RE: Metacomet and Laurel Playground

As you are aware the Elementary Schools Building Committee is proceeding with having new playgrounds designed and installed at both Metacomet and Laurel School. The State Department of Education Bureau of School Facilities requires the Board of Education to approve the plans and specifications prior to their submittal. The playground for each school will be an age appropriate and fully handicap accessible design with a low maintenance poured in place safety surface. The play equipment will include a variety of interactive play as well as slides, swings, climbing apparatus, glides and whirling components. The budget for each playground is \$200,000.00 and includes design, equipment, installation and safety surfacing. Attached are schematic designs of the proposed layouts of the playground equipment.

The Building Committee requests that the Board of Education approve the plans and specifications as developed.
