Essentia Corporate Contributions

SUBJECT: Habitat Health Services on-site services
Application for funding for the 2012/13 school year

Please find enclosed, the Minnesota Common Grant Application. We are requesting funding to cover the cost of 6 hours/week of on-site clinical nurse practitioner to provide health care services, and 4 hours/week of on-site clinical social work to provide infant mental health services at Habitat Health Services for the period September 10, 2012 through June 10, 2013. Habitat Health Services is a school-based clinic that partners with the Habitat Program to provide comprehensive services to pregnant and parenting teens and their children in the Duluth Public Schools by consolidating medical and mental health, social service and educational support to the target population.

We ask that Essentia support this invitation to continue to partner with the Duluth School District in providing these services. We believe that this programming contributes to best outcomes for pregnant and parenting teens and their children by facilitating long term self-sufficiency for the young parents, as well as building parenting capacity and ensuring the healthy mental and physical growth and development of their children.

Questions concerning this grant application should be directed to Deidre Quinlan at Habitat Program, 215 North First Avenue East, Duluth MN 55802 or by telephone at 336-8700 x 2015 or 591-4475. Thank you in advance for your continued support and consideration of this application.

Brief Program /Project Name & Summary:

Duluth Head Start proposes to continue using Reflective Practice with classroom teams on a monthly basis. Reflection will be guided by a mental health consultant. In addition, we will utilize school district teacher substitutes to assist our program coordinators who will take over the classroom supervision while teams are meeting. Reflective Practice has allowed our teams an opportunity to develop a greater level of self awareness about their work with children and families thereby improving their service to children and families at greatest risk in our community.

I. Narrative Section

1. What have you learned through the information you are collecting from prior years' evaluations? What has worked well? What are your current and future challenges?

Duluth Head Start has used funds from FSCSSLC to help build the capacity of our staff. We were able to supplement our Head Start funds to allow for us to contract with two mental health consultants who respond to parent and teacher concerns about individual children, classroom dynamics and Head Start parents.

This system has worked well. Our staff is growing their skills and competence in responding to the needs of Head Start families.

Like all social programs, Head Start struggles to meet current and increasing challenges with limited funds. We have created a staffing formula for mental health consultants, including a cut in hours, we believe will allow them to continue to support families and staff and stay within our grant funded budgets.

The exception to that is with Reflective Practice. We feel strongly about providing our classroom teams this opportunity and project that with the support of the mental health consultants in the coming year, our teams will gain the necessary tools to continue with this model without a facilitator.

2. How does this program help your agency achieve its mission as well as help the Collaborative achieve its mission (listed below)?

Our mission is: The mission of Duluth Head Start is to serve income eligible preschool children and their families. These services include opportunities to

Family Service Collaborative Mission

Improving the lives of children and their families by working together to provide integrated prevention and early intervention strategies

enhance social and cognitive skills, increase health and wellness and build upon family strengths.

Clearly a Head Start team that is sensitive, aware and responsive to the children and families in its care is better equipped to help facilitate the growth of families working to move out of economic poverty.

We think the same is true for the mission of the FSCSSLC. Head Start staff is charged with partnering with families to reach their self identified goals as well as to help children make growth in all areas of development. A team who is cognizant of their roles and responsibilities in building and nurturing their relationships with families is able to be a true partner in that process.

3. Describe your new and ongoing partnership and collaborative efforts to coordinate services and share resources.

Duluth Head Start is currently involved in a collaboration with all other ISD 709 early childhood programs. We are piloting a team teaching approach in some of our Head Start classrooms which brings the early childhood special education teacher and the Head Start teacher together to work with all the children in the class when a significant percentage of the children have an individual education plan or IEP. We work to coordinate trainings with our sister programs as well.

4. What will you be changing and improving in your program for the 2012-2013 year? We will be decreasing the number of mental health consultation hours overall and should this proposal be funded, we will continue to offer classroom teams a monthly Reflective Practice opportunity.

5. Describe how this program is fully funded - the other funding besides the Collaborative funding for the program/project. Duluth Head Start receives State and Federal Head Start grants. The grant projections for 2013 are: State-\$399, 211 which represents a cut of nearly \$60,000. And Federal funds totaling \$1,842,192. We are waiting to hear about a possible .72 % cost of living increase we may be eligible for from the federal government as well.

II. Outcome/Results Data

Briefly summarize your outcome data/program results collected throughout the life of this program/project

We are making good progress toward our goals this year. Head Start staff are increasing their skills and capacity to respond to the great number of needs children and families present with. To date, we have received 29 requests for child observation-those numbers are the cases where a teacher and the parent agree to have the mental health consultant observe the child in the classroom and make suggestions as to how they can respond to the child's needs. This number does not include the informal work our staff and consultants do with parents on a daily basis. The bottom line here is that we are seeing to the needs of children and families in early childhood with the knowledge and hope that early intervention and attention to the

growing needs of children and their families will result in greater school success which translates to greater success in life.
