Board officers take colleague to task over 'ethics violations'

The Johnston, Iowa, board president and vice president came down hard on fellow board member John Dutcher because of what they believe are his repeated ethics violations, *The Des Moines Register* reported.

At a late January board meeting, Board President Mike Farrell read a letter concerning comments Dutcher made online and through email in response to an article at the *Register* website that they consider a violation of board policy, the *Register* reported.

Dutcher posted comments at *DesMoinesRegister.com* underneath a *Register* story about the Johnston district in which he criticized a teacher and indicated he was speaking on behalf of the board. He also revealed disciplinary action taken against the teacher, the *Register* reported.

As Farrell read the letter, Dutcher interrupted with comments that included expletives. Dutcher called the letter the "most ludicrous thing ever," the *urbandale.patch.com* reported.

In the letter, as reported at *urbandale.patch.com*, Farrell said Dutcher's actions were in direct violation of the board's Director's Code of Conduct policy. The policy states:

"Board members' interaction with public, media or other entities must recognize this limitation and the inability of any board members to speak for the board or school administration except to repeat explicitly stated board decisions," and "Board members will not publicly make or express individual negative judgments about the superintendent, staff performance or other board members."

Trouble-making board members put the board/superintendent team in a difficult spot. In the Johnston example, the board leadership is taking

action to neutralize the board renegade.

Here are some ideas that can help any board deal with a difficult colleague:

- **Remember "majority rules."** Some board members simply won't buy into decorum and behavior principles. If the majority is appalled by a dysfunctional board member's behavior, it should stay calm and patient. That's the best course with a board member who will never get it when it comes to his role. If four members of a five-member board do understand their role, the board team can typically ride out the situation.

- **"Leakers" need to be reminded of the board's policy on confidentiality.** No single board member has the right to act as judge and jury over what remains private. In fact, it may be a violation of state school ethics provisions to reveal information about staff discipline decisions.

- **Isolate troublemakers.** If nothing else works to control the behavior of a member with a chip on his shoulder, the board can isolate the troublemaker. Listen to the board member when he goes off, stay polite, but do not respond. Just move onto the next issue without acknowledging the problem member's rant. Once he finds himself isolated, the board member's options start to shrink.

- **Educate, educate, educate.** The orientation and development an effective board receives isn't really going to help fix a "bad apple" board member's behavior. But what it will do if the education is supplied steadily over time is teach your board majority its proper role. When the majority understands its role, the board team remains in a strong position while the trouble-maker is marginalized. ■

Do a quick board appraisal

Take 10 minutes now to put down your thoughts on how the board operates. Look for areas for growth. If each board member does this, collate the results and look for trends that show strengths and weaknesses. Develop a plan to correct weak areas of board performance. Use a scale with 4 being "strongly agree" and 1 being "strongly disagree."

Temporary committees can help

A temporary or ad hoc committee can research and report to the board on an issue of current importance to the district. A good rule of thumb for temporary committees is that they should not work in areas that are related to the mission of the board's standing committees.

Here are some more tips for temporary committees:

1. They should work only until their job is complete.

Dissolve temporary committees once they have made their report or recommendation to the full board.

2. Limit the number of the committee's meetings.

They should meet only when they have work to do. Otherwise, the committee may be tempted to find something to do.

3. Understand that the committee is established by and reports to the board.

The board should provide the temporary committee with a job description, mission, and deadline for its work to be complete. Have the board president appoint committee members subject to board approval to establish the principle of board control of the committee. ■

Commit to relationship maintenance

Here are four commitments the board should make to maintain an effective working relationship with its superintendent:

1. Hold regular board work sessions to focus on board roles and relationships with the superintendent. Meet once or twice annually to have this discussion. Consider adding a clause to the superintendent's contract that mandates these sessions will take place.

2. See yourself as a member of the team, not an individual. The board's authority comes from its collective action during meetings. Board members who don't understand this concept — or willfully disregard it — can damage board and superintendent teamwork.

3. Know your superintendent and board colleagues on a personal level. Relationships become stronger as people get to know each other better. Break bread together occasionally as a board and administrator team. Have regular meetings with the superintendent where the board member and administrator catch up on each other's personal news after handling school-related business.

4. Never criticize the superintendent in public. If the superintendent's work is unsatisfactory in your view, first bring it to the superintendent's attention. Then, use the appraisal process to correct it. That's the professional way to handle work performance issues. You would expect the same in your job. ■

The 2013 Nebraska School Law Seminar

The 2013 School Law Seminar offers school officials an opportunity to receive the most up-to-date information on legislative and court-related developments affecting education. This year's program is scheduled for June 7 from 8:30 a.m. to 4 p.m. at the Kearney Holiday Inn.

The School Law Seminar, offered by the Nebraska Association of School Boards and the Nebraska Council of School Attorneys, is presented by attorneys to broaden the knowledge base of a wide array of issues related to running a school.

The seminar will be moderated by Nebraska Council of School Attorneys' President Joshua Schauer. Individual registration for the workshop is \$140 and includes break refreshments, lunch, and a detailed outline of each lawyer's presentations assembled in a convenient three-ring binder. Subsequent registrations *from the same district* are offered — without written materials — for \$90).

The Nebraska School Law Seminar provides an annual opportunity to hear from the practitioners of the law about changes in the issues that impact schools — and the people who attempt to manage them.

Award of Achievement points and CLE credits are available for participants. Register today at www.nasbonline.org.

2013-14 School Calendar Proposal

In working on the calendar, my attempts take the following into consideration:

- 185 teacher workdays
- Eliminate late starts and early dismissals
- Maximize full days of professional development
- Provide quality instructional hours as much as possible
- Combine “days off” with professional development to create long weekends
- Move parent/teacher conferences earlier in the terms
- Protect the state testing window (March 24-May 2)

In the proposal, the last day of the school year would move one day later for each snow day. This protects all scheduled days of school, contracts, and professional development hours.

This Year

	<u>Scheduled</u>	<u>Actual</u>
Student contact days	180	176
Student hours	1198	1165
Teacher days	185	181
Professional development hours	44	44

Next Year's Proposal

Student contact days	174
Student hours	1174
Equivalent day increase over this year	1.3
Teacher days	185
Professional development hours	63

Days and hours are “guaranteed” with these samples since snow days are added back.

The minimum number of hours required by the state for students in grades 7-12 is 1080.

Since the founding of this Nation, education and democracy have gone hand in hand. The Founders believed a nation that governs itself, like ours, must rely upon an informed and engaged electorate. Their purpose was not only to teach all Americans how to read and write but to instill the self evident truths that are the anchors of our political system.

PRESIDENT RONALD REAGAN

Nebraska State Board of Education
Social Studies Standards
Statement of Purpose
Approved December 7, 2012

The purpose of the Nebraska Social Studies Standards is to teach our children to become young patriots who have an intellectual understanding of the genius of our country's founding principles and who feel an emotional connection to our nation. Achieving this purpose requires teaching Nebraska students to become responsible citizens who are prepared to preserve, protect and defend freedom and democracy in our nation and in the world.

As responsible citizens of the U.S. and Nebraska, our students must:

- Master and be able to use knowledge of the history of the United States, Nebraska, western civilization, eastern civilizations and ancient civilizations (Historical Perspective);
- Master and be able to use spatial patterns on earth (Geographic Perspective);
- Master and be able to use knowledge of the foundations and form of American federalism, our representative democracy, and American politics (Civic Perspective);
- Master and be able to use knowledge about the efficient allocation, production, distribution, and consumption of scarce resources and the advantageous role of free market economics in such allocation (Economic Perspective).

Application of Geography to Issues and Events				
Grade 4	Grade 5	Grades 6-8	High School	
SS 4.3.6 Students will use geographic skills to make connections to issues and events.	SS 5.3.6 Students will use geographic skills to interpret issues and events.	SS 8.3.6 Students will analyze issues and/or events using geographic knowledge and skills to make informed decisions.	SS 12.3.6 Students will analyze issues and/or events using the geographic knowledge and skills to make informed decisions.	
SS 4.3.6.a Identify how changes in human and physical geography have shaped Nebraska. (e.g., map major tornado paths, blizzards, floods, or droughts; how the construction of the Transcontinental Railroad and Interstate Highway system have impacted the way Nebraskans live)	SS 5.3.6.a Explain the influences of physical and human geographic features on historical events in the United States (e.g., railroads building along river valley floodplains, building the Erie Canal to connect the East Coast with the Great Lakes, migrating through the Cumberland Gap into the Kentucky bluegrass region)	SS 8.3.6.a Analyze the physical or human geographic factors explaining the spatial pattern of world events. (e.g., water scarcity and conflict in the Middle East, contrasting demographic trends in developed and developing countries)	SS 12.3.6.a Apply geographic knowledge and skills (e.g., ask geographic questions, acquire, analyze, and present geographic information)	
SS 4.3.6.b Identify questions that help explain the interrelationships of human or physical geographic characteristics of places (e.g., A community is located on a river floodplain with fertile soil and water for transportation, irrigation, and human consumption)	SS 5.3.6.b Analyze aspects of human and physical geography that have shaped the settlement and development of Early America, latitude and longitude in the role of early navigation (e.g., groundwater and irrigation, westward expansion of European immigrants, seeds, fertile soils, agriculture, transportation systems, water power)	SS 8.3.6.b Describe and analyze the role of geographic factors in determining the spatial arrangement of humans and their activity (e.g., geographic concentration of manufacturing, banking, or high tech industries; urbanization; availability of arable land, water and suitable climate for farming; access to resources for development, surveying, mapping, public land survey system, drawing of state and county boundaries)	SS 12.3.6.b Identify and evaluate how geographic knowledge and geographic techniques are applied to improve our lives or solve problems (e.g., use global information systems (GIS), global positioning systems (GPS), satellite images, and maps to find the best location for a new store, identify potential customers, or determine the optimum usage of irrigation and fertilizers, mapping cases of cholera to determine that city water supply was contaminated)
