Texas Government Code, Section 551.086: Certain Public Utilities Competitive Matters
 The Texas Open Meetings Act and its provisions do not require a public power utility governing body to conduct an open meeting to deliberate, vote or take final action on any competitive matter, as that term is defined by Section 552.133, Texas Government Code. Section 551.086 does not limit the right of a public power utility governing body to hold a closed session under any other exception provided for in the Open Meetings Act, supra.

- generation unit specific and portfolio fixed and variable costs, including forecasts of those costs, capital improvement plans for generation units, and generation unit operating characteristics and outage scheduling;
- bidding and pricing information for purchased power, generation, and fuel, and Electric Reliability Council of Texas bids, prices, offers, and related services and strategies;
- effective fuel and purchased power agreements and fuel transportation arrangements and contracts;
- risk management information, contracts, and strategies, including fuel hedging and storage;
- plans, studies, proposals, and analyses for system improvements, additions, or sales, other than transmission and distribution system improvements inside the service area for which the public power utility is the sole certificated retail provider; and
- customer billing, contract, and usage information, electric power pricing information, system load characteristics, and electric power marketing analyses and strategies.

Texas Government Code, Section 551.071: Attorney consultation regarding pending or contemplated litigation, settlement offers, or matters deemed subject to the Code of Professional Responsibility of the State Board of Texas, including contracts containing information proprietary to third parties.

1. At any time during the meeting, the Board may meet in Executive Session for consultation with its attorney concerning attorney client matters under Texas Government Code Section 551.

Texas Government Code, Section 551.074: PERSONNEL MATTERS

- (a) This chapter does not require a governmental body to conduct an open meeting;
- (1) to deliberate the appointment, employment, evaluation, reassignment, duties, discipline or dismissal of a public officer or employee.

Powering My Path: How GEUS Inspired My Future in Electrical Engineering

As a high school senior from Greenville, Texas, I've been reflecting on the people, places, and services that have shaped my life. One I didn't expect to stand out was our local electric provider—Greenville Electric Utility Services (GEUS). But after learning GEUS was nationally recognized for its reliable service, I realized how much of a difference they've made in my everyday life and even in the future I want to pursue.

Growing up, I didn't think much about electricity. It was always just there—lights turned on, my phone charged, the internet worked. But now, as I prepare to study electrical engineering, I understand how important it is to have power you can depend on. GEUS has provided that reliability every day of my life, and it's something I no longer take for granted.

In school, electricity has been essential. From using laptops for assignments to joining Zoom classes during the pandemic, I depended on stable power to stay on track. I had friends in other towns who dealt with outages during remote learning, and it made their lives stressful and unpredictable. Thanks to GEUS, I didn't have to deal with that, which helped me stay focused and successful.

Outside of school, electricity was just as important. It powered my favorite memories—FaceTiming friends, gaming after practice, streaming music, and working on projects late into the night. I didn't realize it, but those small, consistent moments helped shape my high school years and gave me a sense of stability when life felt overwhelming. Electricity was part of the rhythm of my everyday life, and it gave me space to enjoy being a teenager.

One experience that really made me appreciate reliable electricity was the Texas winter storm. While many people across the state lost power and heat for days, my family stayed safe and warm because GEUS kept our lights on. That made me think deeply about the people working behind the scenes and inspired me to learn more about electricity and how it all works. That's when I realized I wanted to become an electrical engineer who understands, builds, and protects the systems that others rely on.

Knowing that GEUS is a public power utility—owned by the community—means even more. They're not a big corporation focused on profits. They care about us because they *are* us. Their commitment to keeping our town powered has inspired me to one day use my skills to do the same for others.

GEUS's recognition proves that great things can come from small towns. They've given me a stable foundation to grow, learn, and dream. Now, I want to follow in their footsteps—not just by understanding how electricity works, but by using it to power better lives.

Thanks to GEUS, I'm not just graduating with good memories, I'm stepping into a future I'm excited about. One day, I hope to do for others what GEUS has done for me.

Other Comments

I am a senior at Greenville High School in the Early College High School program. I would say that I'm a very motivated and determined student who shares a deep connection for engineering and innovation. From a young age, I've been concerned and curious about how technology all around me actually works and how it solves the problems in our world today. The curiosity of technology led me to my path which is electrical engineering, where I want to share my insight and creativity to make a meaningful impact on the future world.

In my academic career, I have done volunteer work that challenged me to step out of my comfort zone. My engagement in the student council allowed me to gain insight and develop a strong leadership foundation through teamwork and communication. Additionally, the experience which included working with Special Olympics and in other activities have taught me that it's about pride or resume but it's about giving back.

My future goal in the next few years is to earn a degree in engineering and then use the knowledge I gain to contribute in technology advancements to improve the world around us. I also hope in the future to start my own business, combining everything I learned in engineering and business to create solutions to the world's problems. I truly believe that determination, willingness to learn, and trusting God's plan will help me achieve my dream.

Receiving the scholarship would help me to pursue an open opportunity for my career. The scholarship would provide financial stability as it would help me focus on education and the pursuit of my goals without having to worry about the financial problems. That is to come within the future.

My commitment to my goal will show through my hard work and dedication to become the best engineer I can be. My passion for innovation, problem-solving, and leadership ability will help me stay focused on my goal. This scholarship will not only help me with my dreams but will allow me to guide and inspire others who also seek a dream and goal.

Notes and Percentage to Budget Explanations

(1) Most of the insurance expense is paid annually in October.

(2) Capital encumbrances for the Electric Fund include multi-year projects with purchase orders opened in prior years based on Board approved appropriations.

(3) FY 2025 year to date change in net position includes \$21,391,851 in expenses for multi-year CIP projects utilizing the Series 2024 bond sale. When excluding these bond funded expenses, change in net position reflects an increase of \$4,870,928. A decrease in net position may be due to multi-year projects utilizing bond proceeds from fund balance.

Professional Survey Campaign

GEUS Marketing subscribed to the APPA Public Power Data Source which also includes a Professional Survey. This campaign will run April 2025-June 2025. Depending on survey results GEUS is eligible to receive award recognition from APPA for Customer Satisfaction Awards. This survey asks questions regarding GEUS' Electric Service as a whole.

Marketing has chosen to roll out communications for this campaign strategically. April communication includes face-to-face communications at events and civic clubs, Herald-Banner Ads, Chamber Website Ads, Lobby Posters, CSR communications and desk flyers, Email Signatures (Marketing and customer Service), and the GEUS Website. Each month we have plans to build upon the communication resources that we utilize.

During the month of April 90 people responded to this survey.

This is a screenshot of one of the questions in the survey.

BOARD MEMBER Spotlight
Jimmy Dickey
 GEUS
 Marketing and Key Accounts
 Energizing the Community

- 🌟 **Board Member Spotlight: Jimmy Dickey**
- 🏢 **Company: GEUS**
- 🔍 **Role: Marketing and Key Accounts**

Jimmy Dickey brings an impressive 40 years of experience to his role in marketing at GEUS. His favorite part of the job is the variety it offers—no two days are ever the same, and he enjoys the dynamic nature of his work.

Jimmy is most proud of the team he works with, speaking highly of the employees in his department. Their dedication, talent, and teamwork are what drive the success of their efforts, and he takes great pride in leading such a strong group.

Something many may not know about Jimmy is that he has traveled to all 50 states and eight different countries—a testament to his adventurous spirit and curiosity about the world.

Jimmy Dickey, with his decades of experience, love for variety, and pride in his team, is a true asset to GEUS and the Greenville community.

🌟 Thank you, Jimmy, for being a Great Board Member! 🌟
