## AGENDA

Special Meeting of the
BOARD OF DIRECTORS
Corvallis School District 509J

Meeting Details: Monday, March 14, 2016, 6:30 PM in the District Office Board Room, 1555 SW 35th Street, Corvallis, OR 97333.

If you would like to watch live-streaming of the School Board meeting, please navigate to the District's YouTube channel: https://www.youtube.com/channel/UC9Jtpte5dmilZI9kySBJbVQ? A recording of the meeting will also be posted to that channel.
I. CALL TO ORDER AND ROLL CALL
II. PLEDGE OF ALLEGIANCE
III. NON-REP. POSITION

SUBJECT: Authorize Human Resources Technology Specialist Position

Issue:
The 2013-14 Non-Represented Employee salary schedule included the position of Human Resources (HR) Technology Specialist. However, no one had held that position since June 30, 2014, so it had been removed from the salary schedule. With a recent staff change in the Human Resources Department, we'd like to post for this position and it would fall under the NonRepresented Employee salary and benefits agreement.

The recommended salary range for the HR Technology Specialist position on a 260-day contract would be:

2015-16
Step 1
\$41,638
Step 2
Step 3
Step 4
Step 5
\$42,669
\$43,727
\$44,811
\$45,922

## 2016-17

| Step 1 | Step 2 | Step 3 | Step 4 | Step 5 |
| :--- | :--- | :--- | :--- | :--- |
| $\$ 42,471$ | $\$ 43,522$ | $\$ 44,601$ | $\$ 45,707$ | $\$ 46,841$ |

Involvement:
Human Resources and Business Services staff were consulted in developing this recommendation.

## ACTION REQUESTED:

Approve the salary range for the HR Technology Specialist position for the 2015-16 \& 2016-17 Non-Represented Employee salary schedules.

## To the Corvallis School Board and Community

The purpose of this document is to provide relevant and factual information about the Corvallis School District to the citizens of Corvallis. Our goal is that this will be helpful in educating the community about our operations and serve as a reference document to school board members as they develop policy and district priorities.

## STUDENTS

Included in this section you will find general information regarding the diverse student populations served by the Corvallis School District.

## FACILITIES

This section highlights properties owned and operated by the district in support of our educational mission.

## FINANCES

Wondering about how the district spends taxpayer funds? This section provides basic information about our annual budget, including specifics regarding Local Option Levy revenues. For complete financial details, review the Adopted Budget and Comprehensive Annual Financial Report (CAFR) posted online.

Suggestions regarding the format and content of this report are welcomed by the Finance and Operations Department. Please contact us via phone at 541-757-3859 or via email to jennifer.schroeder@corvallis.k12.or.us.

## General Student Demographics

## DISTRICT-WIDE ENROLLMENT

Enrollment in the Corvallis School District has consistently declined from 1994-95, when the district had 7,769 students, to a low of 6,278 in 2011-12. Since 2011-12, the district's total student enrollment has increased slightly, with 6,615 students reported as of October 1, 2015.

When reviewing the table below, it is important to note that changes in state reporting allow for kindergarten students to be counted as 1.0 instead of 0.5 , and students who have earned a diploma but who continue enrollment to participate in fifth year programs are also counted in the overall district population beginning in 2013-14.

Table 1: District enrollment by level, 2005-06 to 2015-16 (October 1), excluding Muddy Creek Charter School and YES House

|  | Elementary (K-5) | Middle (6-8) | $\begin{array}{r} \text { High } \\ (9-12) \\ \hline \end{array}$ | Total District | Total Change from Previous |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 2005-06 | 2,816 | 1,518 | 2,408 | 6,742 | (1.5\%) |
| 2006-07 | 2,857 | 1,504 | 2,399 | 6,760 | 0.3\% |

| 2009-10 | 2,757 | 1,521 | 2,268 | 6,546 | (1.8\%) |
| 2010-11 | 2,728 | 1,479 | 2,242 | 6,449 | (1.5\%) |
| 2011-12 | 2,650 | 1,413 | 2,215 | 6,278 | (2.7\%) |
| 2012-13 | 2,631 | 1,448 | 2,220 | 6,299 | 0.3\% |
| 2013-14 | 2,704 | 1,407 | 2,237 | 6,348 | 0.8\% |
| 2014-15 | 2,771 | 1,452 | 2,298 | 6,521 | 2.7\% |
| 2015-16 | 2,808 | 1,438 | 2,369 | 6,615 | 1.4\% |
| 3-year change | 6.7\% | (0.7\%) | 6.7\% | 5\% |  |
| 10-year change | (0.3\%) | (5.3\%) | (1.6\%) | (1.9\%) |  |

The slight increase in enrollment observed in Corvallis over the past few years has also been seen statewide. The Greater Albany Public School District's enrollment, for example, increased 3.7 percent 2012-13 to 2015-16. Overall, enrollment in public education for the State of Oregon has increased 2.2 percent over this same three year time period. Again, this is likely due to changes in reporting and K 12 funding mechanisms.

Another valuable review of enrollment is the difference between projected and actuals. State budgeting timelines require enrollment projections to be submitted almost a year in advance of students arriving for school each fall. Allocation of funding, and, therefore, instructional staff, is based on those advance enrollment projections, and, as such, significant disparities between projected enrollment and actual enrollment can be problematic.

Table 2: Actual enrollment by level (October 1, 2015) compared to projections, excluding Muddy Creek Charter School and YES House

|  | Projected | Actual | Difference | Percent Difference |
| :---: | :---: | :---: | :---: | :---: |
| Elementary (K-5) | 2,874 | 2,808 | (66) | (2.3\%) |
| Middle (6-8) | 1,428 | 1,438 | 10 | 0.7\% |
| High (9-12) | 2,255 | 2,369 | 114 | 5.1\% |
| Total | 6,557 | 6,615 | 58 | 0.9\% |

In addition to district-wide enrollment by level, it can be useful to track students by cohort as they move from kindergarten through graduation. When this information is reviewed over a period of time, an increase is seen between kindergarten and $1^{\text {st }}$ grade. District staff believe this is due to families choosing private full-day kindergarten options instead of half-day district kindergarten programs, followed with enrollment in district $1^{\text {st }}$ grade classrooms the following year. As the district transitioned to full-day kindergarten programs district-wide in 2014-15, it was expected that future increases between kindergarten and $1^{\text {st }}$ grade would not be as dramatic. This has held true. In fact, only 13 more $1^{\text {st }}$ grade students enrolled in 15-16 compared to the 14-15 kindergarten class, while the average increase over the prior years shown since 2004-05 was 37 students.

The review of cohort information also shows a historic increase between the $8^{\text {th }}$ and $9^{\text {th }}$ grades. Again, this is likely due to students entering the Corvallis school system from local private K-8 options and home school environments.

Lastly, starting in 2014-15, an increase is also observed at the $12^{\text {th }}$ grade level. Expansion of the Running Start program is a factor here, as $5^{\text {th }}$ year students pursuing college credits are included in the counts for $12^{\text {th }}$ grade students.

To better understand the impact of $5^{\text {th }}$ year programs and more accurately track student outcomes at the high school level, students are tracked not only by grade but also by cohort. A student is assigned a cohort group when he or she first enrolls in $9^{\text {th }}$ grade. Therefore, students entering $9^{\text {th }}$ grade for the first time during the 2015-16 academic year would be assigned to the 2015-16 cohort. We would expect the majority of these students to earn a high school diploma after four years, or at the conclusion of the 2018-19 school year. Cohort tracking makes it easier to identify students in specialized programs (including Running Start as well as special education) for which it is customary to remain enrolled beyond a fourth year.

## ENROLLMENT BY SCHOOL

Another view of 2015-16 estimates and actuals is by school. From this vantage point, it is possible to identify individual school populations that may be increasing or decreasing more than anticipated. Enrollments by school are shown in the table below. It is important to note that the students participating in programs at College Hill High School, including fifth year programs housed at that location, are included in shown figures for Corvallis High School and Crescent Valley High School.

## DIVERSITY: RACE, ETHNICITY, AND PRIMARY LANGUAGE

Statistical data regarding race and ethnicity is compiled based on information provided by parents during the registration process. In situations where data is not provided by parents, school staff make educated guesses in accordance with state requirements.

Students in Corvallis are more likely to identify as either Asian/Pacific Islander or Multi-Ethnic than the state average. Compared to 2013-14, the district's minority population is growing slowly, increasing by just over one percent, from 30.15 to 31.28 percent in 2015-16.

## STUDENTS

As of October 1, 2015, 1,103 students, or 16.4 percent of registered students, self-reported a primary language spoken in their home other than English. This is up from 970 students reporting this same situation two years ago. Fifty unique languages were reported.

For the second year in a row, Arabic is the second most popular non-English language spoken at home by our students after Spanish. New to the top-ten list this year is Telugu, native to India.

## ECONOMICALLY DISADVANTAGED AND HOMELESS YOUTH

One of the key indicators of economic disadvantage is participation in the Free and Reduced-Priced Meal Program. A federally-funded program to ensure children from households that meet federal income guidelines have access to nutritious meals while at school, this program is completely confidential. Children from households that receive Food Stamps or Temporary Assistance to Needy Families (TANF) benefits are eligible for free meals. Additionally, all foster children are approved for free meals.

Children from households that meet federal income guidelines are determined eligible for either free or reduced-priced meals. Thanks to the Oregon State Legislature, effective 2015-16, students who qualify for reduced-priced meals also receive breakfast and lunch for free. This program provides children the opportunity for a nutritious breakfast that they need to be successful in school.

Overall, participation in this program has increased in Corvallis over the past ten years from 30.0 percent in 2004-05 to 35.9 percent in 2015-16. As one would expect, participation peaked in 2012-13 at 39.7 percent, in line with the state level economic recession. Participation in Corvallis, when compared to the 2014-15 state average eligibility of 51.2 percent, however, is significantly lower than other areas in the state. Locally, Greater Albany's participation rate in 2014-15 was 8.9 percent greater and Philomath students participated at a rate 3.7 percent greater than Corvallis students.

The McKinney-Vento Act's Education of Homeless Children and Youth Program ensures that homeless children and youth are provided a free and appropriate public education, despite lack of a fixed place of residence or a supervising parent or guardian. The state public school admission statute assuring the right of homeless and other children and youth in similar circumstances to enroll in schools is ORS 399.115(7).

Every school district in Oregon has at least one designated Homeless Student Liaison to provide direct assistance to homeless families and unaccompanied youths to access and achieve in school.

In 2014-15, the Corvallis School District provided services under McKinney-Vento to 220 students, grades K-12. This is up 22.7 percent from the 170 students served by the same program in 2004-05.

## SPECIALIZED LEARNING PROGRAMS

In order to meet the diverse needs of students, the district offers a variety of programs aimed at reaching each individual student. These services include those targeted specifically for Talented and Gifted (TAG) students, English Language Learners (ELL), and students on an Individualized Education Plan (IEP). TAG screening does not occur until $4^{\text {th }}$ grade, which lowers the percentage of $K$ - 3 TAG students reported.

Compared with data from 2014-15, the number of students identified as TAG as of October 1, 2015, has reduced from 927 ( 14.2 percent of total) to 817, or 12.4 percent of the total enrollment. This reduction has been a mindful reset and is reflective of new testing and reporting methods.

Over the same period, 2014-15 to 2015-16, there has been a slight increase in the percentage of students receiving services related to language and disability ( 7.1 percent to 7.7 percent ELL and 11.4 percent to 12.0 percent IEP).

## Classroom Environments

## ELEMENTARY SCHOOL CLASS SIZES

Over the past fifteen years, the school board has consistently made lower class size a budget priority. To assist school leadership in the budgeting process, allocations have been defined since the 2011-12 budget to include three categories: basic school support, classroom teacher FTE, and discretionary.

Basic school support identifies specific roles necessary for the basic operation of an individual school. This includes a principal, for example, as well as allocated hours based on the overall school size for support services including, office staff, behavior specialists, and other classified staff. School closures, consolidations, and reconfigurations implemented over the past decade have helped to maintain schools at cost-effective sizes. The Quality Education Model for elementary schools uses a school size of 340 for an effective size. As of October 1, 2015, only Mt. View Elementary falls under that size with 303 students.

Effective for the 2012-13 school year, targeted class sizes were identified for each grade to assist in the allocation of classroom FTE. These targets, shown below, reflect the desire of the district to focus on reducing student to teacher ratios specifically at the lower grades.

The average class size district-wide on October 1, 2015 was 25.6 , compared to 26.1 on the same date last year. All grades were below the budget target sizes established in 2012-13, and well below the stated budgetary maximum.

these experiences. The following table compares this year's class size averages at each elementary school to their averages since 2012-13.

## SECONDARY SCHOOL CLASS SIZES

As with elementary class size, there is no specific board policy regarding student-teacher ratios at the secondary level. The targeted size used to allocate FTE in 2015-16 continues to be 32 students per classroom teacher, up from 29 used in 2011-12. Schools can and do supplement the allocated classroom FTE with vocational education and discretionary budgets.

## Beyond the Typical Classroom

## MUDDY CREEK CHARTER SCHOOL (MCCS)

As of October 1, 2015, there were 103 children enrolled at MCCS, a public charter operated by Inavale Community Partners, Inc. Of these 103, 81 reported resident addresses within the Corvallis School District boundary area. The remaining 22 students attending were residents of Philomath (16), Monroe (4), and Greater Albany (2) school districts.

## RUNNING START

Housed at the Harding Center, Running Start collectively refers to three distinct programs offered to students in cooperation with Linn-Benton Community College: Advanced Diploma, Alternative Learning Options, and Expanded Options. Each of these programs offers district students the opportunity to attend Linn-Benton Community College (LBCC) with tuition and materials paid for by the district.

Students enrolled in the Expanded Options program attend classes both at their home high school (either Corvallis or Crescent Valley) and one, two, or three courses at LBCC each term. Coursework completed at LBCC is also counted towards high school diploma requirements.

Alternative Options students are typically students who were previously home schooled and are taking coursework at LBCC with the intent of earning a high school diploma.

Advanced Diploma students have completed all necessary credits and requirements to earn a high school diploma but have deferred their graduation to earn an Advanced Diploma while also earning college credits.

Running Start students are reported to the Oregon Department of Education (ODE) in the district's quarterly Cumulative Average Daily Membership (ADM) collection based on the number of college credit hours attempted. Twelve credits per term is equivalent to 1.0 FTE.

## TRANSFER STUDENTS

The Corvallis School District, in accordance with state law, district policy, and district administrative regulations, allows students to transfer to and from the district as well as between schools within the district, upon request by parents to the extent as is allowed by enrollment capacities at individual schools.

As one would expect, the majority of inter-district transfers each year involve residents of the Greater Albany and Philomath School Districts. Due to changes in legislation surrounding student transfers, figures regarding the total number of Corvallis residents attending public schools in neighboring districts is no longer available. The number of students entering the district from neighboring districts continues to be tracked, however, and is up just over 27 percent in 2015-16 compared to 2012-13.

Transfers within the district are impacted by school boundary changes, school program offerings, and shifts due to family mobility. Additionally, Franklin K-8 has no boundary area. Therefore, all students attending Franklin are on an in-district transfer.

Figures represent actual number ot students living in the 509J boundary attending a school other than their boundary-area school as captured by district student information system (SIS) October 1 each year. These totals include magnet program assignments (Life Skills and ELL).
*There is no boundary for Franklin K-8, therefore no transfers out are assigned.
**Linus Pauling closed to new transfers 2011-12 through 2015-16.
***Corvallis High closed to new transfers 2013-14 through 2015-16.

A comparison of all enrolled Corvallis residents to those attending their boundary area schools indicates that almost 18 percent of district residents attend a school other than their boundary area school, up from over 16 percent in 2014-15.

## ONLINE AND VIRTUAL SCHOOLS

Virtual schools and online charter programs continue to be popular with families. These schools are required to keep resident districts informed of enrollment in their programs by resident students. As of October 1, 2015, 77 Corvallis resident students were identified as attending a virtual charter school sponsored by a public school district somewhere in the state. This is the same number of students enrolled with virtual charter schools as reported on October 1, 2014. The most popular program continues to be the Oregon Connections Academy, previously sponsored by the Scio School District and now by the Santiam Canyon School District, with 35 Corvallis residents enrolled for both 2014-15 and 2015-16.

Virtual public charter schools not sponsored by a particular district may enroll up to 3 percent of the students who reside in that district without restriction. After three percent, the resident district may refuse to approve enrollment in the virtual school. Nearly 200 Corvallis area students would need to enroll in any one online option prior to triggering this rule.

## PRIVATE SCHOOLS

Each fall, district staff collects total enrollment statistics from private schools operating within the district boundary. The district supports local private schools in providing special education services to students they enroll, regardless of the child's residency. Additionally, private school students may enroll in individual courses offered by the district should that coursework not be available to them at their regular school.

With the exception of a decline in enrollment associated with the closure of the Good Samaritan School last fall, private school enrollments are relatively steady over the past few years and have recovered from previous declines attributed to the economic recession.

## HOME SCHOOL

Home school students must register with Linn-Benton-Lincoln Educational Services District (LBL-ESD). Enrollment of resident students is reported to the district quarterly by LBL-ESD. As with private school enrollments, declines in home school enrollment seen in recent years have reversed.

Also as with private school students, home school students may also attend classes at district schools as a supplement to their main educational experience. These students are not counted in the overall enrollment numbers reported in this document, but do count towards the district's overall Average Daily Membership Weighted (ADMw) through their hours of attendance.

## FACILITIES

## Buildings and Properties

The Corvallis School District operates 13 school locations: seven elementary schools, one K-8 school, two middle schools, two high schools, and one alternative program site. Administrative, facilities, and food service functions are housed at the district office. Together with the Western View Center that houses a district computer lab and meeting space, these 15 locations comprise nearly 1.2 million square feet.

Original construction dates for district buildings range from 1923 (Harding Center) to 2005 (Corvallis High School). Average school building ages as of 2015 are shown below, not inclusive of the Harding Center.

Table 18: Average ages of district schools as of 2015

| :---: | :---: | :---: | :---: |
| Elementary Schools* | 58 | 68 | 47 |
| Middle Schools* | 30 | 68 | 11 |
| High Schools | 27 | 44 | 10 |

*Franklin is averaged in both the Elementary and Middle School Categories
Other facilities owned by the district include: Dixie and Inavale schools, which are both rented to other educational entities, and Osborn Aquatic Center, operated by the City of Corvallis. Dixie Elementary School is utilized by Head Start as well as LBL-ESD. Muddy Creek Charter School continues to operate at the Inavale location.

## FACILITIES

## Classroom Utilization

Utilization is defined as the percentage of available classroom seats used by current students. This measurement was developed by the Program Resources and Review (PR2) Committee in 2005, and is calculated as a percentage of planning capacity and actual enrollment. Planning capacity is calculated per building based on the number of physical classroom spaces available multiplied by the number of students planned per classroom (set at 25 for K-5 and 28 for grades 6-12) multiplied by 85 percent to account for specialized instruction and prep periods.

For the purposes of this section, the students-planned-per-classroom has not been increased to reflect the higher targeted class sizes. The Long Range Facilities Master Planning Committee may address this issue as it updates plans for the district's facilities.

## Overhead Costs

The cost of maintenance overhead is measured by the custodial costs and utilities at each site on a per student basis. The following table shows the site administration and custodial/utility costs per student. Employee costs are based on actual salary and benefits, instead of average. Therefore, discrepancies are seen in the costs.

## FINANCES

## The Budget

In June of each year, the school board adopts a budget for the upcoming fiscal year. A budget is proposed by the superintendent and district staff based on established district priorities, feedback from staff, parents and community members. The budget committee, comprised of the school board and seven community members, reviews the proposed budget and hears public testimony from our local community. After review and possible revisions, the budget committee forwards an approved budget to the school board. The school board adopts the budget for the coming school year.

## TOTAL BUDGET RESOURCES (GENERAL AND GRANT FUNDS)

The district receives most of its operating revenue from sources that are budgeted in the

Figure 2: 2015-16 Selected adopted budget resources General Fund and in the Grants Funds. The largest source comes from the State School Fund Formula, which includes basic property taxes, state and federal timber receipts, and distributions from the state. The largest grants that the district receives are from the federal government for Title 1A (supporting programs that serve the economically-disadvantaged
 students) and IDEA (funding for education of disabled students).

## LOCAL OPTION LEVY

In November, 2010, Corvallis voters renewed a Local Option Levy originally approved in 2006 to support academic achievement, K-5 music skills and appreciation, and the health and physical fitness of all students.

Over the life of the levy, the additional revenue has been targeted to enhance reading and math instruction for kindergarten through fifth grade, to strengthen middle and high school academic instruction in literature, math, science, and social studies, to improve vocational and technical education, to promote wellness and physical fitness for all students, to enhance music instruction for elementary students, and to sustain current classroom academic programs. The renewal authorized the district to levy up to $\$ 1.50$ per $\$ 1,000$ assessed value each year beginning July 1, 2012 for five consecutive years. An adopted levy rate of $\$ 1.50$ is estimated to provide $\$ 4,064,897$ in resources, estimated to provide the 2015-16 services below in full-time equivalents (FTE) and dollars.

Due to the recent recession and the effects of tax compression, the district has been experiencing a significant decrease in Local Option Levy revenue. To illustrate the decline, the district received \$5.6 million in 2009-10, but expects to receive a little over $\$ 4.0$ million in 2015-16 - a 27 percent decrease over five years. For a larger description of the tax ramifications of compression, see page A-21 of the 2015-16 Adopted Budget document.

## GENERAL FUND

The General Fund is the district's main operating budget. This fund pays for instructional programs, daily operations of schools, and general functions of the district. The 2015-16 Adopted Budget allocates a total of $\$ 61,460,134$ in expenditures from the General Fund in the categories described in the table below.

Table 22: 2015-16 Adopted Budget - General Fund expenditures by category

## FINANCES

Another, more simplified, version of expenditures expected from the General Fund can be reviewed by collapsing the multiple categories shown above into three main groups: purchased services; supplies, materials, and capital outlay; and labor costs.

Figure 4: 2015-16 Adopted Budget General Fund Expenditures - Simplified

As noted above, and as in recent years, the largest portion of anticipated 2015-16 General Fund expenditures is related to labor costs, including salaries, wages and benefits. In line with the district's focus on class size, the majority of the district's FTE is allocated to licensed staff and classified staff in direct contact with students.

Corvallis
SCHOOL DISTRICT
V. LOCAL OPTION LEVY RENEWAL

BOARD MEETING DATE: March 14, 2016

## SUBJECT: Local Option Levy Renewal

## BACKGROUND

In November 2006 voters approved a five-year local option levy at a rate of $\$ 1.50$ per $\$ 1,000$ of assessed value beginning July 1, 2007 and ending June 30, 2012 to enhance reading and math instruction for kindergarten through fifth grade; to strengthen middle and high school academic instruction in literature, math, science, and social studies; to improve vocational and technical education; to promote wellness and physical fitness for all students; to enhance music instruction for elementary students; and to sustain current classroom academic programs. In November 2010, voters approved a renewal of the local option levy at the same rate and for the same purposes for another five-year period, expiring June 30, 2017. At the rate of $\$ 1.50$ per $\$ 1,000$ of assessed value, a homeowner whose home is assessed at $\$ 200,000$ pays about $\$ 25$ per month as a result of the levy.

## CURRENT LOCAL OPTION LEVY REVENUES

Funds received from the local option levy represent about $6.5 \%$ of the district's general fund operating revenues. As assessed values (AV) increase over time, the amount of funding received through the local option levy will increase assuming that real market property values (RMV) do not grow more rapidly than AV. When RMV grows more rapidly than AV, compression losses increase. ${ }^{1}$

${ }^{1}$ Measure 5 (approved in 1990) split taxes into "education" and "non-education" groups, and limits the amount of taxes to be paid for education to $\$ 5.00$ per $\$ 1,000$ of Real Market Value (RMV). When property taxes levied on a parcel of property exceed the limit, the rates are "compressed" to not exceed the maximum.

## CURRENT LOCAL OPTION LEVY EXPENDITURES

The majority of funds received from the local option levy (92\%) pay for nearly 50 full-time teachers, or about $15 \%$ of the district's teaching staff. As a result of the local option levy, class sizes have been reduced or stabilized, support for literacy instruction has increased, and students receive twice the amount of music and PE instruction. Local option funds also help support high school athletics and activities and have helped expand vocational and technical education programs at the high schools.

## LOCAL OPTION LEVY RENEWAL \& TIMELINE

Proposing a levy renewal with a rate of $\$ 1.50$ per $\$ 1,000$ of assessed value would not increase the current tax rate; it would extend the existing tax rate for another five years beginning in 2017-2018 after the current levy expires. A levy renewal at the current rate would raise approximately $\$ 4.5$ million a year or $\$ 22.5$ million over five years, from 2017 to 2022.
