HVAC PROJECT PROPOSAL

September 9, 2019

Executive Summary

Thank you for allowing Trane to submit our plan to improve the mechanical systems at East Butler Public Schools. These solutions were determined with onsite surveys, estimating tools, and professional engineering.

Once again, thanks for the opportunity to submit the following proposal for your consideration.

Recommended Facility Improvements

HVAC – Elementary School

The existing 4-ton rooftop unit that serves three elementary classrooms does not provide adequate comfort. This unit and the classrooms served are designated in red shading in the drawing below.

EXISTING HVAC ZONING

FLOOR PLAN - H.V.A.C.

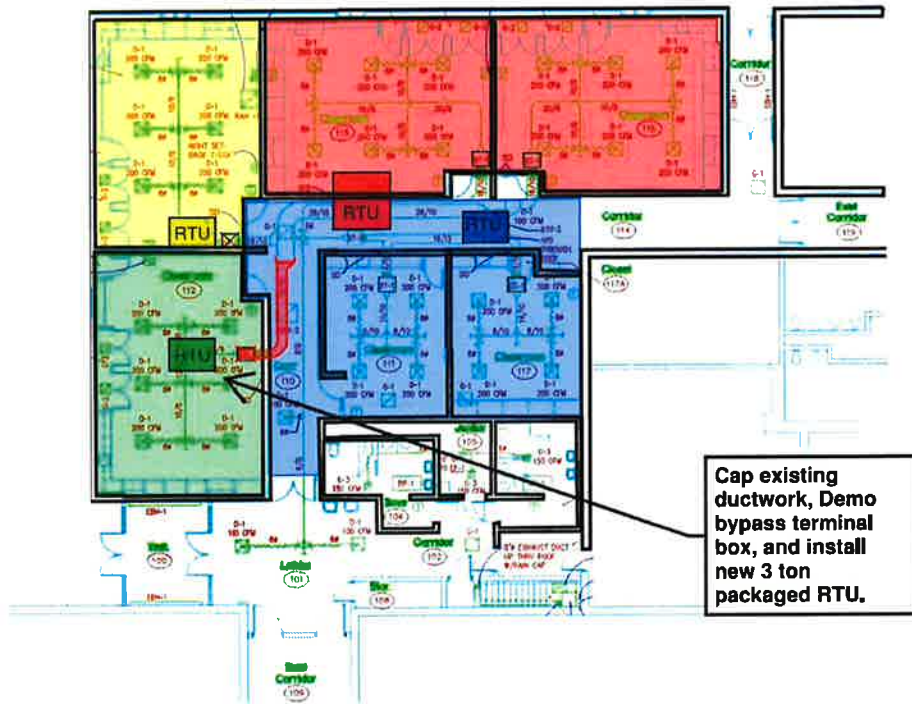

LI

Our proposed solution is to install an additional 3-ton RTU to serve the interior classroom only. This RTU will operate independently to heat, cool, dehumidify, and provide fresh air to the interior classroom.

The new RTU will be supplied with factory mounted Trane controls to allow easy connection to the existing Trane energy management system. The existing 4-ton RTU will remain to serve the two classrooms on the north side of the building. The new RTU and area served is shown in green shading in the drawing below.

The cost for this rooftop unit solution is \$55,000.
