid on a 5-year license if a license is required. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
UPS, Components, and Software & Licenses	Cisco Catalyst or Equivalent	PWR-C1-350WAC-P/2	4	Each	Yes	District Wide
Approximately 4 or more Cisco Catalyst PWR-C1-350WAC-P/2, UPS/Battery Backups or equivalent and all related components including software and licenses for the following locations: 4 more or less located at the Cleburne ISD Admin (DMARC) for district wide use. *Please bid on a 5-year license if a license is required. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Cabling & All Related Components	No Preference	Cat6a	1200	Feet	Yes	District Wide
Approximately 1200 feet of Cat6a or equivalent for the network cabling located at Cleburne ISD Admin (DMARC) for distribution at the network core. The cabling will be for approximately 80 drops or more at approximately 15 feet per drop. ***To include all related components, such as but not limited to: j hooks, patch panels, patch cables, connectors, conduit, installation, configuration, runs and terminations. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Cabling & All Related Components	Cisco Catalyst or Equivalent	STACK-T1-50CM	6	Feet	Yes	District Wide
Approximately 6 feet (4 at 50cm each) of Cisco Catalyst STACK-T1-50CM, 50CM Type 1 Stacking Cable, or equivalent for the core network equipment located at Cleburne ISD Admin (DMARC). The cabling will be for approximately 4 stacking cables or more at approximately 50cm each. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Cabling & All Related Components	Cisco Catalyst or Equivalent	CAB-SPWR-30CM	4	Feet	Yes	District Wide
Approximately 4 feet (4 at 30cm each) of Cisco Catalyst CAB-SPWR-30CM, Catalyst Stack Power Cable 30 CM, or equivalent for the core network equipment located at Cleburne ISD Admin (DMARC). The cabling will be for approximately 4 stacking cables or more at approximately 30cm each. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
WAPs, Components, and Software & Licenses	Extreme or Equivalent	AP5020-WW	822	Each	Yes	Multiple Locations

Function	Mfg or Equivalent	Model	Quantity	Unit	Install & Config	Campus
Approximately 822 or more Extreme Solutions AP5020-WW (Internal) or equivalent Wireless Access Points and all related components for the following locations: 54 more or less WAPs at Adams Elementary School, 264 more or less WAPs at Cleburne High School, 45 more or less WAPs at Coleman Elementary School, 50 more or less WAPs at Cooke Elementary School, 43 more or less WAPs at Gerard Elementary School, 54 more or less WAPs at Irving Elementary School, 51 more or less WAPs at Marti Elementary School, 54 more or less WAPs at Santa Fe Elementary School, 102 more or less WAPs at Lowell Smith JR Intermediate, and 105 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on the following 5-year license if a license is required: XCIQ-PT0-C-EW-5YR-K12 or equivalent.						
WAPs, Components, and Software & Licenses	Extreme or Equivalent	AP460S12C-FCC	62	Each	Yes	Multiple Locations
Approximately 62 or more Extreme Solutions AP460S12C-FCC (External) or equivalent Wireless Access Points and all related components for the following locations: 4 more or less WAPs at Adams Elementary School, 15 more or less WAPs at Cleburne High School, 4 more or less WAPs at Coleman Elementary School, 3 more or less WAPs at Cooke Elementary School, 4 more or less WAPs at Gerard Elementary School, 4 more or less WAPs at Irving Elementary School, 4 more or less WAPs at Marti Elementary School, 4 more or less WAPs at Santa Fe Elementary School, 9 more or less WAPs at Lowell Smith JR Intermediate, and 11 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on the following 5-year license if a license is required: XCIQ-PT0-C-EW-5YR-K12 or equivalent.						
WAPs, Components, and Software & Licenses	Extreme or Equivalent	AP460S6C-FCC	34	Each	Yes	Multiple Locations
Approximately 34 or more Extreme Solutions AP460S6C-FCC (Directional) or equivalent Wireless Access Points and all related components for the following locations: 20 more or less WAPs at Cleburne High School, 6 more or less WAPs at Lowell Smith JR Intermediate, and 8 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on the following 5-year license if a license is required: XCIQ-PT0-C-EW-5YR-K12 or equivalent.						
WAPs, Components, and Software & Licenses	Extreme or Equivalent	ACC-MBO-KT-AX	96	Each	Yes	Multiple Locations
Approximately 96 or more Extreme Solutions ACC-MBO-KT-AX or equivalent Mounting Brackets for Wireless Access Points and all related components for the following locations: 4 more or less WAPs at Adams Elementary School, 35 more or less WAPs at Cleburne High School, 4 more or less WAPs at Coleman Elementary School, 3 more or less WAPs at Cooke Elementary School, 4 more or less WAPs at Gerard Elementary School, 4 more or less WAPs at Irving Elementary School, 4 more or less WAPs at Marti Elementary School, 4 more or less WAPs at Santa Fe Elementary School, 15 more or less WAPs at Lowell Smith JR Intermediate, and 19 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
WAPs, Components, and Software & Licenses	Extreme or Equivalent	KT-147407-02	96	Each	Yes	Multiple Locations
Approximately 96 or more Extreme Solutions KT-147407-02 or equivalent Mounting Brackets for Wireless Access Points and all related components for the following locations: 4 more or less WAPs at Adams Elementary School, 35 more or less WAPs at Cleburne High School, 4 more or less WAPs at Coleman Elementary School, 3 more or less WAPs at Cooke Elementary School, 4 more or less WAPs at Gerard Elementary School, 4 more or less WAPs at Irving Elementary School, 4 more or less WAPs at Marti Elementary School, 4 more or less WAPs at Santa Fe Elementary School, 15 more or less WAPs at Lowell Smith JR Intermediate, and 19 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Cabling & All Related Components	No Preference	Cat6a	29200	Feet	Yes	Multiple Locations
Approximately 29,200 feet of Cat6a (Internal) or equivalent for drops and patch cables. The cabling will be for approximately 89 or more drops at approximately 100 meters (328.08 feet) per drop located at the following locations: 6 more or less drops at Adams Elementary School, 28 more or less drops at Cleburne High School, 3 more or less drops at Coleman Elementary School, 2 more or less drops at Cooke Elementary School, 4 more or less drops at Gerard Elementary School, 6 more or less drops at Irving Elementary School, 4 more or less drops at Marti Elementary School, 6 more or less drops at Santa Fe Elementary School, 21 more or less drops at Lowell Smith JR Intermediate, and 9 more or less drops at Wheat Middle School. ***To include all related components, such as but not limited to: j hooks, patch panels, patch cables, connectors, conduit, installation, configuration, runs and terminations. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						

Function	Mfg or Equivalent	Model	Quantity	Unit	Install & Config	Campus
Cabling & All Related Components	No Preference	Cat6a	19685	Feet	Yes	Multiple Locations
Approximately 19,685 feet of Cat6a (External) or equivalent for drops and patch cables. The cabling will be for approximately 60 or more drops at approximately 100 meters (328.08 feet) per drop located at the following locations: 4 more or less drops at Adams Elementary School, 15 more or less drops at Cleburne High School, 4 more or less drops at Coleman Elementary School, 3 more or less drops at Cooke Elementary School, 4 more or less drops at Gerard Elementary School, 4 more or less drops at Irving Elementary School, 4 more or less drops at Marti Elementary School, 4 more or less drops at Santa Fe Elementary School, 9 more or less drops at Lowell Smith JR Intermediate, and 9 more or less drops at Wheat Middle School. ***To include all related components, such as but not limited to: j hooks, patch panels, patch cables, connectors, conduit, installation, configuration, runs and terminations. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
WAPs, Components, and Software & Licenses	Aruba or Equivalent	HPE ANW AP-735	822	Each	Yes	Multiple Locations
Approximately 822 or more Aruba HPE ANW AP-735 (Internal) or equivalent Wireless Access Points and all related components for the following locations: 54 more or less WAPs at Adams Elementary School, 264 more or less WAPs at Cleburne High School, 45 more or less WAPs at Coleman Elementary School, 50 more or less WAPs at Cooke Elementary School, 43 more or less WAPs at Gerard Elementary School, 54 more or less WAPs at Irving Elementary School, 51 more or less WAPs at Marti Elementary School, 54 more or less WAPs at Santa Fe Elementary School, 102 more or less WAPs at Lowell Smith JR Intermediate, and 105 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on the following 5-year license if a license is required: #Q9Y60AAE (HPE ANW Central AP Fnd 5y E- STU) or equivalent.						
WAPs, Components, and Software & Licenses	Aruba or Equivalent	HPE ANW AP-675 #S0P50A	62	Each	Yes	Multiple Locations
Approximately 62 or more Aruba HPE ANW AP-675 #S0P50A (External) or equivalent Wireless Access Points and all related components for the following locations: 4 more or less WAPs at Adams Elementary School, 15 more or less WAPs at Cleburne High School, 4 more or less WAPs at Coleman Elementary School, 3 more or less WAPs at Cooke Elementary School, 4 more or less WAPs at Gerard Elementary School, 4 more or less WAPs at Irving Elementary School, 4 more or less WAPs at Marti Elementary School, 4 more or less WAPs at Santa Fe Elementary School, 9 more or less WAPs at Lowell Smith JR Intermediate, and 11 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on the following 5-year license if a license is required: #Q9Y60AAE (HPE ANW Central AP Fnd 5y E- STU) or equivalent.						
WAPs, Components, and Software & Licenses	Aruba or Equivalent	HPE ANW AP-677 #S0P55A	34	Each	Yes	Multiple Locations
Approximately 34 or more Aruba HPE ANW AP-677 #S0P55A (Directional) or equivalent Wireless Access Points and all related components for the following locations: 20 more or less WAPs at Cleburne High School, 6 more or less WAPs at Lowell Smith JR Intermediate, and 8 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on the following 5-year license if a license is required: #Q9Y60AAE (HPE ANW Central AP Fnd 5y E- STU) or equivalent.						
WAPs, Components, and Software & Licenses	Aruba or Equivalent	HPE AP-MNT- MP10-B #Q9G69A	79	Each	Yes	Multiple Locations
Approximately 79 or more Aruba HPE AP-MNT- MP10-B #Q9G69A or equivalent Mounting Brackets for Wireless Access Points and all related components for the following locations: 5 more or less WAPs at Adams Elementary School, 26 more or less WAPs at Cleburne High School, 4 more or less WAPs at Coleman Elementary School, 5 more or less WAPs at Cooke Elementary School, 4 more or less WAPs at Gerard Elementary School, 5 more or less WAPs at Irving Elementary School, 5 more or less WAPs at Marti Elementary School, 5 more or less WAPs at Santa Fe Elementary School, 10 more or less WAPs at Lowell Smith JR Intermediate, and 10 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
WAPs, Components, and Software & Licenses	Aruba or Equivalent	AP-MNT-B AP #R3J16A	32	Each	Yes	Multiple Locations

Function	Mfg or Equivalent	Model	Quantity	Unit	Install & Config	Campus
Approximately 32 or more Aruba AP-MNT-B AP #R3J16A or equivalent Mounting Brackets for Wireless Access Points and all related components for the following locations: 4 more or less WAPs at Adams Elementary School, 4 more or less WAPs at Cleburne High School, 5 more or less WAPs at Coleman Elementary School, 3 more or less WAPs at Gerard Elementary School, 4 more or less WAPs at Irving Elementary School, 1 more or less WAPs at Marti Elementary School, 4 more or less WAPs at Santa Fe Elementary School, 2 more or less WAPs at Lowell Smith JR Intermediate, and 5 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
WAPs, Components, and Software & Licenses	Aruba or Equivalent	AP-270-MNT-V1A #R9H97A	62	Each	Yes	Multiple Locations
Approximately 62 or more Aruba AP-270-MNT-V1A #R9H97A Outdoor Long Arm Mount or equivalent Mounting Brackets for Wireless Access Points and all related components for the following locations: 4 more or less WAPs at Adams Elementary School, 15 more or less WAPs at Cleburne High School, 4 more or less WAPs at Coleman Elementary School, 3 more or less WAPs at Cooke Elementary School, 4 more or less WAPs at Gerard Elementary School, 4 more or less WAPs at Irving Elementary School, 4 more or less WAPs at Marti Elementary School, 4 more or less WAPs at Santa Fe Elementary School, 9 more or less WAPs at Lowell Smith JR Intermediate, and 11 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
WAPs, Components, and Software & Licenses	Aruba or Equivalent	AP-270-MNT-H3 #R6W11A	34	Each	Yes	Multiple Locations
Approximately 34 or more Aruba AP-270-MNT-H3 #R6W11A Outdoor Dual Tilt Mount or equivalent Mounting Brackets for Wireless Access Points and all related components for the following locations: 20 more or less WAPs at Cleburne High School, 6 more or less WAPs at Lowell Smith JR Intermediate, and 8 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Firewall, Components, and Software & Licenses	Palo Alto or Equivalent	PAN-PA-3420	1	Each	Yes	District Wide
Firewall appliance: Palo Alto PAN-PA-3420 5 YR or equivalent and all related components to be installed at Cleburne ISD Admin (DMARC) shared by all entities for district-wide use. Bids should include applicable software and licenses to make the service work. Also include any other parts as required and all relevant components including installation, implementation, configuration, and software and licenses. ***Please identify eligible costs from ineligible costs. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on the following 5 year license if a license is required: PAN-PA-3420-BND-CORESEC-5YR or equivalent.						
Switches, Components, and Software & Licenses	Cisco Catalyst or Equivalent	C9200L-48P-4X-EDU	25	Each	Yes	Multiple Locations
Approximately (25) or more Cisco Catalyst C9200L-48P-4X-EDU, Catalyst 9200L 48-port PoE+ only, 4x10G uplinks, K12, or equivalent switches, located at multiple campuses, each configured with related components as follows: (1) x C9200L-DNA-E-48, C9200L Cisco DNA Essentials, 48-port Term license-- (1) x C9200L-DNA-E-48-3Y, C9200L Cisco DNA Essentials, 48-port, 3 Year Term license-- (1) x C9200L-NW-E-48, C9200L Network Essentials, 48-port license-- (2) x CAB-TA-NA, North America AC Type A Power Cable-- (1) x C9K-ACC-RBFT, RUBBER FEET FOR TABLE TOP SETUP 9200 and 9300-- (1) x C9K-ACC-SCR-4, 12-24 and 10-32 SCREWS FOR RACK INSTALLATION, QTY 4-- (1) x CAB-GUIDE-1RU, 1RU CABLE MANAGEMENT GUIDES 9200 and 9300-- (2) x C9200-STACK, Catalyst 9200 Stack Module-- (1) x NETWORK-PNP-LIC, Network Plug-n-Play Connect for zero-touch device deployment-- ## *7 more or less Switches at Adams Elementary School, *3 more or less Switches at Irving Elementary School, *2 more or less Switches at Marti Elementary School, *11 more or less Switches at Santa Fe Elementary School, *2 more or less Switches at Lowell Smith JR Intermediate, and ***And any other parts as required and all relevant components including installation, implementation, configuration, and software and licenses. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on a 3 year license if a license is required.						
Switches, Components, and Software & Licenses	Cisco Catalyst or Equivalent	C9200L-STACK-KIT	25	Each	Yes	Multiple Locations
Approximately (25) or more Cisco Catalyst C9200L-STACK-KIT, Catalyst 9200L Stack Module for switches, or equivalent , located at multiple campuses, each configured with related components as follows: *7 more or less Switches at Adams Elementary School, *3 more or less Switches at Irving Elementary School, *2 more or less Switches at Marti Elementary School, *11 more or less Switches at Santa Fe Elementary School, *2 more or less Switches at Lowell Smith JR Intermediate, ***And any other parts as required and all relevant components including installation, implementation, configuration, and software and licenses. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						

Function	Mfg or Equivalent	Model	Quantity	Unit	Install & Config	Campus
UPS, Components, and Software & Licenses	Cisco Catalyst or Equivalent	PWR-C5-1KWAC/2	25	Each	Yes	Multiple Locations
Approximately 25 or more Cisco Catalyst PWR-C5-1KWAC/2, 1KW AC Config 5 Power Supply, UPS/Battery Backups or equivalent and all related components including software and licenses for the following locations: *7 more or less Switches at Adams Elementary School, *3 more or less Switches at Irving Elementary School, *2 more or less Switches at Marti Elementary School, *11 more or less Switches at Santa Fe Elementary School, *2 more or less Switches at Lowell Smith JR Intermediate, ***And any other parts as required and all relevant components including installation, implementation, configuration, and software and licenses. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on a 3-year license if a license is required.						
Cabling & All Related Components	Cisco Catalyst or Equivalent	STACK-T4-50CM	41	Feet	Yes	Multiple Locations
Approximately 41 feet (25 at 50cm each) of Cisco Catalyst STACK-T4-50CM, 50CM Type 4 Stacking Cable, or equivalent for the following locations: *11.5 feet (7 units) more or less at Adams Elementary School, *5 feet (3 units) more or less at Irving Elementary School, *3 feet (2 units) more or less at Marti Elementary School, *18 feet (11 units) more or less at Santa Fe Elementary School, *3 feet (2 units) more or less at Lowell Smith JR Intermediate, The cabling will be for approximately 25 stacking cables or more at approximately 50cm each. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Cabling & All Related Components	Cisco Catalyst or Equivalent	STACK-T4-1M=	82	Feet	Yes	Multiple Locations
Approximately 82 feet (25 at 1m each) of Cisco Catalyst STACK-T4-1M=, 1M Type 4 Stacking Cable, or equivalent for the following locations: *23 feet (7 units) more or less at Adams Elementary School, *10 feet (3 units) more or less at Irving Elementary School, *6.5 feet (2 units) more or less at Marti Elementary School, *36 feet (11 units) more or less at Santa Fe Elementary School, *6.5 feet (2 units) more or less at Lowell Smith JR Intermediate, The cabling will be for approximately 25 stacking cables or more at approximately 1m each. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Cabling & All Related Components	Cisco Catalyst or Equivalent	STACK-T4-3M=	246	Feet	Yes	Multiple Locations
Approximately 246 feet (25 at 3m each) of Cisco Catalyst STACK-T4-3M=, 3M Type 4 Stacking Cable, or equivalent for the following locations: *69 feet (7 units) more or less at Adams Elementary School, *29.5 feet (3 units) more or less at Irving Elementary School, *20 feet (2 units) more or less at Marti Elementary School, *108 feet (11 units) more or less at Santa Fe Elementary School, *20 feet (2 units) more or less at Lowell Smith JR Intermediate. The cabling will be for approximately 25 stacking cables or more at approximately 3m each. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Cabling & All Related Components	No Preference	Cat6a	164040	Feet	Yes	Multiple Locations
Approximately 164,040 feet of Cat6a or equivalent for drops to replace degraded and exposed Structured cabling. The cabling will be for approximately 500 or more drops at approximately 100 meters (328.08 feet) per drop located at the following locations: 200 more or less drops at Coleman Elementary School, and 300 more or less drops at Cooke Elementary School, ***To include all related components, such as but not limited to: j hooks, patch panels, patch cables, connectors, conduit, installation, configuration, runs and terminations. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Software and Licenses - (Existing Equipment)	Cisco or equivalent	See Narrative	16	Each	Yes	Multiple Locations
Software and licenses supporting all relevant components of the existing equipment used to distribute high-speed broadband throughout the school buildings. We are requesting E-Rate reimbursement beginning July 1, 2025. ***See RFP Attachment "Cleburne BMIC Licenses Equipment List 2025" for all specifications and locations to include in bid response. E-Rate eligible equipment is highlighted in yellow with a quantity of 12 and the remaining 4 in white are ineligible. ***Bid response must clearly separate out eligible and ineligible costs.						
Software and Licenses - (Existing Firewall)	Palo Alto or equivalent	PA-5220 (See Narrative)	1	Each	Yes	District Wide
Software and licenses supporting all relevant components of the existing firewall used to distribute high-speed broadband throughout school buildings. The district is requesting bid for two different options: Option 1: PAN-PA-5220-BND-CORESEC-R (PA-5220, Core Security Subscription Renewal Bundle (Advanced Threat Prevention, Advanced URL Filtering, Advanced Wildfire, DNS Security and SD-WAN), 1 years (12 months) term) or equivalent to support PA-5220-- Option 2: PAN-PA-5220-BND-CORESEC-3YR-R (PA-5220, Core Security Subscription Renewal Bundle (Advanced Threat Prevention, Advanced URL Filtering, Advanced Wildfire, DNS Security and SD-WAN), 3 years (36 months) term) or equivalent to support PA-5220.						

Managed Internal Broadband Services

Leased or Existing	Already Installed	Model or Equivalent	Install & Config	Quantity	Unit	Campus
Leased	False	Palo Alto or Equivalent	No	1	Each	District Wide
Seeking quotes on managed services for (1) Palo Alto FWaaS - PAN-PA-3420 5 YR (leased) firewall or equivalent to be installed at Cleburne ISD Admin (DMARC) shared by all entities for district-wide use. There are approximately 7400 students plus staff and faculty across 20 campuses. Please provide bids for 5-year managed services. Please include the Subscription - Core Security Bundle PAN-PA-3420-BND-CORESEC-5YR or equivalent. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.

RFP Q&A

On the Firewall portion of RFP, sf remote access VPN is required for the solution? If so, how many users? asked on 1/9/2025 8:09:52 AM by Netsync Network Solutions	30-40 users are using the basic VPN for Windows/Mac. No advanced VPN licenses are being requested. Active Directory authentication and Azure SAML authentication portals are in use via the Palo Alto Cloud Identity Engine.
What are the cables on the structured cabling tab for? Wall drops, above ceiling drops? asked on 1/9/2025 8:10:47 AM by Netsync Network Solutions	The cables are a combination of wall and ceiling drops.
How much old/existing cable are we to demo/removing? How many schools are we removing cable from? asked on 1/9/2025 8:11:26 AM by Netsync Network Solutions	A: On the structured cabling tab the RFP states: "remove existing network cabling" B: The number of campuses is two and they are listed on the Structured Cabling tab.
Will a lift be needed in any of the schools for new cables to be installed? asked on 1/9/2025 8:11:40 AM by Netsync Network Solutions	f drops in either of the 2 gyms are at a height that meets the vendor's requirements for needing a lift, then the answer is yes. The vendor may deem other areas necessary to use a lift, but that is at the vendor's discretion.

1. Do you have to bid on all of the options together?
    a. No, you bid on each option separately.

2. Do you plan on mixing Aruba and Extreme?
    a. No, we will select one solution for the entire district.

3. Do you have drop distances and closet designations?
    a. No.

4. Was there a wireless predictive survey done?
    a. No.

5. Regarding campus switches, do the closets have proper power requirements?
    a. Yes

6. What is the project's installation timeline?
    a. We would like to get started as soon as it’s approved.

7. Are we able to install equipment during school hours?
    a. No, installing equipment will be done after school hours.

8. Cooke/Coleman - We will only be replacing exposed cabling outside of the building. The amount listed in the RFP is the maximum number needed.

9. Cooke/Coleman - Can cabling pathways be run inside rather than outside?
    a. Yes

10. Campus Switching - We are moving from 24-port switches to 48-port switches, minor shifting of patch panels may be necessary.

11. What is the condition of the pathways at the campuses?
    a. Most campuses have well-defined pathways.

12. Does new cabling require conduit?
    a. It is specified in the RFP.

13. What is the network core RFP replacing?
    a. The plan is to replace a pair of Nexus 9504 chassis switches and the 3 attached fabric extenders.

Pricing Offer and E-Rate Purchase Agreement

Upon award, to facilitate contract execution with our countersignature, please sign the enclosed E-Rate agreement and send to laurcla@cdwg.com and 470award@cdwg.com.

Before the Services are to be performed, CDW•G will provide a Statement of Work (SOW) detailing the exact scoping and pricing of the services to be provided, which will be executed by both parties prior to the start of services. The SOW will reflect the terms and conditions as negotiated between the parties during the bidding and contracting process.

To the extent allowable, all information and documents hereby submitted in response to FCC 470# 250008635 furnished by Cleburne Independent School District are the Proprietary and Confidential property of CDW Government LLC ("CDW•G").

© CDW Government LLC 2025

This E-Rate Customer Purchase Agreement (this "Agreement") is entered into the date the contract is signed, and effective on April 1, 2025 ("Effective Date") and is made by and between CDW Government LLC an Illinois limited liability corporation with an office at 230 N. Milwaukee Ave., Vernon Hills, Illinois 60061 ("Seller"), and Cleburne Independent School District a non-profit school or library eligible for Universal Service funding, as defined below.

E-Rate Contract Number	135718	**Spin #**	143005588
E-Rate Funding Year	**2025**	**FCC Registration #**	0012123287
Customer	Cleburne Independent School District 505 N. Ridgeway Drive Suite 100 Cleburne, TX, 76033	**Seller**	CDW Government LLC 230 N. Milwaukee Avenue Vernon Hills, IL 60061
Effective Date	April 1, 2025	**Quoted Items (see exhibit 1)**	**470# 250008635**

1. DEFINITIONS

As used in the Agreement, the following terms shall have the meanings set forth below:

A. "Universal Service Administrative Co." or "USAC" – The not for profit organization designated by the U.S. Federal Communications Commission ("FCC") to administer and ensure compliance with the Universal Services Fund.
B. "SLP" - The Schools and Libraries Program of the Universal Service Fund, which includes the E-Rate Program and that is administered by USAC under the direction of the FCC.
C. "E-Rate" – The education rate funding program that is a part of SLP that provides discounts to keep students and library patrons connected to broadband and voice services and which is one of the programs that form the Universal Service Program.
D. "Funding Commitment Decision Letter" or "FCDL" – A letter that a Customer receives from USAC which indicates the applicable discount amount for a specific funding year.
E. "Products" – E-Rate eligible products or services that include computer related hardware but are not limited to caching servers, routers, switches, wireless access points, installation, and warranty maintenance and other items which are eligible for E-Rate discounts in accordance with the rules issued by USAC.
F. "Funding Year" – The specific calendar period, as defined by the SLP, during which the Customer is approved for funding or discounts on Products. FY 2025 is in reference to the program year.

2. TERMS AND CONDITIONS

All orders submitted to Seller by Customer for Products under this Agreement are subject to, where applicable, the terms and conditions on the current TXDIR - Extreme DIR-TSO-4339 (DIR-TSO-4339), and/or, the current Texas Misc IT HW Peri TxDOT DIR-CPO-5093 (DIR-CPO-5093), and/or, the https://www.cdwg.com/content/cdwg/en/terms-conditions/sales-and-service-projects.html, unless otherwise stated herein.

To the extent allowable, all information and documents hereby submitted in response to FCC 470# 250008635 furnished by Cleburne Independent School District are the Proprietary and Confidential property of CDW Government LLC ("CDW•G").
© CDW Government LLC 2025

3. PURCHASE AUTHORIZATIONS

A. E-Rate Status

i. Customer represents and warrants that it qualifies as eligible under the SLP to receive E-Rate funding.

ii. CUSTOMER FURTHER ACKNOWLEDGES AND AGREES THAT THIS AGREEMENT, WHEN EXECUTED, CONSTITUTES A CONTRACT AS REQUIRED BY FCC.

B. E-Rate Purchases

i. Customer represents and warrants that all purchases made under this Agreement shall be for its own use and that it is eligible to receive E-Rate funding as specified by USAC.

ii. IN ACCORDANCE WITH FCC REQUIREMENTS, THE CUSTOMER SHALL SUBMIT A COMPLETED AND SIGNED FCC FORM 486 TO USAC The Form 486 shall be approved by USAC prior to order placement with Seller. See Payment Terms for details.

4. ORDERING AND ASSISTANCE

A. Ordering

Purchase orders shall be submitted through electronic means (email, electronic data interchange (EDI), etc.) directly to Customer's dedicated account manager. Alternatively, if a copy must be sent via mail, common courier, etc., please reach out to your account manager for the appropriate mailing address.

B. Other Requirements

i. All purchase orders shall include 1) a contact name; 2) phone number; 3) purchase order number; 4) CDW Part Number and OEM Part Number; 5) Product description; 6) original and discounted Product price 7) percentage Customer owes and percentage SLP owes (if applicable) 8) ship to location; 9) bill to location; 10) BEAR or SPI Order; and 11) FCC Form 471 and Funding Request Number (FRN) number for each part number. SEPARATE PURCHASE ORDERS SHALL BE SUBMITTED FOR PRODUCTS THAT ARE NOT ELIGIBLE FOR E-RATE FUNDING. ALL ORDERS SHALL BE SUBJECT TO ACCEPTANCE BY SELLER.

ii. If the Customer is unable to commit the full purchase order amount, any balance remaining that was not funded or approved for payment by USAC will be the responsibility of the Customer. The Customer must add the following language to its purchase order:

"The total cost of this purchase order is $_____. The E-Rate portion is $_____, and is committed by USAC. If there is any reduction or denial of payment with the E-Rate portion, Cleburne Independent School District accepts full responsibility for the cost of this purchase, $_____."

To the extent allowable, all information and documents hereby submitted in response to FCC 470# 250008635 furnished by Cleburne Independent School District are the Proprietary and Confidential property of CDW Government LLC ("CDW•G").
© CDW Government LLC 2025

iii. Should Customer choose to add Product or make substitutions to the Products originally sought, following USAC's funding decision, Customer agrees it will be responsible for the amounts owed for the added or substituted Products in excess of its committed funding from USAC.

iv. Customer must complete installation of Products ordered pursuant to this Agreement within thirty (30) days of delivery. In the event Customer, or a third party hired by Customer to complete the installation, fails to install the Products within the timeframe provided herein, the Parties acknowledge and agree that Customer will begin to accrue interest on the amounts owed for such Products in an amount of one and one-half percent (1.5%) per month, or the maximum rate permitted by applicable law.

C. Assistance with Order

i. Customer may call 1-800-328-4239 to get assistance on any purchase order. Any terms or conditions stated in or on the Customer's purchase order which are inconsistent with or in addition to the terms and conditions in this Agreement or the Product Sales Terms and Conditions shall not be valid, are considered null and void and shall not be applicable to or binding on Seller.

ii. FOR PRODUCTS WHICH ARE DISCONTINUED AFTER A CUSTOMER ORDER HAS BEEN ACCEPTED BY SELLER BUT BEFORE THE PRODUCT HAS SHIPPED, SELLER WILL MAKE REASONABLE EFFORTS TO OFFER A COMPARABLE OR BETTER PRODUCT AT THE SAME OR LESSER PRICE, IF AVAILABLE, UPON SLP'S APPROVAL OF THE PRODUCT SUBSTITUTION. ANY INCREASE IN PRICE THAT CANNOT BE ABSORBED BY THE SELLER WILL BE THE RESPONSIBILITY OF Cleburne Independent School District.

5. PRICE AND PAYMENT TERMS

i. Payment terms are subject to continuing credit approval by Seller. Seller may change credit or payment terms at any time when, in Seller's opinion, Customer's financial condition, previous payment record, or the nature of Customer's relationship with Seller so warrants.

ii. Seller may discontinue performance under this Agreement (i) if Customer fails to pay any sum when due under this Agreement or any other agreement with Seller until payment is received or (ii) if Customer is in violation of applicable laws and regulations.

A. Price

The Price shall be as set forth on the Customer's quote from Seller and which is in the form attached hereto as Exhibit I, and as amended from time to time. All prices are exclusive of federal, state, local, or other taxes, which shall be the responsibility of the Customer.

To the extent allowable, all information and documents hereby submitted in response to FCC 470# 250008635 furnished by Cleburne Independent School District are the Proprietary and Confidential property of CDW Government LLC ("CDW•G").
© CDW Government LLC 2025

Payment Terms

i. All payments, regardless of method, shall be submitted to "Accounts Receivable," please contact your account manager for payment method options.

ii. CUSTOMER MAY EITHER WAIT TO PLACE AN ORDER PRIOR TO OR AFTER RECEIPT OF ITS FCDL. IN THE EVENT THAT CUSTOMER PLACES AN ORDER PRIOR TO RECEIPT OF THE FCDL, CUSTOMER SHALL BE RESPONSIBLE FOR PAYMENT OF THE ENTIRE PURCHASE PRICE WITHOUT REGARD TO SLP FUNDING.

iii. Customer must choose one of the following payment methods. However, Customers that choose to order Products prior to receiving their FCDL must follow the BEAR payment method.

☐ **Form 474 Service Provider Invoice (SPI) Method**
Seller will invoice the Customer for the Product price, as set forth on the Product quote, net of the FCDL amount. Customer shall be responsible for making payment within thirty (30) days from date of invoice. There must be an approved FCC Form 486 prior to placing the SPI order.

☐ **Form 472 Billed Entity Applicant Reimbursement (BEAR) Method**
Seller will invoice Customer, upon Product shipment, for the total purchase price without regard to any SLP funding applied to that purchase price for the Products. Customer shall pay the invoiced amount within thirty (30) days from the date of invoice.

iv. Seller accepts BEAR orders beginning April 1 before the beginning of the Funding Year. Seller accepts SPI orders beginning July 1 of the Funding Year when Customer has received its FCDL and completed the FCC Form 486, Seller DOES NOT accept SPI orders before July 1 of the Funding Year, or prior to the Form 486 approval by USAC.

6. NON-ASSIGNABILITY AGREEMENT

Customer shall not assign or otherwise transfer its rights or delegate its obligations under this Agreement without Seller's advance written consent. Any attempted assignment, transfer or delegation without such consent shall be void.

The term of this Agreement shall commence on April 1, 2025 ("Effective Date") and be valid through the later of the Funding Year 2025 or 9/30/2026.

i. Seller may terminate this Agreement at any time for any reason upon thirty (30) days prior written notice to the Customer.

Customer may terminate this Agreement or withdraw an order upon written notice to Seller if: (a) funds are not appropriated to Customer under this program, or (b) Customer's School Board rejects this Agreement ("Termination Notice"). In the event that Customer terminates this Agreement due to non-appropriation of funds, or termination

To the extent allowable, all information and documents hereby submitted in response to FCC 470# 250008635 furnished by Cleburne Independent School District are the Proprietary and Confidential property of CDW Government LLC ("CDW•G").
© CDW Government LLC 2025

for convenience, then Seller may immediately cease performance. However, the Customer shall remain liable for any Products that have shipped or services, already provided, or have been subscribed or purchased prior to Seller's receipt of the Termination Notice. Customer shall also be responsible for any of Seller's out-of-pocket costs arising as a result of any such termination.

ii. In the event Customer receives an extension of funding from SLP, Customer will notify Seller in writing and the parties may agree to execute an amendment to extend this Agreement.

7. NOTICES

All notices and other communications required or permitted under this Agreement shall be served in person or sent by U.S. mail, Federal Express, or equivalent carrier to the party's address listed above

8. GENERAL

If any term or provision herein is determined to be illegal or unenforceable, the validity or enforceability of the remainder of the terms or provisions herein will remain in full force and effect.

9. ENTIRE AGREEMENT

This Agreement constitutes the entire agreement between Seller and Customer and supersedes and replaces any and all previous and contemporaneous communications, representations or agreements between the parties, whether oral or written, regarding transactions hereunder. No provision of this Agreement may be waived or modified except by an amendment signed by an authorized representative of each party.

10. GOVERNING LAW

This Agreement will be governed by the laws of TX, without regard to conflicts of law rules. Any litigation will be brought exclusively in a federal or state court located in the state or commonwealth where Customer's location identified above, and the parties consent to the jurisdiction of the federal and state courts located therein, submit to the jurisdiction thereof. The parties further consent to the exercise of personal jurisdiction.

11. DOCUMENT RETENTION

All documents related to this Agreement will be kept on file by both parties for a period of ten (10) years after the project completion in accordance with the rules of the SLP.

To the extent allowable, all information and documents hereby submitted in response to FCC 470# 250008635 furnished by Cleburne Independent School District are the Proprietary and Confidential property of CDW Government LLC ("CDW•G").

PROJECT SCOPE

INTRODUCTION

Target Network Integration [TNI] the Provider, has dedicated appropriate engineering resources towards the execution of a successful project that aligns with the scope of work and conforms to all scheduled timelines or deadlines. Our engineering team will carefully guide and support Customer through the technical aspects of the new technology and provide knowledge transfer to key personnel. Our goal is to provide a solution that will help increase the network's value and return on investment while improving network availability, resiliency, security, and scalability.

District Facilities

Customer has produced an E-RATE request to implement new switches and wireless networking equipment within district facilities. The facilities will receive new access points and new switches to increase classroom densities and coverage.

Firewall

Customer is planning a firewall migration project at (1) PCS facility. The current-state firewall configurations residing on current FW legacy unit(s) will help guide TNI engineers to evaluate current configurations and then apply existing rules and policies to the newly proposed (1) Palo Alto FWaaS-PAN-3420, or a PA-5220 firewall migration. Firewall designs may incorporate network routing protocols as required by network environment's final state.

Security Discovery & Documentation

Upon award, TNI engineers expect to gain remote connectivity to current firewall and to the overall network to determine current network state and observe firewall in the operational environment. TNI will monitor logs to understand and document any errors and will outline possible configuration omissions, misconfigurations, and then document remediation steps, if needed. Once the discovery is complete, a report will be generated by TNI engineers to explain observations and outline any changes or updates to bring the firewall to an optimized state within the current network environment. It is recommended that the newly updated configuration run on the current firewall in the network for a few days to confirm firewall functionality, observe operational states with the improved configuration.

Migration / Cut Over

Once the new configuration created for existing firewall has proven itself to the design team at TNI and with Customer approval, the newly purchased Palo Alto FW will be staged. The Palo Alto FW will be unboxed, benched, updated to current firmware stable versions, and a new image applied based on approved designs. The staged and tested firewall will then be delivered to Customer facilities in a scheduled maintenance window for installation and migration services. A duration of approximately (4) hours is requested by TNI engineers to complete the installation and operational testing. Once migration is complete, the firewall will be cut over and tested for operational integrity and presented to Customer for final approvals.

LAN Electronics

The Customer will be purchasing Extreme Network Switches to be installed in various MDF/IDF closets at district locations. Equipment is expected to be installed in various MDF/IDF closets within (10) district facilities. Switches will be designed, staged, configured according to an approved design plan, delivered, and installed with Day-One Support of (4) hours.

WLAN Electronics

In addition to the new switches, Customer will be installing new Extreme Wireless Access Point [WLAN] equipment. Extreme Networks AP5020-WW (822), and (80) AP460S12C-FCC, and (34) AP460S6C-FCC Indoor Access Points will be provisioned in the Extreme Cloud Controller. Access Points will be labeled and installed at site(s), and then confirmed, provisioned, and tested within Extreme Cloud Controller. Access points will be labeled according to physical location(s) utilizing Customer's nomenclature as indicated Customer supplied maps.

LAN/WLAN Engineering and Support

TNI will design, stage, label, configure and test all access layer switches & access points prior to TNI onsite installation steps as our standard practice. This lab testing will ensure the equipment delivered is sound and ready for operational testing once

installed. Purchased licenses will be added to the Extreme Cloud Controller, tested & labeled by MDF/IDF closets. Access Points will be marked on district provided maps and delivered as part of project documentation.

Customer will assist Provider in gaining network connectivity or credentials, engage in design meetings, project kickoff meetings, and sign-off upon project completion.

This document will outline the Provider delivery approach and explain the activities throughout the lifecycle of the project. A change request form will be required to expand or change the services in this scope.

Project Phases

The project will be delivered in a series of logical phases.

1) Planning & Design Services

2) Staging Outline

3) On-Site & Remote Support & Implementation Services

4) Knowledge Transfer & Documentation Review

SERVICE DELIVERY APPROACH

PROJECT PLANNING & DESIGN

This phase of the project will introduce the project team and define roles and responsibilities. The project team will provide a step-by-step process to assist in the deployment of the technology solution and a methodology to guide and support Customer throughout the implementation. Business and technical requirements will be gathered to develop a high-level design that will meet the required specifications for availability, capacity, and security.

Planning & Design Tasks

1. Project Readiness Review
    a. Introduce project team
    b. Confirm communication plan
    c. Define roles and responsibilities
    d. Define timeline and scheduling
    e. Facilities readiness report(s)
2. Project Management and Scheduling
    a. Management of information, resources and scheduling
    b. Inventory management and logistics
    c. Change control
    d. Site readiness assessment & confirmations
3. Preliminary technical discovery and documentation
    a. Gather information about existing environment
    b. Request Visio drawings and device configurations
    c. Gain remote access for technical discovery
4. Develop technology strategy and design workshop
    a. Design workshop with technical resources
        i. Review current infrastructure for improvement opportunity
            1. Physical topology-connectivity
            2. L2 VLANs
            3. SSID & VLAN design
            4. RADIUS, DHCP, DNS services
            5. Routing design (static & dynamic)
            6. Security (AAA, security features)
            7. Firewall Rules Documentation

8. NAT
9. VPN (SSL and IPSEC)
10. IPS
11. Web-Content filtering

b. Comprehensive, implementation-ready solution design
c. Documentation includes:
    a. Staging Worksheets
    b. Visio drawings
    c. Low-level design presentation
    d. Site specific implementation plan
    e. Approved test cases
d. Customer Design Acknowledgements
    a. Design change summary
    b. Customer signatures required on low-level design
    c. Staging Plan
    d. Migration Plan
    e. Testing Plans

STAGING OUTLINE

Provider will build, configure, and test each site's equipment at a Provider configuration facility. The equipment will be received, staged and then prepared for delivery to each site. The solution will be tested in a controlled environment to ensure it meets business and technical requirements. The following tasks will be performed during the staging phase:

Staging Tasks

1. Receive and Inventory equipment
    a. Asset inventory report and sign-off
    b. Asset tag and label application onto devices
2. Bench and Build equipment
    a. Firewall
        i. Firmware updated
        ii. IPSEC VPN Tested
        iii. SSL VPN (Tunnel and Portal) Configured and Tested
        iv. NAT Rules and Security Policies Configured and Tested
        v. Active/Active or Active/Passive Failover Configured and Tested
    b. Install power supplies, fans, modules, etc.
    c. Upgrade boot ROM and firmware to stable revision state
    d. Interconnect via design for testing and failover
3. Configure equipment according to Design Plan
    a. Configure services, protocols, security according to approved design
        i. Physical topology-connectivity
        ii. L2 VLAN
        iii. L3 IP addressing scheme
        iv. Routing design (static and dynamic)
        v. Security (AAA, security features)
        vi. Redundancy and fail-over resiliency
        vii. NAT
        viii. VPN (SSL and IPSEC)
        ix. IPS
        x. Web-Content filtering
        xi. AD integration- Users and Groups
        xii. Backup configurations
    b. Backup configurations

4. PoC Test Cases
    a. Perform test plan with checklist
    b. Validate design plan
    c. Test Redundancy
    d. Load testing
5. Label and Ship
    a. Label by Campus and closet
    b. Package by Campus for delivery
    c. Inventory checklist
    d. PoD signatory tickets
    e.

ON-SITE SUPPORT & IMPLEMENTATION SERVICES

An implementation project delivery conference call will be scheduled with all project stakeholders once all equipment has been delivered to each site. The scheduled resources will arrive onsite to execute the implementation plan. The production-ready system will be implemented and tested to assure it is meeting business and technical requirements. The following tasks will be performed during the implementation phase:

Implementation Tasks

1. Implementation project conference call
    a. Confirm equipment delivery
    b. Review and confirm scheduling and resource allocation
    c. Review implementation plan and milestones
    d. Review escalation and communication plan
2. Install Core Components (Palo Alto Security Appliance)
    a. Any legacy gear will be removed and de-commissioned
    b. Ports with non-standard configurations will be labeled prior to removal
    c. Security Appliance will be installed and tested
    d. Cables will be dressed according to design plan
    e. Devices will be provisioned on the network
    f. Any issues will be escalated to Project Manager & project stakeholders
    g. Old equipment will be left same location in MDF room
3. On-Site Installation of Campus/ NOC Switches
    a. Legacy equipment will be removed and de-commissioned
    b. Ports with non-standard configurations will be labeled prior to removal
    c. New switches will be installed according to migration plan
    d. Cables will be dressed according to design plan
    e. Devices will be provisioned on the network
    f. On-Site engineering turn-up and testing
    g. Any issues will be escalated to Project Manager & project stakeholders
    h. Legacy equipment will be left in same closet at each location
4. Engineering - Controller Configuration & Support for WLAN Access Points
    a. Install each access point as indicated on Customer supplied facility maps indicating correct placements of each access point.
    b. Connect Access Points to existing cable drops
    c. Confirm adoption, synchronization of each AP on the network
    d. Test connectivity (SSID verifications)
    e. Tune Access Points (Power Settings, Channel Assignments)
    f. Perform Survey to confirm connectivity
    g. Remediate troubled areas and retest
5. Post-Install walk-through

a. Closet will be reviewed and signed-off by customer
    i. Punch list will be developed and followed by engineers
b. Wireless verifications will be completed to confirm coverage and connectivity for client(s)
    i. Laptop or Tablet
    ii. (2) Client Tests only

KNOWLEDGE TRANSFER AND DOCUMENTATION REVIEW

During the Knowledge Transfer and Documentation review phase, the technology solution will be reviewed as well as all documentation associated with the implementation. The goal of this phase is to demonstrate the solution capabilities and give the customer the knowledge they need to operate and manage the new environment. This will also include the post-implementation handoff and project close out.

Tasks

1. Documentation presentation and review
    a. Visio Drawings
    b. Staging sheets
    c. Device User Guides
2. Review of solution and demonstration of capabilities
    a. Review of CLI or GUI interfaces
    b. Maintenance task review
    c. Common commands
    d. Basic troubleshooting
3. Q&A session
4. Project Handoff and ongoing support review (Extreme)
5. Customer satisfaction surveys
6. Project Close-Out and sign-off

PROJECT ASSUMPTIONS

- CDW will provide all hardware and accessories necessary to implement solutions (see Exhibit "A").
- Provider is responsible for configuration of hardware listed in (Exhibit "A") only.
- Customer is responsible for providing timely access to all project facilities and to ensure work areas are clear from obstructions.
- It is the Customer's responsibility to connect all supplicants to the network. Due to potential network changes or adjustments may require device troubleshooting or a reconnect to new network environment.
- New switches will be mounted in standard 19" inch racks. Customer is responsible for providing available rack space for new equipment.
- All racks, patch cables, cables and cable management will be pre-existing and operational prior to start of project.
- Product will be shipped to and staged at Provider configuration facility in Richardson, TX.
    - Target Network Integration | 675 N. Glenville Dr. #115, Richardson, TX 75081
- Network cutovers will occur during pre-defined Customer approved maintenance schedules.
- Customer will provide current documentation that can be used as an approved current state as a reference for new network design scenarios.
- TNI is not responsible for any server or appliance software issues unless reporting issue is directly related to work being performed.
- Approved Out-of-Scope work will be billed at an hourly rate of $245.00 per hour. No Out-of-Scope work will be performed unless a change order is approved by all parties articulating remediation issue(s), and an estimated number of hours required to complete tasks.
- Work will be performed during scheduled maintenance windows agreed upon by all parties to insure a smooth migration experience.
- Project approved schedule will be carried out with no Customer schedule interruptions once the scheduled group of sites has been approved by all parties.
- Cabling will be performed by 3rd Party contractor hired by Customer or Seller. TNI is not responsible for cabling (copper or fiber).

- Copper & Fiber Patch cables will be supplied by Seller or Customer and not purchased by Provider.
- Current network fiber is expected to perform at 10gb transmission speeds and has been upgraded in advance to accommodate the new 10gb future state. TNI is not responsible for fiber connections that do not perform at 10gb transmission speeds. Any remediation of fiber will be carried out and completed by qualified 3rd party contractor hired by Seller or Customer
- A man-lift may be required to reach high venue access point locations. If so, such lift will be supplied by Provider via Change Order or as an expense item. The average price for a scissor lift is $650.00 per day, depending on availability and location.

Services not specified in this SOW are considered out of scope and will be addressed with a separate SOW or Change Order.

ITEM(S) PROVIDED TO CUSTOMER

Table 1 – Item(s) Provided to Customer

Item	Description	Format
Project Reports	Asset Reports (serial numbers, asset tags by facility) Custody Transfer Forms (POD Reports) Configuration File(s) (Extreme Networks/Palo Alto)	PDF or EXCEL

Services not specified in this SOW are considered out of scope and will be addressed with a separate SOW or Change Order.

PROJECT SCHEDULING

Customer and Seller, who will jointly manage this project, will together develop timelines for an anticipated schedule ("**Anticipated Schedule**") based on Seller's project management methodology. Any dates, deadlines, timelines or schedules contained in the Anticipated Schedule, in this SOW or otherwise, are estimates only, and the Parties will not rely on them for purposes other than initial planning.

PROFESSIONAL SERVICES FEES

Provider will invoice for the Total Fees based on listed milestones in the pricing table.

CONSULTANT FEES

Consultant Fees hereunder are FIXED FEES, meaning that the amount invoiced for the Services will be $123,180.91 in addition to the amount of any Expenses.

The invoice amount of Consultant Fees will equal the amount of fees applicable to each completed project milestone, as specified in Table 1.

Table 2 – Project Fees

Project Milestones	Percentage of Consultant Fees	Fees
LAN | NETWORK CORE | Professional Services - Discovery, Design, Staging, On-Site Installation, Operational Testing, Documentation, Knowledge Transfer, 2-Hour Day One support	$0.11	$13,219.20
WLAN | CAMPUS Switches| Professional Services - Discovery, Design, Staging, On-Site Installation, Operational Testing, Documentation, Knowledge Transfer, 2-Hour Day One support	17.81%	$21,943.87
WLAN | CAMPUS WIRELESS | Professional Services - Discovery, Design, Staging, On-Site Installation, Operational Testing, Documentation, Knowledge Transfer, 2-Hour Day One support	66.18%	$81,518.40

Security | Palo Alto | Professional Services - Discovery, Design, Staging, On-Site Installation, Operational Testing, Documentation, Knowledge Transfer, 2-Hour Day One support	5.28%	$6,499.44
Totals	**100.00%**	**$123,180.91**

EXPENSES

Travel time and direct expenses are included for this project.

Two (2) weeks' advance notice from Customer is required for any necessary travel by Seller personnel.

CUSTOMER-DESIGNATED LOCATIONS

Location(s)	Service(s)		
Cleburne ISD – Multi-Site 505 North Ridgeway Drive Cleburne, Texas, 76033	☐ Assessment ☐ Configuration ☐ Design ☑ Implementation	☐ Knowledge Transfer ☐ Project Management ☐ Reconfiguration ☐ Reinstallation	☐ Staff Augmentation ☐ Support ☐ Training ☐ Custom Work

Summary of work:

Southwest Networks, Inc. (SWN) will perform the following low voltage structured cabling work at **Cleburne Independent School District** (CISD) as listed under this SOW, and per the CISD provided RFP 250008635 documentation including Addendums 1 and 2 Q&A and AP Placement Maps_v1.2.
The following Summary of Work applies strictly to the cabling specifications portion of the RFP. See the General Scope of Work for more details on typical structured cabling system installation methodologies.

Adams Elementary School:
1. Provide and install ten (**10**) Category 6A UTP plenum (CMP) Wireless Access Point drops
2. Provide twenty (**20**) appropriate length Category 6A CM patch cords

Cleburne High School:
1. Provide and install forty-three (**43**) Category 6A UTP plenum (CMP) Wireless Access Point drops
2. Provide eighty-six (**86**) appropriate length Category 6A CM patch cords

Coleman Elementary School:
1. Provide and install seven (**7**) Category 6A UTP plenum (CMP) Wireless Access Point drops
2. Provide fourteen (**14**) appropriate length Category 6A CM patch cords

Cooke Elementary School:
1. Provide and install five (**5**) Category 6A UTP plenum (CMP) Wireless Access Point drops
2. Provide ten (**10**) appropriate length Category 6A CM patch cords

Gerard Elementary School:
1. Provide and install eight (**8**) Category 6A UTP plenum (CMP) Wireless Access Point drops
2. Provide sixteen (**16**) appropriate length Category 6A CM patch cords

Irving Elementary School:
1. Provide and install ten (**10**) Category 6A UTP plenum (CMP) Wireless Access Point drops

2. Provide twenty (**20**) appropriate length Category 6A CM patch cords

Marti Elementary School:
1. Provide and install eight (**8**) Category 6A UTP plenum (CMP) Wireless Access Point drops
2. Provide sixteen (**16**) appropriate length Category 6A CM patch cords

Santa Fe Elementary School:
1. Provide and install ten (**10**) Category 6A UTP plenum (CMP) Wireless Access Point drops
2. Provide twenty (**20**) appropriate length Category 6A CM patch cords

Smith Intermediate School:
1. Provide and install thirty (**30**) Category 6A UTP plenum (CMP) Wireless Access Point drops
2. Provide sixty (**60**) appropriate length Category 6A CM patch cords

Wheat Middle School:
1. Provide and install eighteen (**18**) Category 6A UTP plenum (CMP) Wireless Access Point drops
2. Provide thirty-six (**36**) appropriate length Category 6A CM patch cords

All Sites:

1. Provide appropriately sized and rated man lift where necessary for access to high ceilings cable pathways
2. Utilizing existing above ceiling main cable distribution pathways for new cabling installation. Above ceiling cable pathways to new device locations designed and constructed adequately sized and installed to support cable pathways and fill ratio requirements accordingly
3. Labeling and administration of cabling according to CISD standards
4. End to end cable analyzer Category 6A 'permanent link' cable performance testing in compliance with and according to established ANSI/TIA standards
5. A Manufacturer's 20-year extended product and applications assurance warranty, and a SWN standard 1-year warranty for materials and workmanship
6. Final documentation of installation provided upon completion of project
7. Project duration expected to be approximately six to seven (**6-7)** weeks with each week defined as Monday through Friday requiring a minimum eight (8) consecutive working hours per day

---

General Scope of Work

SWN will provide labor, materials, tooling and equipment necessary for services as identified within this proposal. Descriptions within this general scope of work shall apply to all applicable services as detailed within the Summary of Work.

Horizontal Cabling

1. Provide and install Category 6A UTP plenum (CMP) cable from the CCISD designated MDF / IDF locations to the site-designated Wireless Access Point locations.

2. Above ceiling cable pathways installed using cable J-hook hangers of correct types and sizes with allowable growth potential on dedicated independent support apparatus provided at intervals not to exceed every 5' for preventing unnecessary sag, and avoiding sources of RFI and EMI. Penetrations through interior and exterior walls and fire rated barriers shall include appropriately sized and affixed sleeves and sealed according to applicable NEC, ANSI/UL and ASTM regulations for firestop systems. All cables shall be installed in a professional and competent manner, and dressed with Velcro straps for a clean, neat workmanlike installation.

3. Provide appropriate length cable service loops for the newly installed Category 6A cables at all end device and work area outlet locations, and at the MDF / IDF closet locations.

4. At each of the end device and work area outlet locations, all new Category 6A cabling will terminate utilizing Category 6A 8-position, 8-wire RJ-45 modular jacks to T568B standards. Jacks will house in a one to six port single-gang faceplate, or in a one to two port surface mount 'biscuit' box, properly-installed, labeled, and secured with blank inserts where necessary.

5. MDF and IDF Closet termination of all new Category 6A UTP cables will be achieved utilizing new or existing 19" EIA, 1U 24-port and / or 2U 48-port modular or 110 style patch panels to provide for one hundred percent (100%) connectivity of newly installed Category 6A cabling. All cable shall be installed within the existing MDF and IDF's in a neat, combed, dressed manner, with Velcro straps, utilizing existing cable runway cable paths from the ceiling spaces to the existing racks. No Zip-Ties shall be used.

6. Each Category 6A cable end, jack outlet, surface mount box, and corresponding patch panel port shall be labeled with appropriately sized machine-generated labeling materials per the prescribed and approved labeling convention. Cable drops terminated above accessible ceilings shall receive an approved cable label adhered to the ceiling grid below the cable drop location for easier identification from floor level for standard height ceilings.

7. Provide appropriate length Category 6A CM copper patch cords to accommodate one hundred percent (100%) connectivity for patch panel connection to switch ports within the MDF and IDF Closet locations, each matching the same category specification and color as the corresponding drops or according to CISD specifications.

8. Provide appropriate length Category 6A CM copper patch cords to accommodate one hundred percent (100%) connectivity for the end device work area outlet locations, each matching the same category specification and color as the corresponding drops or according to CISD specifications.

9. All testing procedures and field test instruments for Category 6A cables shall be performed to ensure compliance with established standards: ANSI/TIA-1152; ANSI/TIA-568-0.D; ANSI/TIA-568-1.D; ANSI/TIA-568-C.2; ANSI/TIA-606-B; Faults discovered during testing shall be corrected and re-tested prior to activation of the structured cabling system. One hundred percent (100%) of the field terminated cable plant shall be verified to be functional by acceptance testing as defined by these listed and CISD standards.

Surface Mount Raceway and EMT Conduit Cable Pathways

Interior building surface mount cable pathways shall be installed for cable distribution where in-wall routing or existing surface mount raceway systems are not available and required, unless approved otherwise.

Surface Mount Raceway:

1. One piece latch duct surface mount raceway (SMR) sized appropriately for cable fill ratios shall be installed as a complete, continuous system according to manufacturer's instructions and typically utilizing the factory applied adhesive backing and applying three points of screw type anchoring, one in the center, and one on each end roughly 12" from the edge of the SMR to prevent normal use SMR detachment. Manufacturer provided accessories such as ceiling entrance fittings, tees, seam covers, right angle fittings, etc. shall be provided and SMR terminated using surface mount boxes or dead end caps. SMR surface applied color matching utilizing manufacturer available colors. SMR shall be installed level and plumb with surfaces applied.

Conduit cable pathways:

1. Conduit sections shall be no more than 100 feet and contain no more than 2 90-degree bends between pull boxes. Bends shall not exceed 90 degrees, and the sum total of conduit bends for an entire run of conduit between pull boxes shall not exceed 180 degrees.

2. Conduit sections shall be no more than 100 feet and contain no more than 2 90-degree bends between pull boxes. Bends shall not exceed 90 degrees, and the sum total of conduit bends for an entire run of conduit between pull boxes shall not exceed 180 degrees.

3. Conduit shall be installed as a complete, continuous system.

4. All interior conduit connectors and couplings shall be the screw type, and all conduit terminations shall be tight and secure.

5. The unterminated end of any conduit installed shall be reamed and fitted with a protective bushing, except where a grounding bushing is required.

6. Conduit pathway systems shall be designed and routed with the intent to keep minimum allowable separation away from sources of EMI, such as fluorescent lighting, motors, transformers, electrical power distribution, etc.

7. Exposed conduit to be installed in lines parallel or perpendicular to building lines or structural members except where the structure is not level, and following the surface contours as much as practical, or as physical conditions allow.

8. A 'trailer' pull string provided in each conduit after new cables installed.

9. Conduit shall be clean, dry, and wall penetrations fire-stopped.
   NOTE: Painting of conduits is NOT included within this SOW;

Testing and Documentation

1. SWN will 'Permanent Link' test all new Category 6A cables included in this SOW to meet ANSI/TIA/EIA, and manufacturer standards. Documentation provided will be certified test results, 'As-Built' drawings* of newly installed cabling infrastructure depicting IT closets, cable pathways, cable drop outlet locations and labeling, and warranty documentation.

2. A soft copy of each test result provided at the conclusion of the project.

3. Documentation shall consist of:
   a. Certified copper tests results.
   b. 'As-Built' drawings (*requires customer provided electronic floor plans)
   c. 20-Year manufacturer's extended products and applications assurance warranty.
   d. SWN 1-Year workmanship warranty at project completion.

Warranty

1. A Manufacture 20-Year Extended Products and Applications Assurance Warranty shall be provided and included for this project, as well as SWN's standard 1-Year Warranty for materials and workmanship. **Customer expressly acknowledges and agrees that this warranty is between the Manufacturer and the Customer and is not an obligation of the Provider**.
   NOTE: SWN does not warranty or performance guarantee any new or existing Ethernet cables installed which exceed 90 meters (permanent link) distance from the nearest MDF / IDF closet locations. SWN shall invoke a best effort process to pre-determine new cable runs which may exceed distance limitations. SWN is not responsible for Category 6A cables installed that exceed 90m distances from CISD predetermined MDF and IDF locations.

Project Management

SWN shall provide a project management resource to perform the following activities during the project:

1. **Kickoff Meeting:** Review SOW including project objectives, schedule, logistics, identify and confirm project participants, and discuss project prerequisites, including materials, shop drawings and submittals.

2. **Project Schedule or Plan:** Provide and manage a project schedule that details the overall schedule and resources assigned, and in conjunction with project activities.

3. **Weekly Status Meetings and Reports:** Project status meetings will be conducted on a weekly basis as cabling installation is on-going and installation resources are active to discuss actions items, tasks completed, tasks outstanding, and project issues, as necessary.

4. **Change Management:** When a change to the project occurs, SWN shall utilize a project change control process providing detailed documentation of change.

5. **Project Completion Meeting:** The project team will meet to recap all project activities, provide required documentation, discuss any next steps, and formally close the project.

Exclusions

1. Storm Shelter Wall Core Penetrations
2. New IT racks / cabinets
3. Network Electronics / Wireless Access Point Installation

General Information

1. This proposed Structured Cabling System (SCS) includes all labor, materials, tooling and equipment necessary for services as identified within this proposal, unless noted otherwise. SCS proposed shall be installed adhering to the most current CISD standards, ANSI/TIA/EIA, BICSI, by industry best practices, and in compliance with national (NFPA-70), state and local codes, and the local authority having jurisdiction (LAHJ).
2. A safe and healthy work environment is of the highest priority to SWN for its employees. SWN deemed unacceptable risks of disturbance or damage to existing or assumed presence of asbestos containing building materials (ACBM) during the cabling installation process may nullify and void this proposal at no fault or contract violation to SWN.
3. SWN is not responsible under this SOW for the identification or correction of any existing safety and/or code violations, whether federal, state or local, including but not limited to fire and electrical codes. If SWN should discover any safety and/or code violations during the course of this project, SWN will notify CISD IT personnel of the problem. SWN will not be required to proceed with its work under this SOW until CISD remedies such violation, nor will SWN be responsible for delays to the work caused by such violation.
4. Preventable delays in implementation efforts for reasons not caused by SWN, or changes or adjustments made to this scope of work after authorization to proceed may incur additional charges.
5. SWN is proposing new Category 6A end-to-end SCS with a manufacturer's 20-year extended products and applications assurance warranty, plus a standard 1-year SWN parts and labor warranty.
6. Copper cable type proposed as a Plenum rated indoor solution per CISD request. Jacks, faceplates, patch panels, adapter panels, patch cables, and associated SCS connectivity apparatus according to type, style, series, and colors as acceptable to the proposed SCS or as approved by CISD IT Personnel prior to installation.

7. Labeling (cable plant identification & administration), testing, and final documentation of installation according to most current customer standards or industry best practices.
8. End to end cable analyzer permanent link copper cable transmission performance testing in compliance with and according to established ANSI/TIA standards, and test results documentation and final deliverables provided upon completion of project.

Services not specified in this SOW are considered out of scope and will be addressed with a separate SOW or Change Order.

ITEM(S) PROVIDED TO CUSTOMER

Table 1 – Item(s) Provided to Customer

Item	Description	Format
Test Results	Copper test results for all cabling under SOW	PDF
*As-Builts	Drawing IT Closets & Drop Locations, Labels, Pathways	PDF
Warranty	Manufacturer's and Southwest Networks Warranty	PDF

*Customer to provide electronic copy of architectural floor plans

PROJECT SCHEDULING

Customer and Seller, who will jointly manage this project, will together develop timelines for an anticipated schedule ("**Anticipated Schedule**") based on Seller's project management methodology. Any dates, deadlines, timelines or schedules contained in the Anticipated Schedule, in this SOW or otherwise, are estimates only, and the Parties will not rely on them for purposes other than initial planning.

TOTAL FEES

The total fees due and payable under this SOW ("**Total Fees**") include both fees for Seller's performance of work ("**Services Fees**") and any other related costs and fees specified in the Expenses section ("**Expenses**"). Unless otherwise specified, taxes will be invoiced but are not included in any numbers or calculations provided herein.

Seller will invoice for the Total Fees.

SERVICES FEES

Services Fees hereunder are FIXED FEES, meaning that the amount invoiced for the Services will be $**157,546.46**.

The invoiced amount of Services Fees will equal the amount of fees applicable to each completed project milestone, as specified in Table 2.

Table 1 – Services Fees

Project Milestones	Percentage	Fees

Summary of work:

Southwest Networks, Inc. (SWN) will perform the following low voltage structured cabling work at **Cleburne Independent School District** (CISD) as listed under this SOW, and per the CISD provided RFP 250008635 documentation including Addendums 1 and 2 Q&A and AP Placement Maps_v1.2.
The following Summary of Work applies strictly to the cabling specifications portion of the RFP. See the General Scope of Work for more details on typical structured cabling system installation methodologies.

Coleman Elementary School:

1. Provide and install two-hundred (**200**) Category 6A UTP plenum (CMP) cable drops
2. Provide four-hundred (**400**) appropriate length Category 6A CM patch cords

Cooke Elementary School:

1. Provide and install three-hundred (**300**) Category 6A UTP plenum (CMP) cable drops
2. Provide six-hundred (**600**) appropriate length Category 6A CM patch cords

Both Sites:

1. Provide and install Provide appropriately sized and rated man lift where necessary for access to high ceilings cable pathways
2. Provide appropriately sized and rated man lift where necessary for access to high ceilings cable pathways
3. Above ceiling cable distribution pathways designed and constructed adequately sized and installed to support cable pathways and fill ratio requirements accordingly
4. Labeling and administration of cabling according to CISD standards
5. End to end cable analyzer Category 6A 'permanent link' cable performance testing in compliance with and according to established ANSI/TIA standards
6. A Manufacturer's 20-year extended product and applications assurance warranty, and a SWN standard 1-year warranty for materials and workmanship
7. Final documentation of installation provided upon completion of project

8. Project duration expected to be approximately eight to nine (**8-9)** weeks with each week defined as Monday through Friday requiring a minimum eight (8) consecutive working hours per day

---

General Scope of Work

SWN will provide labor, materials, tooling and equipment necessary for services as identified within this proposal. Descriptions within this general scope of work shall apply to all applicable services as detailed within the Summary of Work.

Horizontal Cabling

1. Provide and install Category 6A UTP plenum (CMP) cable from the CCISD designated MDF / IDF locations to the site-designated Wireless Access Point locations.

2. Above ceiling cable pathways installed using cable J-hook hangers of correct types and sizes with allowable growth potential on dedicated independent support apparatus provided at intervals not to exceed every 5' for preventing unnecessary sag, and avoiding sources of RFI and EMI. Penetrations through interior and exterior walls and fire rated barriers shall include appropriately sized and affixed sleeves and sealed according to applicable NEC, ANSI/UL and ASTM regulations for firestop systems. All cables shall be installed in a professional and competent manner, and dressed with Velcro straps for a clean, neat workmanlike installation.

3. Provide appropriate length cable service loops for the newly installed Category 6A cables at all end device and work area outlet locations, and at the MDF / IDF closet locations.

4. At each of the end device and work area outlet locations, all new Category 6A cabling will terminate utilizing Category 6A 8-position, 8-wire RJ-45 modular jacks to T568B standards. Jacks will house in a one to six port single-gang faceplate, or in a one to two port surface mount 'biscuit' box, properly-installed, labeled, and secured with blank inserts where necessary.

5. MDF and IDF Closet termination of all new Category 6A UTP cables will be achieved utilizing new or existing 19" EIA, 1U 24-port and / or 2U 48-port modular or 110 style patch panels to provide for one hundred percent (100%) connectivity of newly installed Category 6A cabling. All cable shall be installed within the existing MDF and IDF's in a neat, combed, dressed manner, with Velcro straps, utilizing existing cable runway cable paths from the ceiling spaces to the existing racks. No Zip-Ties shall be used.

6. Each Category 6A cable end, jack outlet, surface mount box, and corresponding patch panel port shall be labeled with appropriately sized machine-generated labeling materials per the prescribed and approved labeling convention. Cable drops terminated above accessible ceilings shall receive an approved cable label adhered to the ceiling grid below the cable drop location for easier identification from floor level for standard height ceilings.

7. Provide appropriate length Category 6A CM copper patch cords to accommodate one hundred percent (100%) connectivity for patch panel connection to switch ports within the MDF and IDF Closet locations, each matching the same category specification and color as the corresponding drops or according to CISD specifications.

8. Provide appropriate length Category 6A CM copper patch cords to accommodate one hundred percent (100%) connectivity for the end device work area outlet locations, each matching the same category specification and color as the corresponding drops or according to CISD specifications.

9. All testing procedures and field test instruments for Category 6A cables shall be performed to ensure compliance with established standards: ANSI/TIA-1152; ANSI/TIA-568-0.D; ANSI/TIA-568-1.D; ANSI/TIA-568-C.2; ANSI/TIA-606-B; Faults discovered during testing shall be corrected and re-tested prior to activation of the structured cabling system. One hundred percent (100%) of the field terminated cable plant shall be verified to be functional by acceptance testing as defined by these listed and CISD standards.

Surface Mount Raceway and EMT Conduit Cable Pathways

Interior building surface mount cable pathways shall be installed for cable distribution where in-wall routing or existing surface mount raceway systems are not available and required, unless approved otherwise.

Surface Mount Raceway:

1. One piece latch duct surface mount raceway (SMR) sized appropriately for cable fill ratios shall be installed as a complete, continuous system according to manufacturer's instructions and typically utilizing the factory applied adhesive backing and applying three points of screw type anchoring, one in the center, and one on each end roughly 12" from the edge of the SMR to prevent normal use SMR detachment. Manufacturer provided accessories such as ceiling entrance fittings, tees, seam covers, right angle fittings, etc. shall be provided and SMR terminated using surface mount boxes or dead end caps. SMR surface applied color matching utilizing manufacturer available colors. SMR shall be installed level and plumb with surfaces applied.

Conduit cable pathways:

1. Conduit sections shall be no more than 100 feet and contain no more than 2 90-degree bends between pull boxes. Bends shall not exceed 90 degrees, and the sum total of conduit bends for an entire run of conduit between pull boxes shall not exceed 180 degrees.

2. Conduit sections shall be no more than 100 feet and contain no more than 2 90-degree bends between pull boxes. Bends shall not exceed 90 degrees, and the sum total of conduit bends for an entire run of conduit between pull boxes shall not exceed 180 degrees.

3. Conduit shall be installed as a complete, continuous system.

4. All interior conduit connectors and couplings shall be the screw type, and all conduit terminations shall be tight and secure.

5. The unterminated end of any conduit installed shall be reamed and fitted with a protective bushing, except where a grounding bushing is required.

6. Conduit pathway systems shall be designed and routed with the intent to keep minimum allowable separation away from sources of EMI, such as fluorescent lighting, motors, transformers, electrical power distribution, etc.

7. Exposed conduit to be installed in lines parallel or perpendicular to building lines or structural members except where the structure is not level, and following the surface contours as much as practical, or as physical conditions allow.

8. A 'trailer' pull string provided in each conduit after new cables installed.

9. Conduit shall be clean, dry, and wall penetrations fire-stopped.
   NOTE: Painting of conduits is NOT included within this SOW;

Testing and Documentation

1. SWN will 'Permanent Link' test all new Category 6A cables included in this SOW to meet ANSI/TIA/EIA, and manufacturer standards. Documentation provided will be certified test results, 'As-Built' drawings* of newly

installed cabling infrastructure depicting IT closets, cable pathways, cable drop outlet locations and labeling, and warranty documentation.

2. A soft copy of each test result provided at the conclusion of the project.

3. Documentation shall consist of:
    a. Certified copper tests results.
    b. 'As-Built' drawings (*requires customer provided electronic floor plans)
    c. 20-Year manufacturer's extended products and applications assurance warranty.
    d. SWN 1-Year workmanship warranty at project completion.

Warranty

1. A Manufacture 20-Year Extended Products and Applications Assurance Warranty shall be provided and included for this project, as well as SWN's standard 1-Year Warranty for materials and workmanship. **Customer expressly acknowledges and agrees that this warranty is between the Manufacturer and the Customer and is not an obligation of the Provider**.
   NOTE: SWN does not warranty or performance guarantee any new or existing Ethernet cables installed which exceed 90 meters (permanent link) distance from the nearest MDF / IDF closet locations. SWN shall invoke a best effort process to pre-determine new cable runs which may exceed distance limitations. SWN is not responsible for Category 6A cables installed that exceed 90m distances from CISD predetermined MDF and IDF locations.

Project Management

SWN shall provide a project management resource to perform the following activities during the project:

1. **Kickoff Meeting:** Review SOW including project objectives, schedule, logistics, identify and confirm project participants, and discuss project prerequisites, including materials, shop drawings and submittals.

2. **Project Schedule or Plan:** Provide and manage a project schedule that details the overall schedule and resources assigned, and in conjunction with project activities.

3. **Weekly Status Meetings and Reports:** Project status meetings will be conducted on a weekly basis as cabling installation is on-going and installation resources are active to discuss actions items, tasks completed, tasks outstanding, and project issues, as necessary.

4. **Change Management:** When a change to the project occurs, SWN shall utilize a project change control process providing detailed documentation of change.

5. **Project Completion Meeting:** The project team will meet to recap all project activities, provide required documentation, discuss any next steps, and formally close the project.

Exclusions

1. Storm Shelter Wall Core Penetrations
2. New IT racks / cabinets
3. Network Electronics / Wireless Access Point Installation

General Information

1. This proposed Structured Cabling System (SCS) includes all labor, materials, tooling and equipment necessary for services as identified within this proposal, unless noted otherwise. SCS proposed shall be installed adhering to the most current CISD standards, ANSI/TIA/EIA, BICSI, by industry best practices, and in compliance with national (NFPA-70), state and local codes, and the local authority having jurisdiction (LAHJ).
2. A safe and healthy work environment is of the highest priority to SWN for its employees. SWN deemed unacceptable risks of disturbance or damage to existing or assumed presence of asbestos containing building materials (ACBM) during the cabling installation process may nullify and void this proposal at no fault or contract violation to SWN.
3. SWN is not responsible under this SOW for the identification or correction of any existing safety and/or code violations, whether federal, state or local, including but not limited to fire and electrical codes. If SWN should discover any safety and/or code violations during the course of this project, SWN will notify CISD IT personnel of the problem. SWN will not be required to proceed with its work under this SOW until CISD remedies such violation, nor will SWN be responsible for delays to the work caused by such violation.
4. Preventable delays in implementation efforts for reasons not caused by SWN, or changes or adjustments made to this scope of work after authorization to proceed may incur additional charges.
5. SWN is proposing new Category 6A end-to-end SCS with a manufacturer's 20-year extended products and applications assurance warranty, plus a standard 1-year SWN parts and labor warranty.
6. Copper cable type proposed as a Plenum rated indoor solution per CISD request. Jacks, faceplates, patch panels, adapter panels, patch cables, and associated SCS connectivity apparatus according to type, style, series, and colors as acceptable to the proposed SCS or as approved by CISD IT Personnel prior to installation.
7. Labeling (cable plant identification & administration), testing, and final documentation of installation according to most current customer standards or industry best practices.
8. End to end cable analyzer permanent link copper cable transmission performance testing in compliance with and according to established ANSI/TIA standards, and test results documentation and final deliverables provided upon completion of project.

Services not specified in this SOW are considered out of scope and will be addressed with a separate SOW or Change Order.

ITEM(S) PROVIDED TO CUSTOMER

Table 1 – Item(s) Provided to Customer

Item	Description	Format
Test Results	Copper test results for all cabling under SOW	PDF
*As-Builts	Drawing IT Closets & Drop Locations, Labels, Pathways	PDF
Warranty	Manufacturer's and Southwest Networks Warranty	PDF

*Customer to provide electronic copy of architectural floor plans

PROJECT SCHEDULING

Customer and Seller, who will jointly manage this project, will together develop timelines for an anticipated schedule ("**Anticipated Schedule**") based on Seller's project management methodology. Any dates, deadlines, timelines or schedules contained in the Anticipated Schedule, in this SOW or otherwise, are estimates only, and the Parties will not rely on them for purposes other than initial planning.

TOTAL FEES

The total fees due and payable under this SOW ("**Total Fees**") include both fees for Seller's performance of work ("**Services Fees**") and any other related costs and fees specified in the Expenses section ("**Expenses**"). Unless otherwise specified, taxes will be invoiced but are not included in any numbers or calculations provided herein.

Seller will invoice for the Total Fees.

SERVICES FEES

Services Fees hereunder are FIXED FEES, meaning that the amount invoiced for the Services will be $**245,938.69**.

The invoiced amount of Services Fees will equal the amount of fees applicable to each completed project milestone, as specified in Table 2.

Table 1 – Services Fees

Project Milestones	**Percentage**	**Fees**
Cleburne ISD – Coleman Signed SOW	22%	$53,418.79
Cleburne ISD – Coleman Completion of Work	18%	$43,705.98
Cleburne ISD – Coleman Final Documentation	2%	$4,459.28
Cleburne ISD – Cooke Signed SOW	30%	$72,843.30
Cleburne ISD – Cooke Completion of Work	26%	$63,130.49
Cleburne ISD – Cooke Final Documentation	2%	$4,855.85
CDW senior PM time @ 235 per hour		$3525.00
Total		$245,938.69

2023 Fortune 500 Rank	166

CDW Government LLC (CDW•G) is the wholly owned subsidiary of CDW LLC, a leading multi-brand technology solutions provider to corporate and public sector customers in the U.S., U.K., and Canada. Founded in 1984, CDW currently employs 15,100 coworkers worldwide. Our broad array of offerings ranges from discrete hardware and software products to integrated IT solutions. We provide our products and solutions through our sales and service delivery teams, who are broken down by segment, and further organized into geographic regions. We have an expansive network of offices near major cities and a large team of customer-facing coworkers - including field sellers, technology specialists, and advanced delivery engineers - across the country.

Products and Partnerships	Total E-Rate Solutions
More than 100,000 products from more than 1,000 vendors including leading networking OEMs such as: APC, Cisco, Cradlepoint, Extreme, Fortinet, HP Aruba, IBM, Juniper, Kajeet, Leibert, Palo Alto, Rukus, and more.	▪ **Category One** o Bus Wi-Fi o Wireless Hot Spots ▪ **Category Two** o Internal Connections o Basic Maintenance of Internal Connections o Managed Internal Broadband Services

Our sustainable growth and continued financial stability serve to assure Cleburne Independent School District that we are here to stay and can support you through the life of this contract and beyond. Of note, CDW is number four on CRN's 2023 Solution Provider 500 list that ranks the top integrators, service providers, and IT consultants in North America by services revenue.

K-12 Education Expertise

CDW•G helps schools leverage technology to achieve great educational outcomes. With more than 200 government and education contracts, we are one of the nation's largest direct-response providers of multi-brand technology products and services. For more than 30 years, we have closely monitored emerging technologies to ensure our solutions are at the forefront of innovation. We proactively expand our offerings and certifications to support your evolving needs. We invest in the solutions that matter most to you, like classroom transformation, device ecosystem, cybersecurity, AI, and school safety.

We are a trusted technology partner to more than 15,000 K-12 schools.

Resources - Education Strategy Team

Education Strategists work with you to understand your district's vision and goals to create customized solutions that improve teaching and learning.

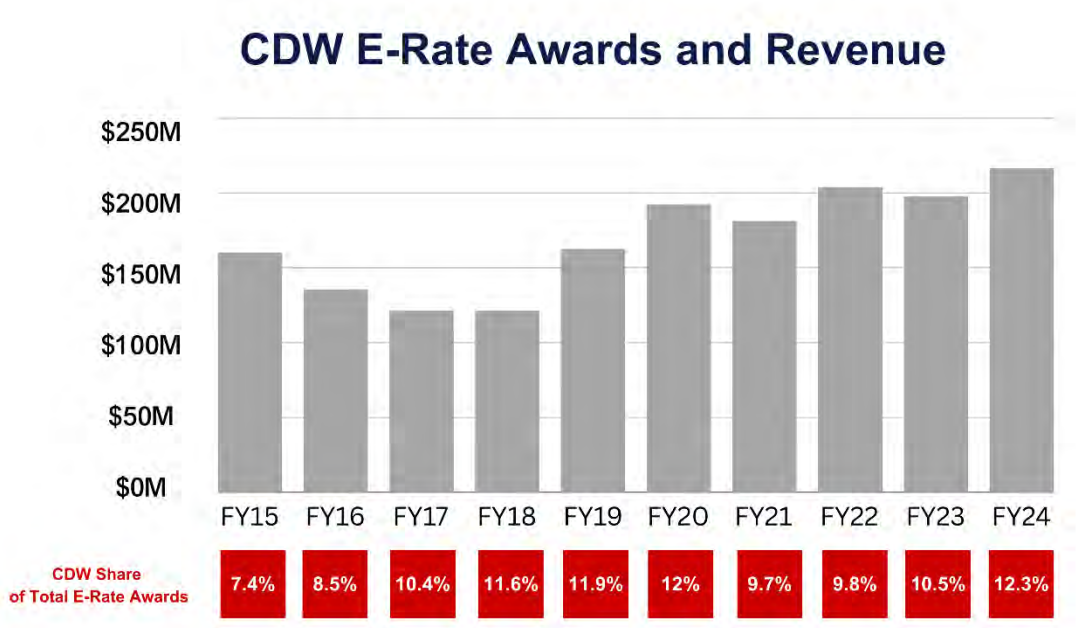
Classroom Modernization Specialists, focused on audiovisual solutions and classroom design, can support you through trainings, consultative calls, webinars, and more.

We guide customers through decisions on the platforms that run your districts and drive transformation. We have dedicated in-house technical resources aligned to K-12 solution areas to help you better understand and integrate technology into your educational goals. Our K-12 Education Strategy Team – comprised of former leaders in education – support districts in implementing digitally-enhanced education and can help you develop a vision for lasting change.

We are a premier provider of Chromebooks to K-12 schools in the U.S.

In 2023, CDW•G deployed 1 out of every 3 Chromebooks into K-12 classrooms in the U.S. for a total of 2.5 million devices. We can support your full device lifecycle management needs and have experience handling complex deployments for the largest school districts in the country, even in adverse conditions.

A Partner You Can Trust – Even in Adverse Conditions



During a time of significant supply chain constraints, CDW•G delivered. One of the largest school districts in the country, Chicago Public Schools (CPS), relies on CDW Education to provide their students with Chromebooks. Like so many other districts across the nation, CPS needed to pivot to distance learning with the onset of COVID-19. To serve the needs of nearly 330,000 students, CPS required 1,000s of Chromebooks. Despite worldwide shortages, CDW•G was able to deliver 20,000 devices over four months on-site and on-time.

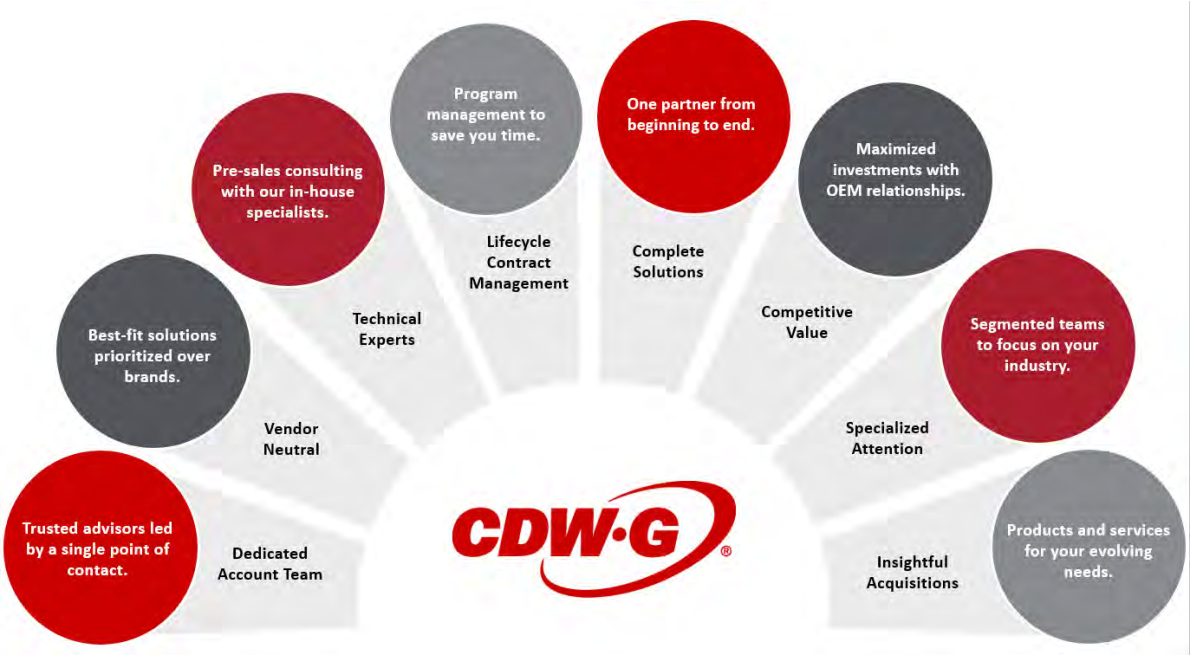
A Powerful E-Rate Partner

We have nearly 30 years of experience delivering successful outcomes for E-Rate funded projects. Participating in E-Rate since our founding in 1998, we are the largest Category 2 provider nationwide, delivering two-times the amount of Category 2 E-Rate projects than our next closest competitor. Since the E-Rate Modernization in 2015, we have been awarded over 19,550 E-Rate projects totalling over $790M in total equipment delivered to schools throughout the United States.

Proven Management Approach



Due to our streamlined and best-practice system of checks and balances, **we have never lost funding for a school,** as substantiated by countless audits. Our dedicated internal K-12 and E-Rate resources help ensure accurate invoicing and contract compliance, as well as provide knowledgeable resources and guidance as you navigate your E-Rate journey.

- **E-Rate Program Management Team** offers knowledge, assistance, and advisement, as well as ensures contract compliance.
- **E-Rate Funding Team** ensures expert handling of both BEAR and SPI E-Rate invoicing by accounts receivable specialists.
- **K-12 Education Strategists** focus on helping you implement solutions attuned to your needs, with realistic budget constraints in mind, often in conjunction with E-Rate funding initiatives.

Strengths, Best Practices, and Value

By aligning with CDW•G, your organization can take advantage of our strengths, best practices, and value-added services.

Inventory Access and In-House Services

A significant advantage we offer Cleburne Independent School District is our ability to deliver the right products, at the right value, right when you need them. CDW has two large, strategically located distribution and configuration centers that ensure speed and accuracy throughout the procurement process. In addition, to supplement our direct purchasing model, CDW has strong affiliations with principal channel distributors, enabling us to quickly obtain competitively priced, non-stocked items.

Helpful Hints for Preparing Form 471

Things to consider when preparing your funding request (Form 471):

- Enter only one manufacturer part number per line item (do not bundle part numbers)
    - All software should be requested under IC, Software
- Even when bundled with warranty support from manufacturer for purchase, as long as warranty cannot be purchased on its own
- If you live in a state that has applicable taxes, such as AR, NC, CA, AZ, WA, make sure to include those taxes on your FCC Form 471.
- If warranty can be purchased separately, then it should be separated for funding request, and warranty funding requested under Basic Maintenance
- Warranty only part numbers should be requested under Basic Maintenance
    - List months of service, should only be for coverage July 1 – June 30 (Funding Year)
    - List hardware supported part number
    - List site where hardware sits

CDW•G can complete Bulk Submission Forms if chosen as the service provider for your funding request. Please email E-Rate@cdw.com for assistance.

Additionally, **please note** - upon award, to facilitate contract execution with our countersignature, please sign the enclosed E-Rate agreement and send to **laurcla@cdwg.com** and 470award@cdwg.com. Please see “E-Rate Order Process” information on the following page for further details.

E-Rate Order Process

1. **Ordering:** Purchase orders shall be submitted through electronic means (email, EDI, etc.) directly to Customer's dedicated account manager. Alternatively, if a copy must be sent via mail, common courier, etc., please reach out to your account manager for the appropriate mailing address.

2. **Required Information:** All orders must include:
   a. Contact name, Phone number
   b. Purchase order number
   c. Part number, Product description
   d. Pre-discount and discounted product price
   e. Percentage Customer owes and percentage SLD owes (SPI – Form 474 Method)
   f. Ship to location, Bill to location
   g. FCC Form 471 Number (also known as Application Number)
   h. FRN for each part number
   i. Billing method (BEAR – Form 472 or SPI – Form 474)
   j. "Net 30 Terms"

   SEPARATE PURCHASE ORDERS SHOULD BE SUBMITTED FOR PRODUCTS THAT ARE NOT ELIGIBLE FOR E- RATE FUNDING. ALL ORDERS ARE SUBJECT TO ACCEPTANCE BY SELLER. PO TOTAL SHOULD REFLECT FULL PURCHASE PRICE OF ORDER.

3. **Assistance With Order:** Customer may call 1-800-328-4239 for assistance on any purchase order. Any terms or conditions stated in or on the Customer's purchase order which are not consistent with or in addition to the terms and conditions in this Agreement or the Product Sales Terms and Conditions shall be null and void and shall not be applicable hereto or binding on Seller.

   IN THE CASE OF CHANGES TO PRODUCTS AFTER A CUSTOMER ORDER HAS BEEN ACCEPTED BUT BEFORE THE PRODUCT HAS SHIPPED, SELLER WILL MAKE REASONABLE EFFORTS TO MAKE AVAILABLE TO THE CUSTOMER A COMPARABLE

To the extent allowable, all information and documents hereby submitted in response to FCC 470# 250008635 furnished by Cleburne Independent School District are the Proprietary and Confidential property of CDW Government LLC ("CDW•G").
© CDW Government LLC 2025

OR BETTER PRODUCT AT THE SAME OR LESSER PRICE WHEN OR IF AVAILABLE, UPON APPROVAL FROM SLD ON PRODUCT SUBSTITUTION.

4. **Price and Payment Terms**

   a. **Price**

   Price shall be as stated in the quotation attached hereto as Exhibit I by CDW-G account manager. Prices are exclusive of federal, state, local, or other taxes, which shall be the responsibility of the Customer. Any taxes will be listed separately on the invoice.

   b. **Payment Terms (Customer must choose one)**

      i. **Form 474 Service Provider Invoice (SPI) Method**

      - Seller will invoice Customer for their portion of the Products upon shipment of Product and Customer shall pay the invoiced amount (discounted amount owed by Customer) within thirty (30) days from date of invoice

      ii. **Form 472 BEAR Method**

      - Seller will invoice Customer for pre-discount portion of the Products upon shipment of Product and Customer shall pay the invoiced amount (full amount owed by Customer) within thirty (30) days from the date of invoice.

5. **Payment Method:** In adherence to Federal E-Rate compliance regulations, CDW-G's quoted price is all-inclusive of any and all discounts, if applicable. No further discounts will be applied during time of invoice. All payments for both methods shall be submitted to the address presented below WHERE APPLICABLE:

YOUR NEIGHBORHOOD IT SOLUTIONS PROVIDER.

CDW Education K-12 Texas team serves Public Schools, Catholic Archdiocese, Charter Schools and Private Schools

Traditional classrooms are evolving into blended learning environments, permitting educators to work closely with students by adapting mobile devices and collaborative technologies with more engaging learning spaces. Today's students are using interactive technology to absorb classroom instruction quicker and engage more with their peers, allowing them to better prepare for online assessments and get ready for the next level of education.

Your local CDW Education team will help you discover the solutions that can help improve learning outcomes.

We have the tools and the talent:

- **Dedicated account managers.** With CDW Education, you get a dedicated account manager who is your main point of contact. He or she is there to provide an in-depth approach, do the research for you and ensure you're getting the technology best suited to your needs. Your account manager is backed by a team of experienced, certified specialists who can help you through every stage of your product's lifecycle.
- **Solution architects.** Our locally based solution architects can design custom engagements and deliverables based on specific district needs.
- **Experts.** Our specialty teams include experts in the areas of servers and storage, collaboration, security, wireless, power and cooling, networking, software licensing, mobility solutions and more.
- **Added value.** We provide a portfolio of value-added services including web-based tools, technology assessments, ROI calculators, automated software license management and asset management.

Why CDW Education?

- CDW·G is a leader in public-sector customer service and product knowledge. We have 500+ coworkers in Texas, 85 of those in the field, ready to assist with everything from pre-sales assessment and design to post-sales support.
- We offer more than 1,000 leading technology brands of hardware, software, peripheral products and services support.
- We hold over 25 contracts in Texas and have preferred vendor awards for federal government, state and local government, and educational institutions.
- *My Account* customer portal provides customized access to your account team, product information, purchase history, quotes and order status — plus, you can manage asset-tagged items and order-configured systems.
- Our state-of-the-art distribution centers in Las Vegas and Chicago house nearly 1 million square feet of warehousing and configuration space.

Solutions

- Advanced Technology Services and Cabling Services
- Audio/Visual
- Classroom Technology
- Cloud Computing
- Collaboration
- Data Center Optimization
- Esports
- Managed Print Services
- Networking
- Power and Cooling
- Security
- Software Licensing and Management
- Storage
- Total Mobility Management and BYOD
- Virtualization

CDW Education supports the Texas economy

In 2024, CDW·G collected and remitted $69.68 million in sales taxes to Texas. Our presence in Austin, Dallas, Houston, and San Antonio is generating jobs contributing directly to the Texas local economy. Texas customers are supported by local CDW·G reps based out of Texas. Supplemented by our regional team of engineers located throughout the state of Texas, as well as our national team, we have a deep bench of SLED experience waiting in the wings to ensure our education customers receive all of the data communications and networking expertise. CDW·G's main Texas branch is in Plano and serves customers from Dallas and the Fort Worth Metroplex area and west to El Paso. With a corporate training room and a videoconferencing room, our customers' IT personnel can do whiteboard sessions, proof of concept and project plans for their upcoming networking implementations.

CDW·G delivers contract pricing to DIR, TCPN, NJPA, National IPA, TIPS/TAPS, Choice Partners and WSCA members.

Awards and recognitions

Cisco Public Sector Partner of the Year – Digital Transformation (2018)

Cisco Americas Commercial Partner of the Year (2018)

Cisco SLED Education Partner of the Year (2019)

Cisco Commercial Partner of the Year (2019)

Cisco US Nationals Architectural Excellence – Security (2018)

Cisco US Nationals Architectural Excellence – Collaboration (2018)

Cisco Software Partner of the Year (2020)

Cisco Meraki Elevate Partner of the Year (2018)

Cisco's North American Master Partner – All Five Certifications (2018)

Glassdoor Best Place to Work (2022)

Google Chrome Global Partner of the Year (2017)

NetApp National Partner of the Year Award (2018)

ServiceNow Elite Partner of the Year (2020) (2021)

No. 17 on Best Places to Work in IT – Computerworld (2018)

America's Best Employers – Forbes Magazine (2021)

No. 161 on Fortune 500 list of America's Largest Corporations – Fortune Magazine (2021)

Top 100 Military Friendly Employers – G.I. Jobs (2018)

Computerworld Best Places to Work in IT (2019)

Fortune's Future 50 (2019)

No. 5 on CRN Top 25 Solution Providers (2021)

Veeam North America Impact Partner (2021)

VMware Partner Industry Award (2021)

AP5020

Highlights

- Cloud-managed AP that simplifies deployment, operation, and management
- AIOps for actionable Explainable ML insights to optimize performance
- Mobile app to easily onboard, provision, and troubleshoot your wireless network
- ExtremeCloud™ IQ and ExtremeCloud IQ Controller for cloud or on-premises

AP Features

Five-Radio Design

- 2.4 GHz (4x4:4)
- 5 GHz (4x4:4)
- 6 GHz (4x4:4)
- IoT Radio
- IoT Radio

Operational Modes*

- Mode 1: 2.4 GHz /5 GHz/6 GHz data radios
- Mode 2: 5 GHz/6 GHz data radios + tri-frequency sensor
- Mode 3: 5 GHz/5 GHz + 6 GHz data radio
- Mode 4: 2.4 GHz/5 GHz + tri-frequency sensor
- Mode 5: 5 GHz/5 GHz + 2.4 GHz data radio
- Mode 6: 6 GHz/6 GHz + 5 GHz data radio

2x2 Tri-Frequency Sensor

Cellular Coexistence Filter (CCF)

- Minimizes the impact of interference from cellular networks

Fully Functional with 802.3bt

Built-in PoE Failover or PSE (PoE Out)

* Modes 2, 4, 5, 6 will be available in a future software release.

Flexible, Cloud-Managed, Premium-Tier Wi-Fi 7 Access Point

The AP5020 is an ExtremeCloud IQ-managed[1], premium-tier Wi-Fi 7 access point (AP) that delivers enhanced wireless experiences, faster speeds, and a range of use cases. This AP is built on Extreme Universal Platform technology, enabling deployment flexibility, and it leverages ExtremeCloud IQ AIOps management to provide improved user experiences.

The AP5020 Wi-Fi 7 AP, with three 4x4:4 radios, provides high-efficiency, high-performance 802.11be aggregate data rates of up to 20 Gbps in the 6 GHz, 5 GHz, and 2.4 GHz bands. Designed for high density environments, such as schools, warehouses, healthcare facilities, and stadiums, the AP5020 is powerful and intelligent enough to provide the highest level of client services without compromising security. Despite advanced capabilities, the AP5020 can operate with fully featured performance capabilities using 802.3bt PoE, simplifying power capacity planning.

With more users, more devices, more applications, and more threats straining the infrastructure, the AP5020 was engineered to meet those challenges. The AP5020 combines powerful 802.11be Wi-Fi 7 technology, advanced security, and AIOps management capabilities together as an enterprise-class solution that allows you to deploy high speed, highly secure Wi-Fi into high-density environments.

Unlike other APs that scan only part time, the AP5020 features a dedicated 2x2 tri-frequency sensor that monitors for rogue devices full time, eliminating the risk of vulnerability and attacks. This tri-radio AP is capable of multiple operational modes, optimizing for maximum performance and security, and features additional dual IoT radios, removing complexity by supporting multiple simultaneous IoT use cases.

[1] ExtremeCloud IQ license required

Wi-Fi 7 (802.11be) Technology

Previous generations of Wi-Fi introduced the 6GHz band for unlicensed operation, increasing the available spectrum by up to 1,200 MHz*, which is three times that of the existing usable spectrum. The 6 GHz band enables improved quality of service (QoS) in dense environments, new applications and use cases, and an improved user experience. Wi-Fi 7 (802.11be) introduces additional benefits across the 2.4 GHz, 5 GHz, and 6 GHz bands with reduced latency and jitter for time-sensitive networking applications. Wi-Fi 7 capabilities such as 320 MHz channels, 4K-QAM, and Multi-Link Operation (MLO) help enable superior speeds and high-density performance.

* Country dependent

AIOps Management

In conjunction with Extreme centralized management software, cloud or on-premises, the AP5020 provides a rich set of data displayed through widgets, representing enhanced historical data or a combination of historical and current data. This provides context-specific granularity with perspective views for locations, network, APs, individual client devices, and policy roles. In each context, administrators can make a widget library. ExtremeCloud IQ CoPilot leverages Explainable Machine Learning (ML) insights and recommendations to help improve user experiences.

Software-Defined Radios

The AP5020 features the industry's first software-defined Wi-Fi 7 AP that supports not only dual 5 GHz and dual 6 GHz capabilities, but also multiple additional software programmable modes to optimally manage radios to provide the highest level of client performance. The AP5020 is a tri-radio AP that can transmit with multiple combinations of three data radios across the 2.4 GHz, 5 GHz, and 6 GHz bands in addition to a dedicated tri-frequency sensor. The AP5020 intelligently monitors the software-configurable radios, enabling network managers to configure network RF technology based on the user environment and to configure the APs in different modes as required. The AP5020 features superior tri-frequency radio performance with a multiband filter that reduces interference and enables 5 GHz and 6 GHz operation across all available channels without restrictions.

Security

The AP5020 delivers the highest level of security services, beginning with support for the latest Wi-Fi Alliance WPA3 security certifications. The AP5020 can act as an enforcement point for ExtremeCloud Universal ZTNA to provide seamless policy enforcement. Leveraging Extreme Fabric Attach securely automates provisioning and deployment by connecting to a Fabric Connect-enabled switch. Additionally, the AP supports a stateful L2-L7 DPI firewall for context-based access security, tri-frequency security, a private pre-shared key (PPSK), a location analytics sensor, and much more. The AP5020 also includes a unique 2x2 security sensor for rich insights and threat detection when paired with Extreme AirDefense.

Universal Hardware

The AP5020 is a Universal hardware platform that allows the user to choose the Wi-Fi operating system (OS). Either the ExtremeCloud IQ Engine OS or the ExtremeCloud IQ Controller Engine OS persona can be enabled as required. The desired persona can be selected at startup or changed later.

After the OS persona is selected, the AP5020 assumes the features or capabilities of the selected OS. When first booted, the AP5020 automatically connects to ExtremeCloud IQ to find its persona. The preprovisioned OS persona is then remotely enabled on the AP5020 system, eliminating the need for manual selection. As a Universal World SKU AP, the AP5020 allows customers, partners, and distributors to order one model for any region where Extreme Networks products are sold, replacing the age-old problem of country-specific models.

Modern IoT Platform

To support both IoT and guest engagement services, the AP5020 integrates Bluetooth® to connect with IoT devices wirelessly to engage loyal customers with Apple iBeacon. Enterprises can use API-driven applications to send advertisements directly to shoppers, guests, and conference attendees. This makes it ideal for businesses to advertise their app download pages, captive portals, or site-specific information. The AP5020 features dual IoT radios, enabling multiple concurrent IoT use cases with improved performance and reduced complexity.

Product Specifications

Radio Specifications

Max. Users

- SSID per radio/total: 16/48
- Users per radio/total: 512/1536

802.11a

- 5.150 GHz–5.850 GHz operating frequency
- Orthogonal frequency-division multiplexing (OFDM) modulation
- Rates (Mbps): 54, 48, 36, 24, 18, 12, 9, 6 w/auto fallback

802.11b

- 2.4 GHz–2.5 GHz operating frequency
- Direct-sequence spread-spectrum (DSSS) modulation
- Rates (Mbps): 11, 5.5, 2, 1 w/auto fallback

802.11g

- 2.4 GHz–2.5 GHz operating frequency
- OFDM modulation
- Rates (Mbps): 54, 48, 36, 24, 18, 12, 9, 6 w/auto fallback

802.11n

- 2.4 GHz–2.5 GHz and 5.150 GHz–5.850 GHz operating frequency
- 802.11n modulation
- HT20 high-throughput (HT) support (for both 2.4 GHz and 5 GHz)
- HT40 HT support for 5 GHz
- A-MPDU and A-MSDU frame aggregation
- Rates (Mbps): MCS0–MCS31 (6.5Mbps–600Mbps)

802.11ac

- 5.150 GHz–5.850 GHz operating frequency
- 802.11ac modulation (256-QAM)
- 5G: 4x4 multiple-in, multiple-out (MIMO) radio
- 2.4G: 4x4 MIMO radio
- Rates (Mbps): MCS0–MCS9 (6.5 Mbps), 3,466 Mbps, NSS = 1-4
- 4x4:4 stream MIMO radio
- VHT20/VHT40/VHT80/VHT160
- TxBF (transmit beamforming)

802.11ax

- 2.4 GHz–2.5 GHz, 5.15GHz–5.850 GHz, and 5.925 GHz–7.125 GHz operating frequencies
- 802.11ax modulation (1024-QAM)
- Dual-band OFDMA
- Rates (Mbps):
  - 6G: HE0-HE11 (8Mbps–9,600Mbps)
  - 5G: HE0-HE11 (8Mbps–4,800Mbps)
  - 2.4G: HE0-HE11 (8Mbps–1,148Mbps)
- 4x4:4 stream MIMO radio at 6 GHz
- 4x4:4 stream MIMO radio at 5 GHz
- 4x4:4 stream MIMO radio at 2.4 GHz
- HE20/HE40/HE80/HE160/HE320 support for 6 GHz
- HE20/HE40/HE80/HE160 support for 5 GHz
- HE20/HE40 support for 2.4 GHz
- UL/DL SU-MIMO and MU-MIMO
- TxBF (transmit beamforming)

802.11be

- 2.4 GHz–2.5GHz, 5.15 GHz–5.850 GHz, and 5.925 GHz–7.125 GHz operating frequencies
- 802.11be modulation (4096-QAM)
- Rates (Mbps):
  - 6G: EHT0-EHT13 (8Mbps–11,500Mbps)
  - 5G: EHT0-EHT13 (8Mbps–5,700Mbps)
  - 2.4G: EHT0-EHT13 (8Mbps–1,300Mbps)
- 4x4:4 stream MIMO radio at 6 GHz
- 4x4:4 stream MIMO radio at 5 GHz
- 4x4:4 stream MIMO radio at 2.4 GHz
- EHT20/EHT40/EHT80/EHT160/EHT320 support for 6 GHz
- EHT20/EHT40/EHT80/EHT160 support for 5 GHz
- EHT20/EHT40 support for 2.4 GHz
- UL/DL SU-MIMO and MU-MIMO
- TxBF (transmit beamforming)

Dual IoT Radios

- (2) radios for Thread, Zigbee®, Bluetooth 5.4 Low Energy, IEEE 802.15.4

Interfaces

- Eth0, Eth1: (2) wired Ethernet ports (RJ45)
- 100/1,000/2,500/5,000/10,000 Mbps autosensing link speed Ethernet port, PoE PD
- 100/1,000/2,500/5,000 Mbps autosensing link speed Ethernet port, PoE PD in or 15.4W PSE out mode (requires 802.3bt on Eth0)
- 802.3az Energy-Efficient Ethernet (EEE)
- USB 2.0, Type A, 5V/400mA with POE 802.3at or 5V/1,000mA with PoE 802.3bt

Power Options

- Power draw: 802.3at PoE: typical 21W, max. 25.5W (802.3at profile) w/o PoE out or USB
- Power draw: 802.3bt: max. 35W with 5W USB
- 12V DC/3A. DC power has priority when both DC and PoE power sources are available.
- PoE failover or optional PSE (PoE Out) supported

Physical Specifications

- Dimensions: 10.16" x 10.16" x 1.62" (258mm x 258mm x 41mm)
- Weight: 3.57 lbs (1.62 kg)

Security

- Kensington lock slot
- Trusted Platform Module (TPM)

Internal Antennas

- (4) dual band 2.4 GHz and 5 GHz
- (4) single band 6 GHz
- (2) 5 GHz/6 GHz sensor
- (3) IoT sensor

Mounting

- AP support 15/16” flush ceiling tile included in the box
- Wall mount included in the box or sold as an accessory
- Sculpted ceiling tile 15/16” wide t-bar sold as an accessory
- Sculpted ceiling tile 9/16” wide t-bar sold as an accessory
- Beam sold as an accessory
- Junction box sold as an accessory
- IL or 9/16” t-bar sold as an accessory
- SL (Silhouette) sold as an accessory
- Wing main plate adaptor sold as an accessory
- Built-in slot for Kensington

Environmental Specifications

- Operating: 0°C to 50°C (32°F to 122°F)
- Storage: 0°C to 70°C (32°F to 158°F)
- Humidity: 0% to 95% (noncondensing)

Environmental Compliance

- EU RoHS–2011/65/EU and Amendments (EU) 2015/863
- EU WEEE–2012/19/EU
- EU REACH–Regulation (EC) No 1907/2006–Reporting
- EU SCIP–EU Waste Framework Directive
- China RoHS–2 SJ/T 11364-2014
- Taiwan RoHS CNS 15663 (2013.7)

Regulatory Compliance

Ordering Information

AP5020 - SKUs

Part number	Description
AP5020-WW	Indoor tri-radio Wi-Fi 7 AP (4x4:4): 2.4 GHz, 5 GHz, 6 GHz and multirate port, internal antennas. T-bar, incl. mt. (AH-ACC-BKT-AX-TB). Domain: World SKU.
AP5020-WW-TAA	Indoor tri-radio Wi-Fi 7 AP, 2.4 GHz, 5 GHz, 6 GHz and multirate port, internal antennas. T-bar, incl. mt. (AH-ACC-BKT-AX-TB). Domain: World SKU, TAA compliant

Mounting accessories

Part number	Indoor AP mounting	Notes
AH-ACC-BKT-AX-TB	Mounting bracket for Prelude 15/16" and Suprafine 9/16" ceilings and walls	Ships with AP5020 Can be used for wall - 0.25"
AH-ACC-BKT-AX-WL	Mounting bracket for direct-to-wall installations	Can be used for wall - 1.25"
AH-ACC-BKT-AX-IL	Mounting bracket for interlude ceilings	
AH-ACC-BKT-AX-SL	Mounting bracket for Armstrong 1/8" and 1/4" main beam Silhouette reveal ceiling grids	Up to 0.33" ceiling tile protrusion
ACC-BKT-AX-JB	Junction box or wall mounting for indoor APs	Gang/junction box
ACC-BKT-AX-BEAM	Beam mounting for indoor APs	Up to 0.78" thick beam
AH-ACC-BKT-916-KIT	9/16" ceiling mount brackets for non-flat/protruded ceiling tiles - use with AH-ACC-BKT-AX-TB	9/16" non-flat/protruded ceiling tiles
ACC-BKT-TB-NF	Adapter bracket AH-ACC-BKT-TB for 15/16" wide t-bars non-flat/protruded ceiling tiles	5/16" wide t-bars non-flat/protruded ceiling tiles
ACC-BKT-AX-WNGADAPT	Adapter backet for cloud AP to wing mounting plate (#37201). 10 pack.	Allow twist mount to mount to legacy mounts

Power accessories

Part number	Description
37219	PWR adapter 12V DC, 3A, 2.5 mm x 5.5 mm connector

Other accessories

Part number	Description
ACC-WIFI-MICRO-USB	Micro-USB to USB console adapter cable for Extreme wireless APs

See Product Installation Guide for more details.

Specifications and product availability are subject to change without notice. 28oct24

AP4020

Key Highlights

- Wi-Fi 7 technology - high throughput, low latency, and extended range
- Cloud-managed - simplifies operations and reduces risk
- AIOps provides proactive insights for reducing MTTR
- Mobile app helps easily onboard, provision, and troubleshoot the wireless network

AP Radio Features

- Data Radios (2x2:2): 2.4 GHz, 5 GHz, 6 GHz and dedicated sensor
- Dual IoT Radios

Operational Modes

- Mode 1: 2.4 GHz /5 GHz/6 GHz data radios and sensor
- Mode 2: 2.4 GHz, and dual 5 GHz, and sensor

Cellular Coexistence Filter (CCF)

- Minimizes the impact of interference from cellular networks

Fully Functional with 802.3at: all data radios, sensor, and 2.5W USB

Built-in PoE Failover

Option to enable USB to 5W with 802.bt power

Flexible, Highly Secure and Cloud-Managed, Wi-Fi 7 Access Point

The AP4020 is an ExtremeCloud IQ managed, Wi-Fi 7 access point (AP) that delivers increased performance and security across a range of use cases for a seamless wireless experience. This AP is built on Extreme's industry-leading Universal Hardware technology, enabling investment protection and deployment flexibility. It simplifies operations, reduces risk and saves time by leveraging ExtremeCloud IQ with artificial intelligence for IT operations (AIOps). The AP4020 can also automatically enforce secure access rules from ExtremeCloud Universal ZTNA - to act as a gatekeeper for preventing attacks at the periphery of the network.

The AP4020 Wi-Fi 7 Access Point is engineered for peak performance in enterprise environments, featuring a quad-radio design with three 2x2:2 radios. With support across the 6 GHz, 5 GHz, and 2.4 GHz bands, it delivers the next generation of high-efficiency, high-performance connectivity using 802.11be, also known as Extremely High Throughput (EHT). In addition to its advanced speed and bandwidth capabilities, the AP4020 includes a full-time dedicated security sensor, ensuring robust protection while maintaining optimal network performance.

Extreme offers one of the most extensive selections of switches to connect Wi-Fi 6E and Wi-Fi 7 access points. The switches that connect the APs include flexible PoE that offer 30/60/90 watts of power on their multi-gigabit ports to support the higher power requirements of 6 GHz Wi-Fi.

Subject to change until product release

Business Benefits and Outcomes

Improve Operational Efficiency

The AP4020 is part of a complete wired and wireless solution that combines AIOps provided by ExtremeCloud IQ, Extreme's Universal Wired portfolio, and advanced security from ExtremeCloud Universal ZTNA. Using powerful 802.11be Wi-Fi 7 technology, this solution allows deployment of high-speed and highly secure Wi-Fi into a broad range of environments including high-density venues. ExtremeCloud IQ improves operational efficiency through powerful cloud-based management capabilities across the wired and wireless infrastructure.

Reduce Risk

With more users, more devices, more applications, and more threats straining the network, the AP4020 was engineered to meet these performance and security challenges. Unlike other APs that scan only part time, the AP4020 features a dedicated tri-frequency sensor that monitors rogue devices full time, eliminating the risk of vulnerability and attacks.

The AP4020, as part of the Extreme Universal Wireless portfolio, allows the user to change an operating system use case without changing the hardware, providing deployment flexibility.

Enhance User Experiences

The enhanced user experience with a Wi-Fi 7 AP4020 access point is marked by ultra-high speeds, low latency, and exceptional connectivity, even in dense or complex environments. Leveraging Wi-Fi 7's Extremely High Throughput (EHT) technology, users enjoy faster downloads, smoother streaming, and more responsive real-time applications like video conferencing and data intensive tasks.

Subject to change until product release

AIOps and Cloud Management

The AP4020 is managed by ExtremeCloud IQ with innovative AIOps capabilities that streamline operations by delivering new levels of network visibility, automation, and intelligence using Explainable ML (machine learning). ExtremeCloud IQ incorporates many AIOps features such as network and client insights that help users reduce mean time to resolution (MTTR).

Network and client insights provide device-generated telemetry data that is depicted in both real-time and historical dashboard views with the ability to drill-down to details. The Client Monitor feature helps identify and troubleshoot network events that clients typically encounter when associating with an AP, authenticating, and accessing the network. Intelligent automation triggers dynamic packet capture (PCAP) to collect salient data used for root cause analysis, and to suggest remediation.

ExtremeCloud IQ includes advanced capabilities to simplify and enhance daily operations. Updated Wi-Fi maps display real-time radio frequency (RF) and responsive views at scale. Users can visualize active channel plans on all three bands: 2.4 gigahertz (GHz) Wi-Fi and Bluetooth Low Energy (BLE), plus 5 and 6 GHz Wi-Fi. It includes a scaling tool with definable wall types, custom attenuation values, an AP expandible device modal, and client information modals.

Templates for APs enable rapid deployment, with most of the port settings already applied by the associated template. The ExtremeCloud IQ Companion mobile app, for Android and iOS, helps simplify the provisioning and configuration of devices and creates a full installation report. This allows users to monitor and access details about the network from any location in near real time, and it includes a comprehensive troubleshooting toolbox.

Wi-Fi 7 (802.11be) Technology

Wi-Fi 7 (802.11be) introduces benefits across the 2.4 GHz, 5 GHz, and 6 GHz bands with reduced latency and jitter for time-sensitive networking applications. Wi-Fi 7 capabilities such as 320 MHz channels, 4K-QAM, and Multi-Link Operation (MLO) helps enable superior speeds and high-density performance. The 6 GHz band enables improved quality of service (QoS) in dense environments, new applications and use cases, and an improved user experience.

* Country dependent

Universal Hardware

The AP4020 is built with Extreme's Universal Hardware technology that allows multiple deployment use cases through a simple change of the software or feature set. Universal hardware platforms increase flexibility and reduce obsolescence by allowing customers to gradually adopt new technologies without the need for a rip and replace approach to their hardware.

Offered with a Universal World SKU AP, the AP4020 allows customers, partners, and distributors to order one model for any region where Extreme Networks products are sold, replacing the age-old problem of country-specific models.

Software-Defined Radios

The Wi-Fi 7 AP4020 features two distinct software defined radio (SDR) modes for different deployment scenarios. Dual 5 GHz supports high-density deployments with a dedicated sensor. The AP4020 is a quad radio AP that can transmit with multiple combinations of three data radios across the 2.4 GHz, 5 GHz, and 6 GHz bands in addition to an always-on dedicated tri-frequency sensor. The AP4020 intelligently monitors the software-configurable radios, enabling network managers to configure network RF technology based on the user environment and to configure the APs in different modes as required. The AP4020 features superior tri-frequency radio performance with a multiband filter that reduces interference and enables 5 GHz and 6 GHz operation across all available channels without restrictions.

Security

The AP4020 delivers the highest level of security services, beginning with support for the latest Wi-Fi Alliance WPA3 security certifications. The AP4020 also acts as an enforcement point for ExtremeCloud Universal ZTNA – the industry's most complete network access security solution. Universal ZTNA provides automated security policy enforcement and manages SSIDs to enforce policies on the AP4020. Extreme Fabric adds additional security by automating provisioning and deployment by connecting to a Fabric -enabled switch. Additionally, the AP supports a stateful L2-L7 DPI firewall for context-based access security, tri-frequency security, an location analytics sensor, and much more. The AP4020 also includes a unique dedicated security sensor for rich insights and threat detection when paired with Extreme AirDefense.

Subject to change until product release

Modern IoT Platform

To support both IoT and guest engagement services, the AP4020 integrates Bluetooth® to connect with IoT devices wirelessly and to engage loyal customers with Apple iBeacon. Enterprises can use API-driven applications to send advertisements directly to shoppers, guests, and conference attendees. This makes it ideal for businesses to advertise their app, download pages, captive portals, or site-specific information. The AP4020 features dual IoT radios, enabling multiple concurrent IoT use cases and eliminates the need for an overlay infrastructure with improved performance and reduced complexity of multiple wireless networks.

Product Specifications

Radio Specifications

Max Users

SSID per Radio/Total: 16/48

Users per Radio/total: 512/1536

802.11a

5.150 GHz–5.850 GHz Operating Frequency

Orthogonal Frequency Division Multiplexing (OFDM) Modulation

Rates (Mbps): 54, 48, 36, 24, 18, 12, 9, 6 w/auto fallback

802.11b

2.4 GHz–2.5 GHz Operating Frequency

Direct-Sequence Spread-Spectrum (DSSS) Modulation

Rates (Mbps): 11, 5.5, 2, 1 w/auto fallback

802.11g

2.4 GHz–2.5 GHz Operating Frequency

Orthogonal Frequency Division Multiplexing (OFDM) Modulation

Rates (Mbps): 54, 48, 36, 24, 18, 12, 9, 6 w/auto fallback

802.11n

2.4 GHz–2.5 GHz and 5.150–5.850 GHz Operating Frequency

802.11n Modulation

HT20 High-Throughput (HT) Support (for both 2.4 GHz and 5 GHz)

HT40 High-Throughput (HT) Support for 5 GHz

A-MPDU and A-MSDU Frame Aggregation

Rates (Mbps): MCS0 – MCS31 (6.5MBps - 600Mbps)

802.11ac

5.150 GHz–5.850 GHz Operating Frequency

802.11ac Modulation (256-QAM)

5G: 2x2 Multiple-In, Multiple-Out (MIMO) Radio

2.4G: 2x2 Multiple-In, Multiple-Out (MIMO) Radio

Rates (Mbps): MCS0–MCS9 (6.5Mbps), 1733Mbps, NSS = 1-2.

2x2:2 Stream Multiple-In, Multiple-Out (MIMO) Radio

VHT20/VHT40/VHT80/VHT160

TxBF (Transmit Beamforming)

802.11ax

2.4 GHz-2.5GHz, 5.50 GHz-5.850 GHz and 5.925 GHz-7.125 GHz Operating Frequencies

802.11ax Modulation (1024-QAM)

Dual-band OFDMA

Rates (Mbps):

• 6G Rate: HE0-HE11 (8 Mbps – 4800 Mbps)

• 5G Rate : HE0-HE11 (8 Mbps – 4800 Mbps)

• 2.4G Rate: HE0-HE11 (8Mbps – 1148 Mbps)

2x2:2 Stream Multiple-In, Multiple-Out (MIMO) Radio at 6 GHz

2x2:2 Stream Multiple-In, Multiple-Out (MIMO) Radio at 5 GHz

2x2:2 Stream Multiple-In, Multiple-Out (MIMO) Radio at 2.4 GHz

HE20/HE40/HE80/HE160/HE320 support for 6 GHz

HE20/HE40/HE80/HE160 support for 5 GHz

HE20/HE40 support for 2.4 GHz

UL/DL SU-MIMO and MU-MIMO

TxBF (Transmit Beamforming)

802.11be

2.4 GHz–2.5GHz, 5.15 GHz–5.850 GHz, and 5.925 GHz–7.125 GHz Operating Frequencies

802.11be modulation (4096-QAM)

Rates (Mbps):

• 6G: EHT0-EHT13 (8Mbps–5,765 Mbps)

• 5G: EHT0-EHT13 (8Mbps–2,882 Mbps)

• 2.4G: EHT0-EHT13 (8Mbps–688 Mbps)

2x2:2 stream MIMO radio at 6 GHz

2x2:2 stream MIMO radio at 5 GHz

2x2:2 stream MIMO radio at 2.4 GHz

EHT20/EHT40/EHT80/EHT160/EHT320 support for 6 GHz

EHT20/EHT40/EHT80/EHT160 support for 5 GHz

EHT20/EHT40 support for 2.4 GHz

UL/DL SU-MIMO and MU-MIMO

TxBF (transmit beamforming)

Dual IoT Radios

(2) radios for Thread, Zigbee®, Bluetooth 5.4 Low Energy, IEEE 802.15.4 Thread

Interfaces

Eth0, Eth1: (2) wired Ethernet ports (RJ45)

100/1,000/2,500/5,000Mbps autosensing link speed Ethernet port, PoE PD

802.3az Energy-Efficient Ethernet (EEE)

USB 2.0, Type A, 5V/500mA with POE 802.3at or 5V/1,000mA with PoE 802.3bt

Power Options

Power Draw: 802.3at PoE: Typical 21W with USB 2.5W; Max: 25.5W 2.5W USB

Power Draw: 802.3bt: Max: 28W with 5W USB

12V DC/3A. DC power has priority when both DC and PoE power sources are available

PoE Failover

Physical Specifications

Dimensions: 9.46 in. x 9.46 in. x 1.48 in. (240.3 mm x 240.3 mm x 37 mm)

Weight: 2.9 lbs (1.3 kg)

Security

Kensington lock slot

Trusted Platform Module (TPM)

Subject to change until product release

Internal Antennas

(2) dual band 2.4 GHz and 5 GHz
(2) single band 5 GHz
(2) single band 6 GHz
(1) 2 GHz/5 GHz/6 GHz sensor
(3) IoT sensor

Mounting

AP support 15/16 in. flush ceiling tile included in the box
Wall mount included in the box or sold as an accessory
Sculpted ceiling tile 15/16 in. wide t-bar sold as an accessory
Sculpted ceiling tile 9/16 in. wide t-bar sold as an accessory
Beam sold as an accessory
Junction box sold as an accessory
IL or 9/16 in. t-bar sold as an accessory
SL (Silhouette) sold as an accessory
WiNG main plate adaptor sold as an accessory
Built-in slot for Kensington

Environmental Specifications

Operating: 0°C to 50°C (32°F to 122°F)
Storage: 0°C to 70°C (32°F to 158°F)
Humidity: 0% to 95% (non-condensing)

Implementation Plan

Tasks for First Two Weeks (Sample Version)

Upon award, your Account Management Team will remain in constant contact with key employee(s) at each location to implement the contract and ensure total satisfaction. CDW•G will make this process as seamless as possible and will follow the work plan that has been developed. In addition, if requested, CDW•G will facilitate any necessary meetings via teleconference, videoconference, or in person, pending appointment, at your location or ours, to ensure that the process meets your expectations.

While there can be challenges to implementing a project of any scale, CDW•G tries to minimize potential problems upfront. We will need Cleburne Independent School District to provide the following in a timely manner in order to facilitate the implementation process:

- Updated contact information for all key personnel
- Information regarding product forecasts
- Standardized product list
- List of authorized users and restrictions
- Imaging specifications
- Specific reporting requirements
- Permission for CDW•G to be listed on manufacturer agreements.

During the implementation process, any problems or concerns should be directed to your account manager for immediate resolution. The following implementation plan demonstrates how CDWG will work with you to successfully implement this project.

Task	Week 1	Week 2
Account Management Set Up		
• **Introduce key customer contacts to CDW•G Account Team** • **Introductory letter/phone contact/ site visit**	**X**	
• **Gather/confirm general customer information** • **Contacts: phone, email, fax** • **Cleburne Independent School District's locations and addresses**	**X**	
• **Outline customer's procedures and requirements, i.e.**	**X**	

To the extent allowable, all information and documents hereby submitted in response to FCC 470# 250008635 furnished by Cleburne Independent School District are the Proprietary and Confidential property of CDW Government LLC ("CDW•G").

K-12 Funding and Other Resources

We know your need for vendor support does not stop at deployment completion. Maintaining technology program innovativeness and alignment with your education goals is a continuous and daunting task. In fact, in a year, your program will look very different. You need a vendor that does more than meet your RFP's technology requirements; you need a vendor partner that shares a passion for education and continued development. Our teams, and our partners, are dedicated to supporting the full scope of Cleburne Independent School District's technology and all your program goals. Following are highlights of the value-adds we offer our education customers.

Get Ed Funding Overview

CDW•G sponsors **GetEdFunding.com**, a free grant-finding resource, providing access to billions of dollars' worth of educational funding opportunities. Through sponsoring this resource, CDW•G's mission is to help educators and institutions discover the funds they need to supplement tight budgets to achieve your goals and take learning to the next level.

Monitored daily, **GetEdFunding.com** can reduce the energy your teachers are spending to search for programs and money. You can finetune your search based on key concepts and 21st century skills and themes. Once you are registered on the site, you can save the grants of greatest interest to return to later. The funding opportunities listed are already available and applicable to standard learning paths. For example, there are more than 60 STEM specific programs currently available for application. Please reach out to your account manager for more information.

To the extent allowable, all information and documents hereby submitted in response to FCC 470# 250008635 furnished by Cleburne Independent School District are the Proprietary and Confidential property of CDW Government LLC ("CDW•G").

mwallace@c-isd.com

Dear Mr Wallace :

Solid IT Networks is pleased to provide a proposal response to Cleburne_470_2025_250008635. This Proposal represents the intention and desire of Solid IT Networks to provide the necessary products and services as listed and required in the RFP.

Please understand that this is a comprehensive proposal that is intended for maximum functionality. Solid IT is offering our bid with the most technically sound, cost effective product with your project in mind. We propose an Aruba / Extreme solution that will meet the districts needs today and in the future. Solid IT has the experience and technical team to make this project successful for the district. We look forward to your response and welcome any further discussion to the thought process regarding our proposal.

Solid IT Networks is a Texas corporation founded in 2001 and brings a wide breadth of experience as a successful systems integrator and project manager. Our primary focus is K-12 schools and higher education. We have been involved in numerous large installations and project rollouts, some in excess of thirty million dollars. Projects have involved multiple schools (touching 65 schools within a three-month period) as well as single schools.

We welcome and look forward to a collaborative relationship.

Sincerely,

Griffin Emerson
Account Executive
Solid IT Networks, Inc.

1) AGREEMENT - By ordering or accepting the goods described herein, Buyer agrees to the terms and conditions set forth herein and in any attachments hereto, none of which may be added to, modified, superseded or otherwise altered except by a written instrument signed by an authorized representative of Seller and delivered to Buyer.
2) TERMS OF PAYMENT/PENALTY. Invoices are issued as of the date of delivery covering deliveries from our stocks and as of the date of shipment covering direct shipments and are due and payable in lawful money of the United States of America upon the issuance thereof unless otherwise specifically agreed in writing. All unpaid items will be charged a 10% late penalty beginning the 10th day the invoice is deemed late, such charges not to exceed the maximum charge permitted by law.
3) BUYER'S DUTY TO INSPECT. Buyer must immediately inspect all material for shortages, conformity with order and defects. If goods appear not to conform to the contract between Buyer and Seller, Buyer shall discontinue their use and immediately notify Seller of such condition and afford Seller a reasonable opportunity to inspect the same. Claims for shortage or deductions for erroneous charges must be presented within fifteen (15) days after receipt of the goods or they will not be allowed. No material will be taken back and credited or replaced unless arrangements for return have been made with Seller. Seller may, at its option, replace those products proven defective or allow credit for an amount not exceeding the sum of the original purchase price thereof. Manufacturer and Distribution warranty, cancellation, and return policies will apply.
4) PRICES, TAXES & LCP PRICING – Unless otherwise indicated, prices are exclusive of all city, state and federal taxes. Any taxes which Seller may be required to collect under any existing law upon or with respect to the sale, purchase delivery, storage, processing, use or consumption of any of the material covered hereby, including taxes upon or measured by the receipts from the sale, thereof, shall be for the account of Buyer and Buyer shall promptly pay the amount thereof to Seller upon request.
Product, inventory, and pricing data are updated frequently and subject to change without notice. Please consult your Solid IT Networks sales representative for timely, updated pricing prior to placing an order.
5) SHIPPING AND CREDIT CARD CHARGES - Additional shipping charges may apply. Payments by credit card will be subject to an additional 4% processing fee.
6) CONFIDENTIALITY - Solid IT Networks, Inc. asserts the information submitted in connection with this quotation is confidential, and if released, may give advantage to a competitor, and therefore should not be disclosed to third parties. In addition, Solid IT asserts the information submitted contains internal proprietary methods in preparing the network configuration and implementation of the work and also may constitute trade secrets which should not be disclosed.

1) AGREEMENT - By ordering or accepting the goods described herein, Buyer agrees to the terms and conditions set forth herein and in any attachments hereto, none of which may be added to, modified, superseded or otherwise altered except by a written instrument signed by an authorized representative of Seller and delivered to Buyer.
2) TERMS OF PAYMENT/PENALTY. Invoices are issued as of the date of delivery covering deliveries from our stocks and as of the date of shipment covering direct shipments and are due and payable in lawful money of the United States of America upon the issuance thereof unless otherwise specifically agreed in writing. All unpaid items will be charged a 10% late penalty beginning the 10th day the invoice is deemed late, such charges not to exceed the maximum charge permitted by law.
3) BUYER'S DUTY TO INSPECT. Buyer must immediately inspect all material for shortages, conformity with order and defects. If goods appear not to conform to the contract between Buyer and Seller, Buyer shall discontinue their use and immediately notify Seller of such condition and afford Seller a reasonable opportunity to inspect the same. Claims for shortage or deductions for erroneous charges must be presented within fifteen (15) days after receipt of the goods or they will not be allowed. No material will be taken back and credited or replaced unless arrangements for return have been made with Seller. Seller may, at its option, replace those products proven defective or allow credit for an amount not exceeding the sum of the original purchase price thereof. Manufacturer and Distribution warranty, cancellation, and return policies will apply.
4) PRICES, TAXES & LCP PRICING – Unless otherwise indicated, prices are exclusive of all city, state and federal taxes. Any taxes which Seller may be required to collect under any existing law upon or with respect to the sale, purchase delivery, storage, processing, use or consumption of any of the material covered hereby, including taxes upon or measured by the receipts from the sale, thereof, shall be for the account of Buyer and Buyer shall promptly pay the amount thereof to Seller upon request.
Product, inventory, and pricing data are updated frequently and subject to change without notice. Please consult your Solid IT Networks sales representative for timely, updated pricing prior to placing an order.
5) SHIPPING AND CREDIT CARD CHARGES - Additional shipping charges may apply. Payments by credit card will be subject to an additional 4% processing fee.
6) CONFIDENTIALITY - Solid IT Networks, Inc. asserts the information submitted in connection with this quotation is confidential, and if released, may give advantage to a competitor, and therefore should not be disclosed to third parties. In addition, Solid IT asserts the information submitted contains internal proprietary methods in preparing the network configuration and implementation of the work and also may constitute trade secrets which should not be disclosed.

1. Company Overview

About Netsync Network Solutions

Founded in 2002, Netsync is a minority-owned business (MBE), and women-owned small business (WOSB) value-added reseller (VAR) specializing in technology solutions. We originated as a team of select senior technical consultants and built our business primarily through relationships and referrals, a true testament to the quality technology services Netsync provides. An end-to-end IT solutions consulting company, Netsync is based in Houston, TX, with offices across the US. Netsync uses a true business consultative approach to determine clients' requirements and architects innovative and synergistic IT solutions to meet clients' needs. Our highly skilled and seasoned engineering team is available 24 hours a day, 7 days a week, 365 days a year.

Netsync Services

Netsync helps public and private organizations implement complex IT strategies build on advanced technology solutions to achieve desired business outcomes. Our team of solution experts brings tangible business value through our progressive Design, Build, Deliver, and Manage services methodology. Each part of our clients' infrastructure is architected, implemented, and supported to provide the best business value from their infrastructure.

Netsync Partners

Netsync is a Cisco Gold Integrator, Master Collaboration, Master Networking, Master Security, Master Service Provider, and Customer Experience (CX) Partner; an HP Amplify Power Services Partner; a Dell Platinum Partner; and an Intel Platinum Partner; with certifications and specializations from the industry's best manufacturers. Netsync has built its reputation serving the public sector/SLED market, with extensive experience deploying complex IT solutions for K-12 and higher education institutions, municipalities, and government agencies. Netsync also completes enterprise and SMB large-scale implementations for corporate clients across industries, including financial services, energy, healthcare, retail, manufacturing, and service providers.

Commitment to Sustainability

Cisco aims to reduce its carbon footprint and energy consumption through various initiatives. They prioritize energy-efficient products and sustainable designs, contributing to their goal of minimizing environmental impact. Cisco's Circular Economy program focuses on responsible product lifecycle management, recycling, and reusing materials. They have set a science-based target to reach net zero greenhouse gas (GHG) emissions across their value chain by 2040. Together, we are committed to deep GHG reductions across their operations, supply chain, and product use. 89 percent of energy came from renewable sources in FY22. https://www.cisco.com/c/en/us/about/csr/environmental-sustainability.html.

3. Professional Services Contact Profiles

Taylor Leger
Account Manager
2304 Tarpley Road
Carrollton, TX 75006
O: 713.218.5000 | M: 214.914.5333 | F: 713.664.9964
E: tleger@netsync.com

As an Account Manager for Netsync, Taylor Leger acts as the main point of contact for services by obtaining quotes and schematics for presentations and providing project coordination for each client. Taylor has full access to all staff assigned to his clients, including deployment technicians, directorial staff, and accounting and purchasing representatives. He is authorized to coordinate with Netsync and manufacturer staff to ensure each project assigned is completed on time and within budget.

Taylor holds a bachelor's degree in Finance from University of Arkansas. As an Account Manager, he frequently coordinates Netsync's marketing events for the North Texas area. Taylor Leger is responsible for managing multiple, complex accounts and takes part in all aspects of his clients' long-term projects. Taylor Leger has been with Netsync for over four years and is responsible for securing many of the contracts that Netsync holds with independent school districts and state and local government entities in the North Texas area. Holding over 20 active accounts with most of his clients engaged in long-term commitments, Taylor also holds state and local contracts that service multiple agencies, facilities, and individual entities.

John Birdsong
Solutions Architect

Enterprise Networking

John Birdsong has a strong record of success in designing, scoping, and deploying large- and small-scale networks to support real-time business critical applications. John has over 25 years' experience designing, installing, and aiding clients in planning for the future growth of networked applications. John offers a background of client advocacy and client consultation skills, allowing him to excel in integration of various technologies from varying manufacturers to provide the best possible solutions to clients.

John has an impressive professional history of designing Enterprise Networking solutions for large and small school districts, public sector entities, and small to large Enterprise clients. As a Solutions Architect, he has been responsible for many projects ranging from designing district-wide Enterprise Networks to designing a global WAN for a Fortune 500 Enterprise client. John has held Cisco Certified Network Associate (CCNA) – Routing and Switching (R&S), Cisco Certified Design Associate (CCDA), and other various industry certifications.

Areas of Expertise

Infrastructure Services	
• Cisco DNA Center	• Cisco Indoor and Outdoor Wireless
• Cisco Catalyst Switching	• Cisco Meraki MS and MR Series
• Cisco Nexus Switching	• AirWatch MDM
• Cisco Routing	• Cisco Software-Defined Access

Project Experience Highlights

- Assisted multiple clients in planning migrations to Cisco Digital Network Architecture (DNA) Center.
- Designed and deployed a district-wide network refresh for one of the largest school districts in Texas. This refresh included Cisco wireless LAN (WLAN), Cisco LAN, and Cisco WAN.
- Designed a global LAN and WLAN refresh for one of the world's largest consumer packaged goods companies, spanning over 2,000 sites.
- Designed a video surveillance system for a transportation entity spanning its entire train network.

Jeff Barker
Executive Sales Director

2304 Tarpley Road, Suite 114
Carrollton, TX 75006
O: 713.218.5000 | M: 214.491.8333 | F: 713.664.9964
E: jbarker@netsync.com

Jeff Barker, Executive Sales Director, joined Netsync team 6 years ago after over 12 years of experience with our largest manufacturing partner, Cisco Systems. Jeff's industry experience working directly with enterprise and healthcare clients, navigating the reseller and partner community, and managing and motivating sales organizations, is a valuable addition to Netsync's growth in North Texas, California, and Southeast, as well as in service provider, and federal operations. He brings with him a wealth of knowledge, maturity, and structure to our leadership team, with key job responsibilities in customer satisfaction, sales mentorship, and promotion of the Netsync brand. Jeff has a bachelor's degree in computer engineering from North Carolina State University and is an avid golfer and sports enthusiast.

Jacob Parks
Solutions Architect

Cybersecurity

Jacob Parks is a highly skilled Cybersecurity Architect with over two decades of industry experience. He holds two prestigious Cisco Certified Internetwork Expert (CCIE [#28508]) certifications, a Certified Information Systems Security Professional #715542 (CISSP), and a GIAC Penetration Tester #15239 (GPEN) certification, highlighting his deep expertise in security.

Jacob's extensive background in security technologies has enabled him to design and implement cutting-edge security infrastructures for large organizations, focusing on securing complex networks, preventing cyber threats, and ensuring data integrity. His proficiency spans advanced routing, switching, firewalls, VPNs, threat detection, and intrusion prevention.

Areas of Expertise

Security Services	
• NAC	• IDS/IPS
• NGFWs	• MFA
• Endpoint Security	• Network Visibility and Segmentation
• VPNs	• SSE
	• SASE
Infrastructure Services	
• Core, Distribution, and Access Switches	

Certifications
• GIAC Penetration Tester

Project Experience Highlights

- Integrated worldwide deployment of NAC solution to address differentiated access for users and endpoints.
- Designed NAC policies for segmented network access for Fortune 500 companies and subsidiaries.
- Designed and deployed multinational VPN and NGFW solutions to facilitate access for core employees and a yearly conference for over 3,000 delegates.
- Designed and deployed Web Security Solution for municipal government targeted for over 10,000 users.
- Oversaw districtwide replacement and upgrade of access and distribution routers and switches for 24 schools.
- Implemented switch and router upgrades for municipal government for over 700 sites.

Property of Netsync Network Solutions. Confidential and Proprietary Information.

4. Technical Response

Project Summary

Cleburne ISD ("CISD" or "District"), headquartered in Cleburne, TX, requested that Netsync Network Solutions ("Netsync") submit a statement of work (SOW) outlining District's upcoming Palo Alto (PA) Firewall -3420 Migration project in response to District's Request for Proposal (RFP) Form 470 No. 250008635.

The purpose of this project is to replace District's existing Palo Alto (PA) firewall PA-5220 with one PA-3420 firewall.

Project Objectives

- Discover and plan District's firewall migration from one PA-5220 to one PA-3420
- Configure one PA-3420 appliance
- Perform testing and validation of successful implementation
- Provide up to two hours of knowledge transfer hours
- Provide up to four hours of Day 1 post-cutover remote support

Project Scope and Phases

Discovery

Kickoff Meeting

1. Netsync will conduct a kickoff meeting:
    a. Identify and introduce key stakeholders, who will participate in developing the definition of requirements for success.
    b. Identify project goals, success criteria, and timeline, including but not limited to:
        i. Review SOW.
        ii. Confirm contacts needed to gain entry and perform work in the buildings.
        iii. Confirm any holidays or "non-working" hours for the installation.
        iv. Confirm any District-required change control processes and any potential impacts that these processes may have on the installation schedule.
        v. Schedule technical discovery meeting(s).
        vi. Review and discuss invoicing preferences and applicable billing milestones.
2. Netsync will identify all required information for implementation components, including but not limited to:
    a. Features and functionality.
    b. Integration with the existing network, as necessary.
3. Netsync will perform inventory discovery to gather hardware information, models, and operating system (OS) validation.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Planning

1. Netsync will meet with District to review the key design principles of migration and integrations with the existing District network and technologies.
2. Netsync will require District to fill out the pre-configuration worksheets for each Palo Alto Series Firewall.
3. Netsync will adhere to manufacturers' best practices for logical designs and configurations unless otherwise noted.
4. Netsync will create and present a low-level design (LLD) that includes the following:
    a. Detailed data center rack diagram. The rack diagram will describe the physical data center rack and cable matrix designs for the following:
        i. One Rack Unit (RU) per PA-3420.
    b. Design and plan deployment for the following:
        i. One PA-3420
5. Netsync will work with District to create an implementation plan, project timeline, target dates, and target milestones.
6. Netsync will work with District to create a test and acceptance plan.
7. Netsync will receive District sign-off on the following:
    a. Low-Level Design (LLD).
    b. Implementation plan – associated project timeline, target dates, and target milestones.
    c. Test and acceptance plans.

Equipment Receipt, Staging, and Delivery

Staging and implementation will only begin upon District approval of the Low-Level Design (LLD) document. Staging excludes any uninterruptible power supply (UPS) devices, batteries, and IP-related information. If applicable, Netsync will complete UPS deployment on site at District installation location(s).

1. Netsync will receive equipment in its own facility, unbox equipment, install configurations and test for any anomalies, replace any equipment that does not burn in correctly, notify District of any additional needs that are discovered during the burn-in process, and prepare equipment for delivery to each respective location.
2. Netsync will tag each device with a District asset tag and add to an inventory spreadsheet.
3. Netsync will provide inside-delivery of equipment to each respective location. Netsync may choose to deliver the equipment before installation (no more than three weeks in advance) or bring the equipment at the time of installation. Netsync will not deliver any equipment without prior written approval from District. If District chooses to pre-deliver the equipment, then it will provide a secured location for storage until installation.
4. This location must be accessible to Netsync employees for staging and configuration needs.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Implementation

1. Netsync will rack one PA-3420 firewall.
2. Netsync will configure PA-3420 with basic network information, including:
    a. Management IP address and subnet.
    b. Gateway.
    c. DNS.
    d. NTP.
3. Netsync will set up platform settings:
    a. Set up Secure Shell Protocol (SSH) access.
    b. Change default credentials and configure administrative access to ensure remote management capabilities.
4. Netsync will upgrade all newly installed firewalls to latest recommended supported code version and patch levels unless otherwise noted.
5. Netsync will register and install applicable licenses.
    a. Palo Alto Networks Core Security subscription bundle.
6. Netsync will work with District to get existing firewall PA-5220 configurations.
7. Netsync will migrate the following firewalls configurations:
    a. One PA-5220 firewalls to one PA-3420 firewall.
8. Netsync will migrate existing policies, objects, network, and device configurations in 1-to-1 manner.
9. Netsync will configure firewall devices:
    a. Interface specific setup: IP Address, interface name, security zones, and interface groups.
    b. Routing setup: static routes, dynamic routing protocols setup, and filtering.
    c. Routing/Policy-Based Routing (PBR) will be determined and migrated, as necessary.
10. Netsync will migrate object management:
    a. Migrate existing network objects.
    b. Migrate existing object groups.
    c. Define other specific objects necessary for deployment.
        i. Up to 20 new objects can be created.
11. Netsync will migrate existing Network Address Translations (NATs).
    a. Migrate existing NAT rules.
    b. Up to 10 new NAT entries can be created.
12. Netsync will migrate policies from existing PA-5220 to PA-3420.
    a. Rules will be migrated in a 1-to-1 manner.
13. Netsync will create up to 2 new security policies as needed for the deployment.
14. Netsync will migrate L2L VPN tunnels in a 1-to-1 manner.
15. Netsync will migrate RA VPN configurations in a 1-to-1 manner.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Testing and Validation

1. Netsync will work with District to create a testing and validation plan to ensure all necessary items are tested and working post cutover.

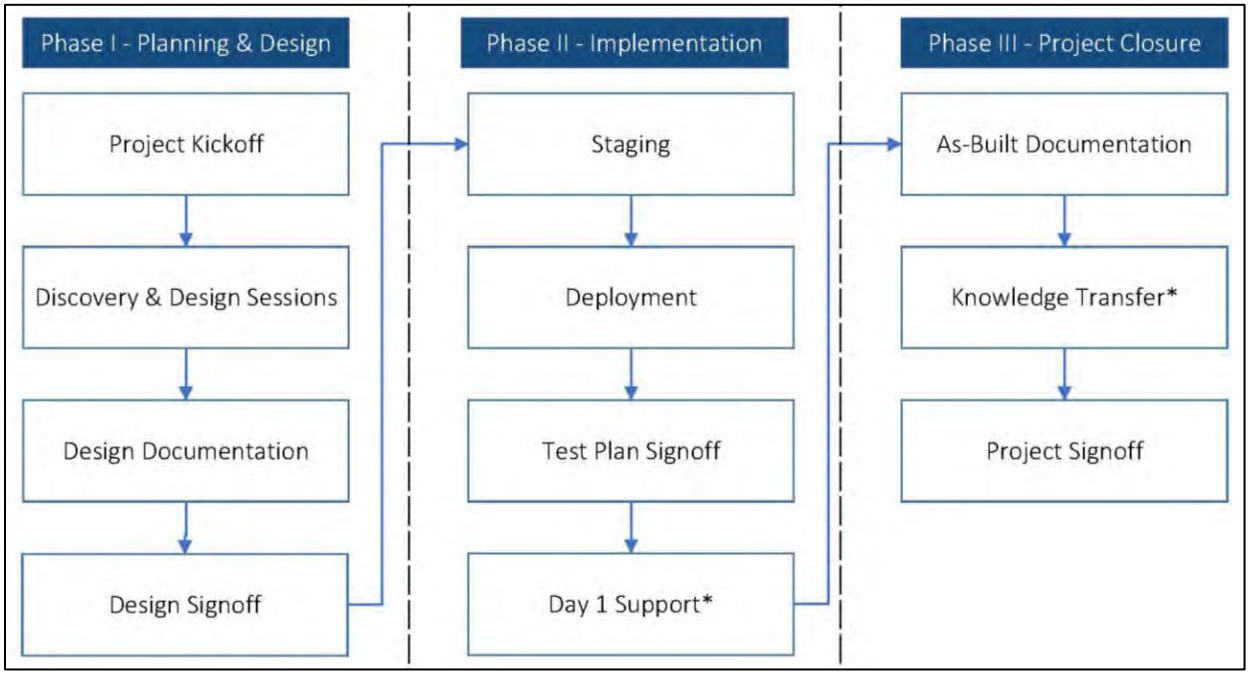
Knowledge Transfer

1. Netsync will provide two hours of knowledge transfer for up to five District attendees. Before the project start, Netsync will work with District to define the specific location, the schedule, and any additional topics for the knowledge transfer session(s). The following topics will be covered:
    a. Features of products and technologies as deployed in the solution.
    b. Review of the as-built documentation to familiarize District with the overall solution and key configuration details.
    c. Basic administration and common operational tasks.
    d. Reinstallation and/or reconfiguration in case of failure.
    e. Monitoring, testing, and maintaining the products deployed in the solution.
    f. Warranty and support procedures for all products deployed in the solution.
    g. Additional District questions or topic requests.
2. If it is determined that the duration of knowledge transfer requested by District will exceed the hours stated above, then Netsync can provide supplementary session(s) at an additional hourly rate.

Note: Knowledge transfer is intended to provide familiarity and conceptual understanding of the specific technologies deployed within this SOW. It is not intended to be comprehensive technical training. The included session(s) may not provide District all of the necessary knowledge and skills to fully manage, monitor, and maintain the solution. Netsync recommends formal training from the solution vendor(s) to address those needs.

Project Prerequisites

1. District will fulfill cabling requirements, if applicable.
2. District will provide Netsync all necessary hardware and information on current environment.
3. District will provide Netsync local and remote administrative credentials (root access) to all equipment to be accessed during the process of this SOW.
4. District will make available authorized personnel during the project with a working knowledge of existing network infrastructure for facility access, questions, and clarification of issues.
5. District will provide Netsync access to all work locations, along with safety, access, security, and emergency protocols.
6. District will obtain all necessary work permits.
7. District will provide a work area for Netsync to use, as needed, during on-site activities to include internet and public phone access.
8. District will provide parking passes and adequate parking for the Netsync project team.
9. District will comply with all physical and environmental requirements per vendor specifications.



Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Management

Netsync approaches all projects using standard Project Management Institute (PMI) methodologies and processes. Once a Project Manager (PM) is assigned, a project kickoff meeting will be held with District, the PM, the Account Manager (AM), and assigned technical resource(s) to ensure each party is in alignment with all aspects of this SOW. The PM will also perform the following project management activities throughout the engagement to ensure District expectations are consistently met and the project is delivered on time and within the established budget:

- Create the Project Plan.
- Ensure that accurate and timely status updates, action items, and scheduled tasks are received by the assigned resource(s) and uploaded as entries to District's applicable project portal. The PM will ensure status information clearly reaches District to also include milestone updates.
- Lead project meetings with District and the Netsync project team.
- Oversee a quality assurance review of documentation-based deliverables before providing to District.

Project Management Office (PMO) Project Lifecycle

* Denotes that the step in the process may or may not be applicable based on SOW.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Updates

- District will receive email alerts indicating an update has been made to the Notes-Status-Issues Log portal web part for the following communication entry types:
  - Meeting Notes.
  - Project Plan.
  - Status Update(s).
  - Issue Tracking.
- If District wishes not to use the Netsync project portal, then District has the option to request direct email correspondence from the Netsync PM for all communication and updates.

Project Scope Change Requests

Netsync is fully committed to completing this project on time and within the established budget. All scope changes and out-of-scope (OOS) requests must be clearly communicated to the AM or PM before those changes or requests are acted on or performed by the assigned resource(s). The following outlines the scope change or OOS request procedure:

1. The PM and District project team will identify required changes.
2. The PM will submit a Project Change Request Form (CR).
3. The PM will submit the CR to District for subsequent approval and sign-off.
4. District will return a signed copy of the CR.

All other terms within the original SOW, in addition to the signed CR, will remain intact.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Documentation

Netsync will provide District the following documentation:

Included (Yes/No)	Document Type	Owner	Description	Frequency
Documentation				
Yes	Statement of Work (SOW)/High-Level Design (HLD)	Solutions Architect and Account Manager	Description of scope based on presales discussions, preliminary walkthroughs, and data gathering sessions. This SOW is the HLD, and presents and illustrates the overall solution.	Once
Yes	Low-Level Design (LLD)	Engineer	The LLD will replace all existing HLDs upon receipt of a purchase order and subsequent full walkthroughs and formal post-sales planning and design sessions. The LLD will be a fully executed document agreed to by both parties before implementation begins.	Once
Yes	Project Plan	PM and Senior Lead Engineer	Task list, schedule, contact list, meeting notes, status, risk, and issue tracking.	Ongoing
Yes	Method of Procedure (MOP)	PM and Senior Lead Engineer	Detailed implementation plan.	Once
Yes	As-Built	Senior Lead Engineer	Post-implementation technical documentation of new configuration(s) and applicable support information.	Once
Yes	Project Sign-off	PM and District	Deliverables acceptance.	Once

Deliverables Acceptance

District will acknowledge receipt and acceptance, or rejection of all deliverables associated with this SOW within 10 business days of delivery (not including federal holidays). If such acknowledgement is not received within this period, then all deliverables will be deemed acknowledged and accepted.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Risks and Assumptions

1. District will participate in all design and planning sessions and be prepared to sign off on all milestones.
2. District will provide Netsync with full access to the relevant functional, technical, and business resources with adequate skills and knowledge to support the performance of services. If District's only method of providing Netsync remote access is through screen share, then additional fees may apply due to project duration extensions.
3. If applicable, Netsync will secure access points (APs) with plastic cable zip ties placed through the mounting bracket, unless District declines this service in writing via email.
4. Unless otherwise noted, all estimates are based on a single implementation trip, per site. District may be charged additional fees for additional onsite meetings.
5. Multiple outages may occur due to the nature of this project; however, they will all occur at scheduled and approved times.
6. District delays to provide Netsync the necessary data to accomplish each task may result in timeline changes.
7. Netsync is not responsible for project delays caused by other vendors and/or manufacturing issues that may impede progress and/or closure of Netsync SOW deliverables.
8. This SOW assumes that the engagement will be a combination of on-site and remote work to drive efficiency. If District requires a 100% on-site engagement, then District must notify Netsync before agreeing to this SOW.
9. If District requires a copy of Netsync's standard Certificate of Insurance (COI) with District-added endorsements, then it should allow up to 10 business days for delivery.
10. Netsync is not responsible for the functionality of District-provided existing equipment or licenses, and assumes that existing equipment and software is under a valid support contract.
11. Anything not specifically stated in this document is outside the scope of this SOW.

Service Level Agreement

Hours of Operation

Standard hours of operation are **8:00 AM to 5:00 PM local time Monday through Friday**. Netsync understands that due to the nature of the industry and work performed, after-hours and weekend availability are often required. In the event Netsync resources are required to perform work outside of the standard hours of operation, agreed-upon work windows will be discussed and subsequently documented via email.

- District will provide Netsync a minimum of three business days' notification for any non-emergency maintenance windows or periods of time.
- Netsync will provide District the best level of support for emergency maintenance windows based on qualified staff resource availability.
- A District project stakeholder or technical contact must be either on location or on-call during the agreed upon after-hours and/or weekend work window(s).

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Pricing and Fees

Fee Type

Fixed Price: The proposed hours are fixed. Additional hours required for in-scope work will not be invoiced unless OOS work is required.

Invoicing Type

Invoice terms are based on credit approval.

Unless specifically noted in the master services agreement (MSA) between District and Netsync, if applicable, Netsync will use the following invoicing type:

- **Milestone Invoicing**: A portion of the project will be invoiced based on achieving the following milestones in the project plan (see milestone table below); the PM will work with District, the AM, and Accounting for appropriate invoicing.

Netsync will send District invoice(s) on Net 30 terms for all applicable hardware, supplemental material, and licenses immediately after delivery and receipt of signed packing/delivery slips.

Project Milestones

This price is based on work taking place during standard hours of operations, **8:00 AM to 5:00 PM local time Monday through Friday**. Additional charges may be incurred for efforts that must be performed outside of this time frame.

Milestone	Percent Billed (%)*
Discovery and Planning	25%
Low-Level Design (LLD)	25%
Implementation	25%
Project Closure/Final Deliverables	25%
Total	100%

*See Netsync quote for project cost.

Project Summary

Cleburne ISD ("CISD" or "District"), headquartered in Cleburne, TX, requested that Netsync Network Solutions ("Netsync") submit a statement of work (SOW) outlining District's upcoming Network Core Refresh project in response to District's Request for Proposal (RFP) Form 470 No. 250008635.

The purpose of this project is to refresh the current District Core switches with new switches.

The current network consists of a pair of Cisco Nexus 9504 Switch and three Cisco Nexus 2148T switches. The 2148T switches currently operate as Fabric Extenders connected to the 9504s. These switches are deployed following a traditional Layer 2/3 network model. The 9504s will be replaced by a pair of Cisco Catalyst 9500-48Y4C switches and the 2148T switches will be replaced with Cisco Catalyst C9300-48T switches.

The C9500s will be stacked using StackWise Virtual Stacking and the C9300s will be stacked using physical stacking.

Exceptions, Clarifications, and Assumptions

The primary focus of this section is to provide any exceptions Netsync took to the original RFP, as well as clarifications around our proposal. This section will also outline any assumptions Netsync made while creating the design.

Netsync has responded to the bid with pricing based on the information provided in the RFP and addendum. Please pay special attention to the exceptions and clarifications outlined below. Also note that the project counts per location are outlined in a table within the Appendix at the end of this SOW.

- If selected, Netsync will require a review of the design and Bill of Materials (BOM) in detail with District to verify that all of the components selected meet the project requirements. This will help ensure the equipment list and quantities support the best possible design.
- Netsync will work with District to make sure all assumptions, exceptions, and clarifications listed below and determined during Discovery are accepted and agreed upon before final pricing.
- Netsync has provided pricing for the specific quantities requested in the RFP. If additional quantities are needed, then these can be purchased for the unit cost provided within the proposal plus the associated labor to install.
- Multiple outages may occur due to the nature of this project; however, they will all occur at scheduled and approved times.
- Netsync is not responsible for project delays caused by other vendors and/or manufacturing issues that may impede progress of Netsync deliverables.
- Netsync is not responsible for configuration changes on any equipment not specifically stated in the SOW.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Network Implementation

- Netsync assumes Client will be responsible for all structured and patch cabling.
- Netsync assumes that all racks in each main distribution frame (MDF) and intermediate distribution frame (IDF) are 19-inch, 2-post racks.

Wireless Implementation

- Wireless is out of scope for this project.

Project Objectives

- Perform a kickoff call with Client and appropriate stakeholders to align expectations and outcomes.
- Conduct a technical requirements and design meeting with Client to gather details.
- Stage equipment at Netsync staging facility.
- Configure equipment as determined during the design meeting.
- Deliver and install equipment at the prescribed campus locations.
- Perform testing as determined during the design meeting.
- Provide Day 1 support for the network on the go-live date.
- Provide a knowledge transfer session to review the implementation.
- Provide documentation.

Project Scope and Phases

Discovery

Kickoff Meeting

1. Netsync will conduct a kickoff meeting:
    a. Identify and introduce key stakeholders, who will participate in developing the definition of requirements for success.
    b. Identify project goals, success criteria, and timeline, including but not limited to:
        i. Review SOW.
        ii. Confirm contacts needed to gain entry and perform work in the buildings.
        iii. Confirm any holidays or “non-working” hours for the installation.
        iv. Confirm any District-required change control processes and any potential impacts that these processes may have on the installation schedule.
        v. Schedule technical discovery meeting(s).
        vi. Review and discuss invoicing preferences and applicable billing milestones.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Planning

Technical Requirements and Design Meeting(s)

1. District will provide Netsync:
    a. Current IP addressing schemes, network diagrams, and configurations relevant to the project details.
2. Netsync will review existing District-provided IP addressing, network diagrams, and configurations looking for opportunities to increase functionality, security, and manageability.
3. Netsync will work with District to review the core and LAN configuration, including but not limited to:
    a. Understand and implement District's current IP addressing scheme.
    b. Review switch naming convention.
    c. Create a virtual LAN (VLAN) plan with a minimum of 10 VLANs and up to a maximum of 15 VLANs.
    d. Determine Quality and Class of Service (QoS/CoS) configurations necessary to support multiple classes of traffic and queue prioritization based on documented best practices.
    e. Discuss configuration options for both Layer 2 and Layer 3 to increase network reliability and performance.
    f. System management:
        i. Integrate with existing authentication, authorization, and accounting (AAA) systems, if available (RADIUS, TACACS, etc.).
        ii. Remote management options (Secure Shell [SSH], Telnet, etc.).
    g. System monitoring:
        i. Simple Network Management Protocol (SNMP) configurations, community strings, and passwords for all devices.
        ii. Syslog server settings.

    Note: Netsync will configure the switches to match District's current configuration. A network redesign and/or configuration changes are outside the scope of this project.
4. Netsync will perform a site walkthrough of each District location at least one week before deployment to:
    a. Evaluate rack space, switch connectivity, and power availability.
    b. Verify final plan for migration and port counts on all devices to be connected.
5. Netsync will review the Bill of Materials (BOM) provided as part of the proposal with the findings from the site surveys to verify any quantity changes.

    Note: Any additions to the design will be priced using the unit pricing provided.
6. Netsync will determine a test plan with District. District will need to provide Netsync with a list of applications that should be tested before and after cutover.
7. Netsync will document all findings, recommendations, and implementation details, including network diagrams.
8. Netsync will review the finalized implementation plan with District before beginning implementation.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Equipment Receipt, Staging, and Delivery

Staging and implementation will only begin upon District approval of the Low-Level Design (LLD) document. Staging excludes any uninterruptible power supply (UPS) devices, batteries, and IP-related information. If applicable, Netsync will complete UPS deployment on site at District installation location(s).

5. Netsync will receive equipment in its own facility, unbox equipment, install configurations and test for any anomalies, replace any equipment that does not burn in correctly, notify District of any additional needs that are discovered during the burn-in process, and prepare equipment for delivery to each respective location.
6. Netsync will tag each device with a District asset tag and add to an inventory spreadsheet.
7. Netsync will provide inside-delivery of equipment to each respective location. Netsync may choose to deliver the equipment before installation (no more than three weeks in advance) or bring the equipment at the time of installation. Netsync will not deliver any equipment without prior written approval from District. If District chooses to pre-deliver the equipment, then it will provide a secured location for storage until installation.
8. This location must be accessible to Netsync employees for staging and configuration needs.

Implementation

Implementation will begin only after Discovery and Planning are 100% complete. District representative must be onsite to receive hardware and sign packing slip prior to installation.

Distribution and Access Switch

1. Netsync will install the distribution and access switches listed in the Appendix into existing equipment rack location or area designated by District.
2. Netsync will configure the Cisco switches to include:
    a. Patch-in drops and fiber.
    b. Properly dress cables with Velcro.
    c. Configure switches based on configuration standards reviewed during technical Discovery.
    d. Perform testing:
        i. Test and validate each switch for proper functionality.
        ii. Validate ports that are associated with devices that are on specific VLANs are properly configured (e.g., cameras, APs, etc.)
3. Netsync will decommission existing switches:
    a. Uninstall existing switches determined during Planning.
    b. Provide an inventory of equipment removed in a data file.
    c. Box the older equipment and label boxes clearly to note included contents.
    d. Deliver boxes to a centralized District location.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Testing and Validation

1. Netsync will perform Testing and Validation as agreed on during the Technical Review and Design meeting.

Knowledge Transfer

1. Netsync will provide two hours of knowledge transfer for up to five District attendees. Before the project start, Netsync will work with District to define the specific location, the schedule, and any additional topics for the knowledge transfer session(s). The following topics will be covered:
    a. Features of products and technologies as deployed in the solution.
    b. Review of the as-built documentation to familiarize District with the overall solution and key configuration details.
    c. Basic administration and common operational tasks.
    d. Reinstallation and/or reconfiguration in case of failure.
    e. Monitoring, testing, and maintaining the products deployed in the solution.
    f. Warranty and support procedures for all products deployed in the solution.
    g. Additional District questions or topic requests.
2. If it is determined that the duration of knowledge transfer requested by District will exceed the hours stated above, then Netsync can provide supplementary session(s) at an additional hourly rate.

Note: Knowledge transfer is intended to provide familiarity and conceptual understanding of the specific technologies deployed within this SOW. It is not intended to be comprehensive technical training. The included session(s) may not provide District all of the necessary knowledge and skills to fully manage, monitor, and maintain the solution. Netsync recommends formal training from the solution vendor(s) to address those needs.

Project Prerequisites

1. District will fulfill cabling requirements, if applicable.
2. District will provide Netsync all necessary hardware and information on current environment.
3. District will provide Netsync local and remote administrative credentials (root access) to all equipment to be accessed during the process of this SOW.
4. District will make available authorized personnel during the project with a working knowledge of existing network infrastructure for facility access, questions, and clarification of issues.
5. District will provide Netsync access to all work locations, along with safety, access, security, and emergency protocols.
6. District will obtain all necessary work permits.
7. District will provide a work area for Netsync to use, as needed, during on-site activities to include internet and public phone access.
8. District will provide parking passes and adequate parking for the Netsync project team.
9. District will comply with all physical and environmental requirements per vendor specifications.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Management

Netsync approaches all projects using standard Project Management Institute (PMI) methodologies and processes. Once a Project Manager (PM) is assigned, a project kickoff meeting will be held with District, the PM, the Account Manager (AM), and assigned technical resource(s) to ensure each party is in alignment with all aspects of this SOW. The PM will also perform the following project management activities throughout the engagement to ensure District expectations are consistently met and the project is delivered on time and within the established budget:

- Create the Project Plan.
- Ensure that accurate and timely status updates, action items, and scheduled tasks are received by the assigned resource(s) and uploaded as entries to District's applicable project portal. The PM will ensure status information clearly reaches District to also include milestone updates.
- Lead project meetings with District and the Netsync project team.
- Oversee a quality assurance review of documentation-based deliverables before providing to District.

Project Management Office (PMO) Project Lifecycle

* Denotes that the step in the process may or may not be applicable based on SOW.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Updates

- District will receive email alerts indicating an update has been made to the Notes-Status-Issues Log portal web part for the following communication entry types:
  - Meeting Notes.
  - Project Plan.
  - Status Update(s).
  - Issue Tracking.
- If District wishes not to use the Netsync project portal, then District has the option to request direct email correspondence from the Netsync PM for all communication and updates.

Project Scope Change Requests

Netsync is fully committed to completing this project on time and within the established budget. All scope changes and out-of-scope (OOS) requests must be clearly communicated to the AM or PM before those changes or requests are acted on or performed by the assigned resource(s). The following outlines the scope change or OOS request procedure:

1. The PM and District project team will identify required changes.
2. The PM will submit a Project Change Request Form (CR).
3. The PM will submit the CR to District for subsequent approval and sign-off.
4. District will return a signed copy of the CR.

All other terms within the original SOW, in addition to the signed CR, will remain intact.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Documentation

Netsync will provide District the following documentation:

Included (Yes/No)	Document Type	Owner	Description	Frequency
Documentation				
Yes	Statement of Work (SOW)/High-Level Design (HLD)	Solutions Architect and Account Manager	Description of scope based on presales discussions, preliminary walkthroughs, and data gathering sessions. This SOW is the HLD, and presents and illustrates the overall solution.	Once
Yes	Low-Level Design (LLD)	Engineer	The LLD will replace all existing HLDs upon receipt of a purchase order and subsequent full walkthroughs and formal post-sales planning and design sessions. The LLD will be a fully executed document agreed to by both parties before implementation begins.	Once
Yes	Project Plan	PM and Senior Lead Engineer	Task list, schedule, contact list, meeting notes, status, risk, and issue tracking.	Ongoing
No	Method of Procedure (MOP)	PM and Senior Lead Engineer	Detailed implementation plan.	Once
Yes	As-Built	Senior Lead Engineer	Post-implementation technical documentation of new configuration(s) and applicable support information.	Once
Yes	Project Sign-off	PM and District	Deliverables acceptance.	Once

Deliverables Acceptance

District will acknowledge receipt and acceptance, or rejection of all deliverables associated with this SOW within 10 business days of delivery (not including federal holidays). If such acknowledgement is not received within this period, then all deliverables will be deemed acknowledged and accepted.

Project Risks and Assumptions

1. District will participate in all design and planning sessions and be prepared to sign off on all milestones.
2. District will provide Netsync with full access to the relevant functional, technical, and business resources with adequate skills and knowledge to support the performance of services. If District's only method of providing Netsync remote access is through screen share, then additional fees may apply due to project duration extensions.
3. If applicable, Netsync will secure access points (APs) with plastic cable zip ties placed through the mounting bracket, unless District declines this service in writing via email.
4. Unless otherwise noted, all estimates are based on a single implementation trip, per site. District may be charged additional fees for additional onsite meetings.
5. Multiple outages may occur due to the nature of this project; however, they will all occur at scheduled and approved times.
6. District delays to provide Netsync the necessary data to accomplish each task may result in timeline changes.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

7. Netsync is not responsible for project delays caused by other vendors and/or manufacturing issues that may impede progress and/or closure of Netsync SOW deliverables.
8. This SOW assumes that the engagement will be a combination of on-site and remote work to drive efficiency. If District requires a 100% on-site engagement, then District must notify Netsync before agreeing to this SOW.
9. If District requires a copy of Netsync's standard Certificate of Insurance (COI) with District-added endorsements, then it should allow up to 10 business days for delivery.
10. Netsync is not responsible for the functionality of District-provided existing equipment or licenses, and assumes that existing equipment and software is under a valid support contract.
11. Anything not specifically stated in this document is outside the scope of this SOW.

Service Level Agreement

Hours of Operation

Standard hours of operation are **8:00 AM to 5:00 PM local time Monday through Friday**. Netsync understands that due to the nature of the industry and work performed, after-hours and weekend availability are often required. In the event Netsync resources are required to perform work outside of the standard hours of operation, agreed-upon work windows will be discussed and subsequently documented via email.

- District will provide Netsync a minimum of three business days' notification for any non-emergency maintenance windows or periods of time.
- Netsync will provide District the best level of support for emergency maintenance windows based on qualified staff resource availability.
- A District project stakeholder or technical contact must be either on location or on-call during the agreed upon after-hours and/or weekend work window(s).

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Pricing and Fees

Fee Type

Fixed Price: The proposed hours are fixed. Additional hours required for in-scope work will not be invoiced unless OOS work is required.

Invoicing Type

Invoice terms are based on credit approval.

Unless specifically noted in the master services agreement (MSA) between District and Netsync, if applicable, Netsync will use the following invoicing type:

- **Milestone Invoicing**: A portion of the project will be invoiced based on achieving the following milestones in the project plan (see milestone table below); the PM will work with District, the AM, and Accounting for appropriate invoicing.

Netsync will send District invoice(s) on Net 30 terms for all applicable hardware, supplemental material, and licenses immediately after delivery and receipt of signed packing/delivery slips.

Project Milestones

This price is based on work taking place during standard hours of operations, **8:00 AM to 5:00 PM local time Monday through Friday**. Additional charges may be incurred for efforts that must be performed outside of this time frame.

Milestone	Percent Billed (%)*
Discovery and Planning	25%
Low-Level Design (LLD)	25%
Implementation	25%
Project Closure/Final Deliverables	25%
Total	100%

*See Netsync quote for project cost.

Project Summary

Cleburne ISD ("CISD" or "District"), headquartered in Cleburne, TX, requested that Netsync Network Solutions ("Netsync") submit a statement of work (SOW) outlining District's upcoming District Wide Wireless Refresh - 9163 Option project in response to District's Request for Proposal (RFP) Form 470 No. 250008635.

The purpose of this project is to refresh the entire District's current wireless network.

District current Cisco centralized wireless network has reached end of life status. District has submitted an RFP to Netsync requesting new hardware and implementation services.

Netsync will stage, configure and install the equipment in the Appendix at the sites listed in the Appendix. Netsync will migrate the existing Cisco WLC configuration to Meraki.

Any configuration changes required for any other systems will be the responsibility of District including but not limited to authentication, authorization and accounting (AAA) servers, Dynamic Host Configuration Protocol (DHCP) servers, DNS servers and LAN switches.

Exceptions, Clarifications, and Assumptions

The primary focus of this section is to provide any exceptions Netsync took to the original RFP, as well as clarifications around our proposal. This section will also outline any assumptions Netsync made while creating the design.

Netsync has responded to the bid with pricing based on the information provided in the RFP and addendum. Please pay special attention to the exceptions and clarifications outlined below. Also note that the project counts per location are outlined in a table within the Appendix at the end of this SOW.

- If selected, Netsync will require a review of the design and Bill of Materials (BOM) in detail with District to verify that all of the components selected meet the project requirements. This will help ensure the equipment list and quantities support the best possible design.
- Netsync will work with District to make sure all assumptions, exceptions, and clarifications listed below and determined during Discovery are accepted and agreed upon before final pricing.
- Netsync has provided pricing for the specific quantities requested in the RFP. The RFP states that the quantities included are estimates. If additional quantities are needed, then these can be purchased for the unit cost provided within the proposal plus the associated labor to install.
- Multiple outages may occur due to the nature of this project; however, they will all occur at scheduled and approved times.
- Netsync is not responsible for project delays caused by other vendors and/or manufacturing issues that may impede progress of Netsync deliverables.
- Netsync is not responsible for configuration changes on any equipment not specifically stated in the SOW.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Network Implementation

- Configuration of switches and routers are out of scope for this project.
- It is assumed the network is fit for purpose, and configuration changes will be the responsibility of District.

Wireless Implementation

- If there are any locations that will require mounting the access point (AP) higher than 15 feet, then there will be additional charges for a mechanical lift unless District has a lift for use.
- Netsync did not create the wireless placement design; therefore, Netsync is not responsible for any design-related issues and cannot guarantee coverage in all desired areas. For the ideal design and coverage, Netsync recommends performing a wireless site survey before implementation to create the ideal placement design.
- The RFP did not specify the location-specific mounting requirements. An internal antenna AP is typically mounted horizontally on a ceiling grid at approximately 10 feet. For any AP that cannot be mounted in the typical format, there may be a more ideal model of AP, antenna, or additional mounting hardware required.
- If awarded, Netsync would like to review all placement locations with District and provide recommendations to help ensure the models purchased support the best possible design. It is District's responsibility to notify Netsync before ordering if any locations exist where APs cannot be mounted in a typical format.
- After wireless LAN (WLAN) system turn-up, there will be a period of radio frequency (RF) self-tuning. During this time, District should expect inconsistent and sporadic coverage, performance, and client connectivity. The expected duration of this self-tuning period should be three to five business days.

Project Objectives

- Perform a kickoff call with District and appropriate stakeholders to align expectations and outcomes
- Conduct a technical requirements and design meeting with District to gather details
- Stage equipment at Netsync staging facility
- Configure equipment as determined during the design meeting
- Deliver and install equipment at the prescribed campus locations
- Perform testing as determined during the design meeting
- Provide Day 1 support for the network on the go-live date
- Provide a knowledge transfer session to review the implementation
- Provide documentation.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Scope and Phases

Discovery

Kickoff Meeting

1. Netsync will conduct a kickoff meeting:
    a. Identify and introduce key stakeholders, who will participate in developing the definition of requirements for success.
    b. Identify project goals, success criteria, and timeline, including but not limited to:
        i. Review SOW.
        ii. Confirm contacts needed to gain entry and perform work in the buildings.
        iii. Confirm any holidays or “non-working” hours for the installation.
        iv. Confirm any District-required change control processes and any potential impacts that these processes may have on the installation schedule.
        v. Schedule technical discovery meeting(s).
        vi. Review and discuss invoicing preferences and applicable billing milestones.

Planning

Technical Requirements and Design Meeting(s)

1. District will provide Netsync:
    a. Wireless AP placement diagrams notating clearly:
        i. New AP placement locations.
        ii. Location of existing APs to be removed.
    b. Any necessary floor plans to be used for placement maps within Cisco Prime Infrastructure.
    c. Configuration details for existing wireless network.
2. Netsync will perform an objective review of the existing wireless LAN (WLAN) environment in terms of current functionality and implementation.
3. Netsync will work with District to review wireless configuration, as related to industry best practices, and security capabilities of the new equipment, including but not limited to:
    a. Understand and implement District’s current IP addressing scheme.
    b. Review wireless AP naming convention.
    c. AP configuration (service set identifiers [SSIDs], virtual LANs [VLANs], security, radio frequency [RF] settings, etc.).
    d. Type of client devices, 802.11a/b/g/n/ac, voice/data support, capacity requirements, performance requirements, accessibility/reliability requirements, infrastructure management, and client management.
    e. Security design pertaining to applicable wireless protocols and applications.

    Note: Netsync will configure the wireless to match District’s current configuration. A wireless redesign and/or configuration changes are outside the scope of this project.
4. Netsync will work with District to review the desired placement locations of the requested APs.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Note: The desired AP placement has been previously completed by District. Therefore, RF design is not required or included as part of this SOW.

5. Netsync will perform a site walkthrough of each District location at least one week before deployment to:
    c. Review and verify the placement locations for the new APs.
    d. Perform an in-depth survey to locate all existing APs.
6. Netsync will review the Bill of Materials (BOM) provided as part of the proposal with the findings from the site surveys to verify any quantity changes.

    Note: Any additions to the design will be priced using the unit pricing provided.
7. Netsync will determine a test plan with District. District will need to provide Netsync with a list of applications that should be tested before and after cutover.
8. Netsync will document all findings, recommendations, and implementation details, including AP placement maps.
9. Netsync will review the finalized implementation plan with District before beginning implementation.

Equipment Receipt, Staging, and Delivery

Staging and implementation will only begin upon District approval of the Low-Level Design (LLD) document. Staging excludes any uninterruptible power supply (UPS) devices, batteries, and IP-related information. If applicable, Netsync will complete UPS deployment on site at District installation location(s).

1. Netsync will receive equipment in its own facility, unbox equipment, install configurations and test for any anomalies, replace any equipment that does not burn in correctly, notify District of any additional needs that are discovered during the burn-in process, and prepare equipment for delivery to each respective location.
2. Netsync will tag each device with a District asset tag and add to an inventory spreadsheet.
3. Netsync will provide inside-delivery of equipment to each respective location. Netsync may choose to deliver the equipment before installation (no more than three weeks in advance) or bring the equipment at the time of installation. Netsync will not deliver any equipment without prior written approval from District. If District chooses to pre-deliver the equipment, then it will provide a secured location for storage until installation.
4. This location must be accessible to Netsync employees for staging and configuration needs.

Implementation

Implementation will begin only after Discovery and Planning are 100% complete. District representative must be onsite to receive hardware and sign packing slip prior to installation.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Meraki Wireless Dashboard

1. Netsync will configure the Meraki Dashboard to include:
    a. Work with District to either set up an account or login to existing Meraki Dashboard account.
    b. Add all new devices to the Meraki Dashboard.
    c. Set up “Network”(s) for APs.
    d. Create up to four service set identifiers (SSIDs).
    e. Configure security parameters.
    f. Configure Active Directory (AD) authentication.
    g. Configure firewall and traffic-shaping rules per SSID.
    h. Enable Bonjour forwarding for Apple TVs, if required.
2. Netsync will perform testing:
    a. Functionality of management web graphical user interface (GUI).
    b. Connectivity to RADIUS backend.
    c. Validate any other testing steps determined during the planning phase.

Meraki Access Point (AP)

1. Netsync will install and configure the new Cisco Meraki wireless APs to include:
    a. Mount APs per the AP placement maps created during Discovery.
    b. Label each AP based on placement location and include placement details in the Inventory spreadsheet.
    c. Verify APs are registered to the Cisco Meraki Dashboard and functioning correctly.
2. Netsync will place site-specific APs in appropriate locations on outdoor maps.
3. Netsync will perform testing:
    a. District connectivity to District-designated configured SSID determined in technical discovery.
    b. All deployed APs join the Cisco Meraki Dashboard (verify with District).
    c. Radio up/down state of all deployed APs.
    d. Validate any other testing steps determined during Planning.
    e. Collect approved and accurate floor plans for each building.

Testing and Validation

1. Netsync will perform Testing and Validation as agreed on during the Technical Review and Design meeting.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Knowledge Transfer

1. Netsync will provide eight hours of knowledge transfer for up to five District attendees. Before the project start, Netsync will work with District to define the specific location, the schedule, and any additional topics for the knowledge transfer session(s). The following topics will be covered:
    a. Features of products and technologies as deployed in the solution.
    b. Review of the as-built documentation to familiarize District with the overall solution and key configuration details.
    c. Basic administration and common operational tasks.
    d. Reinstallation and/or reconfiguration in case of failure.
    e. Monitoring, testing, and maintaining the products deployed in the solution.
    f. Warranty and support procedures for all products deployed in the solution.
    g. Additional District questions or topic requests.
2. If it is determined that the duration of knowledge transfer requested by District will exceed the hours stated above, then Netsync can provide supplementary session(s) at an additional hourly rate.

Note: Knowledge transfer is intended to provide familiarity and conceptual understanding of the specific technologies deployed within this SOW. It is not intended to be comprehensive technical training. The included session(s) may not provide District all of the necessary knowledge and skills to fully manage, monitor, and maintain the solution. Netsync recommends formal training from the solution vendor(s) to address those needs.

Project Prerequisites

1. District will fulfill cabling requirements, if applicable.
2. District will provide Netsync all necessary hardware and information on current environment.
3. District will provide Netsync local and remote administrative credentials (root access) to all equipment to be accessed during the process of this SOW.
4. District will make available authorized personnel during the project with a working knowledge of existing network infrastructure for facility access, questions, and clarification of issues.
5. District will provide Netsync access to all work locations, along with safety, access, security, and emergency protocols.
6. District will obtain all necessary work permits.
7. District will provide a work area for Netsync to use, as needed, during on-site activities to include internet and public phone access.
8. District will provide parking passes and adequate parking for the Netsync project team.
9. District will comply with all physical and environmental requirements per vendor specifications.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Management

Netsync approaches all projects using standard Project Management Institute (PMI) methodologies and processes. Once a Project Manager (PM) is assigned, a project kickoff meeting will be held with District, the PM, the Account Manager (AM), and assigned technical resource(s) to ensure each party is in alignment with all aspects of this SOW. The PM will also perform the following project management activities throughout the engagement to ensure District expectations are consistently met, and the project is delivered on time and within the established budget:

- Create the Project Plan.
- Ensure that accurate and timely status updates, action items, and scheduled tasks are received by the assigned resource(s) and uploaded as entries to District's applicable project portal. The PM will ensure status information clearly reaches District to also include milestone updates.
- Lead project meetings with District and the Netsync project team.
- Oversee a quality assurance review of documentation-based deliverables before providing to District.

Project Management Office (PMO) Project Lifecycle

* Denotes that the step in the process may or may not be applicable based on SOW.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Updates

- District will receive email alerts indicating an update has been made to the Notes-Status-Issues Log portal web part for the following communication entry types:
  - Meeting Notes.
  - Project Plan.
  - Status Update(s).
  - Issue Tracking.
- If District wishes not to use the Netsync project portal, then District has the option to request direct email correspondence from the Netsync PM for all communication and updates.

Project Scope Change Requests

Netsync is fully committed to completing this project on time and within the established budget. All scope changes and out-of-scope (OOS) requests must be clearly communicated to the AM or PM before those changes or requests are acted on or performed by the assigned resource(s). The following outlines the scope change or OOS request procedure:

1. The PM and District project team will identify required changes.
2. The PM will submit a Project Change Request Form (CR).
3. The PM will submit the CR to District for subsequent approval and sign-off.
4. District will return a signed copy of the CR.

All other terms within the original SOW, in addition to the signed CR, will remain intact.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Documentation

Netsync will provide District the following documentation:

Included (Yes/No)	Document Type	Owner	Description	Frequency
Documentation				
Yes	Statement of Work (SOW)/High-Level Design (HLD)	Solutions Architect and Account Manager	Description of scope based on presales discussions, preliminary walkthroughs, and data gathering sessions. This SOW is the HLD, and presents and illustrates the overall solution.	Once
Yes	Low-Level Design (LLD)	Engineer	The LLD will replace all existing HLDs upon receipt of a purchase order and subsequent full walkthroughs and formal post-sales planning and design sessions. The LLD will be a fully executed document agreed to by both parties before implementation begins.	Once
Yes	Project Plan	PM and Senior Lead Engineer	Task list, schedule, contact list, meeting notes, status, risk, and issue tracking.	Ongoing
No	Method of Procedure (MOP)	PM and Senior Lead Engineer	Detailed implementation plan.	Once
Yes	As-Built	Senior Lead Engineer	Post-implementation technical documentation of new configuration(s) and applicable support information.	Once
Yes	Project Sign-off	PM and District	Deliverables acceptance.	Once

Deliverables Acceptance

District will acknowledge receipt and acceptance, or rejection of all deliverables associated with this SOW within 10 business days of delivery (not including federal holidays). If such acknowledgement is not received within this period, then all deliverables will be deemed acknowledged and accepted.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Risks and Assumptions

1. District will participate in all design and planning sessions and be prepared to sign off on all milestones.
2. District will provide Netsync with full access to the relevant functional, technical, and business resources with adequate skills and knowledge to support the performance of services. If District's only method of providing Netsync remote access is through screen share, then additional fees may apply due to project duration extensions.
3. If applicable, Netsync will secure access points (APs) with plastic cable zip ties placed through the mounting bracket, unless District declines this service in writing via email.
4. Unless otherwise noted, all estimates are based on a single implementation trip, per site. District may be charged additional fees for additional onsite meetings.
5. Multiple outages may occur due to the nature of this project; however, they will all occur at scheduled and approved times.
6. District delays to provide Netsync the necessary data to accomplish each task may result in timeline changes.
7. Netsync is not responsible for project delays caused by other vendors and/or manufacturing issues that may impede progress and/or closure of Netsync SOW deliverables.
8. This SOW assumes that the engagement will be a combination of on-site and remote work to drive efficiency. If District requires a 100% on-site engagement, then District must notify Netsync before agreeing to this SOW.
9. If District requires a copy of Netsync's standard Certificate of Insurance (COI) with District-added endorsements, then it should allow up to 10 business days for delivery.
10. Netsync is not responsible for the functionality of District-provided existing equipment or licenses, and assumes that existing equipment and software is under a valid support contract.
11. Anything not specifically stated in this document is outside the scope of this SOW.

Service Level Agreement

Hours of Operation

Standard hours of operation are **8:00 AM to 5:00 PM local time Monday through Friday**. Netsync understands that due to the nature of the industry and work performed, after-hours and weekend availability are often required. In the event Netsync resources are required to perform work outside of the standard hours of operation, agreed-upon work windows will be discussed and subsequently documented via email.

- District will provide Netsync a minimum of three business days' notification for any non-emergency maintenance windows or periods of time.
- Netsync will provide District the best level of support for emergency maintenance windows based on qualified staff resource availability.
- A District project stakeholder or technical contact must be either on location or on-call during the agreed upon after-hours and/or weekend work window(s).

Project Summary

Cleburne ISD ("CISD" or "District"), headquartered in Cleburne, TX, requested that Netsync Network Solutions ("Netsync") submit a statement of work (SOW) outlining District's upcoming Campus Switching Refresh project in response to District's Request for Proposal (RFP) Form 470 No. 250008635.

The purpose of this project is to stage, configure and install new switches to replace existing Cisco 2960 switches which have reached end of life.

Exceptions, Clarifications, and Assumptions

The primary focus of this section is to provide any exceptions Netsync took to the original RFP, as well as clarifications around our proposal. This section will also outline any assumptions Netsync made while creating the design.

Netsync has responded to the bid with pricing based on the information provided in the RFP and addendum. Please pay special attention to the exceptions and clarifications outlined below. Also note that the project counts per location are outlined in a table within the Appendix at the end of this SOW.

- If selected, Netsync will require a review of the design and Bill of Materials (BOM) in detail with District to verify that all the components selected meet the project requirements. This will help ensure the equipment list and quantities support the best possible design.
- Netsync will work with District to make sure all assumptions, exceptions, and clarifications listed below and determined during Discovery are accepted and agreed upon before final pricing.
- Multiple outages may occur due to the nature of this project; however, they will all occur at scheduled and approved times.
- Netsync is not responsible for project delays caused by other vendors and/or manufacturing issues that may impede progress of Netsync deliverables.
- Netsync is not responsible for configuration changes on any equipment not specifically stated in the SOW.

Network Implementation

- Netsync assumes District will be responsible for all patch and structured cabling not specifically listed in the Appendix.
- Netsync assumes District will be responsible for all racks and environmental controls in wiring closets.
- Netsync assumes that all racks in each wiring closet are 19-inch, 2-post racks. If racks are 4-post racks, District will be responsible for 4-post rack mount kits.
- Netsync assumes either existing Small Form Factor Pluggable (SFPs) will be used or District will provide new SFPs.
- Netsync assumes there will be no re-architecture of the environment, and the existing configurations will be used to deploy the new switches.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Wireless Implementation

- Wireless is out of scope for purposes of this project.

Project Objectives

- Perform a kickoff call with District and appropriate stakeholders to align expectations and outcomes
- Conduct a technical requirements and design meeting with District to gather details
- Stage equipment at Netsync staging facility
- Configure equipment as determined during the design meeting
- Deliver and install equipment at the prescribed campus locations
- Perform testing as determined during the design meeting
- Provide Day 1 support for the network on the go-live date
- Provide a knowledge transfer session to review the implementation
- Provide documentation

Project Scope and Phases

Discovery

Kickoff Meeting

1. Netsync will conduct a kickoff meeting:
    a. Identify and introduce key stakeholders, who will participate in developing the definition of requirements for success.
    b. Identify project goals, success criteria, and timeline, including but not limited to:
        i. Review SOW.
        ii. Confirm contacts needed to gain entry and perform work in the buildings.
        iii. Confirm any holidays or “non-working” hours for the installation.
        iv. Confirm any District-required change control processes and any potential impacts that these processes may have on the installation schedule.
        v. Schedule technical discovery meeting(s).
        vi. Review and discuss invoicing preferences and applicable billing milestones.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Planning

Technical Requirements and Design Meeting(s)

1. District will provide Netsync:
    a. Current IP addressing schemes, network diagrams, and configurations relevant to the project details.
2. Netsync will review existing District-provided IP addressing, network diagrams, and configurations looking for opportunities to increase functionality, security, and manageability.
3. Netsync will work with District to review the core and LAN configuration, including but not limited to:
    a. Understand and implement District's current IP addressing scheme.
    b. Review switch naming convention.
    c. Create a virtual LAN (VLAN) plan with a minimum of 10 VLANs and up to a maximum of 15 VLANs.
    d. Determine Quality and Class of Service (QoS/CoS) configurations necessary to support multiple classes of traffic and queue prioritization based on documented best practices.
    e. Discuss configuration options for both Layer 2 and Layer 3 to increase network reliability and performance.
    f. System management:
        i. Integrate with existing authentication, authorization, and accounting (AAA) systems, if available (RADIUS, TACACS, etc.).
        ii. Remote management options (Secure Shell [SSH], Telnet, etc.).
    g. System monitoring:
        i. Simple Network Management Protocol (SNMP) configurations, community strings, and passwords for all devices.
        ii. Syslog server settings.

    Note: Netsync will configure the switches to match District's current configuration. A network redesign and/or configuration changes are outside the scope of this project.
4. Netsync will perform a site walkthrough of each District location at least one week before deployment to:
    e. Evaluate rack space, switch connectivity, and power availability.
    f. Verify final plan for migration and port counts on all devices to be connected.
5. Netsync will review the Bill of Materials (BOM) provided as part of the proposal with the findings from the site surveys to verify any quantity changes.

    Note: Any additions to the design will be priced using the unit pricing provided.
6. Netsync will determine a test plan with District. District will need to provide Netsync with a list of applications that should be tested before and after cutover.
7. Netsync will document all findings, recommendations, and implementation details, including network diagrams.
8. Netsync will review the finalized implementation plan with District before beginning implementation.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Equipment Receipt, Staging, and Delivery

Staging and implementation will only begin upon District approval of the Low-Level Design (LLD) document. Staging excludes any uninterruptible power supply (UPS) devices, batteries, and IP-related information. If applicable, Netsync will complete UPS deployment on site at District installation location(s).

1. Netsync will receive equipment in its own facility, unbox equipment, install configurations and test for any anomalies, replace any equipment that does not burn in correctly, notify District of any additional needs that are discovered during the burn-in process, and prepare equipment for delivery to each respective location.
2. Netsync will tag each device with a District asset tag and add to an inventory spreadsheet.
3. Netsync will provide inside-delivery of equipment to each respective location. Netsync may choose to deliver the equipment before installation (no more than three weeks in advance) or bring the equipment at the time of installation. Netsync will not deliver any equipment without prior written approval from District. If District chooses to pre-deliver the equipment, then it will provide a secured location for storage until installation.
4. This location must be accessible to Netsync employees for staging and configuration needs.

Implementation

Implementation will begin only after Discovery and Planning are 100% complete. District representative must be onsite to receive hardware and sign packing slip prior to installation.

Access Switch

1. Netsync will install the distribution and access switches listed in the Appendix into existing equipment rack location or area designated by District.
2. Netsync will configure the Cisco switches to include:
    a. Patch-in drops and fiber.
    b. Properly dress cables with Velcro.
    c. Configure switches based on configuration standards reviewed during technical Discovery.
    d. Perform testing:
        i. Test and validate each switch for proper functionality.
        ii. Validate ports that are associated with devices that are on specific VLANs are properly configured (e.g., cameras, APs, etc.).
3. Netsync will decommission existing switches:
    a. Uninstall existing switches determined during Planning.
    b. Provide an inventory of equipment removed in a data file.
    c. Box the older equipment and label boxes clearly to note included contents.
    d. Deliver boxes to a centralized District location.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Testing and Validation

1. Netsync will perform Testing and Validation as agreed on during the Technical Review and Design meeting.

Knowledge Transfer

1. Netsync will provide two hours of knowledge transfer for up to five District attendees. Before the project start, Netsync will work with District to define the specific location, the schedule, and any additional topics for the knowledge transfer session(s). The following topics will be covered:
    a. Features of products and technologies as deployed in the solution.
    b. Review of the as-built documentation to familiarize District with the overall solution and key configuration details.
    c. Basic administration and common operational tasks.
    d. Reinstallation and/or reconfiguration in case of failure.
    e. Monitoring, testing, and maintaining the products deployed in the solution.
    f. Warranty and support procedures for all products deployed in the solution.
    g. Additional District questions or topic requests.
2. If it is determined that the duration of knowledge transfer requested by District will exceed the hours stated above, then Netsync can provide supplementary session(s) at an additional hourly rate.

Note: Knowledge transfer is intended to provide familiarity and conceptual understanding of the specific technologies deployed within this SOW. It is not intended to be comprehensive technical training. The included session(s) may not provide District all the necessary knowledge and skills to fully manage, monitor, and maintain the solution. Netsync recommends formal training from the solution vendor(s) to address those needs.

Project Prerequisites

1. District will fulfill cabling requirements, if applicable.
2. District will provide Netsync all necessary hardware and information on current environment.
3. District will provide Netsync local and remote administrative credentials (root access) to all equipment to be accessed during the process of this SOW.
4. District will make available authorized personnel during the project with a working knowledge of existing network infrastructure for facility access, questions, and clarification of issues.
5. District will provide Netsync access to all work locations, along with safety, access, security, and emergency protocols.
6. District will obtain all necessary work permits.
7. District will provide a work area for Netsync to use, as needed, during on-site activities to include internet and public phone access.
8. District will provide parking passes and adequate parking for the Netsync project team.
9. District will comply with all physical and environmental requirements per vendor specifications.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Management

Netsync approaches all projects using standard Project Management Institute (PMI) methodologies and processes. Once a Project Manager (PM) is assigned, a project kickoff meeting will be held with District, the PM, the Account Manager (AM), and assigned technical resource(s) to ensure each party is in alignment with all aspects of this SOW. The PM will also perform the following project management activities throughout the engagement to ensure District expectations are consistently met, and the project is delivered on time and within the established budget:

- Create the Project Plan.
- Ensure that accurate and timely status updates, action items, and scheduled tasks are received by the assigned resource(s) and uploaded as entries to District's applicable project portal. The PM will ensure status information clearly reaches District to also include milestone updates.
- Lead project meetings with District and the Netsync project team.
- Oversee a quality assurance review of documentation-based deliverables before providing to District.

Project Management Office (PMO) Project Lifecycle

* Denotes that the step in the process may or may not be applicable based on SOW.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Updates

- District will receive email alerts indicating an update has been made to the Notes-Status-Issues Log portal web part for the following communication entry types:
    - Meeting Notes.
    - Project Plan.
    - Status Update(s).
    - Issue Tracking.
- If District wishes not to use the Netsync project portal, then District has the option to request direct email correspondence from the Netsync PM for all communication and updates.

Project Scope Change Requests

Netsync is fully committed to completing this project on time and within the established budget. All scope changes and out-of-scope (OOS) requests must be clearly communicated to the AM or PM before those changes or requests are acted on or performed by the assigned resource(s). The following outlines the scope change or OOS request procedure:

5. The PM and District project team will identify required changes.
6. The PM will submit a Project Change Request Form (CR).
7. The PM will submit the CR to District for subsequent approval and sign-off.
8. District will return a signed copy of the CR.

All other terms within the original SOW, in addition to the signed CR, will remain intact.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Documentation

Netsync will provide District the following documentation:

Included (Yes/No)	Document Type	Owner	Description	Frequency
Documentation				
Yes	Statement of Work (SOW)/High-Level Design (HLD)	Solutions Architect and Account Manager	Description of scope based on presales discussions, preliminary walkthroughs, and data gathering sessions. This SOW is the HLD, and presents and illustrates the overall solution.	Once
Yes	Low-Level Design (LLD)	Engineer	The LLD will replace all existing HLDs upon receipt of a purchase order and subsequent full walkthroughs and formal post-sales planning and design sessions. The LLD will be a fully executed document agreed to by both parties before implementation begins.	Once
Yes	Project Plan	PM and Senior Lead Engineer	Task list, schedule, contact list, meeting notes, status, risk, and issue tracking.	Ongoing
No	Method of Procedure (MOP)	PM and Senior Lead Engineer	Detailed implementation plan.	Once
Yes	As-Built	Senior Lead Engineer	Post-implementation technical documentation of new configuration(s) and applicable support information.	Once
Yes	Project Sign-off	PM and District	Deliverables acceptance.	Once

Deliverables Acceptance

District will acknowledge receipt and acceptance, or rejection of all deliverables associated with this SOW within 10 business days of delivery (not including federal holidays). If such acknowledgement is not received within this period, then all deliverables will be deemed acknowledged and accepted.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Risks and Assumptions

1. District will participate in all design and planning sessions and be prepared to sign off on all milestones.
2. District will provide Netsync with full access to the relevant functional, technical, and business resources with adequate skills and knowledge to support the performance of services. If District's only method of providing Netsync remote access is through screen share, then additional fees may apply due to project duration extensions.
3. If applicable, Netsync will secure access points (APs) with plastic cable zip ties placed through the mounting bracket, unless District declines this service in writing via email.
4. Unless otherwise noted, all estimates are based on a single implementation trip, per site. District may be charged additional fees for additional onsite meetings.
5. Multiple outages may occur due to the nature of this project; however, they will all occur at scheduled and approved times.
6. District delays to provide Netsync the necessary data to accomplish each task may result in timeline changes.
7. Netsync is not responsible for project delays caused by other vendors and/or manufacturing issues that may impede progress and/or closure of Netsync SOW deliverables.
8. This SOW assumes that the engagement will be a combination of on-site and remote work to drive efficiency. If District requires a 100% on-site engagement, then District must notify Netsync before agreeing to this SOW.
9. If District requires a copy of Netsync's standard Certificate of Insurance (COI) with District-added endorsements, then it should allow up to 10 business days for delivery.
10. Netsync is not responsible for the functionality of District-provided existing equipment or licenses, and assumes that existing equipment and software is under a valid support contract.
11. Anything not specifically stated in this document is outside the scope of this SOW.

Service Level Agreement

Hours of Operation

Standard hours of operation are **8:00 AM to 5:00 PM local time Monday through Friday**. Netsync understands that due to the nature of the industry and work performed, after-hours and weekend availability are often required. In the event Netsync resources are required to perform work outside of the standard hours of operation, agreed-upon work windows will be discussed and subsequently documented via email.

- District will provide Netsync a minimum of three business days' notification for any non-emergency maintenance windows or periods of time.
- Netsync will provide District the best level of support for emergency maintenance windows based on qualified staff resource availability.
- A District project stakeholder or technical contact must be either on location or on-call during the agreed upon after-hours and/or weekend work window(s).

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Pricing and Fees

Fee Type

Fixed Price: The proposed hours are fixed. Additional hours required for in-scope work will not be invoiced unless OOS work is required.

Invoicing Type

Invoice terms are based on credit approval.

Unless specifically noted in the master services agreement (MSA) between District and Netsync, if applicable, Netsync will use the following invoicing type:

- **Milestone Invoicing**: A portion of the project will be invoiced based on achieving the following milestones in the project plan (see milestone table below); the PM will work with District, the AM, and Accounting for appropriate invoicing.

Netsync will send District invoice(s) on Net 30 terms for all applicable hardware, supplemental material, and licenses immediately after delivery and receipt of signed packing/delivery slips.

Project Milestones

This price is based on work taking place during standard hours of operations, **8:00 AM to 5:00 PM local time Monday through Friday**. Additional charges may be incurred for efforts that must be performed outside of this time frame.

Project Summary

Cleburne ISD ("CISD" or "District"), headquartered in Cleburne, TX, requested that Netsync Network Solutions ("Netsync") submit a statement of work (SOW) outlining District's upcoming District Wide Wireless Refresh project - MR78 Option in response to District's Request for Proposal (RFP) Form 470 No. 250008635.

The purpose of this project is to refresh the entire districts current wireless network.

District's current Cisco Centralized Wireless Network has reached end of life status. District has submitted an RFP to Netsync requesting new hardware and implementation services.

Netsync will stage, configure and install the equipment in the Appendix at the sites listed in the Appendix. Netsync will migrate the existing Cisco WLC configuration to Meraki.

Any configuration changes required for any other systems will be the responsibility of District including but not limited to authentication, authorization and accounting (AAA) servers, Dynamic Host Configuration Protocol (DHCP) servers, DNS servers and LAN switches.

Exceptions, Clarifications, and Assumptions

The primary focus of this section is to provide any exceptions Netsync took to the original RFP, as well as clarifications around our proposal. This section will also outline any assumptions Netsync made while creating the design.

Netsync has responded to the bid with pricing based on the information provided in the RFP and addendum. Please pay special attention to the exceptions and clarifications outlined below. Also note that the project counts per location are outlined in a table within the Appendix at the end of this SOW.

- If selected, Netsync will require a review of the design and Bill of Materials (BOM) in detail with District to verify that all of the components selected meet the project requirements. This will help ensure the equipment list and quantities support the best possible design.
- Netsync will work with District to make sure all assumptions, exceptions, and clarifications listed below and determined during Discovery are accepted and agreed upon before final pricing.
- Netsync has provided pricing for the specific quantities requested in the RFP. The RFP states that the quantities included are estimates. If additional quantities are needed, then these can be purchased for the unit cost provided within the proposal plus the associated labor to install.
- Multiple outages may occur due to the nature of this project; however, they will all occur at scheduled and approved times.
- Netsync is not responsible for project delays caused by other vendors and/or manufacturing issues that may impede progress of Netsync deliverables.
- Netsync is not responsible for configuration changes on any equipment not specifically stated in the SOW.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Network Implementation

- Configuration of switches and routers are out of scope for this project.
- It is assumed the network is fit for purpose, and configuration changes will be the responsibility of District.

Wireless Implementation

- If there are any locations that will require mounting the access point (AP) higher than 15 feet, then there will be additional charges for a mechanical lift unless District has a lift for use.
- Netsync did not create the wireless placement design; therefore, Netsync is not responsible for any design-related issues and cannot guarantee coverage in all desired areas. For the ideal design and coverage, Netsync recommends performing a wireless site survey before implementation to create the ideal placement design.
- The RFP did not specify the location-specific mounting requirements. An internal antenna AP is typically mounted horizontally on a ceiling grid at approximately 10 feet. For any AP that cannot be mounted in the typical format, there may be a more ideal model of AP, antenna, or additional mounting hardware required.
- If awarded, Netsync would like to review all placement locations with District and provide recommendations to help ensure the models purchased support the best possible design. It is District's responsibility to notify Netsync before ordering if any locations exist where APs cannot be mounted in a typical format.
- After wireless LAN (WLAN) system turn-up, there will be a period of radio frequency (RF) self-tuning. During this time, District should expect inconsistent and sporadic coverage, performance, and client connectivity. The expected duration of this self-tuning period should be three to five business days.

Project Objectives

- Perform a kickoff call with District and appropriate stakeholders to align expectations and outcomes.
- Conduct a technical requirements and design meeting with District to gather details.
- Stage equipment at Netsync staging facility.
- Configure equipment as determined during the design meeting.
- Deliver and install equipment at the prescribed campus locations.
- Perform testing as determined during the design meeting.
- Provide Day 1 support for the network on the go-live date.
- Provide a knowledge transfer session to review the implementation.
- Provide documentation.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Scope and Phases

Discovery

Kickoff Meeting

1. Netsync will conduct a kickoff meeting:
    a. Identify and introduce key stakeholders, who will participate in developing the definition of requirements for success.
    b. Identify project goals, success criteria, and timeline, including but not limited to:
        i. Review SOW.
        ii. Confirm contacts needed to gain entry and perform work in the buildings.
        iii. Confirm any holidays or “non-working” hours for the installation.
        iv. Confirm any District-required change control processes and any potential impacts that these processes may have on the installation schedule.
        v. Schedule technical discovery meeting(s).
        vi. Review and discuss invoicing preferences and applicable billing milestones.

Planning

Technical Requirements and Design Meeting(s)

1. District will provide Netsync:
    a. Wireless AP placement diagrams notating clearly:
        i. New AP placement locations.
        ii. Location of existing APs to be removed.
    b. Any necessary floor plans to be used for placement maps within Cisco Prime Infrastructure.
    c. Configuration details for existing wireless network.
2. Netsync will perform an objective review of the existing wireless LAN (WLAN) environment in terms of current functionality and implementation.
3. Netsync will work with District to review wireless configuration, as related to industry best practices, and security capabilities of the new equipment, including but not limited to:
    f. Understand and implement District’s current IP addressing scheme.
    g. Review wireless AP naming convention.
    h. AP configuration (service set identifiers [SSIDs], virtual LANs [VLANs], security, radio frequency [RF] settings, etc.).
    i. Type of client devices, 802.11a/b/g/n/ac, voice/data support, capacity requirements, performance requirements, accessibility/reliability requirements, infrastructure management, and client management.
    j. Security design pertaining to applicable wireless protocols and applications.

    Note: Netsync will configure the wireless to match District’s current configuration. A wireless redesign and/or configuration changes are outside the scope of this project.
4. Netsync will work with District to review the desired placement locations of the requested APs.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Note: The desired AP placement has been previously completed by District. Therefore, RF design is not required or included as part of this SOW.

5. Netsync will perform a site walkthrough of each District location at least one week before deployment to:
    g. Review and verify the placement locations for the new APs.
    h. Perform an in-depth survey to locate all existing APs.
6. Netsync will review the Bill of Materials (BOM) provided as part of the proposal with the findings from the site surveys to verify any quantity changes.

    Note: Any additions to the design will be priced using the unit pricing provided.
7. Netsync will determine a test plan with District. District will need to provide Netsync with a list of applications that should be tested before and after cutover.
8. Netsync will document all findings, recommendations, and implementation details, including AP placement maps.
9. Netsync will review the finalized implementation plan with District before beginning implementation.

Equipment Receipt, Staging, and Delivery

Staging and implementation will only begin upon District approval of the Low-Level Design (LLD) document. Staging excludes any uninterruptible power supply (UPS) devices, batteries, and IP-related information. If applicable, Netsync will complete UPS deployment on site at District installation location(s):

1. Netsync will receive equipment in its own facility, unbox equipment, install configurations and test for any anomalies, replace any equipment that does not burn in correctly, notify District of any additional needs that are discovered during the burn-in process, and prepare equipment for delivery to each respective location.
2. Netsync will tag each device with a District asset tag and add to an inventory spreadsheet.
3. Netsync will provide inside-delivery of equipment to each respective location. Netsync may choose to deliver the equipment before installation (no more than three weeks in advance) or bring the equipment at the time of installation. Netsync will not deliver any equipment without prior written approval from District. If District chooses to pre-deliver the equipment, then it will provide a secured location for storage until installation.
4. This location must be accessible to Netsync employees for staging and configuration needs.

Implementation

Implementation will begin only after Discovery and Planning are 100% complete. District representative must be onsite to receive hardware and sign packing slip prior to installation.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Meraki Wireless Dashboard

1. Netsync will configure the Meraki Dashboard to include:
    a. Work with District to either set up an account or login to existing Meraki Dashboard account.
    b. Add all new devices to the Meraki Dashboard.
    c. Set up “Network”(s) for APs.
    d. Create up to four service set identifiers (SSIDs).
    e. Configure security parameters.
    f. Configure Active Directory (AD) authentication.
    g. Configure firewall and traffic-shaping rules per SSID.
    h. Enable Bonjour forwarding for Apple TVs, if required.
2. Netsync will perform testing:
    a. Functionality of management web graphical user interface (GUI).
    b. Connectivity to RADIUS backend.
    c. Validate any other testing steps determined during the planning phase.

Meraki Access Point (AP)

1. Netsync will install and configure the new Cisco Meraki wireless APs to include:
    a. Mount APs per the AP placement maps created during Discovery.
    b. Label each AP based on placement location and include placement details in the Inventory spreadsheet.
    c. Verify APs are registered to the Cisco Meraki Dashboard and functioning correctly.
2. Netsync will place site-specific APs in appropriate locations on outdoor maps.
3. Netsync will perform testing:
    a. District connectivity to District-designated configured SSID determined in technical discovery.
    b. All deployed APs join the Cisco Meraki Dashboard (verify with District).
    c. Radio up/down state of all deployed APs.
    d. Validate any other testing steps determined during Planning.
    f. Collect approved and accurate floor plans for each building.

Testing and Validation

1. Netsync will perform Testing and Validation as agreed on during the Technical Review and Design meeting.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Knowledge Transfer

1. Netsync will provide eight hours of knowledge transfer for up to five District attendees. Before the project start, Netsync will work with District to define the specific location, the schedule, and any additional topics for the knowledge transfer session(s). The following topics will be covered:
    a. Features of products and technologies as deployed in the solution.
    b. Review of the as-built documentation to familiarize District with the overall solution and key configuration details.
    c. Basic administration and common operational tasks.
    d. Reinstallation and/or reconfiguration in case of failure.
    e. Monitoring, testing, and maintaining the products deployed in the solution.
    f. Warranty and support procedures for all products deployed in the solution.
    g. Additional District questions or topic requests.
2. If it is determined that the duration of knowledge transfer requested by District will exceed the hours stated above, then Netsync can provide supplementary session(s) at an additional hourly rate.

Note: Knowledge transfer is intended to provide familiarity and conceptual understanding of the specific technologies deployed within this SOW. It is not intended to be comprehensive technical training. The included session(s) may not provide District all of the necessary knowledge and skills to fully manage, monitor, and maintain the solution. Netsync recommends formal training from the solution vendor(s) to address those needs.

Project Prerequisites

1. District will fulfill cabling requirements, if applicable.
2. District will provide Netsync all necessary hardware and information on current environment.
3. District will provide Netsync local and remote administrative credentials (root access) to all equipment to be accessed during the process of this SOW.
4. District will make available authorized personnel during the project with a working knowledge of existing network infrastructure for facility access, questions, and clarification of issues.
5. District will provide Netsync access to all work locations, along with safety, access, security, and emergency protocols.
6. District will obtain all necessary work permits.
7. District will provide a work area for Netsync to use, as needed, during on-site activities to include internet and public phone access.
8. District will provide parking passes and adequate parking for the Netsync project team.
9. District will comply with all physical and environmental requirements per vendor specifications.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Management

Netsync approaches all projects using standard Project Management Institute (PMI) methodologies and processes. Once a Project Manager (PM) is assigned, a project kickoff meeting will be held with District, the PM, the Account Manager (AM), and assigned technical resource(s) to ensure each party is in alignment with all aspects of this SOW. The PM will also perform the following project management activities throughout the engagement to ensure District expectations are consistently met and the project is delivered on time and within the established budget:

- Create the Project Plan.
- Ensure that accurate and timely status updates, action items, and scheduled tasks are received by the assigned resource(s) and uploaded as entries to District's applicable project portal. The PM will ensure status information clearly reaches District to also include milestone updates.
- Lead project meetings with District and the Netsync project team.
- Oversee a quality assurance review of documentation-based deliverables before providing to District.

Project Management Office (PMO) Project Lifecycle

* Denotes that the step in the process may or may not be applicable based on SOW.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Updates

- District will receive email alerts indicating an update has been made to the Notes-Status-Issues Log portal web part for the following communication entry types:
  - Meeting Notes.
  - Project Plan.
  - Status Update(s).
  - Issue Tracking.
- If District wishes not to use the Netsync project portal, then District has the option to request direct email correspondence from the Netsync PM for all communication and updates.

Project Scope Change Requests

Netsync is fully committed to completing this project on time and within the established budget. All scope changes and out-of-scope (OOS) requests must be clearly communicated to the AM or PM before those changes or requests are acted on or performed by the assigned resource(s). The following outlines the scope change or OOS request procedure:

1. The PM and District project team will identify required changes.
2. The PM will submit a Project Change Request Form (CR).
3. The PM will submit the CR to District for subsequent approval and sign-off.
4. District will return a signed copy of the CR.

All other terms within the original SOW, in addition to the signed CR, will remain intact.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Documentation

Netsync will provide District the following documentation:

Included (Yes/No)	Document Type	Owner	Description	Frequency
Documentation				
Yes	Statement of Work (SOW)/High-Level Design (HLD)	Solutions Architect and Account Manager	Description of scope based on presales discussions, preliminary walkthroughs, and data gathering sessions. This SOW is the HLD, and presents and illustrates the overall solution.	Once
Yes	Low-Level Design (LLD)	Engineer	The LLD will replace all existing HLDs upon receipt of a purchase order and subsequent full walkthroughs and formal post-sales planning and design sessions. The LLD will be a fully executed document agreed to by both parties before implementation begins.	Once
Yes	Project Plan	PM and Senior Lead Engineer	Task list, schedule, contact list, meeting notes, status, risk, and issue tracking.	Ongoing
No	Method of Procedure (MOP)	PM and Senior Lead Engineer	Detailed implementation plan.	Once
Yes	As-Built	Senior Lead Engineer	Post-implementation technical documentation of new configuration(s) and applicable support information.	Once
Yes	Project Sign-off	PM and District	Deliverables acceptance.	Once

Deliverables Acceptance

District will acknowledge receipt and acceptance, or rejection of all deliverables associated with this SOW within 10 business days of delivery (not including federal holidays). If such acknowledgement is not received within this period, then all deliverables will be deemed acknowledged and accepted.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Risks and Assumptions

1. District will participate in all design and planning sessions and be prepared to sign off on all milestones.
2. District will provide Netsync with full access to the relevant functional, technical, and business resources with adequate skills and knowledge to support the performance of services. If District's only method of providing Netsync remote access is through screen share, then additional fees may apply due to project duration extensions.
3. If applicable, Netsync will secure access points (APs) with plastic cable zip ties placed through the mounting bracket, unless District declines this service in writing via email.
4. Unless otherwise noted, all estimates are based on a single implementation trip, per site. District may be charged additional fees for additional onsite meetings.
5. Multiple outages may occur due to the nature of this project; however, they will all occur at scheduled and approved times.
6. District delays to provide Netsync the necessary data to accomplish each task may result in timeline changes.
7. Netsync is not responsible for project delays caused by other vendors and/or manufacturing issues that may impede progress and/or closure of Netsync SOW deliverables.
8. This SOW assumes that the engagement will be a combination of on-site and remote work to drive efficiency. If District requires a 100% on-site engagement, then District must notify Netsync before agreeing to this SOW.
9. If District requires a copy of Netsync's standard Certificate of Insurance (COI) with District-added endorsements, then it should allow up to 10 business days for delivery.
10. Netsync is not responsible for the functionality of District-provided existing equipment or licenses, and assumes that existing equipment and software is under a valid support contract.
11. Anything not specifically stated in this document is outside the scope of this SOW.

Service Level Agreement

Hours of Operation

Standard hours of operation are **8:00 AM to 5:00 PM local time Monday through Friday**. Netsync understands that due to the nature of the industry and work performed, after-hours and weekend availability are often required. In the event Netsync resources are required to perform work outside of the standard hours of operation, agreed-upon work windows will be discussed and subsequently documented via email.

- District will provide Netsync a minimum of three business days' notification for any non-emergency maintenance windows or periods of time.
- Netsync will provide District the best level of support for emergency maintenance windows based on qualified staff resource availability.
- A District project stakeholder or technical contact must be either on location or on-call during the agreed upon after-hours and/or weekend work window(s).

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Pricing and Fees

Fee Type

Fixed Price: The proposed hours are fixed. Additional hours required for in-scope work will not be invoiced unless OOS work is required.

Invoicing Type

Invoice terms are based on credit approval.

Unless specifically noted in the master services agreement (MSA) between District and Netsync, if applicable, Netsync will use the following invoicing type:

- **Milestone Invoicing**: A portion of the project will be invoiced based on achieving the following milestones in the project plan (see milestone table below); the PM will work with District, the AM, and Accounting for appropriate invoicing.

Netsync will send District invoice(s) on Net 30 terms for all applicable hardware, supplemental material, and licenses immediately after delivery and receipt of signed packing/delivery slips.

Project Milestones

This price is based on work taking place during standard hours of operations, **8:00 AM to 5:00 PM local time Monday through Friday**. Additional charges may be incurred for efforts that must be performed outside of this time frame.

1. Company Overview

About Netsync Network Solutions

Founded in 2002, Netsync is a minority-owned business (MBE), and women-owned small business (WOSB) value-added reseller (VAR) specializing in technology solutions. We originated as a team of select senior technical consultants and built our business primarily through relationships and referrals, a true testament to the quality technology services Netsync provides. An end-to-end IT solutions consulting company, Netsync is based in Houston, TX, with offices across the US. Netsync uses a true business consultative approach to determine clients' requirements and architects innovative and synergistic IT solutions to meet clients' needs. Our highly skilled and seasoned engineering team is available 24 hours a day, 7 days a week, 365 days a year.

Netsync Services

Netsync helps public and private organizations implement complex IT strategies build on advanced technology solutions to achieve desired business outcomes. Our team of solution experts brings tangible business value through our progressive Design, Build, Deliver, and Manage services methodology. Each part of our clients' infrastructure is architected, implemented, and supported to provide the best business value from their infrastructure.

Netsync Partners

Netsync is a Cisco Gold Integrator, Master Collaboration, Master Networking, Master Security, Master Service Provider, and Customer Experience (CX) Partner; an HP Amplify Power Services Partner; a Dell Platinum Partner; and an Intel Platinum Partner; with certifications and specializations from the industry's best manufacturers. Netsync has built its reputation serving the public sector/SLED market, with extensive experience deploying complex IT solutions for K-12 and higher education institutions, municipalities, and government agencies. Netsync also completes enterprise and SMB large-scale implementations for corporate clients across industries, including financial services, energy, healthcare, retail, manufacturing, and service providers.

Commitment to Sustainability

Cisco aims to reduce its carbon footprint and energy consumption through various initiatives. They prioritize energy-efficient products and sustainable designs, contributing to their goal of minimizing environmental impact. Cisco's Circular Economy program focuses on responsible product lifecycle management, recycling, and reusing materials. They have set a science-based target to reach net zero greenhouse gas (GHG) emissions across their value chain by 2040. Together, we are committed to deep GHG reductions across their operations, supply chain, and product use. 89 percent of energy came from renewable sources in FY22. https://www.cisco.com/c/en/us/about/csr/environmental-sustainability.html.

3. Professional Services Contact Profiles

Taylor Leger
Account Manager
2304 Tarpley Road
Carrollton, TX 75006
O: 713.218.5000 | M: 214.914.5333 | F: 713.664.9964
E: tleger@netsync.com

As an Account Manager for Netsync, Taylor Leger acts as the main point of contact for services by obtaining quotes and schematics for presentations and providing project coordination for each client. Taylor has full access to all staff assigned to his clients, including deployment technicians, directorial staff, and accounting and purchasing representatives. He is authorized to coordinate with Netsync and manufacturer staff to ensure each project assigned is completed on time and within budget.

Taylor holds a bachelor's degree in Finance from University of Arkansas. As an Account Manager, he frequently coordinates Netsync's marketing events for the North Texas area. Taylor Leger is responsible for managing multiple, complex accounts and takes part in all aspects of his clients' long-term projects. Taylor Leger has been with Netsync for over four years and is responsible for securing many of the contracts that Netsync holds with independent school districts and state and local government entities in the North Texas area. Holding over 20 active accounts with most of his clients engaged in long-term commitments, Taylor also holds state and local contracts that service multiple agencies, facilities, and individual entities.

John Birdsong
Solutions Architect

Enterprise Networking

John Birdsong has a strong record of success in designing, scoping, and deploying large- and small-scale networks to support real-time business critical applications. John has over 25 years' experience designing, installing, and aiding clients in planning for the future growth of networked applications. John offers a background of client advocacy and client consultation skills, allowing him to excel in integration of various technologies from varying manufacturers to provide the best possible solutions to clients.

John has an impressive professional history of designing Enterprise Networking solutions for large and small school districts, public sector entities, and small to large Enterprise clients. As a Solutions Architect, he has been responsible for many projects ranging from designing district-wide Enterprise Networks to designing a global WAN for a Fortune 500 Enterprise client. John has held Cisco Certified Network Associate (CCNA) – Routing and Switching (R&S), Cisco Certified Design Associate (CCDA), and other various industry certifications.

Areas of Expertise

Infrastructure Services	
• Cisco DNA Center	• Cisco Indoor and Outdoor Wireless
• Cisco Catalyst Switching	• Cisco Meraki MS and MR Series
• Cisco Nexus Switching	• AirWatch MDM
• Cisco Routing	• Cisco Software-Defined Access

Project Experience Highlights

- Assisted multiple clients in planning migrations to Cisco Digital Network Architecture (DNA) Center.
- Designed and deployed a district-wide network refresh for one of the largest school districts in Texas. This refresh included Cisco wireless LAN (WLAN), Cisco LAN, and Cisco WAN.
- Designed a global LAN and WLAN refresh for one of the world's largest consumer packaged goods companies, spanning over 2,000 sites.
- Designed a video surveillance system for a transportation entity spanning its entire train network.

Jeff Barker
Executive Sales Director

2304 Tarpley Road, Suite 114
Carrollton, TX 75006
O: 713.218.5000 | M: 214.491.8333 | F: 713.664.9964
E: jbarker@netsync.com

Jeff Barker, Executive Sales Director, joined Netsync team 6 years ago after over 12 years of experience with our largest manufacturing partner, Cisco Systems. Jeff's industry experience working directly with enterprise and healthcare clients, navigating the reseller and partner community, and managing and motivating sales organizations, is a valuable addition to Netsync's growth in North Texas, California, and Southeast, as well as in service provider, and federal operations. He brings with him a wealth of knowledge, maturity, and structure to our leadership team, with key job responsibilities in customer satisfaction, sales mentorship, and promotion of the Netsync brand. Jeff has a bachelor's degree in computer engineering from North Carolina State University and is an avid golfer and sports enthusiast.

Jacob Parks
Solutions Architect

Cybersecurity

Jacob Parks is a highly skilled Cybersecurity Architect with over two decades of industry experience. He holds two prestigious Cisco Certified Internetwork Expert (CCIE [#28508]) certifications, a Certified Information Systems Security Professional #715542 (CISSP), and a GIAC Penetration Tester #15239 (GPEN) certification, highlighting his deep expertise in security.

Jacob's extensive background in security technologies has enabled him to design and implement cutting-edge security infrastructures for large organizations, focusing on securing complex networks, preventing cyber threats, and ensuring data integrity. His proficiency spans advanced routing, switching, firewalls, VPNs, threat detection, and intrusion prevention.

Areas of Expertise

Security Services	
• NAC	• IDS/IPS
• NGFWs	• MFA
• Endpoint Security	• Network Visibility and Segmentation
• VPNs	• SSE
	• SASE
Infrastructure Services	
• Core, Distribution, and Access Switches	

Certifications
• GIAC Penetration Tester

Project Experience Highlights

- Integrated worldwide deployment of NAC solution to address differentiated access for users and endpoints.
- Designed NAC policies for segmented network access for Fortune 500 companies and subsidiaries.
- Designed and deployed multinational VPN and NGFW solutions to facilitate access for core employees and a yearly conference for over 3,000 delegates.
- Designed and deployed Web Security Solution for municipal government targeted for over 10,000 users.
- Oversaw districtwide replacement and upgrade of access and distribution routers and switches for 24 schools.
- Implemented switch and router upgrades for municipal government for over 700 sites.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

4. Technical Response

Project Summary

Cleburne ISD ("CISD" or "District"), headquartered in Cleburne, TX, requested that Netsync Network Solutions ("Netsync") submit a statement of work (SOW) outlining District's upcoming Palo Alto (PA) Firewall -3420 Migration project in response to District's Request for Proposal (RFP) Form 470 No. 250008635.

The purpose of this project is to replace District's existing Palo Alto (PA) firewall PA-5220 with one PA-3420 firewall.

Project Objectives

- Discover and plan District's firewall migration from one PA-5220 to one PA-3420
- Configure one PA-3420 appliance
- Perform testing and validation of successful implementation
- Provide up to two hours of knowledge transfer hours
- Provide up to four hours of Day 1 post-cutover remote support

Project Scope and Phases

Discovery

Kickoff Meeting

1. Netsync will conduct a kickoff meeting:
    a. Identify and introduce key stakeholders, who will participate in developing the definition of requirements for success.
    b. Identify project goals, success criteria, and timeline, including but not limited to:
        i. Review SOW.
        ii. Confirm contacts needed to gain entry and perform work in the buildings.
        iii. Confirm any holidays or "non-working" hours for the installation.
        iv. Confirm any District-required change control processes and any potential impacts that these processes may have on the installation schedule.
        v. Schedule technical discovery meeting(s).
        vi. Review and discuss invoicing preferences and applicable billing milestones.
2. Netsync will identify all required information for implementation components, including but not limited to:
    a. Features and functionality.
    b. Integration with the existing network, as necessary.
3. Netsync will perform inventory discovery to gather hardware information, models, and operating system (OS) validation.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Planning

1. Netsync will meet with District to review the key design principles of migration and integrations with the existing District network and technologies.
2. Netsync will require District to fill out the pre-configuration worksheets for each Palo Alto Series Firewall.
3. Netsync will adhere to manufacturers' best practices for logical designs and configurations unless otherwise noted.
4. Netsync will create and present a low-level design (LLD) that includes the following:
    a. Detailed data center rack diagram. The rack diagram will describe the physical data center rack and cable matrix designs for the following:
        i. One Rack Unit (RU) per PA-3420.
    b. Design and plan deployment for the following:
        i. One PA-3420
5. Netsync will work with District to create an implementation plan, project timeline, target dates, and target milestones.
6. Netsync will work with District to create a test and acceptance plan.
7. Netsync will receive District sign-off on the following:
    a. Low-Level Design (LLD).
    b. Implementation plan – associated project timeline, target dates, and target milestones.
    c. Test and acceptance plans.

Equipment Receipt, Staging, and Delivery

Staging and implementation will only begin upon District approval of the Low-Level Design (LLD) document. Staging excludes any uninterruptible power supply (UPS) devices, batteries, and IP-related information. If applicable, Netsync will complete UPS deployment on site at District installation location(s).

1. Netsync will receive equipment in its own facility, unbox equipment, install configurations and test for any anomalies, replace any equipment that does not burn in correctly, notify District of any additional needs that are discovered during the burn-in process, and prepare equipment for delivery to each respective location.
2. Netsync will tag each device with a District asset tag and add to an inventory spreadsheet.
3. Netsync will provide inside-delivery of equipment to each respective location. Netsync may choose to deliver the equipment before installation (no more than three weeks in advance) or bring the equipment at the time of installation. Netsync will not deliver any equipment without prior written approval from District. If District chooses to pre-deliver the equipment, then it will provide a secured location for storage until installation.
4. This location must be accessible to Netsync employees for staging and configuration needs.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Implementation

1. Netsync will rack one PA-3420 firewall.
2. Netsync will configure PA-3420 with basic network information, including:
    a. Management IP address and subnet.
    b. Gateway.
    c. DNS.
    d. NTP.
3. Netsync will set up platform settings:
    a. Set up Secure Shell Protocol (SSH) access.
    b. Change default credentials and configure administrative access to ensure remote management capabilities.
4. Netsync will upgrade all newly installed firewalls to latest recommended supported code version and patch levels unless otherwise noted.
5. Netsync will register and install applicable licenses.
    a. Palo Alto Networks Core Security subscription bundle.
6. Netsync will work with District to get existing firewall PA-5220 configurations.
7. Netsync will migrate the following firewalls configurations:
    a. One PA-5220 firewalls to one PA-3420 firewall.
8. Netsync will migrate existing policies, objects, network, and device configurations in 1-to-1 manner.
9. Netsync will configure firewall devices:
    a. Interface specific setup: IP Address, interface name, security zones, and interface groups.
    b. Routing setup: static routes, dynamic routing protocols setup, and filtering.
    c. Routing/Policy-Based Routing (PBR) will be determined and migrated, as necessary.
10. Netsync will migrate object management:
    a. Migrate existing network objects.
    b. Migrate existing object groups.
    c. Define other specific objects necessary for deployment.
        i. Up to 20 new objects can be created.
11. Netsync will migrate existing Network Address Translations (NATs).
    a. Migrate existing NAT rules.
    b. Up to 10 new NAT entries can be created.
12. Netsync will migrate policies from existing PA-5220 to PA-3420.
    a. Rules will be migrated in a 1-to-1 manner.
13. Netsync will create up to 2 new security policies as needed for the deployment.
14. Netsync will migrate L2L VPN tunnels in a 1-to-1 manner.
15. Netsync will migrate RA VPN configurations in a 1-to-1 manner.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Testing and Validation

1. Netsync will work with District to create a testing and validation plan to ensure all necessary items are tested and working post cutover.

Knowledge Transfer

1. Netsync will provide two hours of knowledge transfer for up to five District attendees. Before the project start, Netsync will work with District to define the specific location, the schedule, and any additional topics for the knowledge transfer session(s). The following topics will be covered:
    a. Features of products and technologies as deployed in the solution.
    b. Review of the as-built documentation to familiarize District with the overall solution and key configuration details.
    c. Basic administration and common operational tasks.
    d. Reinstallation and/or reconfiguration in case of failure.
    e. Monitoring, testing, and maintaining the products deployed in the solution.
    f. Warranty and support procedures for all products deployed in the solution.
    g. Additional District questions or topic requests.
2. If it is determined that the duration of knowledge transfer requested by District will exceed the hours stated above, then Netsync can provide supplementary session(s) at an additional hourly rate.

Note: Knowledge transfer is intended to provide familiarity and conceptual understanding of the specific technologies deployed within this SOW. It is not intended to be comprehensive technical training. The included session(s) may not provide District all of the necessary knowledge and skills to fully manage, monitor, and maintain the solution. Netsync recommends formal training from the solution vendor(s) to address those needs.

Project Prerequisites

1. District will fulfill cabling requirements, if applicable.
2. District will provide Netsync all necessary hardware and information on current environment.
3. District will provide Netsync local and remote administrative credentials (root access) to all equipment to be accessed during the process of this SOW.
4. District will make available authorized personnel during the project with a working knowledge of existing network infrastructure for facility access, questions, and clarification of issues.
5. District will provide Netsync access to all work locations, along with safety, access, security, and emergency protocols.
6. District will obtain all necessary work permits.
7. District will provide a work area for Netsync to use, as needed, during on-site activities to include internet and public phone access.
8. District will provide parking passes and adequate parking for the Netsync project team.
9. District will comply with all physical and environmental requirements per vendor specifications.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Management

Netsync approaches all projects using standard Project Management Institute (PMI) methodologies and processes. Once a Project Manager (PM) is assigned, a project kickoff meeting will be held with District, the PM, the Account Manager (AM), and assigned technical resource(s) to ensure each party is in alignment with all aspects of this SOW. The PM will also perform the following project management activities throughout the engagement to ensure District expectations are consistently met and the project is delivered on time and within the established budget:

- Create the Project Plan.
- Ensure that accurate and timely status updates, action items, and scheduled tasks are received by the assigned resource(s) and uploaded as entries to District's applicable project portal. The PM will ensure status information clearly reaches District to also include milestone updates.
- Lead project meetings with District and the Netsync project team.
- Oversee a quality assurance review of documentation-based deliverables before providing to District.

Project Management Office (PMO) Project Lifecycle

* Denotes that the step in the process may or may not be applicable based on SOW.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Updates

- District will receive email alerts indicating an update has been made to the Notes-Status-Issues Log portal web part for the following communication entry types:
  - Meeting Notes.
  - Project Plan.
  - Status Update(s).
  - Issue Tracking.
- If District wishes not to use the Netsync project portal, then District has the option to request direct email correspondence from the Netsync PM for all communication and updates.

Project Scope Change Requests

Netsync is fully committed to completing this project on time and within the established budget. All scope changes and out-of-scope (OOS) requests must be clearly communicated to the AM or PM before those changes or requests are acted on or performed by the assigned resource(s). The following outlines the scope change or OOS request procedure:

1. The PM and District project team will identify required changes.
2. The PM will submit a Project Change Request Form (CR).
3. The PM will submit the CR to District for subsequent approval and sign-off.
4. District will return a signed copy of the CR.

All other terms within the original SOW, in addition to the signed CR, will remain intact.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Documentation

Netsync will provide District the following documentation:

Included (Yes/No)	Document Type	Owner	Description	Frequency
Documentation				
Yes	Statement of Work (SOW)/High-Level Design (HLD)	Solutions Architect and Account Manager	Description of scope based on presales discussions, preliminary walkthroughs, and data gathering sessions. This SOW is the HLD, and presents and illustrates the overall solution.	Once
Yes	Low-Level Design (LLD)	Engineer	The LLD will replace all existing HLDs upon receipt of a purchase order and subsequent full walkthroughs and formal post-sales planning and design sessions. The LLD will be a fully executed document agreed to by both parties before implementation begins.	Once
Yes	Project Plan	PM and Senior Lead Engineer	Task list, schedule, contact list, meeting notes, status, risk, and issue tracking.	Ongoing
Yes	Method of Procedure (MOP)	PM and Senior Lead Engineer	Detailed implementation plan.	Once
Yes	As-Built	Senior Lead Engineer	Post-implementation technical documentation of new configuration(s) and applicable support information.	Once
Yes	Project Sign-off	PM and District	Deliverables acceptance.	Once

Deliverables Acceptance

District will acknowledge receipt and acceptance, or rejection of all deliverables associated with this SOW within 10 business days of delivery (not including federal holidays). If such acknowledgement is not received within this period, then all deliverables will be deemed acknowledged and accepted.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Risks and Assumptions

1. District will participate in all design and planning sessions and be prepared to sign off on all milestones.
2. District will provide Netsync with full access to the relevant functional, technical, and business resources with adequate skills and knowledge to support the performance of services. If District's only method of providing Netsync remote access is through screen share, then additional fees may apply due to project duration extensions.
3. If applicable, Netsync will secure access points (APs) with plastic cable zip ties placed through the mounting bracket, unless District declines this service in writing via email.
4. Unless otherwise noted, all estimates are based on a single implementation trip, per site. District may be charged additional fees for additional onsite meetings.
5. Multiple outages may occur due to the nature of this project; however, they will all occur at scheduled and approved times.
6. District delays to provide Netsync the necessary data to accomplish each task may result in timeline changes.
7. Netsync is not responsible for project delays caused by other vendors and/or manufacturing issues that may impede progress and/or closure of Netsync SOW deliverables.
8. This SOW assumes that the engagement will be a combination of on-site and remote work to drive efficiency. If District requires a 100% on-site engagement, then District must notify Netsync before agreeing to this SOW.
9. If District requires a copy of Netsync's standard Certificate of Insurance (COI) with District-added endorsements, then it should allow up to 10 business days for delivery.
10. Netsync is not responsible for the functionality of District-provided existing equipment or licenses, and assumes that existing equipment and software is under a valid support contract.
11. Anything not specifically stated in this document is outside the scope of this SOW.

Service Level Agreement

Hours of Operation

Standard hours of operation are **8:00 AM to 5:00 PM local time Monday through Friday**. Netsync understands that due to the nature of the industry and work performed, after-hours and weekend availability are often required. In the event Netsync resources are required to perform work outside of the standard hours of operation, agreed-upon work windows will be discussed and subsequently documented via email.

- District will provide Netsync a minimum of three business days' notification for any non-emergency maintenance windows or periods of time.
- Netsync will provide District the best level of support for emergency maintenance windows based on qualified staff resource availability.
- A District project stakeholder or technical contact must be either on location or on-call during the agreed upon after-hours and/or weekend work window(s).

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Pricing and Fees

Fee Type

Fixed Price: The proposed hours are fixed. Additional hours required for in-scope work will not be invoiced unless OOS work is required.

Invoicing Type

Invoice terms are based on credit approval.

Unless specifically noted in the master services agreement (MSA) between District and Netsync, if applicable, Netsync will use the following invoicing type:

- **Milestone Invoicing**: A portion of the project will be invoiced based on achieving the following milestones in the project plan (see milestone table below); the PM will work with District, the AM, and Accounting for appropriate invoicing.

Netsync will send District invoice(s) on Net 30 terms for all applicable hardware, supplemental material, and licenses immediately after delivery and receipt of signed packing/delivery slips.

Project Milestones

This price is based on work taking place during standard hours of operations, **8:00 AM to 5:00 PM local time Monday through Friday**. Additional charges may be incurred for efforts that must be performed outside of this time frame.

Milestone	Percent Billed (%)*
Discovery and Planning	25%
Low-Level Design (LLD)	25%
Implementation	25%
Project Closure/Final Deliverables	25%
Total	100%

*See Netsync quote for project cost.

Project Summary

Cleburne ISD ("CISD" or "District"), headquartered in Cleburne, TX, requested that Netsync Network Solutions ("Netsync") submit a statement of work (SOW) outlining District's upcoming Network Core Refresh project in response to District's Request for Proposal (RFP) Form 470 No. 250008635.

The purpose of this project is to refresh the current District Core switches with new switches.

The current network consists of a pair of Cisco Nexus 9504 Switch and three Cisco Nexus 2148T switches. The 2148T switches currently operate as Fabric Extenders connected to the 9504s. These switches are deployed following a traditional Layer 2/3 network model. The 9504s will be replaced by a pair of Cisco Catalyst 9500-48Y4C switches and the 2148T switches will be replaced with Cisco Catalyst C9300-48T switches.

The C9500s will be stacked using StackWise Virtual Stacking and the C9300s will be stacked using physical stacking.

Exceptions, Clarifications, and Assumptions

The primary focus of this section is to provide any exceptions Netsync took to the original RFP, as well as clarifications around our proposal. This section will also outline any assumptions Netsync made while creating the design.

Netsync has responded to the bid with pricing based on the information provided in the RFP and addendum. Please pay special attention to the exceptions and clarifications outlined below. Also note that the project counts per location are outlined in a table within the Appendix at the end of this SOW.

- If selected, Netsync will require a review of the design and Bill of Materials (BOM) in detail with District to verify that all of the components selected meet the project requirements. This will help ensure the equipment list and quantities support the best possible design.
- Netsync will work with District to make sure all assumptions, exceptions, and clarifications listed below and determined during Discovery are accepted and agreed upon before final pricing.
- Netsync has provided pricing for the specific quantities requested in the RFP. If additional quantities are needed, then these can be purchased for the unit cost provided within the proposal plus the associated labor to install.
- Multiple outages may occur due to the nature of this project; however, they will all occur at scheduled and approved times.
- Netsync is not responsible for project delays caused by other vendors and/or manufacturing issues that may impede progress of Netsync deliverables.
- Netsync is not responsible for configuration changes on any equipment not specifically stated in the SOW.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Network Implementation

- Netsync assumes Client will be responsible for all structured and patch cabling.
- Netsync assumes that all racks in each main distribution frame (MDF) and intermediate distribution frame (IDF) are 19-inch, 2-post racks.

Wireless Implementation

- Wireless is out of scope for this project.

Project Objectives

- Perform a kickoff call with Client and appropriate stakeholders to align expectations and outcomes.
- Conduct a technical requirements and design meeting with Client to gather details.
- Stage equipment at Netsync staging facility.
- Configure equipment as determined during the design meeting.
- Deliver and install equipment at the prescribed campus locations.
- Perform testing as determined during the design meeting.
- Provide Day 1 support for the network on the go-live date.
- Provide a knowledge transfer session to review the implementation.
- Provide documentation.

Project Scope and Phases

Discovery

Kickoff Meeting

1. Netsync will conduct a kickoff meeting:
    a. Identify and introduce key stakeholders, who will participate in developing the definition of requirements for success.
    b. Identify project goals, success criteria, and timeline, including but not limited to:
        i. Review SOW.
        ii. Confirm contacts needed to gain entry and perform work in the buildings.
        iii. Confirm any holidays or “non-working” hours for the installation.
        iv. Confirm any District-required change control processes and any potential impacts that these processes may have on the installation schedule.
        v. Schedule technical discovery meeting(s).
        vi. Review and discuss invoicing preferences and applicable billing milestones.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Planning

Technical Requirements and Design Meeting(s)

1. District will provide Netsync:
    a. Current IP addressing schemes, network diagrams, and configurations relevant to the project details.
2. Netsync will review existing District-provided IP addressing, network diagrams, and configurations looking for opportunities to increase functionality, security, and manageability.
3. Netsync will work with District to review the core and LAN configuration, including but not limited to:
    a. Understand and implement District's current IP addressing scheme.
    b. Review switch naming convention.
    c. Create a virtual LAN (VLAN) plan with a minimum of 10 VLANs and up to a maximum of 15 VLANs.
    d. Determine Quality and Class of Service (QoS/CoS) configurations necessary to support multiple classes of traffic and queue prioritization based on documented best practices.
    e. Discuss configuration options for both Layer 2 and Layer 3 to increase network reliability and performance.
    f. System management:
        i. Integrate with existing authentication, authorization, and accounting (AAA) systems, if available (RADIUS, TACACS, etc.).
        ii. Remote management options (Secure Shell [SSH], Telnet, etc.).
    g. System monitoring:
        i. Simple Network Management Protocol (SNMP) configurations, community strings, and passwords for all devices.
        ii. Syslog server settings.

    Note: Netsync will configure the switches to match District's current configuration. A network redesign and/or configuration changes are outside the scope of this project.
4. Netsync will perform a site walkthrough of each District location at least one week before deployment to:
    a. Evaluate rack space, switch connectivity, and power availability.
    b. Verify final plan for migration and port counts on all devices to be connected.
5. Netsync will review the Bill of Materials (BOM) provided as part of the proposal with the findings from the site surveys to verify any quantity changes.

    Note: Any additions to the design will be priced using the unit pricing provided.
6. Netsync will determine a test plan with District. District will need to provide Netsync with a list of applications that should be tested before and after cutover.
7. Netsync will document all findings, recommendations, and implementation details, including network diagrams.
8. Netsync will review the finalized implementation plan with District before beginning implementation.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Equipment Receipt, Staging, and Delivery

Staging and implementation will only begin upon District approval of the Low-Level Design (LLD) document. Staging excludes any uninterruptible power supply (UPS) devices, batteries, and IP-related information. If applicable, Netsync will complete UPS deployment on site at District installation location(s).

5. Netsync will receive equipment in its own facility, unbox equipment, install configurations and test for any anomalies, replace any equipment that does not burn in correctly, notify District of any additional needs that are discovered during the burn-in process, and prepare equipment for delivery to each respective location.
6. Netsync will tag each device with a District asset tag and add to an inventory spreadsheet.
7. Netsync will provide inside-delivery of equipment to each respective location. Netsync may choose to deliver the equipment before installation (no more than three weeks in advance) or bring the equipment at the time of installation. Netsync will not deliver any equipment without prior written approval from District. If District chooses to pre-deliver the equipment, then it will provide a secured location for storage until installation.
8. This location must be accessible to Netsync employees for staging and configuration needs.

Implementation

Implementation will begin only after Discovery and Planning are 100% complete. District representative must be onsite to receive hardware and sign packing slip prior to installation.

Distribution and Access Switch

1. Netsync will install the distribution and access switches listed in the Appendix into existing equipment rack location or area designated by District.
2. Netsync will configure the Cisco switches to include:
    a. Patch-in drops and fiber.
    b. Properly dress cables with Velcro.
    c. Configure switches based on configuration standards reviewed during technical Discovery.
    d. Perform testing:
        i. Test and validate each switch for proper functionality.
        ii. Validate ports that are associated with devices that are on specific VLANs are properly configured (e.g., cameras, APs, etc.)
3. Netsync will decommission existing switches:
    a. Uninstall existing switches determined during Planning.
    b. Provide an inventory of equipment removed in a data file.
    c. Box the older equipment and label boxes clearly to note included contents.
    d. Deliver boxes to a centralized District location.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Testing and Validation

1. Netsync will perform Testing and Validation as agreed on during the Technical Review and Design meeting.

Knowledge Transfer

1. Netsync will provide two hours of knowledge transfer for up to five District attendees. Before the project start, Netsync will work with District to define the specific location, the schedule, and any additional topics for the knowledge transfer session(s). The following topics will be covered:
    a. Features of products and technologies as deployed in the solution.
    b. Review of the as-built documentation to familiarize District with the overall solution and key configuration details.
    c. Basic administration and common operational tasks.
    d. Reinstallation and/or reconfiguration in case of failure.
    e. Monitoring, testing, and maintaining the products deployed in the solution.
    f. Warranty and support procedures for all products deployed in the solution.
    g. Additional District questions or topic requests.
2. If it is determined that the duration of knowledge transfer requested by District will exceed the hours stated above, then Netsync can provide supplementary session(s) at an additional hourly rate.

Note: Knowledge transfer is intended to provide familiarity and conceptual understanding of the specific technologies deployed within this SOW. It is not intended to be comprehensive technical training. The included session(s) may not provide District all of the necessary knowledge and skills to fully manage, monitor, and maintain the solution. Netsync recommends formal training from the solution vendor(s) to address those needs.

Project Prerequisites

1. District will fulfill cabling requirements, if applicable.
2. District will provide Netsync all necessary hardware and information on current environment.
3. District will provide Netsync local and remote administrative credentials (root access) to all equipment to be accessed during the process of this SOW.
4. District will make available authorized personnel during the project with a working knowledge of existing network infrastructure for facility access, questions, and clarification of issues.
5. District will provide Netsync access to all work locations, along with safety, access, security, and emergency protocols.
6. District will obtain all necessary work permits.
7. District will provide a work area for Netsync to use, as needed, during on-site activities to include internet and public phone access.
8. District will provide parking passes and adequate parking for the Netsync project team.
9. District will comply with all physical and environmental requirements per vendor specifications.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Management

Netsync approaches all projects using standard Project Management Institute (PMI) methodologies and processes. Once a Project Manager (PM) is assigned, a project kickoff meeting will be held with District, the PM, the Account Manager (AM), and assigned technical resource(s) to ensure each party is in alignment with all aspects of this SOW. The PM will also perform the following project management activities throughout the engagement to ensure District expectations are consistently met and the project is delivered on time and within the established budget:

- Create the Project Plan.
- Ensure that accurate and timely status updates, action items, and scheduled tasks are received by the assigned resource(s) and uploaded as entries to District's applicable project portal. The PM will ensure status information clearly reaches District to also include milestone updates.
- Lead project meetings with District and the Netsync project team.
- Oversee a quality assurance review of documentation-based deliverables before providing to District.

Project Management Office (PMO) Project Lifecycle

* Denotes that the step in the process may or may not be applicable based on SOW.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Updates

- District will receive email alerts indicating an update has been made to the Notes-Status-Issues Log portal web part for the following communication entry types:
  - Meeting Notes.
  - Project Plan.
  - Status Update(s).
  - Issue Tracking.
- If District wishes not to use the Netsync project portal, then District has the option to request direct email correspondence from the Netsync PM for all communication and updates.

Project Scope Change Requests

Netsync is fully committed to completing this project on time and within the established budget. All scope changes and out-of-scope (OOS) requests must be clearly communicated to the AM or PM before those changes or requests are acted on or performed by the assigned resource(s). The following outlines the scope change or OOS request procedure:

1. The PM and District project team will identify required changes.
2. The PM will submit a Project Change Request Form (CR).
3. The PM will submit the CR to District for subsequent approval and sign-off.
4. District will return a signed copy of the CR.

All other terms within the original SOW, in addition to the signed CR, will remain intact.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Documentation

Netsync will provide District the following documentation:

Included (Yes/No)	Document Type	Owner	Description	Frequency
Documentation				
Yes	Statement of Work (SOW)/High-Level Design (HLD)	Solutions Architect and Account Manager	Description of scope based on presales discussions, preliminary walkthroughs, and data gathering sessions. This SOW is the HLD, and presents and illustrates the overall solution.	Once
Yes	Low-Level Design (LLD)	Engineer	The LLD will replace all existing HLDs upon receipt of a purchase order and subsequent full walkthroughs and formal post-sales planning and design sessions. The LLD will be a fully executed document agreed to by both parties before implementation begins.	Once
Yes	Project Plan	PM and Senior Lead Engineer	Task list, schedule, contact list, meeting notes, status, risk, and issue tracking.	Ongoing
No	Method of Procedure (MOP)	PM and Senior Lead Engineer	Detailed implementation plan.	Once
Yes	As-Built	Senior Lead Engineer	Post-implementation technical documentation of new configuration(s) and applicable support information.	Once
Yes	Project Sign-off	PM and District	Deliverables acceptance.	Once

Deliverables Acceptance

District will acknowledge receipt and acceptance, or rejection of all deliverables associated with this SOW within 10 business days of delivery (not including federal holidays). If such acknowledgement is not received within this period, then all deliverables will be deemed acknowledged and accepted.

Project Risks and Assumptions

1. District will participate in all design and planning sessions and be prepared to sign off on all milestones.
2. District will provide Netsync with full access to the relevant functional, technical, and business resources with adequate skills and knowledge to support the performance of services. If District's only method of providing Netsync remote access is through screen share, then additional fees may apply due to project duration extensions.
3. If applicable, Netsync will secure access points (APs) with plastic cable zip ties placed through the mounting bracket, unless District declines this service in writing via email.
4. Unless otherwise noted, all estimates are based on a single implementation trip, per site. District may be charged additional fees for additional onsite meetings.
5. Multiple outages may occur due to the nature of this project; however, they will all occur at scheduled and approved times.
6. District delays to provide Netsync the necessary data to accomplish each task may result in timeline changes.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

7. Netsync is not responsible for project delays caused by other vendors and/or manufacturing issues that may impede progress and/or closure of Netsync SOW deliverables.
8. This SOW assumes that the engagement will be a combination of on-site and remote work to drive efficiency. If District requires a 100% on-site engagement, then District must notify Netsync before agreeing to this SOW.
9. If District requires a copy of Netsync's standard Certificate of Insurance (COI) with District-added endorsements, then it should allow up to 10 business days for delivery.
10. Netsync is not responsible for the functionality of District-provided existing equipment or licenses, and assumes that existing equipment and software is under a valid support contract.
11. Anything not specifically stated in this document is outside the scope of this SOW.

Service Level Agreement

Hours of Operation

Standard hours of operation are **8:00 AM to 5:00 PM local time Monday through Friday**. Netsync understands that due to the nature of the industry and work performed, after-hours and weekend availability are often required. In the event Netsync resources are required to perform work outside of the standard hours of operation, agreed-upon work windows will be discussed and subsequently documented via email.

- District will provide Netsync a minimum of three business days' notification for any non-emergency maintenance windows or periods of time.
- Netsync will provide District the best level of support for emergency maintenance windows based on qualified staff resource availability.
- A District project stakeholder or technical contact must be either on location or on-call during the agreed upon after-hours and/or weekend work window(s).

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Pricing and Fees

Fee Type

Fixed Price: The proposed hours are fixed. Additional hours required for in-scope work will not be invoiced unless OOS work is required.

Invoicing Type

Invoice terms are based on credit approval.

Unless specifically noted in the master services agreement (MSA) between District and Netsync, if applicable, Netsync will use the following invoicing type:

- **Milestone Invoicing**: A portion of the project will be invoiced based on achieving the following milestones in the project plan (see milestone table below); the PM will work with District, the AM, and Accounting for appropriate invoicing.

Netsync will send District invoice(s) on Net 30 terms for all applicable hardware, supplemental material, and licenses immediately after delivery and receipt of signed packing/delivery slips.

Project Milestones

This price is based on work taking place during standard hours of operations, **8:00 AM to 5:00 PM local time Monday through Friday**. Additional charges may be incurred for efforts that must be performed outside of this time frame.

Milestone	Percent Billed (%)*
Discovery and Planning	25%
Low-Level Design (LLD)	25%
Implementation	25%
Project Closure/Final Deliverables	25%
Total	100%

*See Netsync quote for project cost.

Project Summary

Cleburne ISD ("CISD" or "District"), headquartered in Cleburne, TX, requested that Netsync Network Solutions ("Netsync") submit a statement of work (SOW) outlining District's upcoming District Wide Wireless Refresh - 9163 Option project in response to District's Request for Proposal (RFP) Form 470 No. 250008635.

The purpose of this project is to refresh the entire District's current wireless network.

District current Cisco centralized wireless network has reached end of life status. District has submitted an RFP to Netsync requesting new hardware and implementation services.

Netsync will stage, configure and install the equipment in the Appendix at the sites listed in the Appendix. Netsync will migrate the existing Cisco WLC configuration to Meraki.

Any configuration changes required for any other systems will be the responsibility of District including but not limited to authentication, authorization and accounting (AAA) servers, Dynamic Host Configuration Protocol (DHCP) servers, DNS servers and LAN switches.

Exceptions, Clarifications, and Assumptions

The primary focus of this section is to provide any exceptions Netsync took to the original RFP, as well as clarifications around our proposal. This section will also outline any assumptions Netsync made while creating the design.

Netsync has responded to the bid with pricing based on the information provided in the RFP and addendum. Please pay special attention to the exceptions and clarifications outlined below. Also note that the project counts per location are outlined in a table within the Appendix at the end of this SOW.

- If selected, Netsync will require a review of the design and Bill of Materials (BOM) in detail with District to verify that all of the components selected meet the project requirements. This will help ensure the equipment list and quantities support the best possible design.
- Netsync will work with District to make sure all assumptions, exceptions, and clarifications listed below and determined during Discovery are accepted and agreed upon before final pricing.
- Netsync has provided pricing for the specific quantities requested in the RFP. The RFP states that the quantities included are estimates. If additional quantities are needed, then these can be purchased for the unit cost provided within the proposal plus the associated labor to install.
- Multiple outages may occur due to the nature of this project; however, they will all occur at scheduled and approved times.
- Netsync is not responsible for project delays caused by other vendors and/or manufacturing issues that may impede progress of Netsync deliverables.
- Netsync is not responsible for configuration changes on any equipment not specifically stated in the SOW.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Network Implementation

- Configuration of switches and routers are out of scope for this project.
- It is assumed the network is fit for purpose, and configuration changes will be the responsibility of District.

Wireless Implementation

- If there are any locations that will require mounting the access point (AP) higher than 15 feet, then there will be additional charges for a mechanical lift unless District has a lift for use.
- Netsync did not create the wireless placement design; therefore, Netsync is not responsible for any design-related issues and cannot guarantee coverage in all desired areas. For the ideal design and coverage, Netsync recommends performing a wireless site survey before implementation to create the ideal placement design.
- The RFP did not specify the location-specific mounting requirements. An internal antenna AP is typically mounted horizontally on a ceiling grid at approximately 10 feet. For any AP that cannot be mounted in the typical format, there may be a more ideal model of AP, antenna, or additional mounting hardware required.
- If awarded, Netsync would like to review all placement locations with District and provide recommendations to help ensure the models purchased support the best possible design. It is District's responsibility to notify Netsync before ordering if any locations exist where APs cannot be mounted in a typical format.
- After wireless LAN (WLAN) system turn-up, there will be a period of radio frequency (RF) self-tuning. During this time, District should expect inconsistent and sporadic coverage, performance, and client connectivity. The expected duration of this self-tuning period should be three to five business days.

Project Objectives

- Perform a kickoff call with District and appropriate stakeholders to align expectations and outcomes
- Conduct a technical requirements and design meeting with District to gather details
- Stage equipment at Netsync staging facility
- Configure equipment as determined during the design meeting
- Deliver and install equipment at the prescribed campus locations
- Perform testing as determined during the design meeting
- Provide Day 1 support for the network on the go-live date
- Provide a knowledge transfer session to review the implementation
- Provide documentation.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Scope and Phases

Discovery

Kickoff Meeting

1. Netsync will conduct a kickoff meeting:
    a. Identify and introduce key stakeholders, who will participate in developing the definition of requirements for success.
    b. Identify project goals, success criteria, and timeline, including but not limited to:
        i. Review SOW.
        ii. Confirm contacts needed to gain entry and perform work in the buildings.
        iii. Confirm any holidays or “non-working” hours for the installation.
        iv. Confirm any District-required change control processes and any potential impacts that these processes may have on the installation schedule.
        v. Schedule technical discovery meeting(s).
        vi. Review and discuss invoicing preferences and applicable billing milestones.

Planning

Technical Requirements and Design Meeting(s)

1. District will provide Netsync:
    a. Wireless AP placement diagrams notating clearly:
        i. New AP placement locations.
        ii. Location of existing APs to be removed.
    b. Any necessary floor plans to be used for placement maps within Cisco Prime Infrastructure.
    c. Configuration details for existing wireless network.
2. Netsync will perform an objective review of the existing wireless LAN (WLAN) environment in terms of current functionality and implementation.
3. Netsync will work with District to review wireless configuration, as related to industry best practices, and security capabilities of the new equipment, including but not limited to:
    a. Understand and implement District’s current IP addressing scheme.
    b. Review wireless AP naming convention.
    c. AP configuration (service set identifiers [SSIDs], virtual LANs [VLANs], security, radio frequency [RF] settings, etc.).
    d. Type of client devices, 802.11a/b/g/n/ac, voice/data support, capacity requirements, performance requirements, accessibility/reliability requirements, infrastructure management, and client management.
    e. Security design pertaining to applicable wireless protocols and applications.

    Note: Netsync will configure the wireless to match District’s current configuration. A wireless redesign and/or configuration changes are outside the scope of this project.
4. Netsync will work with District to review the desired placement locations of the requested APs.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Note: The desired AP placement has been previously completed by District. Therefore, RF design is not required or included as part of this SOW.

5. Netsync will perform a site walkthrough of each District location at least one week before deployment to:
    c. Review and verify the placement locations for the new APs.
    d. Perform an in-depth survey to locate all existing APs.
6. Netsync will review the Bill of Materials (BOM) provided as part of the proposal with the findings from the site surveys to verify any quantity changes.

    Note: Any additions to the design will be priced using the unit pricing provided.
7. Netsync will determine a test plan with District. District will need to provide Netsync with a list of applications that should be tested before and after cutover.
8. Netsync will document all findings, recommendations, and implementation details, including AP placement maps.
9. Netsync will review the finalized implementation plan with District before beginning implementation.

Equipment Receipt, Staging, and Delivery

Staging and implementation will only begin upon District approval of the Low-Level Design (LLD) document. Staging excludes any uninterruptible power supply (UPS) devices, batteries, and IP-related information. If applicable, Netsync will complete UPS deployment on site at District installation location(s).

1. Netsync will receive equipment in its own facility, unbox equipment, install configurations and test for any anomalies, replace any equipment that does not burn in correctly, notify District of any additional needs that are discovered during the burn-in process, and prepare equipment for delivery to each respective location.
2. Netsync will tag each device with a District asset tag and add to an inventory spreadsheet.
3. Netsync will provide inside-delivery of equipment to each respective location. Netsync may choose to deliver the equipment before installation (no more than three weeks in advance) or bring the equipment at the time of installation. Netsync will not deliver any equipment without prior written approval from District. If District chooses to pre-deliver the equipment, then it will provide a secured location for storage until installation.
4. This location must be accessible to Netsync employees for staging and configuration needs.

Implementation

Implementation will begin only after Discovery and Planning are 100% complete. District representative must be onsite to receive hardware and sign packing slip prior to installation.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Meraki Wireless Dashboard

1. Netsync will configure the Meraki Dashboard to include:
    a. Work with District to either set up an account or login to existing Meraki Dashboard account.
    b. Add all new devices to the Meraki Dashboard.
    c. Set up “Network”(s) for APs.
    d. Create up to four service set identifiers (SSIDs).
    e. Configure security parameters.
    f. Configure Active Directory (AD) authentication.
    g. Configure firewall and traffic-shaping rules per SSID.
    h. Enable Bonjour forwarding for Apple TVs, if required.
2. Netsync will perform testing:
    a. Functionality of management web graphical user interface (GUI).
    b. Connectivity to RADIUS backend.
    c. Validate any other testing steps determined during the planning phase.

Meraki Access Point (AP)

1. Netsync will install and configure the new Cisco Meraki wireless APs to include:
    a. Mount APs per the AP placement maps created during Discovery.
    b. Label each AP based on placement location and include placement details in the Inventory spreadsheet.
    c. Verify APs are registered to the Cisco Meraki Dashboard and functioning correctly.
2. Netsync will place site-specific APs in appropriate locations on outdoor maps.
3. Netsync will perform testing:
    a. District connectivity to District-designated configured SSID determined in technical discovery.
    b. All deployed APs join the Cisco Meraki Dashboard (verify with District).
    c. Radio up/down state of all deployed APs.
    d. Validate any other testing steps determined during Planning.
    e. Collect approved and accurate floor plans for each building.

Testing and Validation

1. Netsync will perform Testing and Validation as agreed on during the Technical Review and Design meeting.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Knowledge Transfer

1. Netsync will provide eight hours of knowledge transfer for up to five District attendees. Before the project start, Netsync will work with District to define the specific location, the schedule, and any additional topics for the knowledge transfer session(s). The following topics will be covered:
    a. Features of products and technologies as deployed in the solution.
    b. Review of the as-built documentation to familiarize District with the overall solution and key configuration details.
    c. Basic administration and common operational tasks.
    d. Reinstallation and/or reconfiguration in case of failure.
    e. Monitoring, testing, and maintaining the products deployed in the solution.
    f. Warranty and support procedures for all products deployed in the solution.
    g. Additional District questions or topic requests.
2. If it is determined that the duration of knowledge transfer requested by District will exceed the hours stated above, then Netsync can provide supplementary session(s) at an additional hourly rate.

Note: Knowledge transfer is intended to provide familiarity and conceptual understanding of the specific technologies deployed within this SOW. It is not intended to be comprehensive technical training. The included session(s) may not provide District all of the necessary knowledge and skills to fully manage, monitor, and maintain the solution. Netsync recommends formal training from the solution vendor(s) to address those needs.

Project Prerequisites

1. District will fulfill cabling requirements, if applicable.
2. District will provide Netsync all necessary hardware and information on current environment.
3. District will provide Netsync local and remote administrative credentials (root access) to all equipment to be accessed during the process of this SOW.
4. District will make available authorized personnel during the project with a working knowledge of existing network infrastructure for facility access, questions, and clarification of issues.
5. District will provide Netsync access to all work locations, along with safety, access, security, and emergency protocols.
6. District will obtain all necessary work permits.
7. District will provide a work area for Netsync to use, as needed, during on-site activities to include internet and public phone access.
8. District will provide parking passes and adequate parking for the Netsync project team.
9. District will comply with all physical and environmental requirements per vendor specifications.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Management

Netsync approaches all projects using standard Project Management Institute (PMI) methodologies and processes. Once a Project Manager (PM) is assigned, a project kickoff meeting will be held with District, the PM, the Account Manager (AM), and assigned technical resource(s) to ensure each party is in alignment with all aspects of this SOW. The PM will also perform the following project management activities throughout the engagement to ensure District expectations are consistently met, and the project is delivered on time and within the established budget:

- Create the Project Plan.
- Ensure that accurate and timely status updates, action items, and scheduled tasks are received by the assigned resource(s) and uploaded as entries to District's applicable project portal. The PM will ensure status information clearly reaches District to also include milestone updates.
- Lead project meetings with District and the Netsync project team.
- Oversee a quality assurance review of documentation-based deliverables before providing to District.

Project Management Office (PMO) Project Lifecycle

* Denotes that the step in the process may or may not be applicable based on SOW.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Updates

- District will receive email alerts indicating an update has been made to the Notes-Status-Issues Log portal web part for the following communication entry types:
  - Meeting Notes.
  - Project Plan.
  - Status Update(s).
  - Issue Tracking.
- If District wishes not to use the Netsync project portal, then District has the option to request direct email correspondence from the Netsync PM for all communication and updates.

Project Scope Change Requests

Netsync is fully committed to completing this project on time and within the established budget. All scope changes and out-of-scope (OOS) requests must be clearly communicated to the AM or PM before those changes or requests are acted on or performed by the assigned resource(s). The following outlines the scope change or OOS request procedure:

1. The PM and District project team will identify required changes.
2. The PM will submit a Project Change Request Form (CR).
3. The PM will submit the CR to District for subsequent approval and sign-off.
4. District will return a signed copy of the CR.

All other terms within the original SOW, in addition to the signed CR, will remain intact.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Documentation

Netsync will provide District the following documentation:

Included (Yes/No)	Document Type	Owner	Description	Frequency
Documentation				
Yes	Statement of Work (SOW)/High-Level Design (HLD)	Solutions Architect and Account Manager	Description of scope based on presales discussions, preliminary walkthroughs, and data gathering sessions. This SOW is the HLD, and presents and illustrates the overall solution.	Once
Yes	Low-Level Design (LLD)	Engineer	The LLD will replace all existing HLDs upon receipt of a purchase order and subsequent full walkthroughs and formal post-sales planning and design sessions. The LLD will be a fully executed document agreed to by both parties before implementation begins.	Once
Yes	Project Plan	PM and Senior Lead Engineer	Task list, schedule, contact list, meeting notes, status, risk, and issue tracking.	Ongoing
No	Method of Procedure (MOP)	PM and Senior Lead Engineer	Detailed implementation plan.	Once
Yes	As-Built	Senior Lead Engineer	Post-implementation technical documentation of new configuration(s) and applicable support information.	Once
Yes	Project Sign-off	PM and District	Deliverables acceptance.	Once

Deliverables Acceptance

District will acknowledge receipt and acceptance, or rejection of all deliverables associated with this SOW within 10 business days of delivery (not including federal holidays). If such acknowledgement is not received within this period, then all deliverables will be deemed acknowledged and accepted.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Risks and Assumptions

1. District will participate in all design and planning sessions and be prepared to sign off on all milestones.
2. District will provide Netsync with full access to the relevant functional, technical, and business resources with adequate skills and knowledge to support the performance of services. If District's only method of providing Netsync remote access is through screen share, then additional fees may apply due to project duration extensions.
3. If applicable, Netsync will secure access points (APs) with plastic cable zip ties placed through the mounting bracket, unless District declines this service in writing via email.
4. Unless otherwise noted, all estimates are based on a single implementation trip, per site. District may be charged additional fees for additional onsite meetings.
5. Multiple outages may occur due to the nature of this project; however, they will all occur at scheduled and approved times.
6. District delays to provide Netsync the necessary data to accomplish each task may result in timeline changes.
7. Netsync is not responsible for project delays caused by other vendors and/or manufacturing issues that may impede progress and/or closure of Netsync SOW deliverables.
8. This SOW assumes that the engagement will be a combination of on-site and remote work to drive efficiency. If District requires a 100% on-site engagement, then District must notify Netsync before agreeing to this SOW.
9. If District requires a copy of Netsync's standard Certificate of Insurance (COI) with District-added endorsements, then it should allow up to 10 business days for delivery.
10. Netsync is not responsible for the functionality of District-provided existing equipment or licenses, and assumes that existing equipment and software is under a valid support contract.
11. Anything not specifically stated in this document is outside the scope of this SOW.

Service Level Agreement

Hours of Operation

Standard hours of operation are **8:00 AM to 5:00 PM local time Monday through Friday**. Netsync understands that due to the nature of the industry and work performed, after-hours and weekend availability are often required. In the event Netsync resources are required to perform work outside of the standard hours of operation, agreed-upon work windows will be discussed and subsequently documented via email.

- District will provide Netsync a minimum of three business days' notification for any non-emergency maintenance windows or periods of time.
- Netsync will provide District the best level of support for emergency maintenance windows based on qualified staff resource availability.
- A District project stakeholder or technical contact must be either on location or on-call during the agreed upon after-hours and/or weekend work window(s).

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Pricing and Fees

Fee Type

Fixed Price: The proposed hours are fixed. Additional hours required for in-scope work will not be invoiced unless OOS work is required.

Invoicing Type

Invoice terms are based on credit approval.

Unless specifically noted in the master services agreement (MSA) between District and Netsync, if applicable, Netsync will use the following invoicing type:

- **Milestone Invoicing**: A portion of the project will be invoiced based on achieving the following milestones in the project plan (see milestone table below); the PM will work with District, the AM, and Accounting for appropriate invoicing.

Netsync will send District invoice(s) on Net 30 terms for all applicable hardware, supplemental material, and licenses immediately after delivery and receipt of signed packing/delivery slips.

Project Milestones

This price is based on work taking place during standard hours of operations, **8:00 AM to 5:00 PM local time Monday through Friday**. Additional charges may be incurred for efforts that must be performed outside of this time frame.

Project Summary

Cleburne ISD ("CISD" or "District"), headquartered in Cleburne, TX, requested that Netsync Network Solutions ("Netsync") submit a statement of work (SOW) outlining District's upcoming Campus Switching Refresh project in response to District's Request for Proposal (RFP) Form 470 No. 250008635.

The purpose of this project is to stage, configure and install new switches to replace existing Cisco 2960 switches which have reached end of life.

Exceptions, Clarifications, and Assumptions

The primary focus of this section is to provide any exceptions Netsync took to the original RFP, as well as clarifications around our proposal. This section will also outline any assumptions Netsync made while creating the design.

Netsync has responded to the bid with pricing based on the information provided in the RFP and addendum. Please pay special attention to the exceptions and clarifications outlined below. Also note that the project counts per location are outlined in a table within the Appendix at the end of this SOW.

- If selected, Netsync will require a review of the design and Bill of Materials (BOM) in detail with District to verify that all the components selected meet the project requirements. This will help ensure the equipment list and quantities support the best possible design.
- Netsync will work with District to make sure all assumptions, exceptions, and clarifications listed below and determined during Discovery are accepted and agreed upon before final pricing.
- Multiple outages may occur due to the nature of this project; however, they will all occur at scheduled and approved times.
- Netsync is not responsible for project delays caused by other vendors and/or manufacturing issues that may impede progress of Netsync deliverables.
- Netsync is not responsible for configuration changes on any equipment not specifically stated in the SOW.

Network Implementation

- Netsync assumes District will be responsible for all patch and structured cabling not specifically listed in the Appendix.
- Netsync assumes District will be responsible for all racks and environmental controls in wiring closets.
- Netsync assumes that all racks in each wiring closet are 19-inch, 2-post racks. If racks are 4-post racks, District will be responsible for 4-post rack mount kits.
- Netsync assumes either existing Small Form Factor Pluggable (SFPs) will be used or District will provide new SFPs.
- Netsync assumes there will be no re-architecture of the environment, and the existing configurations will be used to deploy the new switches.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Wireless Implementation

- Wireless is out of scope for purposes of this project.

Project Objectives

- Perform a kickoff call with District and appropriate stakeholders to align expectations and outcomes
- Conduct a technical requirements and design meeting with District to gather details
- Stage equipment at Netsync staging facility
- Configure equipment as determined during the design meeting
- Deliver and install equipment at the prescribed campus locations
- Perform testing as determined during the design meeting
- Provide Day 1 support for the network on the go-live date
- Provide a knowledge transfer session to review the implementation
- Provide documentation

Project Scope and Phases

Discovery

Kickoff Meeting

1. Netsync will conduct a kickoff meeting:
    a. Identify and introduce key stakeholders, who will participate in developing the definition of requirements for success.
    b. Identify project goals, success criteria, and timeline, including but not limited to:
        i. Review SOW.
        ii. Confirm contacts needed to gain entry and perform work in the buildings.
        iii. Confirm any holidays or “non-working” hours for the installation.
        iv. Confirm any District-required change control processes and any potential impacts that these processes may have on the installation schedule.
        v. Schedule technical discovery meeting(s).
        vi. Review and discuss invoicing preferences and applicable billing milestones.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Planning

Technical Requirements and Design Meeting(s)

1. District will provide Netsync:
    a. Current IP addressing schemes, network diagrams, and configurations relevant to the project details.
2. Netsync will review existing District-provided IP addressing, network diagrams, and configurations looking for opportunities to increase functionality, security, and manageability.
3. Netsync will work with District to review the core and LAN configuration, including but not limited to:
    a. Understand and implement District's current IP addressing scheme.
    b. Review switch naming convention.
    c. Create a virtual LAN (VLAN) plan with a minimum of 10 VLANs and up to a maximum of 15 VLANs.
    d. Determine Quality and Class of Service (QoS/CoS) configurations necessary to support multiple classes of traffic and queue prioritization based on documented best practices.
    e. Discuss configuration options for both Layer 2 and Layer 3 to increase network reliability and performance.
    f. System management:
        i. Integrate with existing authentication, authorization, and accounting (AAA) systems, if available (RADIUS, TACACS, etc.).
        ii. Remote management options (Secure Shell [SSH], Telnet, etc.).
    g. System monitoring:
        i. Simple Network Management Protocol (SNMP) configurations, community strings, and passwords for all devices.
        ii. Syslog server settings.

    Note: Netsync will configure the switches to match District's current configuration. A network redesign and/or configuration changes are outside the scope of this project.
4. Netsync will perform a site walkthrough of each District location at least one week before deployment to:
    e. Evaluate rack space, switch connectivity, and power availability.
    f. Verify final plan for migration and port counts on all devices to be connected.
5. Netsync will review the Bill of Materials (BOM) provided as part of the proposal with the findings from the site surveys to verify any quantity changes.

    Note: Any additions to the design will be priced using the unit pricing provided.
6. Netsync will determine a test plan with District. District will need to provide Netsync with a list of applications that should be tested before and after cutover.
7. Netsync will document all findings, recommendations, and implementation details, including network diagrams.
8. Netsync will review the finalized implementation plan with District before beginning implementation.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Equipment Receipt, Staging, and Delivery

Staging and implementation will only begin upon District approval of the Low-Level Design (LLD) document. Staging excludes any uninterruptible power supply (UPS) devices, batteries, and IP-related information. If applicable, Netsync will complete UPS deployment on site at District installation location(s).

1. Netsync will receive equipment in its own facility, unbox equipment, install configurations and test for any anomalies, replace any equipment that does not burn in correctly, notify District of any additional needs that are discovered during the burn-in process, and prepare equipment for delivery to each respective location.
2. Netsync will tag each device with a District asset tag and add to an inventory spreadsheet.
3. Netsync will provide inside-delivery of equipment to each respective location. Netsync may choose to deliver the equipment before installation (no more than three weeks in advance) or bring the equipment at the time of installation. Netsync will not deliver any equipment without prior written approval from District. If District chooses to pre-deliver the equipment, then it will provide a secured location for storage until installation.
4. This location must be accessible to Netsync employees for staging and configuration needs.

Implementation

Implementation will begin only after Discovery and Planning are 100% complete. District representative must be onsite to receive hardware and sign packing slip prior to installation.

Access Switch

1. Netsync will install the distribution and access switches listed in the Appendix into existing equipment rack location or area designated by District.
2. Netsync will configure the Cisco switches to include:
    a. Patch-in drops and fiber.
    b. Properly dress cables with Velcro.
    c. Configure switches based on configuration standards reviewed during technical Discovery.
    d. Perform testing:
        i. Test and validate each switch for proper functionality.
        ii. Validate ports that are associated with devices that are on specific VLANs are properly configured (e.g., cameras, APs, etc.).
3. Netsync will decommission existing switches:
    a. Uninstall existing switches determined during Planning.
    b. Provide an inventory of equipment removed in a data file.
    c. Box the older equipment and label boxes clearly to note included contents.
    d. Deliver boxes to a centralized District location.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Testing and Validation

1. Netsync will perform Testing and Validation as agreed on during the Technical Review and Design meeting.

Knowledge Transfer

1. Netsync will provide two hours of knowledge transfer for up to five District attendees. Before the project start, Netsync will work with District to define the specific location, the schedule, and any additional topics for the knowledge transfer session(s). The following topics will be covered:
    a. Features of products and technologies as deployed in the solution.
    b. Review of the as-built documentation to familiarize District with the overall solution and key configuration details.
    c. Basic administration and common operational tasks.
    d. Reinstallation and/or reconfiguration in case of failure.
    e. Monitoring, testing, and maintaining the products deployed in the solution.
    f. Warranty and support procedures for all products deployed in the solution.
    g. Additional District questions or topic requests.
2. If it is determined that the duration of knowledge transfer requested by District will exceed the hours stated above, then Netsync can provide supplementary session(s) at an additional hourly rate.

Note: Knowledge transfer is intended to provide familiarity and conceptual understanding of the specific technologies deployed within this SOW. It is not intended to be comprehensive technical training. The included session(s) may not provide District all the necessary knowledge and skills to fully manage, monitor, and maintain the solution. Netsync recommends formal training from the solution vendor(s) to address those needs.

Project Prerequisites

1. District will fulfill cabling requirements, if applicable.
2. District will provide Netsync all necessary hardware and information on current environment.
3. District will provide Netsync local and remote administrative credentials (root access) to all equipment to be accessed during the process of this SOW.
4. District will make available authorized personnel during the project with a working knowledge of existing network infrastructure for facility access, questions, and clarification of issues.
5. District will provide Netsync access to all work locations, along with safety, access, security, and emergency protocols.
6. District will obtain all necessary work permits.
7. District will provide a work area for Netsync to use, as needed, during on-site activities to include internet and public phone access.
8. District will provide parking passes and adequate parking for the Netsync project team.
9. District will comply with all physical and environmental requirements per vendor specifications.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Management

Netsync approaches all projects using standard Project Management Institute (PMI) methodologies and processes. Once a Project Manager (PM) is assigned, a project kickoff meeting will be held with District, the PM, the Account Manager (AM), and assigned technical resource(s) to ensure each party is in alignment with all aspects of this SOW. The PM will also perform the following project management activities throughout the engagement to ensure District expectations are consistently met, and the project is delivered on time and within the established budget:

- Create the Project Plan.
- Ensure that accurate and timely status updates, action items, and scheduled tasks are received by the assigned resource(s) and uploaded as entries to District's applicable project portal. The PM will ensure status information clearly reaches District to also include milestone updates.
- Lead project meetings with District and the Netsync project team.
- Oversee a quality assurance review of documentation-based deliverables before providing to District.

Project Management Office (PMO) Project Lifecycle

* Denotes that the step in the process may or may not be applicable based on SOW.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Updates

- District will receive email alerts indicating an update has been made to the Notes-Status-Issues Log portal web part for the following communication entry types:
    - Meeting Notes.
    - Project Plan.
    - Status Update(s).
    - Issue Tracking.
- If District wishes not to use the Netsync project portal, then District has the option to request direct email correspondence from the Netsync PM for all communication and updates.

Project Scope Change Requests

Netsync is fully committed to completing this project on time and within the established budget. All scope changes and out-of-scope (OOS) requests must be clearly communicated to the AM or PM before those changes or requests are acted on or performed by the assigned resource(s). The following outlines the scope change or OOS request procedure:

5. The PM and District project team will identify required changes.
6. The PM will submit a Project Change Request Form (CR).
7. The PM will submit the CR to District for subsequent approval and sign-off.
8. District will return a signed copy of the CR.

All other terms within the original SOW, in addition to the signed CR, will remain intact.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Documentation

Netsync will provide District the following documentation:

Included (Yes/No)	Document Type	Owner	Description	Frequency
Documentation				
Yes	Statement of Work (SOW)/High-Level Design (HLD)	Solutions Architect and Account Manager	Description of scope based on presales discussions, preliminary walkthroughs, and data gathering sessions. This SOW is the HLD, and presents and illustrates the overall solution.	Once
Yes	Low-Level Design (LLD)	Engineer	The LLD will replace all existing HLDs upon receipt of a purchase order and subsequent full walkthroughs and formal post-sales planning and design sessions. The LLD will be a fully executed document agreed to by both parties before implementation begins.	Once
Yes	Project Plan	PM and Senior Lead Engineer	Task list, schedule, contact list, meeting notes, status, risk, and issue tracking.	Ongoing
No	Method of Procedure (MOP)	PM and Senior Lead Engineer	Detailed implementation plan.	Once
Yes	As-Built	Senior Lead Engineer	Post-implementation technical documentation of new configuration(s) and applicable support information.	Once
Yes	Project Sign-off	PM and District	Deliverables acceptance.	Once

Deliverables Acceptance

District will acknowledge receipt and acceptance, or rejection of all deliverables associated with this SOW within 10 business days of delivery (not including federal holidays). If such acknowledgement is not received within this period, then all deliverables will be deemed acknowledged and accepted.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Risks and Assumptions

1. District will participate in all design and planning sessions and be prepared to sign off on all milestones.
2. District will provide Netsync with full access to the relevant functional, technical, and business resources with adequate skills and knowledge to support the performance of services. If District's only method of providing Netsync remote access is through screen share, then additional fees may apply due to project duration extensions.
3. If applicable, Netsync will secure access points (APs) with plastic cable zip ties placed through the mounting bracket, unless District declines this service in writing via email.
4. Unless otherwise noted, all estimates are based on a single implementation trip, per site. District may be charged additional fees for additional onsite meetings.
5. Multiple outages may occur due to the nature of this project; however, they will all occur at scheduled and approved times.
6. District delays to provide Netsync the necessary data to accomplish each task may result in timeline changes.
7. Netsync is not responsible for project delays caused by other vendors and/or manufacturing issues that may impede progress and/or closure of Netsync SOW deliverables.
8. This SOW assumes that the engagement will be a combination of on-site and remote work to drive efficiency. If District requires a 100% on-site engagement, then District must notify Netsync before agreeing to this SOW.
9. If District requires a copy of Netsync's standard Certificate of Insurance (COI) with District-added endorsements, then it should allow up to 10 business days for delivery.
10. Netsync is not responsible for the functionality of District-provided existing equipment or licenses, and assumes that existing equipment and software is under a valid support contract.
11. Anything not specifically stated in this document is outside the scope of this SOW.

Service Level Agreement

Hours of Operation

Standard hours of operation are **8:00 AM to 5:00 PM local time Monday through Friday**. Netsync understands that due to the nature of the industry and work performed, after-hours and weekend availability are often required. In the event Netsync resources are required to perform work outside of the standard hours of operation, agreed-upon work windows will be discussed and subsequently documented via email.

- District will provide Netsync a minimum of three business days' notification for any non-emergency maintenance windows or periods of time.
- Netsync will provide District the best level of support for emergency maintenance windows based on qualified staff resource availability.
- A District project stakeholder or technical contact must be either on location or on-call during the agreed upon after-hours and/or weekend work window(s).

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Pricing and Fees

Fee Type

Fixed Price: The proposed hours are fixed. Additional hours required for in-scope work will not be invoiced unless OOS work is required.

Invoicing Type

Invoice terms are based on credit approval.

Unless specifically noted in the master services agreement (MSA) between District and Netsync, if applicable, Netsync will use the following invoicing type:

- **Milestone Invoicing**: A portion of the project will be invoiced based on achieving the following milestones in the project plan (see milestone table below); the PM will work with District, the AM, and Accounting for appropriate invoicing.

Netsync will send District invoice(s) on Net 30 terms for all applicable hardware, supplemental material, and licenses immediately after delivery and receipt of signed packing/delivery slips.

Project Milestones

This price is based on work taking place during standard hours of operations, **8:00 AM to 5:00 PM local time Monday through Friday**. Additional charges may be incurred for efforts that must be performed outside of this time frame.

Project Summary

Cleburne ISD ("CISD" or "District"), headquartered in Cleburne, TX, requested that Netsync Network Solutions ("Netsync") submit a statement of work (SOW) outlining District's upcoming District Wide Wireless Refresh project - MR78 Option in response to District's Request for Proposal (RFP) Form 470 No. 250008635.

The purpose of this project is to refresh the entire districts current wireless network.

District's current Cisco Centralized Wireless Network has reached end of life status. District has submitted an RFP to Netsync requesting new hardware and implementation services.

Netsync will stage, configure and install the equipment in the Appendix at the sites listed in the Appendix. Netsync will migrate the existing Cisco WLC configuration to Meraki.

Any configuration changes required for any other systems will be the responsibility of District including but not limited to authentication, authorization and accounting (AAA) servers, Dynamic Host Configuration Protocol (DHCP) servers, DNS servers and LAN switches.

Exceptions, Clarifications, and Assumptions

The primary focus of this section is to provide any exceptions Netsync took to the original RFP, as well as clarifications around our proposal. This section will also outline any assumptions Netsync made while creating the design.

Netsync has responded to the bid with pricing based on the information provided in the RFP and addendum. Please pay special attention to the exceptions and clarifications outlined below. Also note that the project counts per location are outlined in a table within the Appendix at the end of this SOW.

- If selected, Netsync will require a review of the design and Bill of Materials (BOM) in detail with District to verify that all of the components selected meet the project requirements. This will help ensure the equipment list and quantities support the best possible design.
- Netsync will work with District to make sure all assumptions, exceptions, and clarifications listed below and determined during Discovery are accepted and agreed upon before final pricing.
- Netsync has provided pricing for the specific quantities requested in the RFP. The RFP states that the quantities included are estimates. If additional quantities are needed, then these can be purchased for the unit cost provided within the proposal plus the associated labor to install.
- Multiple outages may occur due to the nature of this project; however, they will all occur at scheduled and approved times.
- Netsync is not responsible for project delays caused by other vendors and/or manufacturing issues that may impede progress of Netsync deliverables.
- Netsync is not responsible for configuration changes on any equipment not specifically stated in the SOW.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Network Implementation

- Configuration of switches and routers are out of scope for this project.
- It is assumed the network is fit for purpose, and configuration changes will be the responsibility of District.

Wireless Implementation

- If there are any locations that will require mounting the access point (AP) higher than 15 feet, then there will be additional charges for a mechanical lift unless District has a lift for use.
- Netsync did not create the wireless placement design; therefore, Netsync is not responsible for any design-related issues and cannot guarantee coverage in all desired areas. For the ideal design and coverage, Netsync recommends performing a wireless site survey before implementation to create the ideal placement design.
- The RFP did not specify the location-specific mounting requirements. An internal antenna AP is typically mounted horizontally on a ceiling grid at approximately 10 feet. For any AP that cannot be mounted in the typical format, there may be a more ideal model of AP, antenna, or additional mounting hardware required.
- If awarded, Netsync would like to review all placement locations with District and provide recommendations to help ensure the models purchased support the best possible design. It is District's responsibility to notify Netsync before ordering if any locations exist where APs cannot be mounted in a typical format.
- After wireless LAN (WLAN) system turn-up, there will be a period of radio frequency (RF) self-tuning. During this time, District should expect inconsistent and sporadic coverage, performance, and client connectivity. The expected duration of this self-tuning period should be three to five business days.

Project Objectives

- Perform a kickoff call with District and appropriate stakeholders to align expectations and outcomes.
- Conduct a technical requirements and design meeting with District to gather details.
- Stage equipment at Netsync staging facility.
- Configure equipment as determined during the design meeting.
- Deliver and install equipment at the prescribed campus locations.
- Perform testing as determined during the design meeting.
- Provide Day 1 support for the network on the go-live date.
- Provide a knowledge transfer session to review the implementation.
- Provide documentation.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Scope and Phases

Discovery

Kickoff Meeting

1. Netsync will conduct a kickoff meeting:
    a. Identify and introduce key stakeholders, who will participate in developing the definition of requirements for success.
    b. Identify project goals, success criteria, and timeline, including but not limited to:
        i. Review SOW.
        ii. Confirm contacts needed to gain entry and perform work in the buildings.
        iii. Confirm any holidays or “non-working” hours for the installation.
        iv. Confirm any District-required change control processes and any potential impacts that these processes may have on the installation schedule.
        v. Schedule technical discovery meeting(s).
        vi. Review and discuss invoicing preferences and applicable billing milestones.

Planning

Technical Requirements and Design Meeting(s)

1. District will provide Netsync:
    a. Wireless AP placement diagrams notating clearly:
        i. New AP placement locations.
        ii. Location of existing APs to be removed.
    b. Any necessary floor plans to be used for placement maps within Cisco Prime Infrastructure.
    c. Configuration details for existing wireless network.
2. Netsync will perform an objective review of the existing wireless LAN (WLAN) environment in terms of current functionality and implementation.
3. Netsync will work with District to review wireless configuration, as related to industry best practices, and security capabilities of the new equipment, including but not limited to:
    f. Understand and implement District’s current IP addressing scheme.
    g. Review wireless AP naming convention.
    h. AP configuration (service set identifiers [SSIDs], virtual LANs [VLANs], security, radio frequency [RF] settings, etc.).
    i. Type of client devices, 802.11a/b/g/n/ac, voice/data support, capacity requirements, performance requirements, accessibility/reliability requirements, infrastructure management, and client management.
    j. Security design pertaining to applicable wireless protocols and applications.

    Note: Netsync will configure the wireless to match District’s current configuration. A wireless redesign and/or configuration changes are outside the scope of this project.
4. Netsync will work with District to review the desired placement locations of the requested APs.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Note: The desired AP placement has been previously completed by District. Therefore, RF design is not required or included as part of this SOW.

5. Netsync will perform a site walkthrough of each District location at least one week before deployment to:
    g. Review and verify the placement locations for the new APs.
    h. Perform an in-depth survey to locate all existing APs.
6. Netsync will review the Bill of Materials (BOM) provided as part of the proposal with the findings from the site surveys to verify any quantity changes.

    Note: Any additions to the design will be priced using the unit pricing provided.
7. Netsync will determine a test plan with District. District will need to provide Netsync with a list of applications that should be tested before and after cutover.
8. Netsync will document all findings, recommendations, and implementation details, including AP placement maps.
9. Netsync will review the finalized implementation plan with District before beginning implementation.

Equipment Receipt, Staging, and Delivery

Staging and implementation will only begin upon District approval of the Low-Level Design (LLD) document. Staging excludes any uninterruptible power supply (UPS) devices, batteries, and IP-related information. If applicable, Netsync will complete UPS deployment on site at District installation location(s):

1. Netsync will receive equipment in its own facility, unbox equipment, install configurations and test for any anomalies, replace any equipment that does not burn in correctly, notify District of any additional needs that are discovered during the burn-in process, and prepare equipment for delivery to each respective location.
2. Netsync will tag each device with a District asset tag and add to an inventory spreadsheet.
3. Netsync will provide inside-delivery of equipment to each respective location. Netsync may choose to deliver the equipment before installation (no more than three weeks in advance) or bring the equipment at the time of installation. Netsync will not deliver any equipment without prior written approval from District. If District chooses to pre-deliver the equipment, then it will provide a secured location for storage until installation.
4. This location must be accessible to Netsync employees for staging and configuration needs.

Implementation

Implementation will begin only after Discovery and Planning are 100% complete. District representative must be onsite to receive hardware and sign packing slip prior to installation.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Meraki Wireless Dashboard

1. Netsync will configure the Meraki Dashboard to include:
    a. Work with District to either set up an account or login to existing Meraki Dashboard account.
    b. Add all new devices to the Meraki Dashboard.
    c. Set up “Network”(s) for APs.
    d. Create up to four service set identifiers (SSIDs).
    e. Configure security parameters.
    f. Configure Active Directory (AD) authentication.
    g. Configure firewall and traffic-shaping rules per SSID.
    h. Enable Bonjour forwarding for Apple TVs, if required.
2. Netsync will perform testing:
    a. Functionality of management web graphical user interface (GUI).
    b. Connectivity to RADIUS backend.
    c. Validate any other testing steps determined during the planning phase.

Meraki Access Point (AP)

1. Netsync will install and configure the new Cisco Meraki wireless APs to include:
    a. Mount APs per the AP placement maps created during Discovery.
    b. Label each AP based on placement location and include placement details in the Inventory spreadsheet.
    c. Verify APs are registered to the Cisco Meraki Dashboard and functioning correctly.
2. Netsync will place site-specific APs in appropriate locations on outdoor maps.
3. Netsync will perform testing:
    a. District connectivity to District-designated configured SSID determined in technical discovery.
    b. All deployed APs join the Cisco Meraki Dashboard (verify with District).
    c. Radio up/down state of all deployed APs.
    d. Validate any other testing steps determined during Planning.
    f. Collect approved and accurate floor plans for each building.

Testing and Validation

1. Netsync will perform Testing and Validation as agreed on during the Technical Review and Design meeting.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Knowledge Transfer

1. Netsync will provide eight hours of knowledge transfer for up to five District attendees. Before the project start, Netsync will work with District to define the specific location, the schedule, and any additional topics for the knowledge transfer session(s). The following topics will be covered:
    a. Features of products and technologies as deployed in the solution.
    b. Review of the as-built documentation to familiarize District with the overall solution and key configuration details.
    c. Basic administration and common operational tasks.
    d. Reinstallation and/or reconfiguration in case of failure.
    e. Monitoring, testing, and maintaining the products deployed in the solution.
    f. Warranty and support procedures for all products deployed in the solution.
    g. Additional District questions or topic requests.
2. If it is determined that the duration of knowledge transfer requested by District will exceed the hours stated above, then Netsync can provide supplementary session(s) at an additional hourly rate.

Note: Knowledge transfer is intended to provide familiarity and conceptual understanding of the specific technologies deployed within this SOW. It is not intended to be comprehensive technical training. The included session(s) may not provide District all of the necessary knowledge and skills to fully manage, monitor, and maintain the solution. Netsync recommends formal training from the solution vendor(s) to address those needs.

Project Prerequisites

1. District will fulfill cabling requirements, if applicable.
2. District will provide Netsync all necessary hardware and information on current environment.
3. District will provide Netsync local and remote administrative credentials (root access) to all equipment to be accessed during the process of this SOW.
4. District will make available authorized personnel during the project with a working knowledge of existing network infrastructure for facility access, questions, and clarification of issues.
5. District will provide Netsync access to all work locations, along with safety, access, security, and emergency protocols.
6. District will obtain all necessary work permits.
7. District will provide a work area for Netsync to use, as needed, during on-site activities to include internet and public phone access.
8. District will provide parking passes and adequate parking for the Netsync project team.
9. District will comply with all physical and environmental requirements per vendor specifications.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Management

Netsync approaches all projects using standard Project Management Institute (PMI) methodologies and processes. Once a Project Manager (PM) is assigned, a project kickoff meeting will be held with District, the PM, the Account Manager (AM), and assigned technical resource(s) to ensure each party is in alignment with all aspects of this SOW. The PM will also perform the following project management activities throughout the engagement to ensure District expectations are consistently met and the project is delivered on time and within the established budget:

- Create the Project Plan.
- Ensure that accurate and timely status updates, action items, and scheduled tasks are received by the assigned resource(s) and uploaded as entries to District's applicable project portal. The PM will ensure status information clearly reaches District to also include milestone updates.
- Lead project meetings with District and the Netsync project team.
- Oversee a quality assurance review of documentation-based deliverables before providing to District.

Project Management Office (PMO) Project Lifecycle

* Denotes that the step in the process may or may not be applicable based on SOW.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Updates

- District will receive email alerts indicating an update has been made to the Notes-Status-Issues Log portal web part for the following communication entry types:
  - Meeting Notes.
  - Project Plan.
  - Status Update(s).
  - Issue Tracking.
- If District wishes not to use the Netsync project portal, then District has the option to request direct email correspondence from the Netsync PM for all communication and updates.

Project Scope Change Requests

Netsync is fully committed to completing this project on time and within the established budget. All scope changes and out-of-scope (OOS) requests must be clearly communicated to the AM or PM before those changes or requests are acted on or performed by the assigned resource(s). The following outlines the scope change or OOS request procedure:

1. The PM and District project team will identify required changes.
2. The PM will submit a Project Change Request Form (CR).
3. The PM will submit the CR to District for subsequent approval and sign-off.
4. District will return a signed copy of the CR.

All other terms within the original SOW, in addition to the signed CR, will remain intact.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Documentation

Netsync will provide District the following documentation:

Included (Yes/No)	Document Type	Owner	Description	Frequency
Documentation				
Yes	Statement of Work (SOW)/High-Level Design (HLD)	Solutions Architect and Account Manager	Description of scope based on presales discussions, preliminary walkthroughs, and data gathering sessions. This SOW is the HLD, and presents and illustrates the overall solution.	Once
Yes	Low-Level Design (LLD)	Engineer	The LLD will replace all existing HLDs upon receipt of a purchase order and subsequent full walkthroughs and formal post-sales planning and design sessions. The LLD will be a fully executed document agreed to by both parties before implementation begins.	Once
Yes	Project Plan	PM and Senior Lead Engineer	Task list, schedule, contact list, meeting notes, status, risk, and issue tracking.	Ongoing
No	Method of Procedure (MOP)	PM and Senior Lead Engineer	Detailed implementation plan.	Once
Yes	As-Built	Senior Lead Engineer	Post-implementation technical documentation of new configuration(s) and applicable support information.	Once
Yes	Project Sign-off	PM and District	Deliverables acceptance.	Once

Deliverables Acceptance

District will acknowledge receipt and acceptance, or rejection of all deliverables associated with this SOW within 10 business days of delivery (not including federal holidays). If such acknowledgement is not received within this period, then all deliverables will be deemed acknowledged and accepted.

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Project Risks and Assumptions

1. District will participate in all design and planning sessions and be prepared to sign off on all milestones.
2. District will provide Netsync with full access to the relevant functional, technical, and business resources with adequate skills and knowledge to support the performance of services. If District's only method of providing Netsync remote access is through screen share, then additional fees may apply due to project duration extensions.
3. If applicable, Netsync will secure access points (APs) with plastic cable zip ties placed through the mounting bracket, unless District declines this service in writing via email.
4. Unless otherwise noted, all estimates are based on a single implementation trip, per site. District may be charged additional fees for additional onsite meetings.
5. Multiple outages may occur due to the nature of this project; however, they will all occur at scheduled and approved times.
6. District delays to provide Netsync the necessary data to accomplish each task may result in timeline changes.
7. Netsync is not responsible for project delays caused by other vendors and/or manufacturing issues that may impede progress and/or closure of Netsync SOW deliverables.
8. This SOW assumes that the engagement will be a combination of on-site and remote work to drive efficiency. If District requires a 100% on-site engagement, then District must notify Netsync before agreeing to this SOW.
9. If District requires a copy of Netsync's standard Certificate of Insurance (COI) with District-added endorsements, then it should allow up to 10 business days for delivery.
10. Netsync is not responsible for the functionality of District-provided existing equipment or licenses, and assumes that existing equipment and software is under a valid support contract.
11. Anything not specifically stated in this document is outside the scope of this SOW.

Service Level Agreement

Hours of Operation

Standard hours of operation are **8:00 AM to 5:00 PM local time Monday through Friday**. Netsync understands that due to the nature of the industry and work performed, after-hours and weekend availability are often required. In the event Netsync resources are required to perform work outside of the standard hours of operation, agreed-upon work windows will be discussed and subsequently documented via email.

- District will provide Netsync a minimum of three business days' notification for any non-emergency maintenance windows or periods of time.
- Netsync will provide District the best level of support for emergency maintenance windows based on qualified staff resource availability.
- A District project stakeholder or technical contact must be either on location or on-call during the agreed upon after-hours and/or weekend work window(s).

Property of Netsync Network Solutions. Confidential and Proprietary Information.
Do Not Copy or Distribute.

Pricing and Fees

Fee Type

Fixed Price: The proposed hours are fixed. Additional hours required for in-scope work will not be invoiced unless OOS work is required.

Invoicing Type

Invoice terms are based on credit approval.

Unless specifically noted in the master services agreement (MSA) between District and Netsync, if applicable, Netsync will use the following invoicing type:

- **Milestone Invoicing**: A portion of the project will be invoiced based on achieving the following milestones in the project plan (see milestone table below); the PM will work with District, the AM, and Accounting for appropriate invoicing.

Netsync will send District invoice(s) on Net 30 terms for all applicable hardware, supplemental material, and licenses immediately after delivery and receipt of signed packing/delivery slips.

Project Milestones

This price is based on work taking place during standard hours of operations, **8:00 AM to 5:00 PM local time Monday through Friday**. Additional charges may be incurred for efforts that must be performed outside of this time frame.

CW9163E Datasheet

Ultra-High Performance Wi-Fi 6E Wireless

The Cisco Wireless 9163E is an outdoor-rated, enterprise-class 802.11ax on-prem or cloud-managed access point. This AP is equipped with Tri-Band concurrent radios geared towards low/medium density applications. It will work with different external antennas for required directivity.

It features 2x2 Tri-Band traffic radios (2x2 2.4 GHz + 2x2 5 GHz + 2x2 6 GHz), 1x1 Tri-Band scanning radio and a 2.4 GHz IoT radio for (BLE/Zigbee/Thread etc.). It also has an inbuilt GNSS receiver for 6 GHz AFC compliance.

Figure 1.

CW9163E access point

Figure 2.

CW9163E, pictured with omnidirectional dipole antennas [CW-ANT-O1-NS-00]

Flexible Deployment Options

The Cisco Wireless 9163E outdoor Wi-Fi 6E access point is designed with a weatherized and robust enclosure, ensuring uninterrupted wireless access even in the most challenging outdoor environments. As part of the Cisco Wireless 916X series, these access points offer the flexibility to choose between on-premises and cloud management with the ability to change at any time, giving you the freedom to network your way. This next-generation access point is specifically designed to extend your Wi-Fi 6E network outdoors, catering to a wide range of use cases from campus environments and municipal Wi-Fi to stadiums, airport hangers, and everything in between. These access points are not only reliable and secure but also highly flexible and intelligent, adapting to your network requirements seamlessly.

The Cisco Wireless 9163E Wi-Fi 6E access points are equipped with three client-serving 2x2 radios, one IoT radio, and a tri-band scanning radio. It offers a range of advanced features, tailored to meet any outdoor Wi-Fi requirements. With options for a variety of external antennas, the CW9163E provides the flexibility to expand your 6GHz wireless coverage according to your specific needs.

Perfect for organizations that require extended 6GHz Wi-Fi coverage outside, the CW9163E combines high-density coverage with fast and dependable connectivity to address even the most demanding outdoor scenarios. The CW9163E includes a built-in GPS antenna to report location data to AFC services that enable standard power and outdoor operation. It also offers an optional external GPS antenna for extended satellite coverage. Standard power allows for increased range in both indoor and outdoor deployments, unlocking the full potential of 6 GHz Wi-Fi spectrum. By utilizing the 6 GHz band, these access points

neutralize interference, minimize latency, and provide wider channels and more spectrum resulting in higher bandwidth to address today's most crucial wireless requirements.

With the industry's leading on-premises network platform (Catalyst) joining the industry's leading cloud IT platform (Meraki), these access points deliver an unparalleled network experience. If your organization seeks a solution to provide an exceptional outdoor Wi-Fi experience, the Cisco Wireless 9163E Access Points are the optimal choice.

Note: AFC operation is dependent upon regulatory approval. Once approved by local governing bodies, 6 GHz will be enabled for outdoor use with standard power.

Features

Tri–radio aggregate frame rate of up to 3.9 Gbps*

A 6 GHz 2x2:2, 5 GHz 2x2:2 and 2.4 GHz 2x2:2 radio offer a combined tri–radio aggregate frame rate of 3.9 Gbps*. Technologies like transmit beamforming and enhanced receive sensitivity allow the CW9163E to support a higher client density than typical enterprise-class access points, resulting in better performance for more clients from each AP.

Note: " * " Refers to maximum over-the-air data frame rate capability of the radio chipset, and may exceed data rates allowed by IEEE 802.11ax operation.

IoT and Bluetooth Low Energy Radio

An integrated Bluetooth radio provides seamless deployment of BLE Beacon functionality and effortless visibility of Bluetooth devices. The CW9163E enables the next generation of location-aware applications while future-proofing deployments, ensuring it's ready for any new customer engagement strategies.

Automatic Cloud-based RF Optimization

The CW9163E's sophisticated and automated RF optimization means that there is no need for the dedicated hardware and RF expertise typically required to tune a wireless network. The RF data collected by the dedicated fourth radio is continuously fed back to the Meraki cloud. This data is then used to automatically tune the channel selection, transmit power, and client connection settings for optimal performance under even the most challenging RF conditions.

Integrated Enterprise Security and Guest Access

The CW9163E features integrated, easy-to-use security technologies to provide secure connectivity for employees and guests alike. Advanced security features such as AES hardware-based encryption and Enterprise authentication with 802.1X and Active Directory integration provide wired-like security while still being easy to configure. CW9163E will also support 192-bit encryption along with WPA3 support for added security of the wireless network.

One-click guest isolation provides secure, Internet-only access for visitors. To simplify secure retail deployments, PCI compliance reports check network settings against PCI requirements.

Dedicated scanning radio delivers 24x7 Air Marshal and RF analytics

There's no need to choose between wireless security (AirMarshal), advanced RF analysis, and serving client data. A dedicated scanning radio means that all functions occur in real-time, without any impact on client traffic or AP throughput.

The CW9163E's dedicated tri-band scanning radio security radio continually monitors the environment, characterizing RF interference and containing wireless threats like rogue access points. Containment is only possible in the 2.4 GHz and 5 GHz frequencies as 6 GHz requires Protected Management Frames (PMF).

Enterprise Mobility Management (EMM) & Mobile Device Management (MDM) integration

Meraki Systems Manager natively integrates with the CW9163E to offer automatic, context-aware security. System Manager's self-service enrollment helps to rapidly deploy MDM without installing additional equipment and then dynamically tie firewall and traffic shaping policies to client posture.

Application-aware traffic shaping

The CW9163E includes an integrated layer 7 packet inspection, classification, and control engine, enabling the configuration of QoS policies based on traffic

type, helping to prioritize mission-critical applications while setting limits on recreational traffic like peer-to-peer and video streaming. Policies can be implemented per network, SSID, user group, or individual user for maximum flexibility and control.

Voice and video optimizations

Industry-standard QoS features are built-in and easy to configure. Wireless Multimedia (WMM) access categories, 802.1p, and DSCP standards support all ensure important applications get prioritized correctly, not only on the CW9163E but also on other network devices on. Unscheduled Automatic Power Save Delivery (U-APSD) and Target Wait Time feature in 802.11ax clients ensure minimal battery drain on wireless VoIP phones.

Self-configuring, self-maintaining, always up-to-date

When plugged in, the CW9163E automatically connects to the Meraki cloud, downloads its configuration, and joins the appropriate network. Administrators can schedule automatic firmware upgrades for their Dashboard network seamlessly. This ensures the network is kept up-to-date with bug fixes, security updates, and new features.

Meraki Health

CW9163E will support all the latest and greatest analytics to provide AI/ML anomaly detection, server root cause analysis, wireless client scoring based on performance and connectivity metrics, and network benchmarking for networks of similar size and vertical. Along with these features, CW9163E will provide advanced location analytics via API and graphs in dashboard to provide a clear picture of client density and their movement across the floor plan.

Choice of Mode

Cisco Catalyst 9163E Access Points can be managed either on-premises with Catalyst 9800 Wireless Lan Controllers (WLC) or cloud-managed through the Meraki dashboard. Customers have the flexibility to deploy these access points in one mode and migrate to the other mode in the future.

Specifications

Category	Specifications
Radios	• 2.4 GHz 802.11b/g/n/ax client access radio • 5 GHz 802.11a/n/ac/ax client access radio • 6 GHz 802.11ax client access radio • 2.4 GHz, 5 GHz, and 6 GHz tri-band Air Marshal WIDS/WIPS, spectrum analysis, & location analytics radio • 2.4 GHz Bluetooth Low Energy (BLE) radio with Beacon and BLE scanning support Concurrent operation of all five radios
Antennas	**CW-ANT-O1-NS-00 Omnidirectional Dipole Self-Identifying Antenna with N-Type Connectors** • 2.4GHz: Peak gain 4 dBi, omnidirectional in azimuth • 5GHz: Peak gain 8 dBi, omnidirectional in azimuth • 6GHz: Peak gain 8 dBi, omnidirectional in azimuth ⓘ One antenna per pack. Four antennas are required to fully populate all ports. **CW-ANT-D1-NS-00 4-Port Directional Patch Self-Identifying Antenna with N-Type Connectors** • 2.4 GHz: Peak gain 8 dBi, directional antenna, (75x30) • 5 GHz: Peak gain 9 dBi, directional antenna, (60x30)

- 6 GHz: Peak gain 9 dBi, directional antenna, (72x27)

CW-ANT-GPS2-S-00 Active GNSS/GPS Antenna with RP-SMA Connector

- Optional GNSS/GPS external antenna
- L1/L5 frequency bands
- Integrated mounting bracket for wall or pole mounting
- 10ft cable with RP-SMA connector

802.11 ax compatible, 802.11ac Wave 2 and 802.11n Capabilities

- UL/DL-OFDMA
- Target Wait Time (TWT)
- BSS coloring*
- 2x2 MIMO with two spatial streams
- Maximal ratio combining (MRC)
- 802.11ax beamforming
- 20 and 40 MHz* channels (802.11n)
- 20, 40*, 80 MHz channels (802.11ac Wave 2)
- 20, 40*, 80 and 160MHz channels (802.11ax)

Note: *40MHz channels are supported only in 5 & 6 GHz bands

- Up to 1024-QAM on 2.4 GHz, 5 GHz and 6 GHz bands
- Packet aggregation - A-MPDU (transmit and receive), A-MSDU (transmit and receive)

Power

- Power over Ethernet: 42.5 - 57 V (PoE+ and UPoE compliant)
- Power requirement: Up to 25W (PoE+)
- Power over Ethernet injector sold separately

Actual power consumption may vary depending on the AP usage

Interfaces

- 1x 100M/1000M/2.5G Multigigabit Ethernet (RJ-45)
- Management console port (RJ-45)
- 4x N-Type Wi-Fi Antenna Connectors
- RP-SMA Active GPS/GNSS Antenna Connector

Mounting

- Wall and pole (2.5” to 3.9” diameter) mount capable
- Compatible with MA-MNT-MR-16 (included) and AIR-MNT-VERT1

Security	• Integrated Layer 7 firewall with mobile device policy management • Real-time WIDS/WIPS with alerting and automatic rogue AP containment with Air Marshal • Flexible guest access with device isolation • VLAN tagging (802.1q) and tunneling with IPsec VPN • PCI compliance reporting • WPA2-PSK, WPA2-Enterprise, WPA3 - Personal, WPA3 - Enterprise, WPA3 - Enhanced Open (OWE) • EAP Local authentication - EAP-TTLS/PAP, PEAP-GTC, EAP-TLS • Advanced Encryption Standard (AES) • Enterprise Mobility Management (EMM) & Mobile Device Management (MDM) integration • Cisco ISE integration for Guest access and BYOD Posturing
Quality of Service	• Advanced Power Save (U-APSD) • WMM Access Categories with DSCP and 802.1p support • Layer 7 application traffic identification and shaping
Mobility	• PMK, OKC, & 802.11r for fast Layer 2 roaming • Distributed or centralized layer 3 roaming
Analytics	• Embedded location analytics reporting and device tracking • Global L7 traffic analytics reporting per network, per device, & per application
LED Indicators	• One power/booting/firmware upgrade status
Reliability	Mean Time Between Failure (MTBF): • 468,413 hrs at 77°F (25°C) operating temperature • 128,631 hrs at 149°F (65°C) operating temperature
Dimensions (W x L x H)	• Access point (without mounting brackets): • CW9163E: 9.64 x 9.64 x 2.5 in. (245 x 245 x 63.5 mm)
Weight	• 3.3 lb (1.50 kg)

- 802.3at Power over Ethernet Plus (PoE+), 802.3af Power over Ethernet (PoE)

Input power requirements

Power Source	2.4GHz radio	5GHz radio	6GHz radio	Link speed
802.3at (PoE+)	2x2	2x2	2x2	2.5 Gbps
802.3af (PoE)	1x1	1x1	off	1Gbps

Note: Actual power consumption may vary depending on AP usage. It is recommended that you ensure that LLDP/CDP is enabled to a

Environmental

- Nonoperating (storage) temperature: -22° to 158°F (-30° to 70°C)
- Nonoperating (storage) altitude test: 25°C (77°F) at 15,000 ft (4600 m)
- Operating temperature: -40° to 149°F (-40° to 65°C) without solar derating
- Operating temperature: -40° to 131°F (-40° to 55°C) with solar derating
- Operating humidity: 5% to 95% (noncondensing)
- Operating altitude test: 40°C (104°F) at 9843 ft (3000 m)
- Ingress Protection: IP67
- Wind resistance up to 100 mph (161 km/h) sustained winds and 165 mph (266 km/h) wind gusts
- Icing protection: MIL-STD-810F,13mm 13mm (0.5 in.)
- Corrosion: NEMA 250-2008 (600 hrs. salt, 1200 hrs. mixed gas)
- Solar radiation: EN 60068-2-5 (753 W/m2)
- Vibration: MIL-STD-810E, Method 514.4 (0.41 Grms from 5Hz to 500Hz, 2 hours per each axis X,Y,Z)

System memory

- 2048 MB DRAM
- 1024 MB flash

Warranty

- Outdoor access point
- 1 year hardware warranty with advanced replacement included

Available transmit power settings

CW9166 Datasheet

Ultra-High Performance Wi-Fi 6E Wireless

Tri-band 802.11ax-compatible access point with separate radios dedicated to security, RF management, and Bluetooth® coupled with a USB port for added connectivity options.

Figure 1.

Catalyst 9166 Series access point

Figure 2.

Catalyst 9166D1, pictured with different configurations utilizing a bracket [AIR-AP-Bracket-2] and articulating arm [CW-MNT-ART2-00]

Flexible Deployment Options

The Cisco Catalyst 9166 Series Access Points (AP) allow you to choose between on premises and cloud management. They are the next-generation APs perfect for mission critical deployments and support the new 6GHz band for Wi-Fi. They are resilient, secure, and intelligent.

The Cisco Catalyst 9166 series Wi-Fi 6E access points enable operation in the 6GHz band to produce a network that is more reliable and secure, with higher throughput, more capacity, and less device interference. These access points provide three 4x4 radios and a host of cutting-edge features, including integrated environmental sensors (Only in DNA Mode) and IoT radios. The Catalyst 9166 Series even offers an internal directional antenna model - the Catalyst 9166D1 - designed for use cases and areas with high ceilings such as auditoriums, warehouses, and other large open space areas. The Catalyst 9166D1 should be leveraged where typically external antennas would be required. And because the Catalyst 9166D1 uses a built-in directional antenna, it eliminates the need for additional hardware to achieve ideal wireless coverage.

Operational management is flexible because customers can change their network management whenever they want. If a network with Cisco Catalyst 9166 Series Access Points was originally an on-premises deployment, it can be changed to cloud-based management without the need to purchase and redistribute additional hardware, saving you money as you network your way.

With the industry's leading on-premises network platform (Catalyst) joining the industry's leading cloud IT platform (Meraki), these access points provide an unparalleled network experience. For organizations that need a wireless solution to deliver a reliable, flexible, and superior experience for your users, the Cisco Catalyst 9166 Series Access Points are the best choice.

Cisco Meraki Cloud Management

Pairing the Cisco Catalyst 9166 Series Access Points with the Meraki cloud platform gives organizations a unified IT experience for network monitoring and management. The Meraki dashboard provides an intuitive and interactive web interface connecting your network to the industry's leading cloud IT platform.

Through the dashboard, Meraki provides sophisticated and scalable tools to automate network optimization, deploy policy and segmentation configurations across thousands of sites and devices, and manage a full-stack network from SD-WAN to Access to IoT technologies. The platform supports over 3.5 million active networks around the world.

Working together, the Catalyst 9166 Series and Cisco Meraki offer such features as:

- Cisco Spaces
- Cisco Identity Services Engine
- Meraki Health intelligent optimization and assurance

- Meraki Vision, smart cameras, and sensors for network closet monitoring

Cisco DNA and Catalyst 9800 WLC support

Cisco Catalyst 9166 Series Access Points can also be paired with Catalyst 9800 WLC and Cisco Catalyst Center. Cisco Catalyst Center allows you to understand your network with real-time analytics, quickly detect and contain security threats, and easily provide network-wide consistency through automation and virtualization.

Working together, the Catalyst 9166 Series and Cisco DNA offer such features as:

- Cisco Spaces
- Cisco Identity Services Engine
- Cisco DNA Analytics and Assurance along with Intelligence Capture (iCAP)
- For information about Cisco DNA, refer to the Cisco DNA Solution Overview.

Software configurable flex radio architecture for 6 GHz support

The Cisco Catalyst Wireless 9166 supports a software-defined flex radio which can be operated in either a 5 GHz or 6 GHz mode. This provides an option to operate the AP in either a dual 5 GHz configuration or a true tri-band configuration.

Tri-band configuration unlocks the use of the new spectrum in the 6 GHz frequency range, which provides additional channels to increase throughput and reduce interference and noise from legacy devices. 6 GHz support ensures that the CW9166 supports future technologies.

High-Performance 802.11ax compatible wireless

The CW9166 is a cloud-managed 4x4:4 802.11ax compatible access point that raises the bar for wireless performance and efficiency. Designed for next-generation deployments in offices, schools, hospitals, retail shops, and hotels, the CW9166 offers high throughput, enterprise-grade security, and simple management.

The CW9166 provides a maximum of 7.78 Gbps* aggregate frame rate with concurrent 2.4 GHz, 5 GHz, and 6 GHz radios. A dedicated fourth radio provides real-time WIDS/WIPS with automated RF optimization, and a fifth integrated IoT radio delivers Bluetooth scanning and beaconing.

With the combination of cloud management, high-performance hardware, multiple radios, and advanced software features, the CW9166 makes an outstanding platform for the most demanding of uses—including high-density deployments and bandwidth or performance-intensive applications like voice (Cisco WebEx) and high-definition video.

CW9166 and Meraki cloud management

Management of the CW9166 is through the Meraki cloud, with an intuitive browser-based interface that enables rapid deployment without time-consuming deployment complexity and time-consuming staging process. Since the CW9166 is self-configuring and managed over the web, it can be deployed at a remote location in a matter of minutes, even without on-site IT staff.

24x7 monitoring via the Meraki cloud delivers real-time alerts if the network encounters problems. Remote diagnostic tools enable immediate troubleshooting over the web so that distributed networks can be managed with a minimum of hassle.

The CW9166's firmware is automatically kept up to date via the cloud. New features, bug fixes, and enhancements are delivered seamlessly over the web. This means no manual software updates to download or missing security patches to worry about.

Product Highlights

- 4x4:4 UL/DL MU-MIMO 802.11ax compatible
- 7.78 Gbps tri-radio aggregate frame rate
- 24x7 real-time WIDS/WIPS and spectrum analytics via dedicated Scanning radio
- Integrated Bluetooth Low Energy Beacon and scanning radio
- Single 5 Gbps mGig Ethernet port support
- USB 2.0 host interface (Type A connector) with 4.5W power budget
- Enhanced transmit power and receive sensitivity
- Full-time Wi-Fi location tracking via dedicated Scanning radio
- Integrated enterprise security and guest access
- Application-aware traffic shaping
- Optimized for voice and video
- Self-configuring, plug-and-play deployment
- Sleek design blends into office environments

Features

Tri–radio aggregate frame rate of up to 7.78 Gbps*

A 6 GHz 4x4:4, 5 GHz 4x4:4 and 2.4 GHz 4x4:4 radio offer a combined tri–radio aggregate frame rate of 7.78 Gbps*. Technologies like transmit beamforming and enhanced receive sensitivity allow the CW9166 to support a higher client density than typical enterprise-class access points, resulting in better performance for more clients from each AP.

* Refers to maximum over-the-air data frame rate capability of the radio chipset, and may exceed data rates allowed by IEEE 802.11ax operation.

Multi-User Multiple Input Multiple Output (MU-MIMO)

With support for features of 802.11ax, the CW9166 offers DL and UL MU-MIMO and OFDMA for more efficient transmission to multiple clients. Especially suited to environments with numerous mobile devices, MU-MIMO and OFDMA enable multiple clients to receive data simultaneously. This increases the total network performance and improves the end-user experience.

IoT and Bluetooth Low Energy Radio

An integrated Bluetooth radio provides seamless deployment of BLE Beacon functionality and effortless visibility of Bluetooth devices. The CW9166 enables the next generation of location-aware applications while future-proofing deployments, ensuring it’s ready for any new customer engagement strategies.

Automatic cloud-based RF Optimization

The CW9166’s sophisticated and automated RF optimization means that there is no need for the dedicated hardware and RF expertise typically required to tune a wireless network. The RF data collected by the dedicated fourth radio is continuously fed back to the Meraki cloud. This data is then used to automatically tune the channel selection, transmit power, and client connection settings for optimal performance under even the most challenging RF conditions.

Integrated Enterprise Security and Guest Access

The CW9166 features integrated, easy-to-use security technologies to provide secure connectivity for employees and guests alike. Advanced security features such as AES hardware-based encryption and Enterprise authentication with 802.1X and Active Directory integration provide wired-like security while still being easy to configure. CW9166 will also support 192-bit encryption along with WPA3 support for added security of the wireless network.

One-click guest isolation provides secure, Internet-only access for visitors. PCI compliance reports check network settings against PCI requirements to simplify

secure retail deployments.

Dedicated scanning radio delivers 24x7 Air Marshal and RF analytics

There's no need to choose between wireless security (AirMarshal), advanced RF analysis, and serving client data. A dedicated scanning radio means that all functions occur in real-time, without any impact on client traffic or AP throughput.

The CW9166's dedicated tri-band scanning radio security radio continually monitors the environment, characterizing RF interference and containing wireless threats like rogue access points. Containment is only possible in the 2.4 GHz and 5 GHz frequencies as 6 GHz requires Protected Management Frames (PMF).

Enterprise Mobility Management (EMM) & Mobile Device Management (MDM) integration

Meraki Systems Manager natively integrates with the CW9166 to offer automatic, context-aware security. System Manager's self-service enrollment helps to rapidly deploy MDM without installing additional equipment and then dynamically tie firewall and traffic shaping policies to client posture.

Application-aware traffic shaping

The CW9166 includes an integrated layer 7 packet inspection, classification, and control engine, enabling the configuration of QoS policies based on traffic type, helping to prioritize mission-critical applications while setting limits on recreational traffic like peer-to-peer and video streaming. Policies can be implemented per network, SSID, user group, or individual user for maximum flexibility and control.

Voice and video optimizations

Industry-standard QoS features are built-in and easy to configure. Wireless Multimedia (WMM) access categories, 802.1p, and DSCP standards support all ensure important applications get prioritized correctly, not only on the CW9166 but also on other network devices on. Unscheduled Automatic Power Save Delivery (U-APSD) and Target Wait Time feature in 802.11ax clients ensure minimal battery drain on wireless VoIP phones.

Self-configuring, self-maintaining, always up-to-date

When plugged in, the CW9166 automatically connects to the Meraki cloud, downloads its configuration, and joins the appropriate network. Administrators can schedule automatic firmware upgrades for their Dashboard network seamlessly. This ensures the network is kept up-to-date with bug fixes, security updates, and new features.

Meraki Health

CW9166 will support all the latest and greatest analytics to provide AI/ML anomaly detection, server root cause analysis, wireless client scoring based on performance and connectivity metrics, and network benchmarking for networks of similar size and vertical. Along with these features, CW9166 will provide advanced location analytics via API and graphs in Dashboard to provide a clear picture of client density and their movement across the floor plan.

Choice of Mode

Cisco Catalyst 9166 Series Access Points can be managed either on-premises with Catalyst 9800 Wireless Lan Controllers (WLC) or cloud-managed through the Meraki dashboard. Customers have the flexibility to deploy these access points in one mode and migrate to the other mode in the future.

Specifications

Category	Specifications

Radios	• 2.4 GHz 802.11b/g/n/ax client access radio • 5 GHz 802.11a/n/ac/ax client access radio • 6 GHz 802.11ax client access radio • 2.4 GHz, 5 GHz, and 6 GHz tri-band Air Marshal WIDS/WIPS, spectrum analysis, & location analytics radio • 2.4 GHz Bluetooth Low Energy (BLE) radio with Beacon and BLE scanning support Concurrent operation of all five radios
Antenna	• CW9166I ◦ 2.4 GHz: Peak gain 3 dBi, internal antenna, omnidirectional in azimuth ◦ 5 GHz: Peak gain 5 dBi, internal antenna, omnidirectional in azimuth ◦ 5 GHz: (XOR) Peak gain 5 dBi, internal antenna, omnidirectional in azimuth ◦ 6 GHz: Peak gain 4 dBi, internal antenna, omnidirectional in azimuth • CW9166D1 ◦ 2.4 GHz: Peak gain 6 dBi, directional antenna, (70x70) ◦ 5 GHz: Peak gain 6 dBi, directional antenna, (70x70) ◦ 5 GHz (XOR): Peak gain 8 dBi, directional antenna, (60x60) ◦ 6 GHz: Peak gain 8 dBi, directional antenna, (60x60)
802.11ax compatible, 802.11ac Wave 2 and 802.11n Capabilities	• UL/DL-OFDMA • Target Wait Time (TWT) • BSS coloring* • SU-MIMO and DL MU-MIMO support • Maximal ratio combining (MRC) • 802.11ax beamforming • 20 and 40 MHz* channels (802.11n) • 20, 40*, 80 MHz channels (802.11ac Wave 2) • 20, 40*, 80 and 160MHz channels (802.11ax) **Note:** *40MHz channels are supported only in 5 & 6 GHz bands. • Up to 1024-QAM on 2.4 GHz, 5 GHz and 6 GHz bands • Packet aggregation - A-MPDU (transmit and receive), A-MSDU (transmit and receive)

Power

- Power over Ethernet: 42.5 - 57 V (PoE+ and UPoE compliant)
- DC Power Adapter (54V)
- Power requirement USB: Up to 30.5W (UPOE)
- Power requirement No USB: Up to 25W (PoE+)
- Power over Ethernet injector and DC adapter sold separately

Actual power consumption may vary depending on the AP usage

CW9166I

Power Source	2.4 GHz radio	5 GHz radio	6 GHz radio	Link speed	USB	Maximum PoE Power consumption
802.3bt (UPOE)	4x4	4x4	4x4	5Gbps	Y (4.5W)	30.5W
802.3at (PoE+)	4x4	4x4	4x4	5Gbps	N	25 W
802.3af (PoE)	–	–	–	–	–	–
DC Power	4x4	4x4	4x4	5Gbps	Y	

CW9166D1

Power Source	2.4 GHz radio	5 GHz radio	6 GHz radio	Link speed	USB	Maximum PoE Power consumption
802.3bt (UPOE)	4x4	4x4	4x4	5Gbps	Y (4.5W)	30.5W
802.3at (PoE+)	4x4	4x4	4x4	5Gbps	N	25 W
802.3af (PoE)	–	–	–	–	–	–
DC Power	4x4	4x4	4x4	5Gbps	Y	

It is recommended that you ensure that LLDP is enabled to allow proper power negotiation

802.3af PoE is not supported

Interfaces

- 1x 100/1000/2.5G/5G BASE-T Ethernet (RJ45)
- 1x DC power connector (8 mm, center positive)
- USB 2.0 at 4.5W

- RJ45 Console port - Only available in DNA Mode
- Environmental Interfaces - Only available in DNA Mode

Mounting

- All Cisco standard mounting hardware supported (AIR-AP-BRACKET-2 included)
- Articulating Arm (CW-MNT-ART2-00 optional)
- Desktop, ceiling, wall, and pole mount capable
- Ceiling tile rail (9/16, 15/16, or 1 ½" flush or recessed rails), assorted cable junction boxes

Physical security

- Kensington lock slot

Environment

- CW9166I
  - Nonoperating (storage) temperature: -22° to 158°F (-30° to 70°C)
  - Nonoperating (storage) altitude test: 25˚C (77°F) at 15,000 ft (4600 m)
  - Operating temperature: 32° to 122°F (0° to 50°C)
  - Operating humidity: 10% to 90% (non-condensing)
  - Operating altitude test: 40˚C (104°F) at 9843 ft (3000 m)
- CW9166D1
  - Nonoperating (storage) temperature: -22° to 158°F (-30° to 70°C)
  - Nonoperating (storage) altitude test: 25°C (77°F) at 15,000 ft (4600 m)
  - Operating temperature: -4° to 122°F (-20° to 50°C)
  - Operating humidity: 10% to 90% (noncondensing)
  - Operating altitude test: 40°C (104°F) at 9843 ft (3000 m)

Reliability

Mean Time Between Failure (MTBF):

	• 1,128,980 hrs at 77°F (25°C) operating temperature • 289,596 hrs at 122°F (50°C) operating temperature
Physical Dimensions	• CW9166I ◦ 9.5 x 9.5 x 2.2 in. (241.3 x 241.3 x 56.9 mm) ◦ Weight: 3.54 lb. (1.60 kg) • CW9166D1 ◦ 9.5 x 9.5 x 2.28 in (241.3 x 241.3 x 57.9 mm) ◦ Weight: 3.50 lb (1.59 kg)
Security	• Integrated Layer 7 firewall with mobile device policy management • Real-time WIDS/WIPS with alerting and automatic rogue AP containment with Air Marshal • Flexible guest access with device isolation • VLAN tagging (802.1q) and tunneling with IPsec VPN • PCI compliance reporting • WPA2-PSK, WPA2-Enterprise, WPA3 - Personal, WPA3 - Enterprise, WPA3 - Enhanced Open (OWE) • EAP Local authentication - EAP-TTLS/PAP, PEAP-GTC, EAP-TLS • Advanced Encryption Standard (AES) • Enterprise Mobility Management (EMM) & Mobile Device Management (MDM) integration • Cisco ISE integration for Guest access and BYOD Posturing
Quality of Service	• Advanced Power Save (U-APSD) • WMM Access Categories with DSCP and 802.1p support • Layer 7 application traffic identification and shaping
Mobility	• PMK, OKC, & 802.11r for fast Layer 2 roaming • Distributed or centralized layer 3 roaming
Analytics	• Embedded location analytics reporting and device tracking • Global L7 traffic analytics reporting per network, per device, & per application

LED Indicators	• One power/booting/firmware upgrade status
Regulatory	• RoHS • For additional country-specific regulatory information, please contact Meraki sales
Warranty	• Indoor access point • Lifetime hardware warranty with advanced replacement included

COST PROPOSAL 20

Firm Profile

*Impacting communities **for good.***

MGT brings ***fifty years*** of experience driving positive social change and performance in education, government, nonprofits, and critical infrastructure/private industries through ***assisting clients to strengthen their foundation, change systematically, and enable resiliencies for long-lasting change.*** Since inception, MGT has significantly grown and capacity – working with state and local governments and education partners. Today, we bring a team of over **900 professionals** who offer in-depth market knowledge and understanding so we can hit the ground running.

MGT | FIRST LOOK

Name: MGT Impact Solutions, LLC (MGT)

Locations: Headquarters in Tampa Florida; branch offices nationwide

Structure: Privately held, employee-owned, client-driven Limited Liability Company

Lines of Business: Strategy and Implementation, Performance and Operations, IT Infrastructure, and Cyber Security and Resilience for public sector and commercial companies.

MGT is a privately held, employee-owned and financially stable limited liability company with a deep roster of staff and a commitment to serving the public. Our clients care about addressing the world's most-pressing problems, and so do we. Their "why" is our why.

What sets us apart is our ability to customize and offer individualized support but also the resources of a larger infrastructure to enable flexibility in impacting to-scale. Throughout our history, MGT has successfully delivered more than **30,000 projects** through a thoughtful balance of balancing the "immediate" needs while changing systems to plan for future resilience and success.

Our Commitment

MGT embraces the most complex challenges on the leadership agenda, with deep commitment, agility, and local expertise to make a measurable and profound impact. Simply stated, **We are impacting communities for good.**

50 years

900 consultants

30,000 projects

Executive Summary

Cleburne ISD (CISD) has released a 470 form requesting hardware to refresh their routing, switching, and wireless networking infrastructure. MGT is proposing a professional services engagement scope of work to accompany the hardware proposal.

This proposal includes services to stage, configure, and install the following components:

- Qty 2 – Core Aruba CX8360's
- Qty 4 – Core Aruba CX 6300M's
- Qty 25 – Switch Aruba CX 6200M's
- Qty 822 – Aruba AP735 Access Points
- Qty 62 – Aruba AP675 Access Points
- Qty 34 – Aruba AP677 Access Points
- Qty 2 – Palo Alto 3420 Border Firewall

All of the proposed Aruba equipment also has Aruba Central management licensing for 5 years associated.

MGT has noted that Cleburne ISD requested pricing for Palo Alto 3420 hardware, maintenance, subscriptions, and Element Management in addition to a complete Palo Alto 3420 Firewall as a Service (FWaaS).

MGT is proposing the following purchase options for the Palo Alto Firewalls as redundant systems cannot be covered by E-Rate funding.

- Option 1: Cleburne ISD applies for funding to purchase the Primary Palo Alto 3420 hardware, maintenance, and subscriptions under the "Internal Connections" category and MGT Element Management\Monitoring under the "Managed Internal Broadband Services" category.
- Option 2: Cleburne ISD applies for funding to purchase the Primary Palo Alto 3420 as a service (FWaaS) with hardware, maintenance, subscriptions, and MGT Element Management\Monitoring wholly under the "Managed Internal Broadband Services" category.
- Option 3: Cleburne ISD applies for funding to purchase the Primary Palo Alto 3420 as a service (FWaaS) with hardware, maintenance, subscriptions, and MGT Element Management\Monitoring wholly under the "Managed Internal Broadband Services" category. Additionally, the district leverages aggressive pricing associated with this bid to purchase the secondary Palo Alto 3420 hardware, maintenance, subscriptions, and MGT Element Management\Monitoring out of local funds.

.

MGT Impact Solutions Architects, System Engineers, Project Managers, and Installers are very experienced in large-scale Security Network projects and will provide the district with the services required to ensure the organization can successfully meet the needs and expectations of Cleburne ISD.

Schools and Libraries Program Requirements

MGT Impact Solutions is eligible to participate in the Schools and Libraries Program and has obtained a Service Provider Identification Number (SPIN) from USAC. MGT Impact Solutions SPIN number is 143054314.

Scope of Work

This proposal contains MGT's proprietary and confidential information. It is not to be released or disclosed, in whole or in part, other than to those individuals who are directly involved in evaluating this report, without the prior express written consent of MGT.

CISD and MGT stakeholders will conduct a formalized Scope of Work creation and review process upon award of this RFP. Below is a preview of MGT Impact Solutions' standard professional and manager services offerings.

Central Project Management

MGT will supply a project manager who will be responsible for the coordination and execution of the items contained within this scope of work. The goal is for the MTG's project manager to focus on completing the scope of services promptly.

MGT will assign a resource to project manage this scope of work. The project manager will be responsible for:

- Communication coordination - Coordinate meetings with Cleburne ISD's single point of contact to meet time frames and deliverables
- Time and resource management - Inform Cleburne ISD's single point of contact of changes or modifications to the project timeline
- Coordinating deliveries of electronics
- Inventory tracking - Keep detailed records of product quantities and descriptions (from the bill of materials provided within this scope of work) as they relate to specific sites
- Providing MGT's project status updates on a weekly conference call
- Coordinating resources with Cleburne ISD on the deployment of electronics
- Creating and maintaining a detailed project plan

Deliverables

- *Implementation plan including:*
    - *Detailed configuration items*
    - *Installation plan for proposed hardware*
    - *Testing and verification plan*

Network Design Formalization and Review

MGT will work with CISD staff to plan an updated network design. The network design process will be conducted in accordance with the MGT methodology. This is a standard, structured approach used by MGT and is managed in phases:

- Project initiation including preliminary information gathering.
- Data collection through meetings, interviews, and electronic capture.
- Data analysis including preparation of preliminary findings and recommendations.
- Preparation of results, findings, and recommendations into final design drawings and presentation.

MGT will perform the following:

- Review existing network documentation
- Review configurations from existing hardware
- Review settings for WAN\LAN on a per Site basis:
    - VLANs
    - IP Addressing
    - DHCP
    - DNS
    - Dynamic Routing protocols
    - Multi-Cast routing and distribution protocols
    - Spanning tree
    - QoS
    - ACL's
- Review settings for WLAN on a per Site basis:
    - VLANs
    - IP Addressing
    - DHCP
    - DNS
    - RADIUS/AD servers
    - SSID Design
    - Authentication methods
- Review access and badging requirements
- Review district naming and labeling scheme
- Review asset tagging requirements
- Review current CAD drawings/fire maps for AP placement
- Review existing Border Firewall Policies
- Conduct site walk through to determine:
    - Mounting locations and types
    - Identify if special mount is needed
    - Validate CAD drawings
    - Determine location for network drop additions, wiring closet locations and cabling installation requirements
- Update AP Placement maps
- Conduct site walk through to determine:
    - Available rack space in MDF/IDF Closets
    - Available power in MDF/IDF Closets
- Prepare minimal impact network implementation plan consisting of:
    - Firewall, WAN\LAN, and WLAN configuration parameters
    - Use cases and workflows translated from customer requirements
    - Identify critical path issues for implementation

    - Prepare plan for cutover activity to replace legacy equipment
- Build route\switch configurations structured around data collection and customer design requirements
- Build ap configurations structured around data collection and customer design requirements
- Migrate border firewall policy base from existing Palo Alto Appliances
- Create installation plan for all associated network hardware
- Create testing and verification plan

Deliverables

- *Network design document including:*
    - *WAN\LAN configuration*
    - *WLAN configuration*
    - *Site walk throughs to determine installation parameters*
- *Implementation plan including:*
    - *Detailed configuration items*
    - *Installation plan for proposed hardware*
    - *Testing and verification plan*

Lab Staging

MGT will receive equipment in our staging facility in Houston, Texas. Our environment has all the capabilities in place to create an "assembly line" of prestaging activities including unboxing and verifying no cosmetic defects, scanning of serial number/asset tag/ MAC Address information, affix approved labels, and manage the project's master documentation.

MGT will:

- Receive hardware
- Discard boxes, packing materials, and unnecessary manuals
- Stage Access Points
    - Take APs out of box to install mounting clip
    - Label AP with agreed upon name from district
    - Label AP with Asset Tag
    - Scan the AP serial numbers, MAC addresses, and asset tags into a spreadsheet that is used to assign an AP number that will correspond to the maps produced. This spreadsheet will also include the room number or location the AP was installed, AP name that will be programmed into the controller, type of AP, mounting information, and E-rate FRN (instructional site only)
    - Mark AP boxes for deployment to specific locations
    - Prepare any special boxes or mounts needed for installation
- Stage Routing and Switching hardware
    - Take equipment out of box to install mounting hardware
    - Label equipment with agreed upon name from district
    - Label equipment with Asset Tag
    - Scan the switch serial numbers, model, and asset tags into an inventory spreadsheet
    - Mark equipment boxes for deployment to specific locations
    - Perform any necessary firmware upgrades
- Stage Border Firewall
    - Take equipment out of box to install mounting hardware
    - Label equipment with agreed upon name from district
    - Label equipment with Asset Tag
    - Scan the switch serial numbers, model, and asset tags into an inventory spreadsheet
    - Mark equipment boxes for deployment to specific locations
    - Perform any necessary firmware upgrades

Deliverables:

- *Equipment prepped for physical installation*
- *Labels applied to network equipment*
- *Network equipment inventoried in spreadsheet*
- *APs prepped for physical installation*
- *Special mounting equipment prepped for physical installation*
- *Labels applied to APs*
- *APs inventoried in spreadsheet*
- *AP boxes labeled to identify location/room for installation*

Perform Firewall Implementation

MGT will conduct an out-of-hours activity to implement the border and public firewalls in accordance with the implementation plan created during the project planning phase.

MGT will:

- Conduct an out-of-hours cutover activity
- Perform configuration of the core router interfaces for new firewalls
- Connect firewalls to the network core
- Perform verification network connectivity
- Verify user access to applications
- Test failover performance in various scenarios
    - Firewall failure
    - Link failure to Network core

Deliverables:

- *Implement public firewall*
- *Validated failover*
- *Knowledge Transfer*

Routing and Switching Infrastructure Configurations

In order to perform the installation process properly MGT will follow the Aruba recommended best practices. The following processes must be strictly adhered to in order to maintain a supportable hardware and software configuration.

During the configuration process the customer agrees to commit to a configuration freeze regarding any specific configuration elements that may delay or otherwise negatively affect the execution of this scope of work. Any required configuration changes needed during this window that are performed outside of this scope of work and may impact the execution of this project should be communicated by the CISD team to MGT.

MGT will configure the following WAN\LAN parameters for CISD's Aruba Central Cloud Platform Deployment:

- Layer 3 Configurations
  - Dynamic routing protocols
  - Multicast Routing
  - Layer 3 Interfaces
  - DHCP relays
- Layer 2 Configurations
  - VLAN subnetting and interfaces
  - Spanning Tree
  - Multicast Snooping
  - Traffic QoS
  - Dynamic Interface profiles (Access Points)
  - QoS
- Administrative Configurations
  - NTP
  - DNS
  - Administrative Credentials
  - SNMP

Deliverables

- *WAN\LAN infrastructure configured as determined by customer requirements identified in the Network Design phase of this scope.*

WLAN Infrastructure Configurations

In order to perform the installation process properly MGT will follow the HPE/Aruba recommended best practices. The following processes must be strictly adhered to in order to maintain a supportable hardware and software configuration. MGT will require unrestricted access to the Central AOS-10 and existing WLAN infrastructure during the configuration process.

During the configuration process the customer agrees to commit to a configuration freeze regarding any specific configuration elements that may delay or otherwise negatively affect the execution of this scope of work. Any required configuration changes needed during this window that are performed outside of this scope of work and may impact the execution of this project should be communicated by the PISD team to MGT.

MGT will configure the following WLAN parameters for CISD's AOS-10 Cloud Platform Deployment:

- SSID Profiles
- Authentication profiles
    - Utilizing existing Authentication Servers where applicable
    - Utilizing existing pre-shared keys where applicable
    - Utilizing existing Captive Portal guest workflows where applicable
    - Utilizing existing MAC authentication workflows where applicable
- RF Profiles and Channel Plans
- WLAN client network interface profiles
    - Configuring access point uplinks to support L2 bridging for wireless clients at the campus edge.
- Site-based access point grouping
- Site-based maps for ap and client locations
- Network event reporting as determined by CISD
- Administrative access as determined by CISD

Deliverables

- *WLAN infrastructure configured as determined by customer requirements identified in the Network Design phase of this scope*

Access Point Installation

MGT will work with the district team to perform per site access point installations in accordance with the implementation schedule created in previous phases.

MGT will:

- Install new APs and mount
- Verify APs boot and connects to AOS-10 Cloud Platform
- Troubleshoot any problems, if needed
- Note location of APs on map if different than plan
- Provide update to network diagrams, final AP placement maps, and final cable plant documentation
- Import AP location into AOS-10 Cloud Platform for VisualRF heatmap
- Execute test plan to validate the installed wireless network systems
- Create necessary configuration groups in accordance with the network design created in previous phases

Deliverables:

- *Installed AP infrastructure*
- *Executed test plan*
- *Updated network diagrams, AP maps, and cable plant documentation*

Router\Switching Installation

MGT will work with the district team to perform per site access point installations in accordance with the implementation schedule created in previous phases.

MGT will:

- Install new Routers and Switches
- Remove existing hardware and deliver to designated CISD staging area
- Troubleshoot any problems, if needed
- Provide update to network diagrams and final cable plant documentation
- Execute test plan to validate the installed network systems

Deliverables:

- *Installed WAN\LAN infrastructure*
- *Executed test plan*
- *Updated network diagrams and cable plant documentation*

Post Implementation Support

MGT will provide remote support for one business day following successful completion of the deployment at each campus. During this time any unforeseen issues will be identified and resolved. Additionally, during this period MGT will deliver closing as-built documentation and provide basic instruction on the configuration and maintenance of the hardware devices provided.

MGT will:

- Conduct final verification testing for correct functionality according to test plan
- Provide as-built design documents containing detailed system configuration and installation specifications
- Brief customer or conduct installation-specific on-the-job instruction

Deliverables

- *Remote support for one business day following each campus cutover*

Remote Managed Services

MGT will provide remote managed firewall services for Cleburne ISD Palo Alto infrastructure. Services for this proposal will be facilitated from our 24/7 Operations Center in Atlanta via a secure connection to Cleburne ISD. Managed services will commence once onboarding services are complete.

Monitoring and Element Management Onboarding

Based on the data provided by Cleburne ISD, MGT will begin the managed services onboarding process.

During this process MGT will:

- Review existing ticketing process and workflow
- Work with Cleburne ISD staff to build out Saleforce.com (SFDC) event handling and notification playbooks
    - Firewall Monitoring
    - Carrier Circuit Monitoring
    - Firewall Element Management
    - Manufacturer Support Procedures
        - Palo Alto – Manufacturer
    - Escalations
- Document standard change control and approval processes
- Document emergency change control and approval processes
- Review maintenance patch/update schedules
- Review documentation standards
- Configure devices to support polling, send applicable logs, or SNMP traps
    - Firewalls
- Configure applicable default dashboards
    - Overview
- Test notifications procedures

Deliverables:

- *Implemented monitoring solution*
- *Documented playbooks and procedures*
- *Documented patch management process and schedules*
- *Verified manufacturer support contract access*
- *Applicable dashboards*
- *Tested notification procedures*

Remote Managed Services

MGT Network Operations Center staff will:

- Provide 24 x 7 x 365 proactive health monitoring
    - Active and passive polling
    - Establish monitoring baselines
    - Notify upon baseline deviations and outages
        - Equipment failure, loss of connectivity, spike in utilization, etc.

    - Process hardware RMAs as requested
    - Common point of contact including engineering escalation
- Provide online ticketing (Salesforce)
    - Auto-generation of ticketing
    - Online tracking of ticket status
    - Stale ticket escalation
    - Change control for all MACD efforts
- Provide dashboards based off onboarding requirements
    - Custom dashboards are available but may require additional SOW and fee
- Provide Network and Security management
    - Simple MACD
        - Palo Alto
- Provide WAN Carrier triage and support
- Provide Quarterly Business Reviews (onsite or remote at customer request)
    - Review ticketing
    - Review MACD completed
    - Review upcoming changes

Deliverables:

- *Online Ticketing and dashboards*
- *Remote 24x7 monitoring and notifications*
- *Remote element management services*
- *Quarterly reviews*

Remote Managed Service Level Agreements

MGT will provide managed services for the devices listed in the section below in accordance with the following service levels.

- Monitoring incidents notifications – within 30 minutes
- Moves/Adds/Changes within 24 hours
- Documented Change management process

MGT will keep Cleburne ISD appraised of all security incidents and provide regular reports detailing operational status of the network. Layer 3 Communications uses the following service level definitions for ticket workflow:

- High Priority (P1) – Critical security incident or service impacting outage – immediate notification upon identification of issue and root cause analysis report within 8 hours of remediation
- Medium Priority (P2) – Major security incident or severely degraded services – notification within 2 hours and root cause analysis report within 24 hours of remediation
- Low Priority (P3) – Minor security incident (e.g., false positive review) – notification within 24 hours
- No Priority (P4) – Non-service impacting request (e.g., whitelist or SIEM rule creation) – acknowledgement within 24 hours and completion within 72 hours (assumes manufacturer engagement is not required)

Managed Services Elements

MGT will provide monitoring and management of the following elements, with the attached service level defined above. Once this contract has been instantiated, the following chart will be completed for the master elements. Any devices that require customized visualization by MGT DevOps Engineers will be highlighted in red. Customization may not be complete prior to onboarding.

Name	Device Type	Quantity	Service Level
Border Firewalls	Palo Alto 3420	2	EMG\MNS

Account team will work with the customer to provide a detailed inventory for all devices and services delivered. This should include:

- Host name
- IP Address
- Any metadata tags
- SNMP Community String
- R/O Credentials for configuration backup
- Service level
- Carrier Information
    - Carrier Name
    - Support contact
    - Circuit commit rate

For any device requiring SNMP traps, device will need to be configured to send applicable data to Layer 3 Communications collector.

Project closeout

After all deliverables are met, we will meet to confirm that all portions of the project are complete and final invoicing is acceptable.

MGT will:

- Organize a closeout meeting to review final deliverables and conditions for project closure
    - Verified production services in accordance with test plan
    - As-built design documents
    - Configuration backups
    - Knowledge transfer

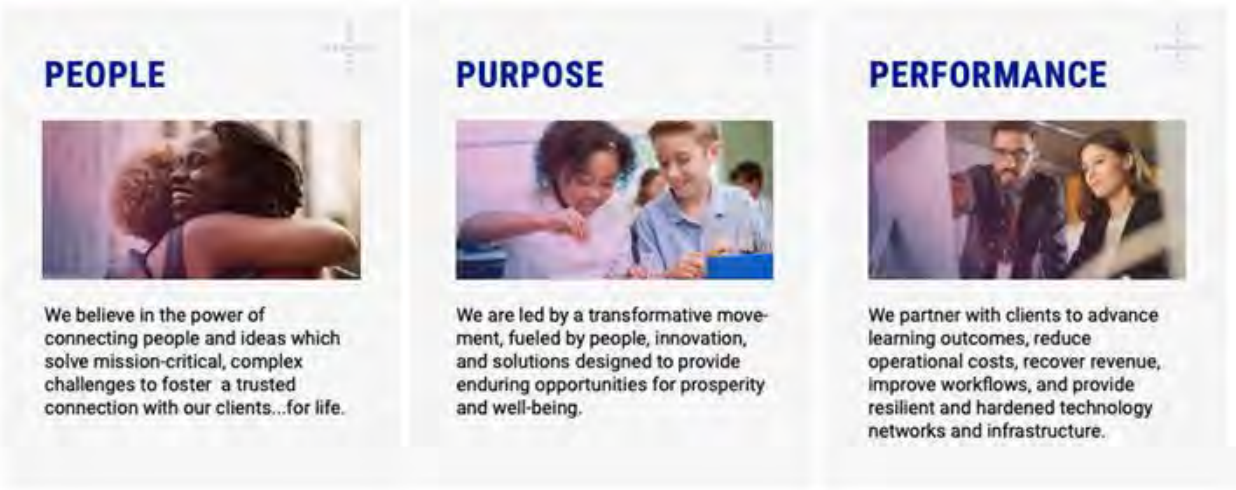
Deliverables

- *Documentation of completion*

Exceptions

Any tasks not listed above will need to be scoped as an additional billable engagement. Deployments with these exceptions will be scoped separately and will result in an addendum to this SOW.

Client Requirements



In order for MGT to effectively perform the desired services, we will require the assistance of CISD. These items will be required to be made available at a minimum of two weeks prior to an agreed upon implementation date. Failure to do so may result in the implementation being rescheduled at a later time. The customer is responsible for providing:

- An escort to provide access to controlled areas.
- Any passwords required to access the existing network equipment for configuration assessments and migrations.
- Remote VPN Access for element managed devices.
- Active support contracts for element managed devices.
- Active license subscriptions required for element managed devices.
- Execution of all tasks defined where customer instruction or customer responsibility is indicated - MGT will work largely in an advisory role and coordinate with customer for project execution.

Our MGT Vision

To achieve our mission of being the social impact and performance leader in our industry, we are continuously improving to earn the privilege of being selected as our clients' partner of choice in the mission-critical domains we impact. By elevating education systems, managing and securing critical networks, solving complex human capital and fiscal problems, and advancing equity as a performance imperative, we can impact communities, for good through client partnership.

We deliver these solutions through our "three-point stance" of technology, education, and performance offerings. With our long-term vision of creating profound social impact through client performance, we seek out the "best of the best" to join us in our work supporting clients' top priorities.

Cost Proposal

Defined by Impact. Driven by People. Dedicated to the Community.

Our cost proposal reflects our interpretation of the written requirements within your solicitation. With that understanding, we believe a scope clarification discussion during Project Initiation would allow us to confirm our understanding of your requirements and exchange ideas on how to manage the cost of this program. **We take pride in customizing our client's needs — and we will work with you to ensure our fees are aligned with your expectations and budget.**

MGT proposes to complete the CISD's project for a fixed fee cost. This includes professional fees and other costs (travel, surveys, postage, etc., as applicable). Pricing is firm for 30 days. Payment required upon completion of the project.

COST PROPOSAL 20

Firm Profile

*Impacting communities **for good.***

MGT brings ***fifty years*** of experience driving positive social change and performance in education, government, nonprofits, and critical infrastructure/private industries through ***assisting clients to strengthen their foundation, change systematically, and enable resiliencies for long-lasting change.*** Since inception, MGT has significantly grown and capacity – working with state and local governments and education partners. Today, we bring a team of over **900 professionals** who offer in-depth market knowledge and understanding so we can hit the ground running.

MGT | FIRST LOOK

Name: MGT Impact Solutions, LLC (MGT)

Locations: Headquarters in Tampa Florida; branch offices nationwide

Structure: Privately held, employee-owned, client-driven Limited Liability Company

Lines of Business: Strategy and Implementation, Performance and Operations, IT Infrastructure, and Cyber Security and Resilience for public sector and commercial companies.

MGT is a privately held, employee-owned and financially stable limited liability company with a deep roster of staff and a commitment to serving the public. Our clients care about addressing the world's most-pressing problems, and so do we. Their "why" is our why.

What sets us apart is our ability to customize and offer individualized support but also the resources of a larger infrastructure to enable flexibility in impacting to-scale. Throughout our history, MGT has successfully delivered more than **30,000 projects** through a thoughtful balance of balancing the "immediate" needs while changing systems to plan for future resilience and success.

Our Commitment

MGT embraces the most complex challenges on the leadership agenda, with deep commitment, agility, and local expertise to make a measurable and profound impact. Simply stated, **We are impacting communities for good.**

50 years

900 consultants

30,000 projects

Executive Summary

Cleburne ISD (CISD) has released a 470 form requesting hardware to refresh their routing, switching, and wireless networking infrastructure. MGT is proposing a professional services engagement scope of work to accompany the hardware proposal.

This proposal includes services to stage, configure, and install the following components:

- Qty 2 – Core Aruba CX8360's
- Qty 4 – Core Aruba CX 6300M's
- Qty 25 – Switch Aruba CX 6200M's
- Qty 822 – Aruba AP735 Access Points
- Qty 62 – Aruba AP675 Access Points
- Qty 34 – Aruba AP677 Access Points
- Qty 2 – Palo Alto 3420 Border Firewall

All of the proposed Aruba equipment also has Aruba Central management licensing for 5 years associated.

MGT has noted that Cleburne ISD requested pricing for Palo Alto 3420 hardware, maintenance, subscriptions, and Element Management in addition to a complete Palo Alto 3420 Firewall as a Service (FWaaS).

MGT is proposing the following purchase options for the Palo Alto Firewalls as redundant systems cannot be covered by E-Rate funding.

- Option 1: Cleburne ISD applies for funding to purchase the Primary Palo Alto 3420 hardware, maintenance, and subscriptions under the "Internal Connections" category and MGT Element Management\Monitoring under the "Managed Internal Broadband Services" category.
- Option 2: Cleburne ISD applies for funding to purchase the Primary Palo Alto 3420 as a service (FWaaS) with hardware, maintenance, subscriptions, and MGT Element Management\Monitoring wholly under the "Managed Internal Broadband Services" category.
- Option 3: Cleburne ISD applies for funding to purchase the Primary Palo Alto 3420 as a service (FWaaS) with hardware, maintenance, subscriptions, and MGT Element Management\Monitoring wholly under the "Managed Internal Broadband Services" category. Additionally, the district leverages aggressive pricing associated with this bid to purchase the secondary Palo Alto 3420 hardware, maintenance, subscriptions, and MGT Element Management\Monitoring out of local funds.

.

MGT Impact Solutions Architects, System Engineers, Project Managers, and Installers are very experienced in large-scale Security Network projects and will provide the district with the services required to ensure the organization can successfully meet the needs and expectations of Cleburne ISD.

Schools and Libraries Program Requirements

MGT Impact Solutions is eligible to participate in the Schools and Libraries Program and has obtained a Service Provider Identification Number (SPIN) from USAC. MGT Impact Solutions SPIN number is 143054314.

Scope of Work

This proposal contains MGT's proprietary and confidential information. It is not to be released or disclosed, in whole or in part, other than to those individuals who are directly involved in evaluating this report, without the prior express written consent of MGT.

CISD and MGT stakeholders will conduct a formalized Scope of Work creation and review process upon award of this RFP. Below is a preview of MGT Impact Solutions' standard professional and manager services offerings.

Central Project Management

MGT will supply a project manager who will be responsible for the coordination and execution of the items contained within this scope of work. The goal is for the MTG's project manager to focus on completing the scope of services promptly.

MGT will assign a resource to project manage this scope of work. The project manager will be responsible for:

- Communication coordination - Coordinate meetings with Cleburne ISD's single point of contact to meet time frames and deliverables
- Time and resource management - Inform Cleburne ISD's single point of contact of changes or modifications to the project timeline
- Coordinating deliveries of electronics
- Inventory tracking - Keep detailed records of product quantities and descriptions (from the bill of materials provided within this scope of work) as they relate to specific sites
- Providing MGT's project status updates on a weekly conference call
- Coordinating resources with Cleburne ISD on the deployment of electronics
- Creating and maintaining a detailed project plan

Deliverables

- *Implementation plan including:*
    - *Detailed configuration items*
    - *Installation plan for proposed hardware*
    - *Testing and verification plan*

Network Design Formalization and Review

MGT will work with CISD staff to plan an updated network design. The network design process will be conducted in accordance with the MGT methodology. This is a standard, structured approach used by MGT and is managed in phases:

- Project initiation including preliminary information gathering.
- Data collection through meetings, interviews, and electronic capture.
- Data analysis including preparation of preliminary findings and recommendations.
- Preparation of results, findings, and recommendations into final design drawings and presentation.

MGT will perform the following:

- Review existing network documentation
- Review configurations from existing hardware
- Review settings for WAN\LAN on a per Site basis:
    - VLANs
    - IP Addressing
    - DHCP
    - DNS
    - Dynamic Routing protocols
    - Multi-Cast routing and distribution protocols
    - Spanning tree
    - QoS
    - ACL's
- Review settings for WLAN on a per Site basis:
    - VLANs
    - IP Addressing
    - DHCP
    - DNS
    - RADIUS/AD servers
    - SSID Design
    - Authentication methods
- Review access and badging requirements
- Review district naming and labeling scheme
- Review asset tagging requirements
- Review current CAD drawings/fire maps for AP placement
- Review existing Border Firewall Policies
- Conduct site walk through to determine:
    - Mounting locations and types
    - Identify if special mount is needed
    - Validate CAD drawings
    - Determine location for network drop additions, wiring closet locations and cabling installation requirements
- Update AP Placement maps
- Conduct site walk through to determine:
    - Available rack space in MDF/IDF Closets
    - Available power in MDF/IDF Closets
- Prepare minimal impact network implementation plan consisting of:
    - Firewall, WAN\LAN, and WLAN configuration parameters
    - Use cases and workflows translated from customer requirements
    - Identify critical path issues for implementation

    - Prepare plan for cutover activity to replace legacy equipment
- Build route\switch configurations structured around data collection and customer design requirements
- Build ap configurations structured around data collection and customer design requirements
- Migrate border firewall policy base from existing Palo Alto Appliances
- Create installation plan for all associated network hardware
- Create testing and verification plan

Deliverables

- *Network design document including:*
    - *WAN\LAN configuration*
    - *WLAN configuration*
    - *Site walk throughs to determine installation parameters*
- *Implementation plan including:*
    - *Detailed configuration items*
    - *Installation plan for proposed hardware*
    - *Testing and verification plan*

Lab Staging

MGT will receive equipment in our staging facility in Houston, Texas. Our environment has all the capabilities in place to create an "assembly line" of prestaging activities including unboxing and verifying no cosmetic defects, scanning of serial number/asset tag/ MAC Address information, affix approved labels, and manage the project's master documentation.

MGT will:

- Receive hardware
- Discard boxes, packing materials, and unnecessary manuals
- Stage Access Points
    - Take APs out of box to install mounting clip
    - Label AP with agreed upon name from district
    - Label AP with Asset Tag
    - Scan the AP serial numbers, MAC addresses, and asset tags into a spreadsheet that is used to assign an AP number that will correspond to the maps produced. This spreadsheet will also include the room number or location the AP was installed, AP name that will be programmed into the controller, type of AP, mounting information, and E-rate FRN (instructional site only)
    - Mark AP boxes for deployment to specific locations
    - Prepare any special boxes or mounts needed for installation
- Stage Routing and Switching hardware
    - Take equipment out of box to install mounting hardware
    - Label equipment with agreed upon name from district
    - Label equipment with Asset Tag
    - Scan the switch serial numbers, model, and asset tags into an inventory spreadsheet
    - Mark equipment boxes for deployment to specific locations
    - Perform any necessary firmware upgrades
- Stage Border Firewall
    - Take equipment out of box to install mounting hardware
    - Label equipment with agreed upon name from district
    - Label equipment with Asset Tag
    - Scan the switch serial numbers, model, and asset tags into an inventory spreadsheet
    - Mark equipment boxes for deployment to specific locations
    - Perform any necessary firmware upgrades

Deliverables:

- *Equipment prepped for physical installation*
- *Labels applied to network equipment*
- *Network equipment inventoried in spreadsheet*
- *APs prepped for physical installation*
- *Special mounting equipment prepped for physical installation*
- *Labels applied to APs*
- *APs inventoried in spreadsheet*
- *AP boxes labeled to identify location/room for installation*

Perform Firewall Implementation

MGT will conduct an out-of-hours activity to implement the border and public firewalls in accordance with the implementation plan created during the project planning phase.

MGT will:

- Conduct an out-of-hours cutover activity
- Perform configuration of the core router interfaces for new firewalls
- Connect firewalls to the network core
- Perform verification network connectivity
- Verify user access to applications
- Test failover performance in various scenarios
    - Firewall failure
    - Link failure to Network core

Deliverables:

- *Implement public firewall*
- *Validated failover*
- *Knowledge Transfer*

Routing and Switching Infrastructure Configurations

In order to perform the installation process properly MGT will follow the Aruba recommended best practices. The following processes must be strictly adhered to in order to maintain a supportable hardware and software configuration.

During the configuration process the customer agrees to commit to a configuration freeze regarding any specific configuration elements that may delay or otherwise negatively affect the execution of this scope of work. Any required configuration changes needed during this window that are performed outside of this scope of work and may impact the execution of this project should be communicated by the CISD team to MGT.

MGT will configure the following WAN\LAN parameters for CISD's Aruba Central Cloud Platform Deployment:

- Layer 3 Configurations
  - Dynamic routing protocols
  - Multicast Routing
  - Layer 3 Interfaces
  - DHCP relays
- Layer 2 Configurations
  - VLAN subnetting and interfaces
  - Spanning Tree
  - Multicast Snooping
  - Traffic QoS
  - Dynamic Interface profiles (Access Points)
  - QoS
- Administrative Configurations
  - NTP
  - DNS
  - Administrative Credentials
  - SNMP

Deliverables

- *WAN\LAN infrastructure configured as determined by customer requirements identified in the Network Design phase of this scope.*

WLAN Infrastructure Configurations

In order to perform the installation process properly MGT will follow the HPE/Aruba recommended best practices. The following processes must be strictly adhered to in order to maintain a supportable hardware and software configuration. MGT will require unrestricted access to the Central AOS-10 and existing WLAN infrastructure during the configuration process.

During the configuration process the customer agrees to commit to a configuration freeze regarding any specific configuration elements that may delay or otherwise negatively affect the execution of this scope of work. Any required configuration changes needed during this window that are performed outside of this scope of work and may impact the execution of this project should be communicated by the PISD team to MGT.

MGT will configure the following WLAN parameters for CISD's AOS-10 Cloud Platform Deployment:

- SSID Profiles
- Authentication profiles
    - Utilizing existing Authentication Servers where applicable
    - Utilizing existing pre-shared keys where applicable
    - Utilizing existing Captive Portal guest workflows where applicable
    - Utilizing existing MAC authentication workflows where applicable
- RF Profiles and Channel Plans
- WLAN client network interface profiles
    - Configuring access point uplinks to support L2 bridging for wireless clients at the campus edge.
- Site-based access point grouping
- Site-based maps for ap and client locations
- Network event reporting as determined by CISD
- Administrative access as determined by CISD

Deliverables

- *WLAN infrastructure configured as determined by customer requirements identified in the Network Design phase of this scope*

Access Point Installation

MGT will work with the district team to perform per site access point installations in accordance with the implementation schedule created in previous phases.

MGT will:

- Install new APs and mount
- Verify APs boot and connects to AOS-10 Cloud Platform
- Troubleshoot any problems, if needed
- Note location of APs on map if different than plan
- Provide update to network diagrams, final AP placement maps, and final cable plant documentation
- Import AP location into AOS-10 Cloud Platform for VisualRF heatmap
- Execute test plan to validate the installed wireless network systems
- Create necessary configuration groups in accordance with the network design created in previous phases

Deliverables:

- *Installed AP infrastructure*
- *Executed test plan*
- *Updated network diagrams, AP maps, and cable plant documentation*

Router\Switching Installation

MGT will work with the district team to perform per site access point installations in accordance with the implementation schedule created in previous phases.

MGT will:

- Install new Routers and Switches
- Remove existing hardware and deliver to designated CISD staging area
- Troubleshoot any problems, if needed
- Provide update to network diagrams and final cable plant documentation
- Execute test plan to validate the installed network systems

Deliverables:

- *Installed WAN\LAN infrastructure*
- *Executed test plan*
- *Updated network diagrams and cable plant documentation*

Post Implementation Support

MGT will provide remote support for one business day following successful completion of the deployment at each campus. During this time any unforeseen issues will be identified and resolved. Additionally, during this period MGT will deliver closing as-built documentation and provide basic instruction on the configuration and maintenance of the hardware devices provided.

MGT will:

- Conduct final verification testing for correct functionality according to test plan
- Provide as-built design documents containing detailed system configuration and installation specifications
- Brief customer or conduct installation-specific on-the-job instruction

Deliverables

- *Remote support for one business day following each campus cutover*

Remote Managed Services

MGT will provide remote managed firewall services for Cleburne ISD Palo Alto infrastructure. Services for this proposal will be facilitated from our 24/7 Operations Center in Atlanta via a secure connection to Cleburne ISD. Managed services will commence once onboarding services are complete.

Monitoring and Element Management Onboarding

Based on the data provided by Cleburne ISD, MGT will begin the managed services onboarding process.

During this process MGT will:

- Review existing ticketing process and workflow
- Work with Cleburne ISD staff to build out Saleforce.com (SFDC) event handling and notification playbooks
    - Firewall Monitoring
    - Carrier Circuit Monitoring
    - Firewall Element Management
    - Manufacturer Support Procedures
        - Palo Alto – Manufacturer
    - Escalations
- Document standard change control and approval processes
- Document emergency change control and approval processes
- Review maintenance patch/update schedules
- Review documentation standards
- Configure devices to support polling, send applicable logs, or SNMP traps
    - Firewalls
- Configure applicable default dashboards
    - Overview
- Test notifications procedures

Deliverables:

- *Implemented monitoring solution*
- *Documented playbooks and procedures*
- *Documented patch management process and schedules*
- *Verified manufacturer support contract access*
- *Applicable dashboards*
- *Tested notification procedures*

Remote Managed Services

MGT Network Operations Center staff will:

- Provide 24 x 7 x 365 proactive health monitoring
    - Active and passive polling
    - Establish monitoring baselines
    - Notify upon baseline deviations and outages
        - Equipment failure, loss of connectivity, spike in utilization, etc.

    - Process hardware RMAs as requested
    - Common point of contact including engineering escalation
- Provide online ticketing (Salesforce)
    - Auto-generation of ticketing
    - Online tracking of ticket status
    - Stale ticket escalation
    - Change control for all MACD efforts
- Provide dashboards based off onboarding requirements
    - Custom dashboards are available but may require additional SOW and fee
- Provide Network and Security management
    - Simple MACD
        - Palo Alto
- Provide WAN Carrier triage and support
- Provide Quarterly Business Reviews (onsite or remote at customer request)
    - Review ticketing
    - Review MACD completed
    - Review upcoming changes

Deliverables:

- *Online Ticketing and dashboards*
- *Remote 24x7 monitoring and notifications*
- *Remote element management services*
- *Quarterly reviews*

Remote Managed Service Level Agreements

MGT will provide managed services for the devices listed in the section below in accordance with the following service levels.

- Monitoring incidents notifications – within 30 minutes
- Moves/Adds/Changes within 24 hours
- Documented Change management process

MGT will keep Cleburne ISD appraised of all security incidents and provide regular reports detailing operational status of the network. Layer 3 Communications uses the following service level definitions for ticket workflow:

- High Priority (P1) – Critical security incident or service impacting outage – immediate notification upon identification of issue and root cause analysis report within 8 hours of remediation
- Medium Priority (P2) – Major security incident or severely degraded services – notification within 2 hours and root cause analysis report within 24 hours of remediation
- Low Priority (P3) – Minor security incident (e.g., false positive review) – notification within 24 hours
- No Priority (P4) – Non-service impacting request (e.g., whitelist or SIEM rule creation) – acknowledgement within 24 hours and completion within 72 hours (assumes manufacturer engagement is not required)

Managed Services Elements

MGT will provide monitoring and management of the following elements, with the attached service level defined above. Once this contract has been instantiated, the following chart will be completed for the master elements. Any devices that require customized visualization by MGT DevOps Engineers will be highlighted in red. Customization may not be complete prior to onboarding.

Name	Device Type	Quantity	Service Level
Border Firewalls	Palo Alto 3420	2	EMG\MNS

Account team will work with the customer to provide a detailed inventory for all devices and services delivered. This should include:

- Host name
- IP Address
- Any metadata tags
- SNMP Community String
- R/O Credentials for configuration backup
- Service level
- Carrier Information
    - Carrier Name
    - Support contact
    - Circuit commit rate

For any device requiring SNMP traps, device will need to be configured to send applicable data to Layer 3 Communications collector.

Project closeout

After all deliverables are met, we will meet to confirm that all portions of the project are complete and final invoicing is acceptable.

MGT will:

- Organize a closeout meeting to review final deliverables and conditions for project closure
    - Verified production services in accordance with test plan
    - As-built design documents
    - Configuration backups
    - Knowledge transfer

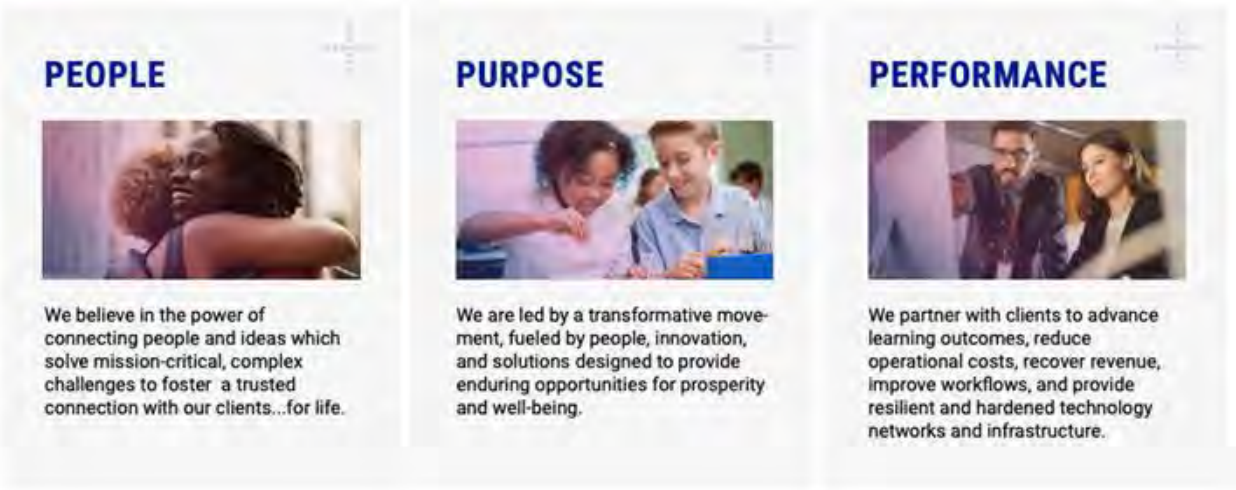
Deliverables

- *Documentation of completion*

Exceptions

Any tasks not listed above will need to be scoped as an additional billable engagement. Deployments with these exceptions will be scoped separately and will result in an addendum to this SOW.

Client Requirements



In order for MGT to effectively perform the desired services, we will require the assistance of CISD. These items will be required to be made available at a minimum of two weeks prior to an agreed upon implementation date. Failure to do so may result in the implementation being rescheduled at a later time. The customer is responsible for providing:

- An escort to provide access to controlled areas.
- Any passwords required to access the existing network equipment for configuration assessments and migrations.
- Remote VPN Access for element managed devices.
- Active support contracts for element managed devices.
- Active license subscriptions required for element managed devices.
- Execution of all tasks defined where customer instruction or customer responsibility is indicated - MGT will work largely in an advisory role and coordinate with customer for project execution.

Our MGT Vision

To achieve our mission of being the social impact and performance leader in our industry, we are continuously improving to earn the privilege of being selected as our clients' partner of choice in the mission-critical domains we impact. By elevating education systems, managing and securing critical networks, solving complex human capital and fiscal problems, and advancing equity as a performance imperative, we can impact communities, for good through client partnership.

We deliver these solutions through our "three-point stance" of technology, education, and performance offerings. With our long-term vision of creating profound social impact through client performance, we seek out the "best of the best" to join us in our work supporting clients' top priorities.

Cost Proposal

Defined by Impact. Driven by People. Dedicated to the Community.

Our cost proposal reflects our interpretation of the written requirements within your solicitation. With that understanding, we believe a scope clarification discussion during Project Initiation would allow us to confirm our understanding of your requirements and exchange ideas on how to manage the cost of this program. **We take pride in customizing our client's needs — and we will work with you to ensure our fees are aligned with your expectations and budget.**

MGT proposes to complete the CISD's project for a fixed fee cost. This includes professional fees and other costs (travel, surveys, postage, etc., as applicable). Pricing is firm for 30 days. Payment required upon completion of the project.

Total Cost	**$1,849,074.40**
E-Rate Covered	**$1,095,805.47**
Customer Portion	**$753,268.93**

E-rate eligibility breakdown for multi-year products:

Aruba 5YR Subscriptions:
- Estimated USAC portion pending approval
- 5 YR: $251,224.40

Aruba 5YR Support:
- Year 1 E-rate Eligible: $8271.11
- Year 2 E-rate Eligible: $8271.11
- Year 3 E-rate Eligible: $8271.11
- Year 4 E-rate Eligible: $8271.11
- Year 5 E-rate Eligible: $8271.11

FWaaS/MGT Managed Services:
- Year 1 E-rate Eligible: $46,682.96
- Year 2 E-rate Eligible: $46,682.96
- Year 3 E-rate Eligible: $46,682.96
- Year 4 E-rate Eligible: $46,682.96
- Year 5 E-rate Eligible: $46,682.96

(Optional) Palo Alto 5220 Premium Support:
- Year 1 E-rate Eligible: $2,054.53
- Year 2 E-rate Eligible: $2,054.53
- Year 3 E-rate Eligible: $2,054.53

(Optional) Palo Alto 5220 Bundled Subscriptions:
- Year 1 E-rate Eligible: $15,552.00
- Year 2 E-rate Eligible: $15,552.00
- Year 3 E-rate Eligible: $15,552.00

The "PAN 5220 Support and Licenses 3YR" is optional and not factored into total price.

Communication
March 10, 2025

To: CISD Board of Trustees

From: Dr. Coby Kirkpatrick
Michael Wallace

Re: Firewall (FWaaS)

Strategic Goal, Objective, or Need Addressed:

To safeguard sensitive data throughout the district from evolving threats, upgrading the firewall installed in 2020 to a more robust, next-generation solution will enhance network security.

Summary:

A robust and up-to-date firewall, enhanced by managed firewall-as-a-service services, safeguards our network and protects student and staff data. The service provides ongoing updates and management.

A Request for Proposal (RFP) was released through the federal E-rate program to upgrade the firewall. Four responses were received and evaluated. MGT's bid, at $256,000, was found to have the best value and includes a 10% contingency. The 2021 Bond includes this project, and bond funds will make the purchase. E-rate could fund up to 80% of the total cost.

Attachment(s):

- Erate - Firewall

Action Requested
We respectfully request the Board approve the purchase of a firewall from MGT in the amount of $256,000.

COST PROPOSAL 20

Firm Profile

*Impacting communities **for good.***

MGT brings ***fifty years*** of experience driving positive social change and performance in education, government, nonprofits, and critical infrastructure/private industries through ***assisting clients to strengthen their foundation, change systematically, and enable resiliencies for long-lasting change.*** Since inception, MGT has significantly grown and capacity – working with state and local governments and education partners. Today, we bring a team of over **900 professionals** who offer in-depth market knowledge and understanding so we can hit the ground running.

MGT | FIRST LOOK

Name: MGT Impact Solutions, LLC (MGT)

Locations: Headquarters in Tampa Florida; branch offices nationwide

Structure: Privately held, employee-owned, client-driven Limited Liability Company

Lines of Business: Strategy and Implementation, Performance and Operations, IT Infrastructure, and Cyber Security and Resilience for public sector and commercial companies.

MGT is a privately held, employee-owned and financially stable limited liability company with a deep roster of staff and a commitment to serving the public. Our clients care about addressing the world's most-pressing problems, and so do we. Their "why" is our why.

What sets us apart is our ability to customize and offer individualized support but also the resources of a larger infrastructure to enable flexibility in impacting to-scale. Throughout our history, MGT has successfully delivered more than **30,000 projects** through a thoughtful balance of balancing the "immediate" needs while changing systems to plan for future resilience and success.

Our Commitment

MGT embraces the most complex challenges on the leadership agenda, with deep commitment, agility, and local expertise to make a measurable and profound impact. Simply stated, **We are impacting communities for good.**

50 years

900 consultants

30,000 projects

Executive Summary

Cleburne ISD (CISD) has released a 470 form requesting hardware to refresh their routing, switching, and wireless networking infrastructure. MGT is proposing a professional services engagement scope of work to accompany the hardware proposal.

This proposal includes services to stage, configure, and install the following components:

- Qty 2 – Core Aruba CX8360's
- Qty 4 – Core Aruba CX 6300M's
- Qty 25 – Switch Aruba CX 6200M's
- Qty 822 – Aruba AP735 Access Points
- Qty 62 – Aruba AP675 Access Points
- Qty 34 – Aruba AP677 Access Points
- Qty 2 – Palo Alto 3420 Border Firewall

All of the proposed Aruba equipment also has Aruba Central management licensing for 5 years associated.

MGT has noted that Cleburne ISD requested pricing for Palo Alto 3420 hardware, maintenance, subscriptions, and Element Management in addition to a complete Palo Alto 3420 Firewall as a Service (FWaaS).

MGT is proposing the following purchase options for the Palo Alto Firewalls as redundant systems cannot be covered by E-Rate funding.

- Option 1: Cleburne ISD applies for funding to purchase the Primary Palo Alto 3420 hardware, maintenance, and subscriptions under the "Internal Connections" category and MGT Element Management\Monitoring under the "Managed Internal Broadband Services" category.
- Option 2: Cleburne ISD applies for funding to purchase the Primary Palo Alto 3420 as a service (FWaaS) with hardware, maintenance, subscriptions, and MGT Element Management\Monitoring wholly under the "Managed Internal Broadband Services" category.
- Option 3: Cleburne ISD applies for funding to purchase the Primary Palo Alto 3420 as a service (FWaaS) with hardware, maintenance, subscriptions, and MGT Element Management\Monitoring wholly under the "Managed Internal Broadband Services" category. Additionally, the district leverages aggressive pricing associated with this bid to purchase the secondary Palo Alto 3420 hardware, maintenance, subscriptions, and MGT Element Management\Monitoring out of local funds.

.

MGT Impact Solutions Architects, System Engineers, Project Managers, and Installers are very experienced in large-scale Security Network projects and will provide the district with the services required to ensure the organization can successfully meet the needs and expectations of Cleburne ISD.

Schools and Libraries Program Requirements

MGT Impact Solutions is eligible to participate in the Schools and Libraries Program and has obtained a Service Provider Identification Number (SPIN) from USAC. MGT Impact Solutions SPIN number is 143054314.

Scope of Work

This proposal contains MGT's proprietary and confidential information. It is not to be released or disclosed, in whole or in part, other than to those individuals who are directly involved in evaluating this report, without the prior express written consent of MGT.

CISD and MGT stakeholders will conduct a formalized Scope of Work creation and review process upon award of this RFP. Below is a preview of MGT Impact Solutions' standard professional and manager services offerings.

Central Project Management

MGT will supply a project manager who will be responsible for the coordination and execution of the items contained within this scope of work. The goal is for the MTG's project manager to focus on completing the scope of services promptly.

MGT will assign a resource to project manage this scope of work. The project manager will be responsible for:

- Communication coordination - Coordinate meetings with Cleburne ISD's single point of contact to meet time frames and deliverables
- Time and resource management - Inform Cleburne ISD's single point of contact of changes or modifications to the project timeline
- Coordinating deliveries of electronics
- Inventory tracking - Keep detailed records of product quantities and descriptions (from the bill of materials provided within this scope of work) as they relate to specific sites
- Providing MGT's project status updates on a weekly conference call
- Coordinating resources with Cleburne ISD on the deployment of electronics
- Creating and maintaining a detailed project plan

Deliverables

- *Implementation plan including:*
    - *Detailed configuration items*
    - *Installation plan for proposed hardware*
    - *Testing and verification plan*

Network Design Formalization and Review

MGT will work with CISD staff to plan an updated network design. The network design process will be conducted in accordance with the MGT methodology. This is a standard, structured approach used by MGT and is managed in phases:

- Project initiation including preliminary information gathering.
- Data collection through meetings, interviews, and electronic capture.
- Data analysis including preparation of preliminary findings and recommendations.
- Preparation of results, findings, and recommendations into final design drawings and presentation.

MGT will perform the following:

- Review existing network documentation
- Review configurations from existing hardware
- Review settings for WAN\LAN on a per Site basis:
    - VLANs
    - IP Addressing
    - DHCP
    - DNS
    - Dynamic Routing protocols
    - Multi-Cast routing and distribution protocols
    - Spanning tree
    - QoS
    - ACL's
- Review settings for WLAN on a per Site basis:
    - VLANs
    - IP Addressing
    - DHCP
    - DNS
    - RADIUS/AD servers
    - SSID Design
    - Authentication methods
- Review access and badging requirements
- Review district naming and labeling scheme
- Review asset tagging requirements
- Review current CAD drawings/fire maps for AP placement
- Review existing Border Firewall Policies
- Conduct site walk through to determine:
    - Mounting locations and types
    - Identify if special mount is needed
    - Validate CAD drawings
    - Determine location for network drop additions, wiring closet locations and cabling installation requirements
- Update AP Placement maps
- Conduct site walk through to determine:
    - Available rack space in MDF/IDF Closets
    - Available power in MDF/IDF Closets
- Prepare minimal impact network implementation plan consisting of:
    - Firewall, WAN\LAN, and WLAN configuration parameters
    - Use cases and workflows translated from customer requirements
    - Identify critical path issues for implementation

    - Prepare plan for cutover activity to replace legacy equipment
- Build route\switch configurations structured around data collection and customer design requirements
- Build ap configurations structured around data collection and customer design requirements
- Migrate border firewall policy base from existing Palo Alto Appliances
- Create installation plan for all associated network hardware
- Create testing and verification plan

Deliverables

- *Network design document including:*
    - *WAN\LAN configuration*
    - *WLAN configuration*
    - *Site walk throughs to determine installation parameters*
- *Implementation plan including:*
    - *Detailed configuration items*
    - *Installation plan for proposed hardware*
    - *Testing and verification plan*

Lab Staging

MGT will receive equipment in our staging facility in Houston, Texas. Our environment has all the capabilities in place to create an "assembly line" of prestaging activities including unboxing and verifying no cosmetic defects, scanning of serial number/asset tag/ MAC Address information, affix approved labels, and manage the project's master documentation.

MGT will:

- Receive hardware
- Discard boxes, packing materials, and unnecessary manuals
- Stage Access Points
    - Take APs out of box to install mounting clip
    - Label AP with agreed upon name from district
    - Label AP with Asset Tag
    - Scan the AP serial numbers, MAC addresses, and asset tags into a spreadsheet that is used to assign an AP number that will correspond to the maps produced. This spreadsheet will also include the room number or location the AP was installed, AP name that will be programmed into the controller, type of AP, mounting information, and E-rate FRN (instructional site only)
    - Mark AP boxes for deployment to specific locations
    - Prepare any special boxes or mounts needed for installation
- Stage Routing and Switching hardware
    - Take equipment out of box to install mounting hardware
    - Label equipment with agreed upon name from district
    - Label equipment with Asset Tag
    - Scan the switch serial numbers, model, and asset tags into an inventory spreadsheet
    - Mark equipment boxes for deployment to specific locations
    - Perform any necessary firmware upgrades
- Stage Border Firewall
    - Take equipment out of box to install mounting hardware
    - Label equipment with agreed upon name from district
    - Label equipment with Asset Tag
    - Scan the switch serial numbers, model, and asset tags into an inventory spreadsheet
    - Mark equipment boxes for deployment to specific locations
    - Perform any necessary firmware upgrades

Deliverables:

- *Equipment prepped for physical installation*
- *Labels applied to network equipment*
- *Network equipment inventoried in spreadsheet*
- *APs prepped for physical installation*
- *Special mounting equipment prepped for physical installation*
- *Labels applied to APs*
- *APs inventoried in spreadsheet*
- *AP boxes labeled to identify location/room for installation*

Perform Firewall Implementation

MGT will conduct an out-of-hours activity to implement the border and public firewalls in accordance with the implementation plan created during the project planning phase.

MGT will:

- Conduct an out-of-hours cutover activity
- Perform configuration of the core router interfaces for new firewalls
- Connect firewalls to the network core
- Perform verification network connectivity
- Verify user access to applications
- Test failover performance in various scenarios
    - Firewall failure
    - Link failure to Network core

Deliverables:

- *Implement public firewall*
- *Validated failover*
- *Knowledge Transfer*

Routing and Switching Infrastructure Configurations

In order to perform the installation process properly MGT will follow the Aruba recommended best practices. The following processes must be strictly adhered to in order to maintain a supportable hardware and software configuration.

During the configuration process the customer agrees to commit to a configuration freeze regarding any specific configuration elements that may delay or otherwise negatively affect the execution of this scope of work. Any required configuration changes needed during this window that are performed outside of this scope of work and may impact the execution of this project should be communicated by the CISD team to MGT.

MGT will configure the following WAN\LAN parameters for CISD's Aruba Central Cloud Platform Deployment:

- Layer 3 Configurations
  - Dynamic routing protocols
  - Multicast Routing
  - Layer 3 Interfaces
  - DHCP relays
- Layer 2 Configurations
  - VLAN subnetting and interfaces
  - Spanning Tree
  - Multicast Snooping
  - Traffic QoS
  - Dynamic Interface profiles (Access Points)
  - QoS
- Administrative Configurations
  - NTP
  - DNS
  - Administrative Credentials
  - SNMP

Deliverables

- *WAN\LAN infrastructure configured as determined by customer requirements identified in the Network Design phase of this scope.*

WLAN Infrastructure Configurations

In order to perform the installation process properly MGT will follow the HPE/Aruba recommended best practices. The following processes must be strictly adhered to in order to maintain a supportable hardware and software configuration. MGT will require unrestricted access to the Central AOS-10 and existing WLAN infrastructure during the configuration process.

During the configuration process the customer agrees to commit to a configuration freeze regarding any specific configuration elements that may delay or otherwise negatively affect the execution of this scope of work. Any required configuration changes needed during this window that are performed outside of this scope of work and may impact the execution of this project should be communicated by the PISD team to MGT.

MGT will configure the following WLAN parameters for CISD's AOS-10 Cloud Platform Deployment:

- SSID Profiles
- Authentication profiles
    - Utilizing existing Authentication Servers where applicable
    - Utilizing existing pre-shared keys where applicable
    - Utilizing existing Captive Portal guest workflows where applicable
    - Utilizing existing MAC authentication workflows where applicable
- RF Profiles and Channel Plans
- WLAN client network interface profiles
    - Configuring access point uplinks to support L2 bridging for wireless clients at the campus edge.
- Site-based access point grouping
- Site-based maps for ap and client locations
- Network event reporting as determined by CISD
- Administrative access as determined by CISD

Deliverables

- *WLAN infrastructure configured as determined by customer requirements identified in the Network Design phase of this scope*

Access Point Installation

MGT will work with the district team to perform per site access point installations in accordance with the implementation schedule created in previous phases.

MGT will:

- Install new APs and mount
- Verify APs boot and connects to AOS-10 Cloud Platform
- Troubleshoot any problems, if needed
- Note location of APs on map if different than plan
- Provide update to network diagrams, final AP placement maps, and final cable plant documentation
- Import AP location into AOS-10 Cloud Platform for VisualRF heatmap
- Execute test plan to validate the installed wireless network systems
- Create necessary configuration groups in accordance with the network design created in previous phases

Deliverables:

- *Installed AP infrastructure*
- *Executed test plan*
- *Updated network diagrams, AP maps, and cable plant documentation*

Router\Switching Installation

MGT will work with the district team to perform per site access point installations in accordance with the implementation schedule created in previous phases.

MGT will:

- Install new Routers and Switches
- Remove existing hardware and deliver to designated CISD staging area
- Troubleshoot any problems, if needed
- Provide update to network diagrams and final cable plant documentation
- Execute test plan to validate the installed network systems

Deliverables:

- *Installed WAN\LAN infrastructure*
- *Executed test plan*
- *Updated network diagrams and cable plant documentation*

Post Implementation Support

MGT will provide remote support for one business day following successful completion of the deployment at each campus. During this time any unforeseen issues will be identified and resolved. Additionally, during this period MGT will deliver closing as-built documentation and provide basic instruction on the configuration and maintenance of the hardware devices provided.

MGT will:

- Conduct final verification testing for correct functionality according to test plan
- Provide as-built design documents containing detailed system configuration and installation specifications
- Brief customer or conduct installation-specific on-the-job instruction

Deliverables

- *Remote support for one business day following each campus cutover*

Remote Managed Services

MGT will provide remote managed firewall services for Cleburne ISD Palo Alto infrastructure. Services for this proposal will be facilitated from our 24/7 Operations Center in Atlanta via a secure connection to Cleburne ISD. Managed services will commence once onboarding services are complete.

Monitoring and Element Management Onboarding

Based on the data provided by Cleburne ISD, MGT will begin the managed services onboarding process.

During this process MGT will:

- Review existing ticketing process and workflow
- Work with Cleburne ISD staff to build out Saleforce.com (SFDC) event handling and notification playbooks
    - Firewall Monitoring
    - Carrier Circuit Monitoring
    - Firewall Element Management
    - Manufacturer Support Procedures
        - Palo Alto – Manufacturer
    - Escalations
- Document standard change control and approval processes
- Document emergency change control and approval processes
- Review maintenance patch/update schedules
- Review documentation standards
- Configure devices to support polling, send applicable logs, or SNMP traps
    - Firewalls
- Configure applicable default dashboards
    - Overview
- Test notifications procedures

Deliverables:

- *Implemented monitoring solution*
- *Documented playbooks and procedures*
- *Documented patch management process and schedules*
- *Verified manufacturer support contract access*
- *Applicable dashboards*
- *Tested notification procedures*

Remote Managed Services

MGT Network Operations Center staff will:

- Provide 24 x 7 x 365 proactive health monitoring
    - Active and passive polling
    - Establish monitoring baselines
    - Notify upon baseline deviations and outages
        - Equipment failure, loss of connectivity, spike in utilization, etc.

    - Process hardware RMAs as requested
    - Common point of contact including engineering escalation
- Provide online ticketing (Salesforce)
    - Auto-generation of ticketing
    - Online tracking of ticket status
    - Stale ticket escalation
    - Change control for all MACD efforts
- Provide dashboards based off onboarding requirements
    - Custom dashboards are available but may require additional SOW and fee
- Provide Network and Security management
    - Simple MACD
        - Palo Alto
- Provide WAN Carrier triage and support
- Provide Quarterly Business Reviews (onsite or remote at customer request)
    - Review ticketing
    - Review MACD completed
    - Review upcoming changes

Deliverables:

- *Online Ticketing and dashboards*
- *Remote 24x7 monitoring and notifications*
- *Remote element management services*
- *Quarterly reviews*

Remote Managed Service Level Agreements

MGT will provide managed services for the devices listed in the section below in accordance with the following service levels.

- Monitoring incidents notifications – within 30 minutes
- Moves/Adds/Changes within 24 hours
- Documented Change management process

MGT will keep Cleburne ISD appraised of all security incidents and provide regular reports detailing operational status of the network. Layer 3 Communications uses the following service level definitions for ticket workflow:

- High Priority (P1) – Critical security incident or service impacting outage – immediate notification upon identification of issue and root cause analysis report within 8 hours of remediation
- Medium Priority (P2) – Major security incident or severely degraded services – notification within 2 hours and root cause analysis report within 24 hours of remediation
- Low Priority (P3) – Minor security incident (e.g., false positive review) – notification within 24 hours
- No Priority (P4) – Non-service impacting request (e.g., whitelist or SIEM rule creation) – acknowledgement within 24 hours and completion within 72 hours (assumes manufacturer engagement is not required)

Managed Services Elements

MGT will provide monitoring and management of the following elements, with the attached service level defined above. Once this contract has been instantiated, the following chart will be completed for the master elements. Any devices that require customized visualization by MGT DevOps Engineers will be highlighted in red. Customization may not be complete prior to onboarding.

Name	Device Type	Quantity	Service Level
Border Firewalls	Palo Alto 3420	2	EMG\MNS

Account team will work with the customer to provide a detailed inventory for all devices and services delivered. This should include:

- Host name
- IP Address
- Any metadata tags
- SNMP Community String
- R/O Credentials for configuration backup
- Service level
- Carrier Information
    - Carrier Name
    - Support contact
    - Circuit commit rate

For any device requiring SNMP traps, device will need to be configured to send applicable data to Layer 3 Communications collector.

Project closeout

After all deliverables are met, we will meet to confirm that all portions of the project are complete and final invoicing is acceptable.

MGT will:

- Organize a closeout meeting to review final deliverables and conditions for project closure
    - Verified production services in accordance with test plan
    - As-built design documents
    - Configuration backups
    - Knowledge transfer

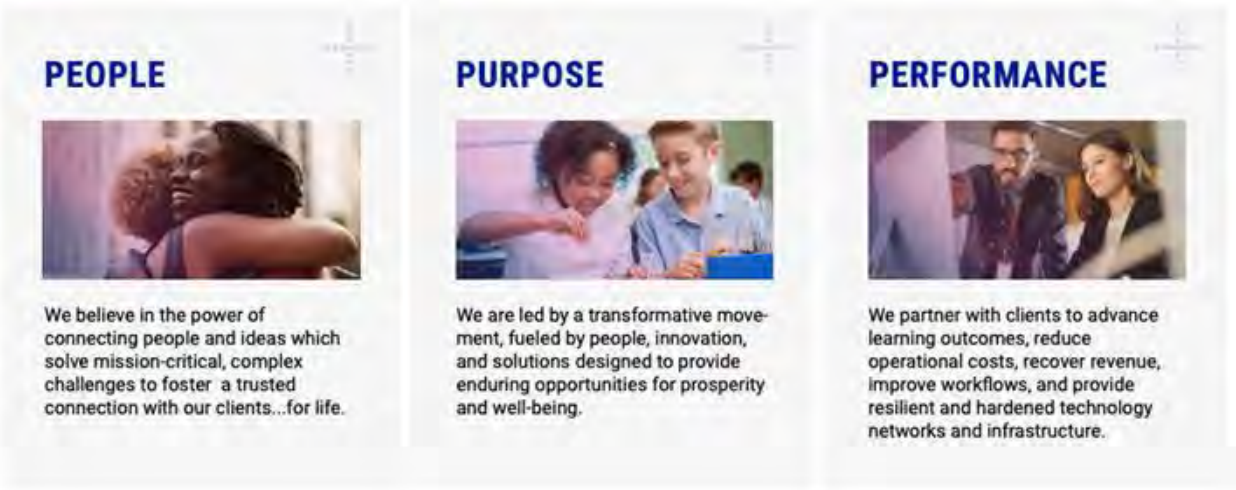
Deliverables

- *Documentation of completion*

Exceptions

Any tasks not listed above will need to be scoped as an additional billable engagement. Deployments with these exceptions will be scoped separately and will result in an addendum to this SOW.

Client Requirements



In order for MGT to effectively perform the desired services, we will require the assistance of CISD. These items will be required to be made available at a minimum of two weeks prior to an agreed upon implementation date. Failure to do so may result in the implementation being rescheduled at a later time. The customer is responsible for providing:

- An escort to provide access to controlled areas.
- Any passwords required to access the existing network equipment for configuration assessments and migrations.
- Remote VPN Access for element managed devices.
- Active support contracts for element managed devices.
- Active license subscriptions required for element managed devices.
- Execution of all tasks defined where customer instruction or customer responsibility is indicated - MGT will work largely in an advisory role and coordinate with customer for project execution.

Our MGT Vision

To achieve our mission of being the social impact and performance leader in our industry, we are continuously improving to earn the privilege of being selected as our clients' partner of choice in the mission-critical domains we impact. By elevating education systems, managing and securing critical networks, solving complex human capital and fiscal problems, and advancing equity as a performance imperative, we can impact communities, for good through client partnership.

We deliver these solutions through our "three-point stance" of technology, education, and performance offerings. With our long-term vision of creating profound social impact through client performance, we seek out the "best of the best" to join us in our work supporting clients' top priorities.

Cost Proposal

Defined by Impact. Driven by People. Dedicated to the Community.

Our cost proposal reflects our interpretation of the written requirements within your solicitation. With that understanding, we believe a scope clarification discussion during Project Initiation would allow us to confirm our understanding of your requirements and exchange ideas on how to manage the cost of this program. **We take pride in customizing our client's needs — and we will work with you to ensure our fees are aligned with your expectations and budget.**

MGT proposes to complete the CISD's project for a fixed fee cost. This includes professional fees and other costs (travel, surveys, postage, etc., as applicable). Pricing is firm for 30 days. Payment required upon completion of the project.

COST PROPOSAL 20

Firm Profile

*Impacting communities **for good.***

MGT brings ***fifty years*** of experience driving positive social change and performance in education, government, nonprofits, and critical infrastructure/private industries through ***assisting clients to strengthen their foundation, change systematically, and enable resiliencies for long-lasting change.*** Since inception, MGT has significantly grown and capacity – working with state and local governments and education partners. Today, we bring a team of over **900 professionals** who offer in-depth market knowledge and understanding so we can hit the ground running.

MGT | FIRST LOOK

Name: MGT Impact Solutions, LLC (MGT)

Locations: Headquarters in Tampa Florida; branch offices nationwide

Structure: Privately held, employee-owned, client-driven Limited Liability Company

Lines of Business: Strategy and Implementation, Performance and Operations, IT Infrastructure, and Cyber Security and Resilience for public sector and commercial companies.

MGT is a privately held, employee-owned and financially stable limited liability company with a deep roster of staff and a commitment to serving the public. Our clients care about addressing the world's most-pressing problems, and so do we. Their "why" is our why.

What sets us apart is our ability to customize and offer individualized support but also the resources of a larger infrastructure to enable flexibility in impacting to-scale. Throughout our history, MGT has successfully delivered more than **30,000 projects** through a thoughtful balance of balancing the "immediate" needs while changing systems to plan for future resilience and success.

Our Commitment

MGT embraces the most complex challenges on the leadership agenda, with deep commitment, agility, and local expertise to make a measurable and profound impact. Simply stated, **We are impacting communities for good.**

50 years

900 consultants

30,000 projects

Executive Summary

Cleburne ISD (CISD) has released a 470 form requesting hardware to refresh their routing, switching, and wireless networking infrastructure. MGT is proposing a professional services engagement scope of work to accompany the hardware proposal.

This proposal includes services to stage, configure, and install the following components:

- Qty 2 – Core Aruba CX8360's
- Qty 4 – Core Aruba CX 6300M's
- Qty 25 – Switch Aruba CX 6200M's
- Qty 822 – Aruba AP735 Access Points
- Qty 62 – Aruba AP675 Access Points
- Qty 34 – Aruba AP677 Access Points
- Qty 2 – Palo Alto 3420 Border Firewall

All of the proposed Aruba equipment also has Aruba Central management licensing for 5 years associated.

MGT has noted that Cleburne ISD requested pricing for Palo Alto 3420 hardware, maintenance, subscriptions, and Element Management in addition to a complete Palo Alto 3420 Firewall as a Service (FWaaS).

MGT is proposing the following purchase options for the Palo Alto Firewalls as redundant systems cannot be covered by E-Rate funding.

- Option 1: Cleburne ISD applies for funding to purchase the Primary Palo Alto 3420 hardware, maintenance, and subscriptions under the "Internal Connections" category and MGT Element Management\Monitoring under the "Managed Internal Broadband Services" category.
- Option 2: Cleburne ISD applies for funding to purchase the Primary Palo Alto 3420 as a service (FWaaS) with hardware, maintenance, subscriptions, and MGT Element Management\Monitoring wholly under the "Managed Internal Broadband Services" category.
- Option 3: Cleburne ISD applies for funding to purchase the Primary Palo Alto 3420 as a service (FWaaS) with hardware, maintenance, subscriptions, and MGT Element Management\Monitoring wholly under the "Managed Internal Broadband Services" category. Additionally, the district leverages aggressive pricing associated with this bid to purchase the secondary Palo Alto 3420 hardware, maintenance, subscriptions, and MGT Element Management\Monitoring out of local funds.

.

MGT Impact Solutions Architects, System Engineers, Project Managers, and Installers are very experienced in large-scale Security Network projects and will provide the district with the services required to ensure the organization can successfully meet the needs and expectations of Cleburne ISD.

Schools and Libraries Program Requirements

MGT Impact Solutions is eligible to participate in the Schools and Libraries Program and has obtained a Service Provider Identification Number (SPIN) from USAC. MGT Impact Solutions SPIN number is 143054314.

Scope of Work

This proposal contains MGT's proprietary and confidential information. It is not to be released or disclosed, in whole or in part, other than to those individuals who are directly involved in evaluating this report, without the prior express written consent of MGT.

CISD and MGT stakeholders will conduct a formalized Scope of Work creation and review process upon award of this RFP. Below is a preview of MGT Impact Solutions' standard professional and manager services offerings.

Central Project Management

MGT will supply a project manager who will be responsible for the coordination and execution of the items contained within this scope of work. The goal is for the MTG's project manager to focus on completing the scope of services promptly.

MGT will assign a resource to project manage this scope of work. The project manager will be responsible for:

- Communication coordination - Coordinate meetings with Cleburne ISD's single point of contact to meet time frames and deliverables
- Time and resource management - Inform Cleburne ISD's single point of contact of changes or modifications to the project timeline
- Coordinating deliveries of electronics
- Inventory tracking - Keep detailed records of product quantities and descriptions (from the bill of materials provided within this scope of work) as they relate to specific sites
- Providing MGT's project status updates on a weekly conference call
- Coordinating resources with Cleburne ISD on the deployment of electronics
- Creating and maintaining a detailed project plan

Deliverables

- *Implementation plan including:*
    - *Detailed configuration items*
    - *Installation plan for proposed hardware*
    - *Testing and verification plan*

Network Design Formalization and Review

MGT will work with CISD staff to plan an updated network design. The network design process will be conducted in accordance with the MGT methodology. This is a standard, structured approach used by MGT and is managed in phases:

- Project initiation including preliminary information gathering.
- Data collection through meetings, interviews, and electronic capture.
- Data analysis including preparation of preliminary findings and recommendations.
- Preparation of results, findings, and recommendations into final design drawings and presentation.

MGT will perform the following:

- Review existing network documentation
- Review configurations from existing hardware
- Review settings for WAN\LAN on a per Site basis:
    - VLANs
    - IP Addressing
    - DHCP
    - DNS
    - Dynamic Routing protocols
    - Multi-Cast routing and distribution protocols
    - Spanning tree
    - QoS
    - ACL's
- Review settings for WLAN on a per Site basis:
    - VLANs
    - IP Addressing
    - DHCP
    - DNS
    - RADIUS/AD servers
    - SSID Design
    - Authentication methods
- Review access and badging requirements
- Review district naming and labeling scheme
- Review asset tagging requirements
- Review current CAD drawings/fire maps for AP placement
- Review existing Border Firewall Policies
- Conduct site walk through to determine:
    - Mounting locations and types
    - Identify if special mount is needed
    - Validate CAD drawings
    - Determine location for network drop additions, wiring closet locations and cabling installation requirements
- Update AP Placement maps
- Conduct site walk through to determine:
    - Available rack space in MDF/IDF Closets
    - Available power in MDF/IDF Closets
- Prepare minimal impact network implementation plan consisting of:
    - Firewall, WAN\LAN, and WLAN configuration parameters
    - Use cases and workflows translated from customer requirements
    - Identify critical path issues for implementation

    - Prepare plan for cutover activity to replace legacy equipment
- Build route\switch configurations structured around data collection and customer design requirements
- Build ap configurations structured around data collection and customer design requirements
- Migrate border firewall policy base from existing Palo Alto Appliances
- Create installation plan for all associated network hardware
- Create testing and verification plan

Deliverables

- *Network design document including:*
    - *WAN\LAN configuration*
    - *WLAN configuration*
    - *Site walk throughs to determine installation parameters*
- *Implementation plan including:*
    - *Detailed configuration items*
    - *Installation plan for proposed hardware*
    - *Testing and verification plan*

Lab Staging

MGT will receive equipment in our staging facility in Houston, Texas. Our environment has all the capabilities in place to create an "assembly line" of prestaging activities including unboxing and verifying no cosmetic defects, scanning of serial number/asset tag/ MAC Address information, affix approved labels, and manage the project's master documentation.

MGT will:

- Receive hardware
- Discard boxes, packing materials, and unnecessary manuals
- Stage Access Points
    - Take APs out of box to install mounting clip
    - Label AP with agreed upon name from district
    - Label AP with Asset Tag
    - Scan the AP serial numbers, MAC addresses, and asset tags into a spreadsheet that is used to assign an AP number that will correspond to the maps produced. This spreadsheet will also include the room number or location the AP was installed, AP name that will be programmed into the controller, type of AP, mounting information, and E-rate FRN (instructional site only)
    - Mark AP boxes for deployment to specific locations
    - Prepare any special boxes or mounts needed for installation
- Stage Routing and Switching hardware
    - Take equipment out of box to install mounting hardware
    - Label equipment with agreed upon name from district
    - Label equipment with Asset Tag
    - Scan the switch serial numbers, model, and asset tags into an inventory spreadsheet
    - Mark equipment boxes for deployment to specific locations
    - Perform any necessary firmware upgrades
- Stage Border Firewall
    - Take equipment out of box to install mounting hardware
    - Label equipment with agreed upon name from district
    - Label equipment with Asset Tag
    - Scan the switch serial numbers, model, and asset tags into an inventory spreadsheet
    - Mark equipment boxes for deployment to specific locations
    - Perform any necessary firmware upgrades

Deliverables:

- *Equipment prepped for physical installation*
- *Labels applied to network equipment*
- *Network equipment inventoried in spreadsheet*
- *APs prepped for physical installation*
- *Special mounting equipment prepped for physical installation*
- *Labels applied to APs*
- *APs inventoried in spreadsheet*
- *AP boxes labeled to identify location/room for installation*

Perform Firewall Implementation

MGT will conduct an out-of-hours activity to implement the border and public firewalls in accordance with the implementation plan created during the project planning phase.

MGT will:

- Conduct an out-of-hours cutover activity
- Perform configuration of the core router interfaces for new firewalls
- Connect firewalls to the network core
- Perform verification network connectivity
- Verify user access to applications
- Test failover performance in various scenarios
    - Firewall failure
    - Link failure to Network core

Deliverables:

- *Implement public firewall*
- *Validated failover*
- *Knowledge Transfer*

Routing and Switching Infrastructure Configurations

In order to perform the installation process properly MGT will follow the Aruba recommended best practices. The following processes must be strictly adhered to in order to maintain a supportable hardware and software configuration.

During the configuration process the customer agrees to commit to a configuration freeze regarding any specific configuration elements that may delay or otherwise negatively affect the execution of this scope of work. Any required configuration changes needed during this window that are performed outside of this scope of work and may impact the execution of this project should be communicated by the CISD team to MGT.

MGT will configure the following WAN\LAN parameters for CISD's Aruba Central Cloud Platform Deployment:

- Layer 3 Configurations
  - Dynamic routing protocols
  - Multicast Routing
  - Layer 3 Interfaces
  - DHCP relays
- Layer 2 Configurations
  - VLAN subnetting and interfaces
  - Spanning Tree
  - Multicast Snooping
  - Traffic QoS
  - Dynamic Interface profiles (Access Points)
  - QoS
- Administrative Configurations
  - NTP
  - DNS
  - Administrative Credentials
  - SNMP

Deliverables

- *WAN\LAN infrastructure configured as determined by customer requirements identified in the Network Design phase of this scope.*

WLAN Infrastructure Configurations

In order to perform the installation process properly MGT will follow the HPE/Aruba recommended best practices. The following processes must be strictly adhered to in order to maintain a supportable hardware and software configuration. MGT will require unrestricted access to the Central AOS-10 and existing WLAN infrastructure during the configuration process.

During the configuration process the customer agrees to commit to a configuration freeze regarding any specific configuration elements that may delay or otherwise negatively affect the execution of this scope of work. Any required configuration changes needed during this window that are performed outside of this scope of work and may impact the execution of this project should be communicated by the PISD team to MGT.

MGT will configure the following WLAN parameters for CISD's AOS-10 Cloud Platform Deployment:

- SSID Profiles
- Authentication profiles
    - Utilizing existing Authentication Servers where applicable
    - Utilizing existing pre-shared keys where applicable
    - Utilizing existing Captive Portal guest workflows where applicable
    - Utilizing existing MAC authentication workflows where applicable
- RF Profiles and Channel Plans
- WLAN client network interface profiles
    - Configuring access point uplinks to support L2 bridging for wireless clients at the campus edge.
- Site-based access point grouping
- Site-based maps for ap and client locations
- Network event reporting as determined by CISD
- Administrative access as determined by CISD

Deliverables

- *WLAN infrastructure configured as determined by customer requirements identified in the Network Design phase of this scope*

Access Point Installation

MGT will work with the district team to perform per site access point installations in accordance with the implementation schedule created in previous phases.

MGT will:

- Install new APs and mount
- Verify APs boot and connects to AOS-10 Cloud Platform
- Troubleshoot any problems, if needed
- Note location of APs on map if different than plan
- Provide update to network diagrams, final AP placement maps, and final cable plant documentation
- Import AP location into AOS-10 Cloud Platform for VisualRF heatmap
- Execute test plan to validate the installed wireless network systems
- Create necessary configuration groups in accordance with the network design created in previous phases

Deliverables:

- *Installed AP infrastructure*
- *Executed test plan*
- *Updated network diagrams, AP maps, and cable plant documentation*

Router\Switching Installation

MGT will work with the district team to perform per site access point installations in accordance with the implementation schedule created in previous phases.

MGT will:

- Install new Routers and Switches
- Remove existing hardware and deliver to designated CISD staging area
- Troubleshoot any problems, if needed
- Provide update to network diagrams and final cable plant documentation
- Execute test plan to validate the installed network systems

Deliverables:

- *Installed WAN\LAN infrastructure*
- *Executed test plan*
- *Updated network diagrams and cable plant documentation*

Post Implementation Support

MGT will provide remote support for one business day following successful completion of the deployment at each campus. During this time any unforeseen issues will be identified and resolved. Additionally, during this period MGT will deliver closing as-built documentation and provide basic instruction on the configuration and maintenance of the hardware devices provided.

MGT will:

- Conduct final verification testing for correct functionality according to test plan
- Provide as-built design documents containing detailed system configuration and installation specifications
- Brief customer or conduct installation-specific on-the-job instruction

Deliverables

- *Remote support for one business day following each campus cutover*

Remote Managed Services

MGT will provide remote managed firewall services for Cleburne ISD Palo Alto infrastructure. Services for this proposal will be facilitated from our 24/7 Operations Center in Atlanta via a secure connection to Cleburne ISD. Managed services will commence once onboarding services are complete.

Monitoring and Element Management Onboarding

Based on the data provided by Cleburne ISD, MGT will begin the managed services onboarding process.

During this process MGT will:

- Review existing ticketing process and workflow
- Work with Cleburne ISD staff to build out Saleforce.com (SFDC) event handling and notification playbooks
    - Firewall Monitoring
    - Carrier Circuit Monitoring
    - Firewall Element Management
    - Manufacturer Support Procedures
        - Palo Alto – Manufacturer
    - Escalations
- Document standard change control and approval processes
- Document emergency change control and approval processes
- Review maintenance patch/update schedules
- Review documentation standards
- Configure devices to support polling, send applicable logs, or SNMP traps
    - Firewalls
- Configure applicable default dashboards
    - Overview
- Test notifications procedures

Deliverables:

- *Implemented monitoring solution*
- *Documented playbooks and procedures*
- *Documented patch management process and schedules*
- *Verified manufacturer support contract access*
- *Applicable dashboards*
- *Tested notification procedures*

Remote Managed Services

MGT Network Operations Center staff will:

- Provide 24 x 7 x 365 proactive health monitoring
    - Active and passive polling
    - Establish monitoring baselines
    - Notify upon baseline deviations and outages
        - Equipment failure, loss of connectivity, spike in utilization, etc.

    - Process hardware RMAs as requested
    - Common point of contact including engineering escalation
- Provide online ticketing (Salesforce)
    - Auto-generation of ticketing
    - Online tracking of ticket status
    - Stale ticket escalation
    - Change control for all MACD efforts
- Provide dashboards based off onboarding requirements
    - Custom dashboards are available but may require additional SOW and fee
- Provide Network and Security management
    - Simple MACD
        - Palo Alto
- Provide WAN Carrier triage and support
- Provide Quarterly Business Reviews (onsite or remote at customer request)
    - Review ticketing
    - Review MACD completed
    - Review upcoming changes

Deliverables:

- *Online Ticketing and dashboards*
- *Remote 24x7 monitoring and notifications*
- *Remote element management services*
- *Quarterly reviews*

Remote Managed Service Level Agreements

MGT will provide managed services for the devices listed in the section below in accordance with the following service levels.

- Monitoring incidents notifications – within 30 minutes
- Moves/Adds/Changes within 24 hours
- Documented Change management process

MGT will keep Cleburne ISD appraised of all security incidents and provide regular reports detailing operational status of the network. Layer 3 Communications uses the following service level definitions for ticket workflow:

- High Priority (P1) – Critical security incident or service impacting outage – immediate notification upon identification of issue and root cause analysis report within 8 hours of remediation
- Medium Priority (P2) – Major security incident or severely degraded services – notification within 2 hours and root cause analysis report within 24 hours of remediation
- Low Priority (P3) – Minor security incident (e.g., false positive review) – notification within 24 hours
- No Priority (P4) – Non-service impacting request (e.g., whitelist or SIEM rule creation) – acknowledgement within 24 hours and completion within 72 hours (assumes manufacturer engagement is not required)

Managed Services Elements

MGT will provide monitoring and management of the following elements, with the attached service level defined above. Once this contract has been instantiated, the following chart will be completed for the master elements. Any devices that require customized visualization by MGT DevOps Engineers will be highlighted in red. Customization may not be complete prior to onboarding.

Name	Device Type	Quantity	Service Level
Border Firewalls	Palo Alto 3420	2	EMG\MNS

Account team will work with the customer to provide a detailed inventory for all devices and services delivered. This should include:

- Host name
- IP Address
- Any metadata tags
- SNMP Community String
- R/O Credentials for configuration backup
- Service level
- Carrier Information
    - Carrier Name
    - Support contact
    - Circuit commit rate

For any device requiring SNMP traps, device will need to be configured to send applicable data to Layer 3 Communications collector.

Project closeout

After all deliverables are met, we will meet to confirm that all portions of the project are complete and final invoicing is acceptable.

MGT will:

- Organize a closeout meeting to review final deliverables and conditions for project closure
    - Verified production services in accordance with test plan
    - As-built design documents
    - Configuration backups
    - Knowledge transfer

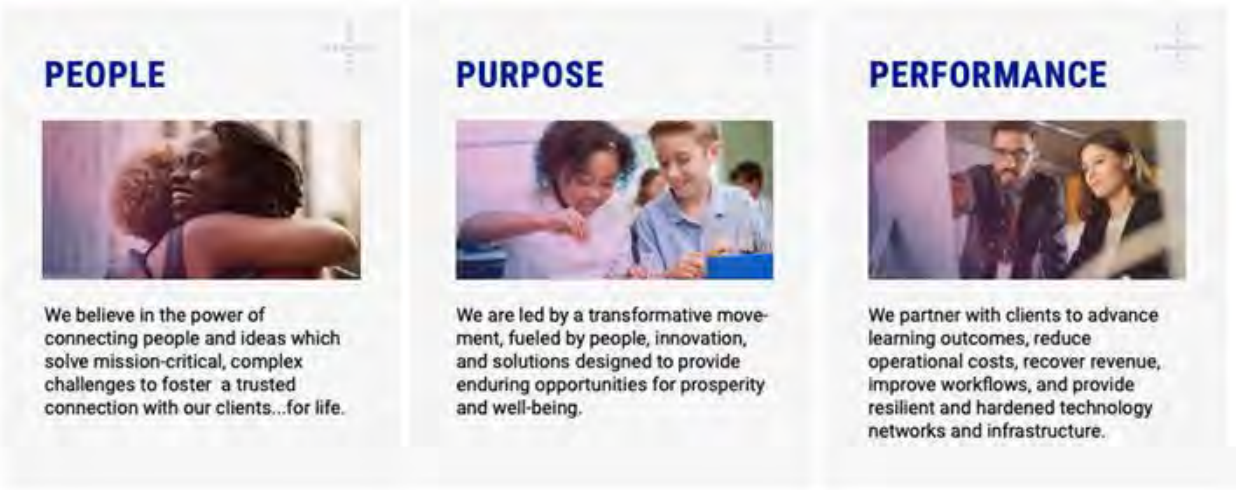
Deliverables

- *Documentation of completion*

Exceptions

Any tasks not listed above will need to be scoped as an additional billable engagement. Deployments with these exceptions will be scoped separately and will result in an addendum to this SOW.

Client Requirements



In order for MGT to effectively perform the desired services, we will require the assistance of CISD. These items will be required to be made available at a minimum of two weeks prior to an agreed upon implementation date. Failure to do so may result in the implementation being rescheduled at a later time. The customer is responsible for providing:

- An escort to provide access to controlled areas.
- Any passwords required to access the existing network equipment for configuration assessments and migrations.
- Remote VPN Access for element managed devices.
- Active support contracts for element managed devices.
- Active license subscriptions required for element managed devices.
- Execution of all tasks defined where customer instruction or customer responsibility is indicated - MGT will work largely in an advisory role and coordinate with customer for project execution.

Our MGT Vision

To achieve our mission of being the social impact and performance leader in our industry, we are continuously improving to earn the privilege of being selected as our clients' partner of choice in the mission-critical domains we impact. By elevating education systems, managing and securing critical networks, solving complex human capital and fiscal problems, and advancing equity as a performance imperative, we can impact communities, for good through client partnership.

We deliver these solutions through our "three-point stance" of technology, education, and performance offerings. With our long-term vision of creating profound social impact through client performance, we seek out the "best of the best" to join us in our work supporting clients' top priorities.

Cost Proposal

Defined by Impact. Driven by People. Dedicated to the Community.

Our cost proposal reflects our interpretation of the written requirements within your solicitation. With that understanding, we believe a scope clarification discussion during Project Initiation would allow us to confirm our understanding of your requirements and exchange ideas on how to manage the cost of this program. **We take pride in customizing our client's needs — and we will work with you to ensure our fees are aligned with your expectations and budget.**

MGT proposes to complete the CISD's project for a fixed fee cost. This includes professional fees and other costs (travel, surveys, postage, etc., as applicable). Pricing is firm for 30 days. Payment required upon completion of the project.

Customer Portion	**$753,268.93**

E-rate eligibility breakdown for multi-year products:

Aruba 5YR Subscriptions:
- Estimated USAC portion pending approval
- 5 YR: $251,224.40

Aruba 5YR Support:
- Year 1 E-rate Eligible: $8271.11
- Year 2 E-rate Eligible: $8271.11
- Year 3 E-rate Eligible: $8271.11
- Year 4 E-rate Eligible: $8271.11
- Year 5 E-rate Eligible: $8271.11

FWaaS/MGT Managed Services:
- Year 1 E-rate Eligible: $46,682.96
- Year 2 E-rate Eligible: $46,682.96
- Year 3 E-rate Eligible: $46,682.96
- Year 4 E-rate Eligible: $46,682.96
- Year 5 E-rate Eligible: $46,682.96

(Optional) Palo Alto 5220 Premium Support:
- Year 1 E-rate Eligible: $2,054.53
- Year 2 E-rate Eligible: $2,054.53
- Year 3 E-rate Eligible: $2,054.53

(Optional) Palo Alto 5220 Bundled Subscriptions:
- Year 1 E-rate Eligible: $15,552.00
- Year 2 E-rate Eligible: $15,552.00
- Year 3 E-rate Eligible: $15,552.00

The "PAN 5220 Support and Licenses 3YR" is optional and not factored into total price.

Professional Services for Core Network

The selected vendor will be responsible for providing all necessary professional services to design, implement, and configure a new network solution. These services include, but are not limited to:

Network Design: Develop a detailed network design that aligns with our specific requirements, including topology, device selection, and configuration specifications.

Hardware Procurement: Source and procure all required network hardware, including switches, routers, firewalls, and wireless access points.

Network Implementation: Install and configure all network devices according to the approved design and specifications.

Network Configuration: Configure all network devices to meet our specific requirements, including IP addressing, routing protocols, security policies, and quality of service (QoS) settings.

Network Cabling: Provide and cable all required cabling and SFP modules to industry standards.

Existing Network Cabling: Remove existing network cabling and return to CISD.

Testing and Validation: Thoroughly test the entire network solution to ensure it meets performance, security, and reliability standards.

Documentation: Provide comprehensive documentation of the network design, implementation, and configuration.

Project Management: Manage the entire project, including planning, scheduling, and communication with all stakeholders.

Pricing

The vendor must provide a detailed breakdown of all costs associated with the professional services, including:

Professional Services Fees: Hourly rates for network engineers, project managers, and other technical staff.	Network Engineers: $194 per hour Project Manager: $155 per hour OTS: $62 per hou	$33,700	see attached sales quote for PS and deployment
Hardware Costs: Costs for all network hardware, including switches, routers, firewalls, and wireless access points.	$79138.44 (includes hw maintenance support)	$79,138.44	see attached sales quote for HW breakdown
Software Licenses: Costs for any required network software licenses.	$9336.28 (includes sw & resale SaaS services)	$9,336.28	see attached sales quote for SW licenses/subscription
Travel and Expenses: Costs for travel, lodging, and other expenses incurred during the project.	$1,200	$1,200	
	Total	**$123,375**	

Solution Delivery

The delivered network solution must be:

100% Configured: All network devices must be fully configured to our specifications, including IP addressing, routing protocols, security policies, and QoS settings.

Fully Functional: The network solution must be fully functional and perform to our required standards.

Documented: The vendor must provide comprehensive documentation of the network design, implementation, and configuration.

Professional Services for Wireless Network Implementation

The selected vendor will be responsible for providing all necessary professional services to design, implement, and configure a new wireless network solution. These services include, but are not limited to:
Network Design: Develop a detailed wireless network design that aligns with our specific requirements, including topology, access point selection, and RF channel planning.
Hardware Procurement: Source and procure all required wireless hardware, including access points, controllers, and antennas.
Network Implementation: Install and configure all wireless devices according to the approved design and specifications.
Network Cabling: Install, run, terminate, use J-hooks, and use conduit for all outdoor runs and in interior locations as needed. No cabling will be exposed.
Network Cabling: Supply Cat6a patch cables for each new drop.
Network Cabling: Use the existing cabling and patch cables.

Wireless Configuration: Configure all wireless devices to meet our specific requirements, including SSID, security settings, QoS, and roaming policies.
Testing and Validation: Thoroughly test the entire wireless network solution to ensure it meets performance, security, and reliability standards.
Maps & Heat Maps: Import building floor maps into the system and create heat maps for each location AP's are deployed.
Documentation: Provide comprehensive documentation of the wireless network design, implementation, and configuration.
Project Management: Manage the entire project, including planning, scheduling, and communication with all stakeholders.

Pricing

The vendor must provide a detailed breakdown of all costs associated with the professional services, including:

		Total	
Professional Services Fees: Hourly rates for network engineers, RF engineers, project managers, and other technical	Network Engineers: $194 per hour Project Manager: $155 per hour OTS: $62 per hour	$486,763.00	see attached sales quote for PS and deployment breakdown
Hardware Costs: Costs for all wireless hardware, including access points, controllers, and antennas.	$461,647.62	$461,647.62	see attached sales quote for HW breakdown
Software Licenses: Costs for any required wireless network software licenses.	$189,750.60	$189,750.60	see attached sales quote for SW licenses/subscription
Travel and Expenses: Costs for travel, lodging, and other expenses incurred during the project.	$22,000	$22,000.00	
	Total	**$1,160,161.22**	

Solution Delivery

The delivered wireless network solution must be:
100% Configured: All wireless devices must be fully configured to our specifications, including SSID, security settings, QoS, and roaming policies.
Fully Functional: The wireless network solution must be fully functional and perform to our required standards, providing reliable and secure wireless connectivity.
Documented: The vendor must provide comprehensive documentation of the wireless network design, implementation, and configuration.

Professional Services for Firewall Implementation

The selected vendor will be responsible for providing all necessary professional services to design, implement, and configure a new firewall solution. These services include, but are not limited to:
Security Needs Assessment: Conduct a thorough assessment of our security requirements to identify potential threats and vulnerabilities.
Firewall Configuration: Configure the firewall to implement security policies, including firewall rules, intrusion prevention, VPN, and other security features.
Network Integration: Integrate the firewall into our existing network infrastructure, ensuring seamless communication and optimal performance.
Network Cabling: Provide and cable all required cabling and SFP modules to industry standards.
Testing and Validation: Thoroughly test the firewall configuration to ensure it meets our security requirements and does not impact network performance.
Documentation: Provide comprehensive documentation of the firewall design, implementation, and configuration.
Project Management: Manage the entire project, including planning, scheduling, and communication with all stakeholders.

Pricing

The vendor must provide a detailed breakdown of all costs associated with the professional services unless professional services are reflected in the recurring expense, including:

Professional Services Fees: Hourly rates for network security engineers, project managers, and other technical staff.	Network Engineers: $167 per hour Project Manager: $155 per hour OTS: $62 per hour	$10,252	see attached sales quote for PS and deployment breakdown
Hardware Costs: Costs for the firewall hardware w/maintenance support	$73,557.66	$73,557.66	see attached sales quote for HW breakdown
Software Licenses: Costs for any required firewall software licenses.	$124,143.18	$124,143.48	see attached sales quote for SW licenses/subscription
Travel and Expenses: Costs for travel, lodging, and other expenses incurred during the project.	$1,500	$1,500	
	Total	**$209,453**	

Solution Delivery

The delivered firewall solution must be:

100% Configured: The firewall must be fully configured to our specifications, including firewall rules, intrusion prevention, VPN, and other security features.
Fully Functional: The firewall must be fully functional and perform to our required standards, providing robust security protection.
Documented: The vendor must provide comprehensive documentation of the firewall design, implementation, and configuration.

Professional Services for Core Network

The selected vendor will be responsible for providing all necessary professional services to design, implement, and configure a new network solution. These services include, but are not limited to:

Network Design: Develop a detailed network design that aligns with our specific requirements, including topology, device selection, and configuration specifications.

Hardware Procurement: Source and procure all required network hardware, including switches, routers, firewalls, and wireless access points.

Network Implementation: Install and configure all network devices according to the approved design and specifications.

Network Configuration: Configure all network devices to meet our specific requirements, including IP addressing, routing protocols, security policies, and quality of service (QoS) settings.

Network Cabling: Provide and cable all required cabling and SFP modules to industry standards.

Existing Network Cabling: Remove existing network cabling and return to CISD.
Testing and Validation: Thoroughly test the entire network solution to ensure it meets performance, security, and reliability standards.
Documentation: Provide comprehensive documentation of the network design, implementation, and configuration.
Project Management: Manage the entire project, including planning, scheduling, and communication with all stakeholders.

Pricing

The vendor must provide a detailed breakdown of all costs associated with the professional services, including:		Total	
Professional Services Fees: Hourly rates for network engineers, project managers, and other technical staff.	Network Engineers: $194 per hour Project Manager: $155 per hour OTS: $62 per hour	$42,615.00	see attached sales quote for PS and deployment breakdown
Hardware Costs: Costs for all network hardware, including switches, routers, firewalls, and wireless access points.	$79,384.00	$79,384.50	see attached sales quote for HW breakdown
Software Licenses: Costs for any required network software licenses.	$12,240.50	$12,240.50	see attached sales quote for SW licenses/subscription
Travel and Expenses: Costs for travel, lodging, and other expenses incurred during the project.	$3,500	$3,500	
	Total	**$137,740.00**	

Solution Delivery

The delivered network solution must be:
100% Configured: All network devices must be fully configured to our specifications, including IP addressing, routing protocols, security policies, and QoS settings.
Fully Functional: The network solution must be fully functional and perform to our required standards.
Documented: The vendor must provide comprehensive documentation of the network design, implementation, and configuration.

Replace Degraded Exposed Structured Cabling

Campus	Cabling	Drop Length	Drop Qty
Coleman	Cat6a	100 meters	200
Cooke	Cat6a	100 meters	300

Network Cabling: Install, run, terminate, use J-hooks, and use conduit for all outdoor runs and in interior locations as needed. No cabling will be exposed.
Network Cabling: Supply Cat6a patch cables for each new drop.
Network Cabling: Use the existing cabling and patch cables.

Professional Services for structured cabling

The selected vendor will be responsible for providing all necessary professional services to design, implement, and configure a new network solution. These services include, but are not limited to:
Network Design: Develop a detailed network design that aligns with our specific requirements, including topology, device selection, and configuration specifications.
Hardware Procurement: Source and procure all required network hardware, including switches, routers, firewalls, and wireless access points.
Network Implementation: Install and configure all network devices according to the approved design and specifications.
Network Configuration: Configure all network devices to meet our specific requirements, including IP addressing, routing protocols, security policies, and quality of service (QoS) settings.
Network Cabling: Provide and cable all required cabling and SFP modules to industry standards.
Existing Network Cabling: Remove existing network cabling and return to CISD.
Testing and Validation: Thoroughly test the entire network solution to ensure it meets performance, security, and reliability standards.
Documentation: Provide comprehensive documentation of the network design, implementation, and configuration.
Project Management: Manage the entire project, including planning, scheduling, and communication with all stakeholders.

Pricing

The vendor must provide a detailed breakdown of all costs associated with the professional services, including:		Total	
Professional Services Fees: Hourly rates for network engineers, project managers, and other technical staff.	$406,000.00	$406,000.00	(PS & T&E)
Hardware Costs: Costs for all network hardware, including switches, routers, firewalls, and wireless access points.	NA	$0	
Software Licenses: Costs for any required network software licenses.	NA	$0	
Travel and Expenses: Costs for travel, lodging, and other expenses incurred during the project.	NA (Included in project total for structured cabling)	$0	
	Total	**$406,000.00**	

Solution Delivery

The delivered network solution must be:
100% Configured: All network devices must be fully configured to our specifications, including IP addressing, routing protocols, security policies, and QoS settings.
Fully Functional: The network solution must be fully functional and perform to our required standards.
Documented: The vendor must provide comprehensive documentation of the network design, implementation, and configuration.

A OneC1 solution for

Cleburne Independent School District

Cleburne Independent School District
513 N Ridgeway Drive
Cleburne, TX 76033

Dear Michael:

Thank you for the opportunity to participate in the Cleburne Independent School District Form 470 #: 250008635. We understand that Cleburne Independent School District is ready to invest to enable your staff to engage more effectively virtually serving your constituents, residents and businesses.

In the attached response, we have attempted to address all the questions as succinctly and factually as possible. As you are reviewing this response, please do not hesitate to let me know if you have any questions or clarifications regarding our answers.

C1, a subsidiary of ConvergeOne, Inc.is committed to providing best-in-class design, implementation and day two support services with our industry leading, certified teams. With our local presence, our teams are readily available to service Cleburne Independent School District with our local resources.

C1 maintains a dedicated government practice with resources focused on local government. As you evaluate our response, please know that C1 prides ourselves on our client satisfaction and building a long-term partnership with our clients.

Thank you again for this opportunity. Please do not hesitate to reach out directly to Chericia Curtis at ccurtis@oneC1.com

Thank you,

Shane Harper

Executive Summary

C1 is a proven, service led, cloud solution provider that utilizes intellectual property and unique methodologies to create value for our customers to develop progressive solutions that connect people with purpose. Over 6,000 enterprise and mid-market customers trust C1 with cloud, collaboration, enterprise networking, data center and cybersecurity solutions to achieve business outcomes. Our investments in cloud infrastructure and professional and managed services provide transformational opportunities for customers to achieve financial and operational benefits with leading technologies.

C1 has partnerships with more than 300 global industry leaders, including Avaya, Cisco, Dell Technologies, Extreme Networks, Genesys, Juniper, IBM, Microsoft and VMware to customize specific business outcomes. We deliver solutions with a full lifecycle approach including strategy, design and implementation with professional, managed and support services. C1 holds more than 5,600 technical certifications across hundreds of engineers throughout North America, including three Customer Success Centers.

Our Expertise

- 30+ years of experience – and counting!
- More than 6,000 customers, including 55% of the Fortune 100, 41% of the Fortune 500 and 36% of the Fortune 1000 customers across the healthcare, finance, manufacturing, education and energy enterprises
- In-house engineers, design specialists, and technicians holding 5,600+ active industry certifications

Our Portfolio

- Intellectual Property (IP): C1Conversations and OnGuard – Spans customer environments encompassing many different technologies, making those technologies more efficient and allowing customers to continue to realize benefits from existing investments.
- Solutions: Customer Experience, Cybersecurity, Data Center, Enterprise Networking and Unified Communications
- Services: Cloud, Maintenance, Managed Services and Professional Services
- Center of Excellence: Extensive technical and administrative training courses with multiple delivery options: web, instructor led, on-site, etc.

Our Resources

- 2,600+ employees in offices nationwide – and growing
- Strategic partnerships for integration of best-of-breed hardware, software, and applications
- Three state-of-the-art Network Operations Centers for multivendor support
- High-tech Performance Readiness Center® for configuration, staging, and testing
- One source for systems integration, data networking, IT specialty consulting, application development, program management, and more

- Alliance Program: Bringing our expertise and solutions to global clients through our international partnerships

Our Partners

- Strategic technology partners include Avaya, Cisco, Dell Technologies, Extreme Networks, Genesys, Juniper, IBM, Microsoft, VMware and many more.

At ConvergeOne, our goal is to earn your trust as an advisor – someone you count on to deliver the very best solution based on a thorough understanding of your business and the ways in which the right technology can help you achieve your goals.

ConvergeOne E-Rate Program

The ConvergeOne team has been responding to E-Rate Category 2 Internal Connections since Year One (1998) for a combined total of 48 years of experience. In addition, ConvergeOne sends members of our SLED and Public Sector Contracts teams to the yearly USAC/SLD training. Additionally, ConvergeOne employs an independent consulting firm, Funds for Learning, to ensure ConvergeOne maintains complete program compliance. For FY22, ConvergeOne was the #2 E-Rate Partner providing Category 2 Internal Connections hardware/software, cabling, professional services and maintenance. ConvergeOne can support SPI or BEAR invoicing.

- ConvergeOne SPIN: 143011994
- ConvergeOne FRN: 0011951522

Why ConvergeOne?

Since it was launched in 1993, ConvergeOne has earned a reputation as a quality provider of value-added communications solutions for businesses of all types and sizes. Our investments in a dedicated implementation team, ongoing training, industry certifications, and state-of-the-art service delivery tools make us skilled in sales, design, network integration, project management, ongoing support – virtually everything you need to implement an end-to-end information technology solution.

From the start, ConvergeOne has focused on delivering personalized attention rather than a "one size fits all" solution. We listen closely and work to learn all we can about a customer's business, and then create an end-to-end solution designed to meet the customers' needs on all levels.

At ConvergeOne, we measure the trust that organizations place in us based on the long-standing relationships we develop with customers and a high percentage of repeat business. These relationships, as well as those we've built with our partners, are key to our success and instrumental to our growth.

C1 combines unequaled knowledge and experience with a can-do attitude to develop customer solutions that work from day one and keep on working. We don't simply install the "latest and greatest." Our professionals transform leading-edge technologies into innovative, reliable communications solutions.

ConvergeOne's portfolio is not limited by proprietary products and services, giving us the flexibility to create a "vendor-agnostic" solution based on a customer's unique business criteria and communications requirements. ConvergeOne's multivendor capabilities also include monitoring and maintenance services from our high-tech CSCs.

All manufacturer solutions are carefully screened and field-tested by C1 to ensure the results and deliver the promised value to our customers. Our engineers and technicians also take extra steps to ensure seamless integration of an end-to-end solution – programming and testing every component at our state-of-the-art Performance Readiness Center® prior to shipment to a customer's site.

The Center of Excellence for Learning and Development further enhances the C1 advantage by offering customers a variety of training opportunities to help them build their own administrative and application proficiency.

When you choose C1 as your information technology solutions and services provider, you not only work with one of the most experienced multi-vendor Business Partners in the industry – you gain a partner who is dedicated to the relationship and committed to adding value to your business.

Customer RFP

Site Visit: The district will have a site visit Friday, December 20, 2024 with a start time of 10 AM CST. Vendors should report to Cleburne ISD Central Office Annex (Technology Building), located at 513 N Ridgeway Drive, Cleburne TX, 76033. The District would like to limit the site visit to two individuals per company/service provider. Attendance is not mandatory but highly encouraged. Please RSVP to Michael Wallace viaemail:techrfp@c-isd.com.

All proposals need to be submitted through this system to be accepted. No phone calls concerning this application will be accepted. All communication about this RFP will only be provided via the Q&A section of this RFP in which questions and answers will be posted publicly. Responses received after the stated deadline may be deemed non-responsive. All vendors must comply with Texas Education Agency Financial Accountability Guidelines found in Module 5:Purchasing.

C1 has read and understands.

Specific Requirements:

- All proposals should be received by the Bid Close Date. Any offer, modification, revision, or withdrawal of an offer received after this Close Date may not be considered unless it is determined that an untimely submission was due to circumstances beyond the vendors control, a consideration of the offer would be in the best interest of the applicant, or the offer is the only proposal received.

C1 has read and understands.

- For all of the items/services listed in this Request for Proposal, please consider services that are equivalent, more/less in quantity, better and/or more cost effective when submitting proposals.

C1 has read and understands.

- If installation is requested, then installation must be included with the equipment and/or service requested. Otherwise, the bid may be considered non-responsive.

C1 has read and understands.

- All equipment on this request is for owned equipment. Unless otherwise stated, any leased equipment responses may be deemed non responsive.

C1 has read and understands.

- In the event that no bids are received in a certain service category, we may solicit cost-effective bids after the Bid Close Date.

C1 has read and understands.

- If special construction charges apply, please include the option for installment payments of up to 4 years for the applicants non-discounted share.

C1 has read and understands.

- All contracts are contingent upon funding by the Schools and Libraries Division (SLD) of the Universal Services Administrative Company (USAC) unless otherwise agreed upon by district.

C1 has read and understands.

- All pricing provided in the proposal should be in accordance with the Lowest Corresponding Price rule.

C1 has read and understands.

- Service providers may include contingency fees in their bid responses if they deem it a necessary item and the fees are reasonable and a regular business practice. These fees should be included based on the situation/circumstances to provide the service/products. These charges should be separate from any other charges and clearly listed in the proposal. The fees will only be paid if the service/products are completed.

C1 has read and understands.

- Proposers should separate the cost of eligible services/products from non-eligible services/products and clearly indicate this separation on the proposal.

C1 has read and understands.

- Proposer must be in good standing with the Federal Communications Commission (FCC)and does not have a red-light status. If there is a red-light status, the contract will become null and void without penalty to the applicant.

C1 has read and understands.

- Proposers will be held responsible for complying with all E-Rate program rules. No gifts shall be offered or accepted by the applicant at any time.

C1 has read and understands.

- All submitted bids should include contracts and the contracts should also include the option for voluntary extensions unless they are month to month services.

C1 has read and understands.

- Submitted bids should include scalability of bandwidth during the terms of the contract.

C1 has read and understands.

- A manufacturer's multi-year warranty for a period up to three years that is provided as an integral part of an eligible component, without a separately identifiable cost, may be included in the cost of the component.

C1 has read and understands.

Function	Mfg or Equivalent	Model	Quantity	Unit	Install & Config	Campus
Switches, Components, and Software & Licenses	Cisco Catalyst or Equivalent	C9300-NM-2Y	4	Each	Yes	District Wide
Approximately (4) or more Cisco Catalyst C9300-NM-2Y, Catalyst 9300 2 x 25GE Network Module or equivalent, located at the Cleburne ISD Admin (DMARC) for district wide use, each configured with any related components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
UPS, Components, and Software & Licenses	Cisco Catalyst or Equivalent	C9K-PWR-650WAC-R/2	2	Each	Yes	District Wide
Approximately 2 or more Cisco Catalyst C9K-PWR-650WAC-R/2, 650W AC Config 4 Power Supply front to back cooling, UPS/Battery Backups or equivalent and all related components including software and licenses for the following locations: 2 more or less located at the Cleburne ISD Admin (DMARC) for district wide use. *Please bid on a 5-year license if a license is required. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
UPS, Components, and Software & Licenses	Cisco Catalyst or Equivalent	PWR-C1-350WAC-P/2	4	Each	Yes	District Wide
Approximately 4 or more Cisco Catalyst PWR-C1-350WAC-P/2, UPS/Battery Backups or equivalent and all related components including software and licenses for the following locations: 4 more or less located at the Cleburne ISD Admin (DMARC) for district wide use. *Please bid on a 5-year license if a license is required. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Cabling & All Related Components	No Preference	Cat6a	1200	Feet	Yes	District Wide
Approximately 1200 feet of Cat6a or equivalent for the network cabling located at Cleburne ISD Admin (DMARC) for distribution at the network core. The cabling will be for approximately 80 drops or more at approximately 15 feet per drop. ***To include all related components, such as but not limited to: j hooks, patch panels, patch cables, connectors, conduit, installation, configuration, runs and terminations. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Cabling & All Related Components	Cisco Catalyst or Equivalent	STACK-T1-50CM	6	Feet	Yes	District Wide
Approximately 6 feet (4 at 50cm each) of Cisco Catalyst STACK-T1-50CM, 50CM Type 1 Stacking Cable, or equivalent for the core network equipment located at Cleburne ISD Admin (DMARC). The cabling will be for approximately 4 stacking cables or more at approximately 50cm each. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Cabling & All Related Components	Cisco Catalyst or Equivalent	CAB-SPWR-30CM	4	Feet	Yes	District Wide
Approximately 4 feet (4 at 30cm each) of Cisco Catalyst CAB-SPWR-30CM, Catalyst Stack Power Cable 30 CM, or equivalent for the core network equipment located at Cleburne ISD Admin (DMARC). The cabling will be for approximately 4 stacking cables or more at approximately 30cm each. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
WAPs, Components, and Software & Licenses	Extreme or Equivalent	AP5020-WW	822	Each	Yes	Multiple Locations
Approximately 822 or more Extreme Solutions AP5020-WW (Internal) or equivalent Wireless Access Points and all related components for the following locations: 54 more or less WAPs at Adams Elementary School, 264 more or less WAPs at Cleburne High School, 45 more or less WAPs at Coleman Elementary School, 50 more or less WAPs at Cooke Elementary School, 43 more or less WAPs at Gerard Elementary School, 54 more or less WAPs at Irving Elementary School, 51 more or less WAPs at Marti Elementary School, 54 more or less WAPs at Santa Fe Elementary School, 102 more or less WAPs at Lowell Smith JR Intermediate, and 105 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on the following 5-year license if a license is required: XCIQ-PT0-C-EW-5YR-K12 or equivalent.						
WAPs, Components, and Software & Licenses	Extreme or Equivalent	AP460S12C-FCC	62	Each	Yes	Multiple Locations

Function	Mfg or Equivalent	Model	Quantity	Unit	Install & Config	Campus
Approximately 62 or more Extreme Solutions AP460S12C-FCC (External) or equivalent Wireless Access Points and all related components for the following locations: 4 more or less WAPs at Adams Elementary School, 15 more or less WAPs at Cleburne High School, 4 more or less WAPs at Coleman Elementary School, 3 more or less WAPs at Cooke Elementary School, 4 more or less WAPs at Gerard Elementary School, 4 more or less WAPs at Irving Elementary School, 4 more or less WAPs at Marti Elementary School, 4 more or less WAPs at Santa Fe Elementary School, 9 more or less WAPs at Lowell Smith JR Intermediate, and 11 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on the following 5-year license if a license is required: XCIQ-PT0-C-EW-5YR-K12 or equivalent.						
WAPs, Components, and Software & Licenses	Extreme or Equivalent	AP460S6C-FCC	34	Each	Yes	Multiple Locations
Approximately 34 or more Extreme Solutions AP460S6C-FCC (Directional) or equivalent Wireless Access Points and all related components for the following locations: 20 more or less WAPs at Cleburne High School, 6 more or less WAPs at Lowell Smith JR Intermediate, and 8 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on the following 5-year license if a license is required: XCIQ-PT0-C-EW-5YR-K12 or equivalent.						
WAPs, Components, and Software & Licenses	Extreme or Equivalent	ACC-MBO-KT-AX	96	Each	Yes	Multiple Locations
Approximately 96 or more Extreme Solutions ACC-MBO-KT-AX or equivalent Mounting Brackets for Wireless Access Points and all related components for the following locations: 4 more or less WAPs at Adams Elementary School, 35 more or less WAPs at Cleburne High School, 4 more or less WAPs at Coleman Elementary School, 3 more or less WAPs at Cooke Elementary School, 4 more or less WAPs at Gerard Elementary School, 4 more or less WAPs at Irving Elementary School, 4 more or less WAPs at Marti Elementary School, 4 more or less WAPs at Santa Fe Elementary School, 15 more or less WAPs at Lowell Smith JR Intermediate, and 19 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
WAPs, Components, and Software & Licenses	Extreme or Equivalent	KT-147407-02	96	Each	Yes	Multiple Locations
Approximately 96 or more Extreme Solutions KT-147407-02 or equivalent Mounting Brackets for Wireless Access Points and all related components for the following locations: 4 more or less WAPs at Adams Elementary School, 35 more or less WAPs at Cleburne High School, 4 more or less WAPs at Coleman Elementary School, 3 more or less WAPs at Cooke Elementary School, 4 more or less WAPs at Gerard Elementary School, 4 more or less WAPs at Irving Elementary School, 4 more or less WAPs at Marti Elementary School, 4 more or less WAPs at Santa Fe Elementary School, 15 more or less WAPs at Lowell Smith JR Intermediate, and 19 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Cabling & All Related Components	No Preference	Cat6a	29200	Feet	Yes	Multiple Locations
Approximately 29,200 feet of Cat6a (Internal) or equivalent for drops and patch cables. The cabling will be for approximately 89 or more drops at approximately 100 meters (328.08 feet) per drop located at the following locations: 6 more or less drops at Adams Elementary School, 28 more or less drops at Cleburne High School, 3 more or less drops at Coleman Elementary School, 2 more or less drops at Cooke Elementary School, 4 more or less drops at Gerard Elementary School, 6 more or less drops at Irving Elementary School, 4 more or less drops at Marti Elementary School, 6 more or less drops at Santa Fe Elementary School, 21 more or less drops at Lowell Smith JR Intermediate, and 9 more or less drops at Wheat Middle School. ***To include all related components, such as but not limited to: j hooks, patch panels, patch cables, connectors, conduit, installation, configuration, runs and terminations. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Cabling & All Related Components	No Preference	Cat6a	19685	Feet	Yes	Multiple Locations
Approximately 19,685 feet of Cat6a (External) or equivalent for drops and patch cables. The cabling will be for approximately 60 or more drops at approximately 100 meters (328.08 feet) per drop located at the following locations: 4 more or less drops at Adams Elementary School, 15 more or less drops at Cleburne High School, 4 more or less drops at Coleman Elementary School, 3 more or less drops at Cooke Elementary School, 4 more or less drops at Gerard Elementary School, 4 more or less drops at Irving Elementary School, 4 more or less drops at Marti Elementary School, 4 more or less drops at Santa Fe Elementary School, 9 more or less drops at Lowell Smith JR Intermediate, and 9 more or less drops at Wheat Middle School. ***To include all related components, such as but not limited to: j hooks, patch panels, patch cables, connectors, conduit, installation, configuration, runs and terminations. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						

Function	Mfg or Equivalent	Model	Quantity	Unit	Install & Config	Campus
WAPs, Components, and Software & Licenses	Aruba or Equivalent	HPE ANW AP-735	822	Each	Yes	Multiple Locations
Approximately 822 or more Aruba HPE ANW AP-735 (Internal) or equivalent Wireless Access Points and all related components for the following locations: 54 more or less WAPs at Adams Elementary School, 264 more or less WAPs at Cleburne High School, 45 more or less WAPs at Coleman Elementary School, 50 more or less WAPs at Cooke Elementary School, 43 more or less WAPs at Gerard Elementary School, 54 more or less WAPs at Irving Elementary School, 51 more or less WAPs at Marti Elementary School, 54 more or less WAPs at Santa Fe Elementary School, 102 more or less WAPs at Lowell Smith JR Intermediate, and 105 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on the following 5-year license if a license is required: #Q9Y60AAE (HPE ANW Central AP Fnd 5y E- STU) or equivalent.						
WAPs, Components, and Software & Licenses	Aruba or Equivalent	HPE ANW AP-675 #S0P50A	62	Each	Yes	Multiple Locations
Approximately 62 or more Aruba HPE ANW AP-675 #S0P50A (External) or equivalent Wireless Access Points and all related components for the following locations: 4 more or less WAPs at Adams Elementary School, 15 more or less WAPs at Cleburne High School, 4 more or less WAPs at Coleman Elementary School, 3 more or less WAPs at Cooke Elementary School, 4 more or less WAPs at Gerard Elementary School, 4 more or less WAPs at Irving Elementary School, 4 more or less WAPs at Marti Elementary School, 4 more or less WAPs at Santa Fe Elementary School, 9 more or less WAPs at Lowell Smith JR Intermediate, and 11 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on the following 5-year license if a license is required: #Q9Y60AAE (HPE ANW Central AP Fnd 5y E- STU) or equivalent.						
WAPs, Components, and Software & Licenses	Aruba or Equivalent	HPE ANW AP-677 #S0P55A	34	Each	Yes	Multiple Locations
Approximately 34 or more Aruba HPE ANW AP-677 #S0P55A (Directional) or equivalent Wireless Access Points and all related components for the following locations: 20 more or less WAPs at Cleburne High School, 6 more or less WAPs at Lowell Smith JR Intermediate, and 8 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on the following 5-year license if a license is required: #Q9Y60AAE (HPE ANW Central AP Fnd 5y E- STU) or equivalent.						
WAPs, Components, and Software & Licenses	Aruba or Equivalent	HPE AP-MNT- MP10-B #Q9G69A	79	Each	Yes	Multiple Locations
Approximately 79 or more Aruba HPE AP-MNT- MP10-B #Q9G69A or equivalent Mounting Brackets for Wireless Access Points and all related components for the following locations: 5 more or less WAPs at Adams Elementary School, 26 more or less WAPs at Cleburne High School, 4 more or less WAPs at Coleman Elementary School, 5 more or less WAPs at Cooke Elementary School, 4 more or less WAPs at Gerard Elementary School, 5 more or less WAPs at Irving Elementary School, 5 more or less WAPs at Marti Elementary School, 5 more or less WAPs at Santa Fe Elementary School, 10 more or less WAPs at Lowell Smith JR Intermediate, and 10 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
WAPs, Components, and Software & Licenses	Aruba or Equivalent	AP-MNT-B AP #R3J16A	32	Each	Yes	Multiple Locations
Approximately 32 or more Aruba AP-MNT-B AP #R3J16A or equivalent Mounting Brackets for Wireless Access Points and all related components for the following locations: 4 more or less WAPs at Adams Elementary School, 4 more or less WAPs at Cleburne High School, 5 more or less WAPs at Coleman Elementary School, 3 more or less WAPs at Gerard Elementary School, 4 more or less WAPs at Irving Elementary School, 1 more or less WAPs at Marti Elementary School, 4 more or less WAPs at Santa Fe Elementary School, 2 more or less WAPs at Lowell Smith JR Intermediate, and 5 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
WAPs, Components, and Software & Licenses	Aruba or Equivalent	AP-270-MNT-V1A #R9H97A	62	Each	Yes	Multiple Locations

Function	Mfg or Equivalent	Model	Quantity	Unit	Install & Config	Campus
Approximately 62 or more Aruba AP-270-MNT-V1A #R9H97A Outdoor Long Arm Mount or equivalent Mounting Brackets for Wireless Access Points and all related components for the following locations: 4 more or less WAPs at Adams Elementary School, 15 more or less WAPs at Cleburne High School, 4 more or less WAPs at Coleman Elementary School, 3 more or less WAPs at Cooke Elementary School, 4 more or less WAPs at Gerard Elementary School, 4 more or less WAPs at Irving Elementary School, 4 more or less WAPs at Marti Elementary School, 4 more or less WAPs at Santa Fe Elementary School, 9 more or less WAPs at Lowell Smith JR Intermediate, and 11 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
WAPs, Components, and Software & Licenses	Aruba or Equivalent	AP-270-MNT-H3 #R6W11A	34	Each	Yes	Multiple Locations
Approximately 34 or more Aruba AP-270-MNT-H3 #R6W11A Outdoor Dual Tilt Mount or equivalent Mounting Brackets for Wireless Access Points and all related components for the following locations: 20 more or less WAPs at Cleburne High School, 6 more or less WAPs at Lowell Smith JR Intermediate, and 8 more or less WAPs at Wheat Middle School. ***Bids must include all components, cabling, software and licenses to make the service work. Also to include any other parts as required and all relevant components including installation, implementation, and configuration. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Firewall, Components, and Software & Licenses	Palo Alto or Equivalent	PAN-PA-3420	1	Each	Yes	District Wide
Firewall appliance: Palo Alto PAN-PA-3420 5 YR or equivalent and all related components to be installed at Cleburne ISD Admin (DMARC) shared by all entities for district-wide use. Bids should include applicable software and licenses to make the service work. Also include any other parts as required and all relevant components including installation, implementation, configuration, and software and licenses. ***Please identify eligible costs from ineligible costs. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on the following 5 year license if a license is required: PAN-PA-3420-BND-CORESEC-5YR or equivalent.						
Switches, Components, and Software & Licenses	Cisco Catalyst or Equivalent	C9200L-48P-4X-EDU	25	Each	Yes	Multiple Locations
Approximately (25) or more Cisco Catalyst C9200L-48P-4X-EDU, Catalyst 9200L 48-port PoE+ only, 4x10G uplinks, K12, or equivalent switches, located at multiple campuses, each configured with related components as follows: (1) x C9200L-DNA-E-48, C9200L Cisco DNA Essentials, 48-port Term license-- (1) x C9200L-DNA-E-48-3Y, C9200L Cisco DNA Essentials, 48-port, 3 Year Term license-- (1) x C9200L-NW-E-48, C9200L Network Essentials, 48-port license-- (2) x CAB-TA-NA, North America AC Type A Power Cable-- (1) x C9K-ACC-RBFT, RUBBER FEET FOR TABLE TOP SETUP 9200 and 9300-- (1) x C9K-ACC-SCR-4, 12-24 and 10-32 SCREWS FOR RACK INSTALLATION, QTY 4-- (1) x CAB-GUIDE-1RU, 1RU CABLE MANAGEMENT GUIDES 9200 and 9300-- (2) x C9200-STACK, Catalyst 9200 Stack Module-- (1) x NETWORK-PNP-LIC, Network Plug-n-Play Connect for zero-touch device deployment-- ## *7 more or less Switches at Adams Elementary School, *3 more or less Switches at Irving Elementary School, *2 more or less Switches at Marti Elementary School, *11 more or less Switches at Santa Fe Elementary School, *2 more or less Switches at Lowell Smith JR Intermediate, and ***And any other parts as required and all relevant components including installation, implementation, configuration, and software and licenses. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on a 3 year license if a license is required.						
Switches, Components, and Software & Licenses	Cisco Catalyst or Equivalent	C9200L-STACK-KIT	25	Each	Yes	Multiple Locations
Approximately (25) or more Cisco Catalyst C9200L-STACK-KIT, Catalyst 9200L Stack Module for switches, or equivalent , located at multiple campuses, each configured with related components as follows: *7 more or less Switches at Adams Elementary School, *3 more or less Switches at Irving Elementary School, *2 more or less Switches at Marti Elementary School, *11 more or less Switches at Santa Fe Elementary School, *2 more or less Switches at Lowell Smith JR Intermediate, ***And any other parts as required and all relevant components including installation, implementation, configuration, and software and licenses. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
UPS, Components, and Software & Licenses	Cisco Catalyst or Equivalent	PWR-C5-1KWAC/2	25	Each	Yes	Multiple Locations
Approximately 25 or more Cisco Catalyst PWR-C5-1KWAC/2, 1KW AC Config 5 Power Supply, UPS/Battery Backups or equivalent and all related components including software and licenses for the following locations: *7 more or less Switches at Adams Elementary School, *3 more or less Switches at Irving Elementary School, *2 more or less Switches at Marti Elementary School, *11 more or less Switches at Santa Fe Elementary School, *2 more or less Switches at Lowell Smith JR Intermediate, ***And any other parts as required and all relevant components including installation, implementation, configuration, and software and licenses. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications. ***Please bid on a 3-year license if a license is required.						
Cabling & All Related Components	Cisco Catalyst or Equivalent	STACK-T4-50CM	41	Feet	Yes	Multiple Locations

Function	Mfg or Equivalent	Model	Quantity	Unit	Install & Config	Campus
Approximately 41 feet (25 at 50cm each) of Cisco Catalyst STACK-T4-50CM, 50CM Type 4 Stacking Cable, or equivalent for the following locations: *11.5 feet (7 units) more or less at Adams Elementary School, *5 feet (3 units) more or less at Irving Elementary School, *3 feet (2 units) more or less at Marti Elementary School, *18 feet (11 units) more or less at Santa Fe Elementary School, *3 feet (2 units) more or less at Lowell Smith JR Intermediate, The cabling will be for approximately 25 stacking cables or more at approximately 50cm each. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Cabling & All Related Components	Cisco Catalyst or Equivalent	STACK-T4-1M=	82	Feet	Yes	Multiple Locations
Approximately 82 feet (25 at 1m each) of Cisco Catalyst STACK-T4-1M=, 1M Type 4 Stacking Cable, or equivalent for the following locations: *23 feet (7 units) more or less at Adams Elementary School, *10 feet (3 units) more or less at Irving Elementary School, *6.5 feet (2 units) more or less at Marti Elementary School, *36 feet (11 units) more or less at Santa Fe Elementary School, *6.5 feet (2 units) more or less at Lowell Smith JR Intermediate, The cabling will be for approximately 25 stacking cables or more at approximately 1m each. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Cabling & All Related Components	Cisco Catalyst or Equivalent	STACK-T4-3M=	246	Feet	Yes	Multiple Locations
Approximately 246 feet (25 at 3m each) of Cisco Catalyst STACK-T4-3M=, 3M Type 4 Stacking Cable, or equivalent for the following locations: *69 feet (7 units) more or less at Adams Elementary School, *29.5 feet (3 units) more or less at Irving Elementary School, *20 feet (2 units) more or less at Marti Elementary School, *108 feet (11 units) more or less at Santa Fe Elementary School, *20 feet (2 units) more or less at Lowell Smith JR Intermediate. The cabling will be for approximately 25 stacking cables or more at approximately 3m each. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Cabling & All Related Components	No Preference	Cat6a	164040	Feet	Yes	Multiple Locations
Approximately 164,040 feet of Cat6a or equivalent for drops to replace degraded and exposed Structured cabling. The cabling will be for approximately 500 or more drops at approximately 100 meters (328.08 feet) per drop located at the following locations: 200 more or less drops at Coleman Elementary School, and 300 more or less drops at Cooke Elementary School, ***To include all related components, such as but not limited to: j hooks, patch panels, patch cables, connectors, conduit, installation, configuration, runs and terminations. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						
Software and Licenses - (Existing Equipment)	Cisco or equivalent	See Narrative	16	Each	Yes	Multiple Locations
Software and licenses supporting all relevant components of the existing equipment used to distribute high-speed broadband throughout the school buildings. We are requesting E-Rate reimbursement beginning July 1, 2025. ***See RFP Attachment "Cleburne BMIC Licenses Equipment List 2025" for all specifications and locations to include in bid response. E-Rate eligible equipment is highlighted in yellow with a quantity of 12 and the remaining 4 in white are ineligible. ***Bid response must clearly separate out eligible and ineligible costs.						
Software and Licenses - (Existing Firewall)	Palo Alto or equivalent	PA-5220 (See Narrative)	1	Each	Yes	District Wide
Software and licenses supporting all relevant components of the existing firewall used to distribute high-speed broadband throughout school buildings. The district is requesting bid for two different options: Option 1: PAN-PA-5220-BND-CORESEC-R (PA-5220, Core Security Subscription Renewal Bundle (Advanced Threat Prevention, Advanced URL Filtering, Advanced Wildfire, DNS Security and SD-WAN), 1 years (12 months) term) or equivalent to support PA-5220-- Option 2: PAN-PA-5220-BND-CORESEC-3YR-R (PA-5220, Core Security Subscription Renewal Bundle (Advanced Threat Prevention, Advanced URL Filtering, Advanced Wildfire, DNS Security and SD-WAN), 3 years (36 months) term) or equivalent to support PA-5220.						

Managed Internal Broadband Services

Leased or Existing	Already Installed	Model or Equivalent	Install & Config	Quantity	Unit	Campus
Leased	False	Palo Alto or Equivalent	No	1	Each	District Wide
Seeking quotes on managed services for (1) Palo Alto FWaaS - PAN-PA-3420 5 YR (leased) firewall or equivalent to be installed at Cleburne ISD Admin (DMARC) shared by all entities for district-wide use. There are approximately 7400 students plus staff and faculty across 20 campuses. Please provide bids for 5-year managed services. Please include the Subscription - Core Security Bundle PAN-PA-3420-BND-CORESEC-5YR or equivalent. ***Please see BOM attached "Cleburne_2025_C2 BOM" for all specifications.						

Basic Maintenance of Internal Connections

CONFIDENTIAL AND PROPRIETARY INFORMATION OF C1

This Solution Summary summarizes the documents(s) that are attached hereto and such documents are incorporated herein by reference (collectively, this "Order"). Customer's signature on this Order (or Customer's issuance of a purchase order in connection with this Order) shall represent Customer's agreement with each document in this Order and acknowledgement that such attached document(s) are represented accurately by this Solution Summary.

Unless otherwise specified in this Order, this Order shall be subject to the following terms and conditions (the "Agreement"): (i) the Master Sales Agreement or other applicable agreement in effect as of the date hereof between ConvergeOne, Inc. and/or its subsidiaries and affiliates (collectively, "C1" or "Seller") and Customer; or (ii) if no such applicable agreement is currently in place between C1 and Customer, the Online General Terms and Conditions currently found on the internet at: https://www.onec1.com/agreements . If Customer's Agreement is a master agreement entered into with one of C1's predecessors, affiliates and/or subsidiaries ("Legacy Master Agreement"), the terms and conditions of such Legacy Master Agreement shall apply to this Order, subject to any modifications, located at: https://www.onec1.com/agreements . In the event of a conflict between the terms and conditions in the Agreement and this Order, the order of precedence shall be as follows: (i) this Order (with the most recent and specific document controlling if there are conflicts between the Solution Summary and any applicable supporting document(s) incorporated into this Order), (ii) Attachment A to the Agreement (if applicable), and (iii) the main body of the Agreement.

This Order may include the sale of any of the following to Customer: (a) any hardware, third party software, and/or Seller software (collectively, "Products"); (b) any installation services, professional services, and/or third party provided support services that are generally associated with the Products and sold to customers by Seller (collectively, "Professional Services"); (c) any Seller-provided vendor management services, software release management services, remote monitoring services and/or, troubleshooting services (collectively, "Managed Services"); and/or (d) any Seller-provided maintenance services ordered by Customer to maintain and service Supported Products or Supported Systems at Supported Sites to ensure that they operate in conformance with their respective documentation and specifications (collectively, "Maintenance Services"). For ease of reference only, Professional Services, Managed Services and Maintenance Services may be referred to collectively as "Services." Unless otherwise defined herein, capitalized terms used herein will have the same meanings as set forth in the Agreement.

Notwithstanding anything to the contrary stated above, this Order is subject to the terms and conditions of the Public Sector Contract referenced herein, and such Public Sector Contract supersedes all references to a Master Sales Agreement, the Online General Terms and Conditions, and/or a Legacy Master Agreement referred above

Products and/or Services not specifically itemized are not provided hereunder. This Order will be valid for a period of thirty (30) days following the date hereof. Thereafter, this Order will no longer be of any force and effect. Due to rapidly changing prices in the market for third party Products and/or Services, after the expiration of the foregoing 30 day period, Seller reserves the right to adjust offerings and/or prices accordingly prior to issuing any new Order(s).

This Order is a configured order and/or contains software.

1. SCOPE OF WORK - TERMS AND CONDITIONS

This Statement of Work or Scope of Work ("SOW") and the applicable Solution Summary (and any documents attached thereto and incorporated therein by reference) (collectively, this "Order") is between ConvergeOne, Inc. and/or its subsidiaries and affiliates (collectively, "ConvergeOne" or "Seller") and Cleburne Independent School District ("Customer"), and is subject to the terms and conditions of the Public Sector Contract(s) referenced in Professional Services Pricing and Billing Schedule herein (each individually and collectively, the "Agreement"), and such Public Sector Contract(s) supersedes any and all references to a Master Sales Agreement, the Online General Terms and Conditions, and/or a Legacy Master Agreement in the Order. In the event of a conflict between the terms and conditions in the Agreement and this Order, the terms of the Agreement shall control.

Any dates and/or time intervals listed in this Order are approximate and for planning purposes only. ConvergeOne will use commercially reasonable efforts to accommodate any requested dates; provided however, project milestones will be fully discussed and mutually agreed upon between ConvergeOne and Customer after project kickoff.

Services not specifically itemized are not provided herein. Any additional applications, technologies, integrations, or other Services not specified herein, are not included in this SOW, and may result in additional charges at any time during the project.

The outline of deliverables for this Order follows below.

The outline of deliverables for this Order follows below.

DRAFT

2. PROJECT TIMELINE EXPECTATIONS

Approximately 5 business days after signed acceptance of this SOW, C1 will assign a project manager that will make contact and start planning a project kick-off meeting. The project kick-off may not take place immediately. Project start times depend on the availability of C1 and Customer resources.

The expected duration of this project has been budgeted at twenty (20) weeks from the time of kick-off to completion. If the project exceeds this timeframe, a project change order may be required to extend the engagement, resulting in additional fees.

3. PROJECT OVERVIEW

Thank you for the opportunity to work with you on the Cleburne ISD RFP project. This document describes the work to be performed during this engagement and covers the assumptions as the basis for this agreement, the responsibilities of C1 personnel, and the responsibilities of the Customer.

3.1. ITLS (IT Life Cycle Services)

The scope of this service engagement is to provide system deployment and/or imaging services for **Cleburne Independent School District**. Details of the engagement are outlined below, and specific deployment details are contained in the body of this document.

ITLS Switches Configuration & Deployment:
A total of 32 Switches will be deployed as part of this engagement.

ITLS Wireless Access Points Device Configuration and Deployment:
A total of 918 Wireless Access Points will be deployed as part of this Engagement.

C1 will be implementing or performing the following as part of this project:

- ExtremeCloud IQ cloud-managed network

3.2. Project Location(s)

Below is a list of the location(s) that are included in this project.

Client will provide a list of installation sites for this engagement.

DRAFT

4. PROJECT SCOPE OF SERVICES

This section identifies the work that will be performed as part of this project. Below is an initial, high-level list of tasks and assumptions for the project. This schedule may change depending on the Customer's business requirements and other factors. Also, depending on the schedule finally agreed upon at the kickoff meeting, the days worked may not be contiguous. C1 will conduct a meeting with the Customer to review and finalize the technical approach, constraints, and project schedule. This meeting is intended to ensure that all parties are working with consistent expectations for the project.

4.1. Enterprise Networking

Cloud-Managed Networking Implementation

Planning and Design Tasks

C1 Responsibilities

- This project is for an ExtremeCloud IQ cloud-managed network
- Review current network deployment, including hardware, firmware, and general configuration
- Work in collaboration with the Customer to verify the solution requirements for the cloud-managed networking solution
- Review and provide a document that outlines all of the information needed to implement the solution
- Consult with the Customer to determine requirements and document these requirements
- Validate quantities of devices to be part of system and their locations (types as defined for the project). This does not include visual verification of locations.
- Develop implementation/migration plan
- Develop test plan

Customer Responsibilities

- Work in collaboration with C1 to verify the solution requirements for the cloud-managed networking solution
- Work with C1 to determine the specified requirements
- Work with C1 to validate product quantities and locations
- Work with C1 to develop implementation/migration plan
- Work with C1 to develop test plan

Execution Tasks - General

C1 Responsibilities

- Add the cloud-managed devices that are part of this project to customer's cloud-managed network, typically using serial numbers or sales order numbers, on behalf of the customer
- Configure the system to support 6 networks/sites
- Perform 16 hours of post-install support
- Perform 8 hours of System Administrator Training
- Provide end of project documentation

Customer Responsibilities

DRAFT

- Provide Internet connectivity for cloud-managed networking devices
- Provide DHCP services for cloud-managed network devices, including approprite DNS services
- Provide required information including but not limited to: hostnames, username(s), password(s), IP addressing, DNS, NTP
- Any configuration of AAA services is the customer's responsibility unless otherwise indicated in this document

Assumptions

- Provide administrator rights to cloud-managed networking platform

Execution Tasks - Wireless

C1 Responsibilities

- This project includes 918 access points
- Verify licensing for 918 APs
- Configure the cloud-managed networking system per the agreed upon system requirements documentation
- Import 12 floor plans
- Implement 4 SSID(s)
- Configure splash page
- Configure switch network to support wireless access
- Mount access points, including 822 drop-ceiling mounted APs
- Provide remote assistance for cutover to new wireless system

Customer Responsibilities

- Provide OSHA approved ladders/lifts with sufficient height to enable installation of ceiling-mount access points, for any access points to be installed by C1, unless stated otherwise in this document
- Validate that wireless system is operating as expected
- Provide any/all patch cabling unless otherwise stated in this document

Assumptions

- Other wireless systems that are operating in the area may cause interference and performance issues that are outside the control of C1.
- Mounting of access points does not include cabling to those access points unless designated in another part of this SOW

DRAFT

- Configuration of network for access points does not include tuning of quality of service settings, access-lists, or firewall rules unless otherwise stated in this document
- If the existing switch to switch connections are access ports or only have an untagged VLAN for the connection, the conversion of those switchports to trunk or tagged VLANs is outside of this scope unless otherwise stated in this documen

Execution Tasks - Switching

C1 Responsibilities

- This project includes 31 48-port switches
- Verify licensing for switches
- Configure the cloud-managed networking system per the agreed upon system requirements documentation
- Configure 2 switches for layer 3 functionality
- Configure 29 switches for layer 2 functionality
- Install 31 switches in 6 MDF/IDFs at 10 sites
- Remotely assist with migration to switches

Customer Responsibilities

- Validate that switching system operates as expected

4.2. Security Services

Firewalls

Palo Alto Services

Installation and Configuration of Palo Alto Security Devices

C1 Responsibilities

- Pre-Configuration / Staging / Burn-in
  - Ensure latest Stable OS version or upgrade to same
  - Configure for secure remote access
  - Configure IP Addressing and Interfaces
  - Configure Initial Rule Set if available
  - Integrate with existing Panorama if available (C1 does not have knowledge of existing network)

DRAFT

- Installation / Configuration
    - Physically install / Rack equipment in a space to be provided by the customer.
    - Cable to existing WAN and LAN infrastructure.
    - Integrate with customer Active Directory if applicable
    - Configure firewall up to twenty (20) rules per firewall.
    - Configure secure outbound NAT as required by customer
    - Verify Internet access from LAN segment.
