CHILD NUTRITION MEMORANDUM

To: William Hanson, CFO/Executive Director of Business Services

From: Pamela Bowe, R.D.L.D. Supervisor Child Nutrition

Date: 3/2/2016

Re: Breakfast and Lunch Meal Price Increase

Due to the Healthy Hunger-Free Kids Act of 2010, signed into law December, 2010, requiring schools to charge students for paid meals at a price that is, on average, equal to the difference between the federal free meal reimbursements and any state reimbursements, and paid meal reimbursement. Schools that currently charge less are required to gradually increase their prices over time until they meet the requirement. Because our current lunch price does not meet the paid lunch equity price we are required to increase our lunch price by ten cents.

Current Paid Lunch Prices		Proposed Paid Lunch Prices	
Elementary	\$2.30	Elementary	\$2.40
Secondary	\$2.55	Secondary	\$2.65

Also, the Act establishes a maximum annual increase in the required paid increases of \$.10 annually. The weighted average for a paid meal is \$2.78 and the Child Nutrition Department must adjust their average lunch price toward the \$2.78.

Memo

From: Pam Bowe, R.D.L.D.
Date: 2/23/2016
Re: Adult Meal Price Increase

The Department of Education, Nutrition, Health and Youth Development and USDA have informed us that the minimum price for adult meals has increased. The minimum price of adult meals has increased to \$2.15 for breakfast and \$3.80 for lunch. Meals purchased by adults must be priced high enough so that the cost of the meal is fully paid by the customer. The Child Nutrition Department proposes that we raise our adult breakfast meal prices to \$2.25 per meal in order to cover raw food and labor costs. The Child Nutrition Department proposes that we raise our adult lunch prices to \$3.80 to match the recommended amount. This increase would begin on June 13, 2016.

2016 Minimum Meal Prices for Adults

Summer Food Service Program funds may not subsidize non-program meals. Meals purchased by adults must be priced high enough so that the cost of the meal is fully paid by the customer.

The minimum meal prices for adults shown below are set by the current rate of federal reimbursement received for each meal type, including the value of U.S. Department of Agriculture (USDA) Foods, and rounded up to the nearest five cents.

Minimum Adult Prices

Breakfast: \$2.15

Lunch: \$3.80

Snack: \$.95

After the Healthy, Hunger –Free Kids Act of 2010 was signed into law in December of 2010, there was a provision that was enacted to ensure that sufficient funds are provided for lunches served to students not eligible for free or reduced price meals. This Paid Lunch Equity process was implemented by USDA beginning in 2011. Each school year USDA sets the charge for paid lunches. If the Child Nutrition Department does not meet the paid lunch equity price that is set by USDA, the Child Nutrition Department is required to raise its lunch prices to match the set price. The maximum amount a lunch price can be raised is .10 or ten cents per school year.

Beginning in 2011, the lunch price has gone up 10 cents. In 2014 and 2015, according to the set Paid Lunch Equity a price increase was not required. For 2016, the Paid Lunch Equity has been set at \$2.78.

*The Governor and State Legislature adopted legislation to pay the .40 cents per meal for families that qualified for reduced lunches. This reimbursement is paid on the Monthly Meals Claim.

**The Child Nutrition Department began district wide to offer breakfast at no charge to any student in an effort to prevent overt identification of free or reduced students and encourage breakfast participation.

Re: Bid #1248 – Historic Old Central High School Parking Lot Improvements

Five (5) bids were received in response to the School District's notice for bids for the HOCHS Parking Lot Improvements. The attached Bid Tab reflects the bids received.

Unfortunately, the District's administration and project engineer are not able to recommend awarding this bid. Minnesota statute requires the contracting authority include in its solicitation, notice that contractors shall submit a signed statement verifying compliance with the Statute (M.S. 16C.285). I will be recommending the School Board reject all bids in response to Bid #1248 – HOCHS Parking Lot Improvements based upon the following: the notice was not included in our solicitation document, there were inconsistent submissions related to the statute requirements, and the bids received exceeded our \$500,000.00 budget for this project.

We are in the process of preparing to re-bid the project and will be making some revisions to the project design and specifications. Our goal is to have the Bid Notice and revised drawings posted and available within the next 10 days.

Attached please find the Bid Tab and letter sent to contractors regarding the status of this bid.

B. General Terms and Conditions

1. To not charge a fee to view the Exhibit (although the Exhibit may be part of a larger exposition which charges an admission fee, it may not be the major attraction of such an event for which a fee is charged).
2. To assume all onsite and transportation costs, including:
 - i. The costs for transporting or shipping the exhibit to the exhibition location and the transportation or shipping costs for returning the Exhibit to the Court.
 - ii. Any other onsite expenses, including, but not limited to, property insurance, adequate indoor storage of empty crates, and daily exhibit maintenance.

 - iii. If the Court deems that professional repair to or replacement of any part of the exhibit is necessary, the EXHIBITOR agrees that the Court will have sole and absolute discretion to select an appropriate vendor for repair to or replacement of any parts of the exhibit at EXHIBITOR'S expense.
 - iv. Should damage have occurred to the Exhibit while in transit, the EXHIBITOR also agrees to notify the carrier immediately and save all packing materials until the carrier or agent has inspected them.
6. The EXHIBITOR assumes responsibility for any liability, damages, or injuries to persons or property arising out of or in any way connected with the EXHIBITOR'S possession or use of the Exhibit and will hold the Court harmless against any claims arising hereunder.
7. The EXHIBITOR agrees to follow the instructions provided in Attachment B to display and dismantle the Exhibit.
 - i. The EXHIBITOR must prominently identify that the Exhibit is on loan from the U.S. District Court, District of Minnesota.

Instructions for Banner Stands

PLEASE READ BEFORE ATTEMPTING BANNER STAND SETUP

Each banner stand unit comes in a canvas tote bag. Each bag is labeled individually as to which display is inside the tote bag. Inside the tote bag, you will find the banner stand metal base unit and a 3-section aluminum pole piece.

Simply take the metal base out from the bag, place unit on the floor in the desired location where is going to be displayed, fold out and assemble the aluminum pole, then place the pole into the metal base, the metal base has 2 holes inside the unit, firmly press down and make sure the pole is securely pressed down through both holes and is secure to the bottom of the metal base unit. Then grab the metal top bar of the poster (**from the back of the banner stand - the text will be on the other side from you**) and fold out the hook that is in the top of the metal bar, slowly raise the poster and hook it to the top of the aluminum pole.

If the display has to be moved slightly for fine positioning (i.e. back against the wall), grip the metal base unit with two hands (one hand on each side of the metal base unit) and gently slide the metal base unit on the floor to fine position the display. If the banner stand has to moved once it is setup requiring more than just fine positioning, please follow the take down instructions below. Once the poster is back in the metal base unit, then the unit can be easily moved to the new desired location.

DO NOT MOVE THE BANNER STANDS USING THE ALUMINUM POLE AS THIS MAY DAMAGE OR DESTROY THE BANNER STAND DISPLAY.

To take down, position yourself on the back side of the poster (the text will be on the other side from you), securely grab the metal top bar of the poster and lift slightly to unhook the poster from the aluminum pole, then slowly guide the poster down evenly back into the metal base unit. Fold down the aluminum pole and place back in its bag. Place the metal base unit and the aluminum pole back into the correct tote bag.

For optimum functionality and durability, please raise and lower the sign into and out of the metal base unit slowly.

Proposal QTB035418

Mr. Kerry Leider

Re: Proposal for Special Inspection and Testing Services
Denfeld High School CTE Addition
4405 West 4th Street
Duluth, Minnesota

Dear Mr. Leider:

Braun Intertec Corporation is pleased to submit this proposal to provide special inspections and testing services for the proposed Career Technical Education addition to Denfeld High School in Duluth, Minnesota.

Our Understanding of Project

We understand this project will include the construction of a 2,100 square foot addition to the existing Denfeld High School. The design of the addition is to utilize the west courtyard by constructing a masonry wall across the courtyard and enclosing the courtyard with steel framed roof structure supported on structural steel columns and cast in place concrete footings. The interior floor of the addition will be a grade supported concrete slab. Included in the project is the removal of existing storm drain in the courtyard and extending the existing storm drain to accommodate the addition.

Available Information

This proposal was prepared using the following documents and information.

- Project plans prepared by Architectural Resources Inc. (ARI), dated February 23, 2016.
- Project specifications prepared by ARI, dated February 23, 2016.
- Discussions with you regarding special inspection and testing requirements.

Other than the references cited above, Special Inspection and Testing Schedule, construction schedule, or geotechnical report were provided to help us prepare this proposal.

Overview of Procedures and Staff Qualifications

Special Inspections

Braun Intertec has adopted the International Code Council (ICC) Model Program for Special Inspection to develop the guiding principles for our special inspection program. This model was selected because it was designed by the ICC to assist owners, contractors and building officials in the understanding, administration and enforcement of the special inspection requirements of the International Building Code (IBC). Currently, there are ICC certifications for reinforced concrete, structural masonry, pre-tension/post-tension (pre-stressed) concrete, spray-applied fireproofing, structural steel and bolting, and structural welding.

Qualifications and Experience

ICC certified special inspectors will provide our special inspections. An ICC certified special inspector is one who has successfully demonstrated their ability to understand the building code, construction practices and how to read and understand construction documents. Through experience and examination, our ICC certified special inspectors have demonstrated their ability to provide special inspection services.

Inspections and Reporting

Our special inspectors summarize the nature, extent and results of their special inspection activities, at the time they are performed, on Special Inspection Daily Report forms. These records are transmitted electronically to those who may want to review these documents on an agreed upon schedule.

When required, the Special Inspection Daily Report forms will be accompanied by a tabulation titled Summary of Discrepancies Needing Correction or Review by the Design Engineer or Architect. This tabulation will list the items that are determined to be in conflict with the project documents and have not been corrected by the contractor. The summary will include resolutions when the design team provides them. An updated copy of the tabulation will be submitted each time an existing discrepancy has been resolved or a new one is recorded. Special inspection procedural and final reports for structural steel inspections and non-structural steel inspections will be prepared and submitted periodically or at the end of our involvement with the project according to the requirements of the building code.

Communications

Our special inspectors will communicate the results of their inspections back to our supervising engineer each day special inspections are performed. It is important for our special inspectors to develop a working relationship with the project's structural engineer-of-record. We will be in contact with the structural engineering consultant periodically to review the work being performed and to request clarifications and direction on any item that may require it. These requests, and their responses, can also be sent to the owner, the project design and construction teams, and other interested parties, such as the building official, as needed.

Efficient Staff Use

Cross-utilization of personnel on a project is an excellent means to provide efficiencies and to economize inspection and testing costs. As a result, most of our special inspectors hold certifications in several areas, as well as being certified to use a nuclear gauge for soil density testing, and are generally ACI

Concrete Field Testing Technician – Grade I certified. The ACI Grade I certification, or equivalent, is also requirement of the American Society of Testing and Materials (ASTM) to cast concrete test cylinders.

Construction Materials Testing

We will commit that each concrete technician assigned to this project will be ACI Concrete Field Testing Technician – Grade I certified to conduct the required concrete testing, and that each soil technician will be certified to use a nuclear gauge for soil density testing, so that the test results can be determined on site and evaluated once the required laboratory testing is completed.

Scope of Services

ICC certified *special inspectors*, or qualified technicians working under the direction of ICC certified special inspectors, will provide the required special inspection services under the direction of a licensed professional engineer, either on a full-time or periodic basis depending on the construction schedule and when requested by the general contractor. The special inspectors or qualified technicians will perform the specified construction materials testing services on an on-call basis as scheduled by the general contractor. After reviewing the available information, to determine compliance with the project plans and/or specifications, other design or construction documents and applicable ASTM and other industry standards, we interpret our scope of services for this project will be limited to the tasks defined below. *Special inspections are italicized.*

Soil Related Services

- *Observe and evaluate the soils exposed in the bottoms of excavations to determine if the soils are similar to those encountered by soil borings associated with referenced geotechnical reports, and suitable for support of excavation backfill, additional required fill, and the project's structural design loads.*
- Perform laboratory mechanical analyses of prospective fill and backfill materials.
- Perform laboratory Proctor tests to determine the maximum standard Proctor dry densities and optimum moisture contents of prospective backfill and fill materials.
- *Observe the placement and compaction of backfill and fill.*
- Test compacted backfill and fill placed below building footprints and oversizing areas, below slabs and/or pavements, in utility trenches, and in areas for which compaction specifications have been provided, to determine if the relative compaction was achieved.

Concrete Related Services

- *Observe concrete reinforcement placement.*
- *Observe the general placement of bolts and other embeds in the plastic concrete.*
- *Observe the concrete placement and test sample preparation.*

- Sample and test the plastic concrete for slump, air content, temperature, and unit weight.
- Prepare test cylinders for laboratory compressive strength testing.
- Perform laboratory compressive strength testing of the concrete samples.

Structural Masonry Related Services

- *Observe the structural masonry construction and grouting operation on a periodic basis.*
- *Observe the preparation of grout samples.*
- Perform structural masonry grout testing.
- Perform structural masonry mortar testing.
- *Observe the preparation of prisms.*
- Perform structural masonry prism testing.

Structural Steel and Fireproofing Related Services

- Observe and test the structural steel welded and bolted connections.
- *Observe and test the metal decking connections for orientation, sidelap fasteners, the hold down connections and the placement of shear studs.*
- *Observe and document the installation of the base plate anchor bolts.*
- *Observe the installation of drilled-in-place, epoxy secured anchor bolts.*
- *Observe and test the spray-applied fireproofing for thickness, density and bond strength.*

Pavement Related Services

- Provide test-roll observations of the pavement subgrade soils and/or aggregate base layer to determine if the materials tested are capable of supporting bituminous or concrete pavement.
- Perform laboratory mechanical analyses of aggregate base material samples.
- Perform laboratory Proctor tests to determine the maximum standard Proctor dry density and optimum moisture content of the aggregate base material.
- Test compacted aggregate base material to determine if the relative compaction was achieved.

- Sample and test the plastic concrete for slump, air content, temperature, and unit weight.
- Prepare test cylinders of concrete for laboratory compressive strength testing.
- Perform laboratory compressive strength testing of the concrete samples.

Engineering Consulting and Project Communication and Reporting Services

- Provide engineering consulting services and service management including scheduling of our field personnel, review of field reports, and communication with the contractor, owner, building official and design team.

Cost

We will furnish the services described in this proposal for an estimated fee of **\$7,424**. A tabulation showing hourly and/or unit rates associated with our proposed scope of services is attached. To the extent possible, units and hours were reviewed with representatives of the contractor to determine if timeframes are consistent with their expectations for completing the various activities. The actual cost of our services will be based on the actual units or hours expended to meet the requirements of the project documents.

Because our services are directly controlled by the schedule and performance of others, the actual cost may vary from our estimate. Invoices for our services will be based on the actual number of hours spent on the project and the units tested.

Our work will extend over multiple invoicing periods. As such, for work that is performed during the course of each invoicing period, we will submit partial progress invoices.

Additional Services

It is difficult to project all of the services and the quantity of services that may be required for any project. If services are required that are not discussed herein, we will provide them at the rates shown in the attached table or, if not shown, at our current Schedule of Charges.

General Remarks

We will be happy to meet with you to discuss our proposed scope of services further and clarify the various scope components.

We appreciate the opportunity to present this proposal to you. *Please sign and return a copy to us in its entirety.*

The proposed fee is based on the scope of services described and the assumption that our services will be authorized within 30 days, and that others will not delay us beyond our proposed schedule.

We include the Braun Intertec General Conditions, which provide additional terms and are a part of our agreement.

To have questions answered or schedule a time to meet and discuss our approach to this project further, please call Joe Butler or David Morrison at 218.624.4967.

Sincerely,

BRAUN INTERTEC CORPORATION
