INDEPENDENT AUDITORS' REPORT

Board of Trustees of
Granbury Independent School District
Granbury, Texas

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of Granbury Independent School District (the District), as of and for the year ended August 31, 2009, which collectively comprise the District's basic financial statements as listed in the table of contents. These financial statements are the responsibility of Granbury Independent School District's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and the significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of Granbury Independent School District as of August 31, 2009, and the respective changes in financial position, and cash flows, where applicable, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

401 WEST HIGHWAY 6 ■ P. O. BOX 20725 ■ WACO, TX 76702-0725 ■ (254) 772-4901■ FAX: (254) 772-4920 ■ www.pbhcpa.com

TEMPLE, TX (254) 791-3460 ■ WHITNEY, TX (254) 694-4600 ■ ALBUQUERQUE, NM (505) 266-5904

In accordance with *Government Auditing Standards*, we have also issued our report dated December 4, 2009, on our consideration of Granbury Independent School District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

The Management's Discussion and Analysis and budgetary comparison information on pages 4 through 12 and 44 through 46, are not a required part of the basic financial statements but are supplementary information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise Granbury Independent School District's basic financial statements. The combining statements and required TEA schedules are presented for purposes of additional analysis and are not a required part of the basic financial statements. The accompanying Schedule of Expenditures of Federal Awards is presented for purposes of additional analysis as required by U. S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments and Nonprofit Organizations*, and is also not a required part of the basic financial statements of Granbury Independent School District. The combining statements, required TEA schedules, and accompanying Schedule of Expenditures of Federal Awards have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, are fairly stated in all material respects in relation to the basic financial statements taken as a whole. Exhibit J-3 (Fund Balance and Cash Flow Calculation Worksheet) has not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on it.

MANAGEMENT'S DISCUSSION AND ANALYSIS

As management of Granbury Independent School District, we offer readers of the District's financial statements this narrative overview and analysis of the financial activities of the District for the year ended August 31, 2009. We encourage readers to consider the information presented here in conjunction with the District's financial statements, which follow this section.

FINANCIAL HIGHLIGHTS

- The District rated "Superior Achievement" in financial management for the sixth consecutive year by the TEA Financial Integrity Rating System of Texas (includes Administrative Cost ratio of 5.6% below the state cap).
- Actual expenses were less than the appropriated budget.
- The assets of the District exceeded its liabilities at the close of the most recent period by $24,144,634 *(net assets).* Of this amount, $18,652,514 *(unrestricted net assets)* may be used to meet the District's ongoing obligations.
- As of the close of the current fiscal year, the District's governmental funds reported combined ending fund balances of $17,379,614. Approximately 95.1% of this total amount, $16,522,745, is available for spending at the government's discretion *(unreserved, undesignated fund balance).*
- At the end of the current fiscal year, unreserved, undesignated fund balance for the General Fund was $16,522,745 or 26.1% of the total General Fund expenditures.

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis are intended to serve as an introduction to the District's basic financial statements. The District's basic financial statements are comprised of three components: (1) government-wide financial statements, (2) fund financial statements, and (3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves.

Government-wide financial statements. The *government-wide financial statements* are designed to provide readers with a broad overview of the District's finances, in a manner similar to a private-sector business.

The *statement of net assets* presents information on all of the District's assets and liabilities, with the difference between the two reported as *net assets.* Over time, increases or decreases in net assets may serve as a useful indicator of whether the financial position of the District is improving or deteriorating.

The *statement of activities* presents information for all of the current year's revenues and expenses regardless of when cash is received or paid. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods.

Both of the District's government-wide financial statements distinguish the functions of the District as being principally supported by taxes and intergovernmental revenues *(governmental activities* as opposed to *business-type activities* that are intended to recover all or a significant portion of their costs through user fees and charges. The District has no component units for which it is financially accountable. The government-wide financial statements can be found on pages 13 – 15 of this report.

Fund financial statements. A *fund* is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The District, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related requirements. The fund financial statements provide more detailed information about the District's most significant funds – not the District as a whole.

- Some funds are required by state law and/or bond covenants.
- Other funds may be established by the Board to control and manage money for particular purposes or to show that it is properly using certain taxes or grants.

All of the funds of the District can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

- *Governmental funds* – Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements. Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for *governmental funds* with similar information presented for *governmental activities* in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between *governmental funds* and *governmental activities.* The District adopts an annual appropriated budget for its General Fund, Debt Service Fund and Food Service Fund.

  A budgetary comparison schedule has been provided to demonstrate compliance with these budgets. The basic governmental fund financial statements can be found on pages 16 – 19 of this report.

- *Proprietary funds* – Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. There are two proprietary fund types. Enterprise Funds are used to report the same functions presented as business-type activities in the government-wide financial statements. The District has business-type activities or Enterprise Funds that operate similar to a private business. The District uses the Enterprise Fund to account for its construction business activities. The second type of proprietary fund is the Internal Service Fund. Internal Service Funds are an accounting device used to accumulate and allocate costs internally among the various functions. The District uses the Internal Service Fund to report activities for its workers' compensation self-insurance fund and the flexible benefits plan. The basic proprietary fund financial statements can be found on pages 20 – 22 of this report.

- *Fiduciary funds* – Fiduciary funds provide are used to account for resources held for the benefit of parties outside the government. Fiduciary funds are *not* reflected in the government-wide financial statements because the resources of those funds are *not* available to support the District's own programs. The District is the trustee, or fiduciary, for these funds and is responsible for ensuring that the assets reported in these funds are used for their intended purposes. All of the District's fiduciary activities are reported in a separate statement of fiduciary net assets that can be found on pages 23 – 24.

- *Notes to the financial statements* – The notes provide additional information that is essential to a complete understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found on pages 25 – 43 of this report.

Other information. In addition to the basic financial statements and accompanying notes, this report also presents certain *required supplementary information* that further explains and supports the information in the financial statements. Required supplementary information can be found on pages 44 – 46 of this report.

FINANCIAL ANALYSIS

Government-wide Financial Analysis

As noted earlier, net assets may serve over time as a useful indicator of a government's financial position. In the case of the District, governmental type assets exceeded liabilities by $24,203,580 and business-type liabilities exceeded assets by ($58,946) as of August 31, 2009.

Investment in capital assets (e.g., land, buildings, furniture and equipment, and construction in progress) less any related debt used to acquire those assets that is still outstanding is $4,523,035. The District uses these capital assets to provide services to students; consequently, these assets are *not* available for future spending. Although the District's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities. An additional portion of the District's net assets ($969,085) represents resources that are subject to external restrictions on how they may be used. The remaining balance of *unrestricted net assets* ($18,652,514) may be used to meet the District's ongoing obligations. This surplus is not an indication that the District has significant resources available to meet financial obligations next year, but rather the result of having long-term commitments that are less than currently available resources.

FINANCIAL ANALYSIS OF THE DISTRICT'S FUNDS

As noted earlier, the District uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements, bond covenants, and segregation for particular purposes.

Governmental funds. The focus of the District's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the District's financing requirements. In particular, unreserved, undesignated fund balance may serve as a useful measure of the District's net resources available for spending at the end of a fiscal year.

At the end of the current fiscal year, the District's governmental funds reported combined ending fund balances of $17,379,614, a decrease of $1,276,263. Approximately 95.1% of this total amount ($16,522,745) constitutes unreserved, undesignated fund balance. The remainder of fund balance is reserved or designated to indicate that it is not available for new spending because it has already been committed (1) to pay debt service ($324,779), (2) to pay for construction ($180,833), (3) for food service ($49,989), and (4) for inventory and other miscellaneous designations ($301,268).

The General Fund is the primary operating fund of the District. At the end of the current fiscal year, unreserved, undesignated fund balance of the General Fund was $16,522,745, out of a total fund balance of $16,697,009. As a measure of the General Fund's liquidity, it may be useful to compare both unreserved, undesignated fund balance and total fund balance to the total fund expenditures. Unreserved, undesignated fund balance represents 26.1% of the total General Fund expenditures.

The fund balance of the District's General Fund decreased by $1,068,780 during the current fiscal year. Key factors in this decrease are as follows:

- TEA Target Revenue has established a system by which revenue is only increased as student ADA is increased. Granbury ISD did not recognize an increase in ADA this year, thus revenue remained consistent with last year; however, expenses increased, resulting in the reduction of the fund balance.

The net decrease in fund balance during the period in the Debt Service Fund is $75,778. This decrease was a result of planned use of fund balance.

Proprietary funds. As mentioned earlier, the District's proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail.

Unrestricted net assets for the Enterprise Funds at August 31, 2009, amounted to $(67,935) for the Enterprise Fund and $200,709 for Internal Service Funds. The total increase in net assets was $8,989 for the Enterprise Fund and an increase of $198,597 for Internal Service Funds. For the fiscal year ended August 31, 2009, the District, the state, community, and employees contributed approximately $291,443 to the Enterprise Funds and $660,555 to the Internal Service Funds.

GENERAL FUND BUDGETARY HIGHLIGHTS

Over the course of the year, the District recommended and the Board approved several revisions to budgeted revenue and appropriations. These amendments fall into the following categories:

- Amendments approved shortly after the beginning of the new fiscal year for amounts reserved and designated in the prior year.

- Amendments in early and late summer to revise estimates for local and state revenue based on the latest information on student attendance numbers and tax collections.

- Amendments throughout the year for transfers to and from other funds and federal indirect cost calculations.

- Amendments during the year for unexpected occurrences.

The District made the following amendments to budgeted revenue:

- Approximately $10,400,000 increase in local tax revenue due to increased property values.

- Approximately $3,400,000 decrease in state revenue due to increased property values.

- Approximate $140,000 increase in local revenue due to insurance proceeds for property damage to District facilities.

Following is a summary of amendments made to appropriations:

- Approximately $6,000,000 increase in State Recapture due to increased property tax revenue.

- Approximately $700,000 due to restructuring of grade levels at various District school buildings.

Additional information on the District's capital assets can be found in Note C on pages 35 – 36 of this report.

Long-term debt. As of August 31, 2009, the District had total general obligation bonded debt outstanding of $53,589,951, a decrease of $3,527,780 over the prior year. Accretion on capital appreciation bonds was $1,065,547 for fiscal year 2009, resulting in an ending balance of $9,397,449. There was a loss on refunding of $1,914,735, a decrease of $91,177 over the prior year.

The "AAA" long-term rating on the District's Texas bonds reflects the Texas Permanent School Fund guarantee. The "A2" Moody's underlying rating on the District's unenhanced debt reflects the District's growing economic base, manageable debt position and strong financial operations. Additional information on the District's long-term debt can be found in Note E on pages 37 – 38 of this report.

ECONOMIC FACTORS AND NEXT YEAR'S BUDGETS AND RATES

- The District's student attendance rate remains stable at 95.8%.
- The District's enrollment has experienced minimal decrease and ADA growth is expected at 0%.
- The District's taxable valuation has increased by 18% and is projected to continue to increase as a result of the oil and gas exploration associated with the Barnet Shale but not necessarily at the same rate as in the past due to the down turn of the real estate market and slowing of natural gas productivity.
- The District lowered the total tax rate to $1.155 ($1.04 for maintenance and operations and $0.115 for debt service). Ability to do this is a result of higher tax base, District management's efficient use of resources, and state funding changes. The District has fully utilized the additional $0.04 available as a result of HB1.

- The District has appropriated maintenance and operations revenues and expenditures in the 2009-2010 budget of $60,474,360 and $63,571,782, respectively. Expenditures include an additional $1,870,000 for salary/wage increases which is over 100% of total increase. Other expenditures were reduced to allow this to occur. Normal lapse in budget is 2-5% in expenditures. If the 2009-10 fiscal year is normal, the $3,097,422 deficit budget will be an actual deficit of $2,000,000 to $2,500,000, which will reduce the fund balance, but still maintain a healthy balance.

REQUESTS FOR INFORMATION

This financial report is designed to provide our citizens, taxpayers, customers, investors and creditors with a general overview of the District's finances as well as demonstrate accountability for funds the district receives. Questions concerning any of the information provided in this report or requests for additional information should be addressed to the Granbury Independent School District Business office.

GRANBURY INDEPENDENT SCHOOL DISTRICT
RECONCILIATION OF THE GOVERNMENTAL FUNDS BALANCE SHEET TO THE STATEMENT OF NET ASSETS
AUGUST 31, 2009

	Total Fund Balances - Governmental Funds	$	17,379,614
1	The District uses internal service funds to charge the costs of certain activities, such as self-insurance, to appropriate functions in other funds. The assets and liabilities of the internal service funds are included in governmental activities in the statement of net assets. The net effect of this consolidation is to increase net assets.		200,709
2	Capital assets used in governmental activities are not financial resources and therefore are not reported in governmental funds. At the beginning of the year, the cost of these assets was $119,066,884 and the accumulated depreciation was $50,066,494. In addition, long-term liabilities, including bonds payable, are not due and payable in the current period, and, therefore are not reported as liabilities in the funds. The net effect of including the beginning balances for capital assets (net of depreciation) and long-term debt in the governmental activities is to increase net assets.		5,522,383
3	Current year capital outlays and long-term debt principal payments are expenditures in the fund financial statements,but they should be shown as increases in capital assets and reductions in long-term debt in the government-wide financial statements. The net effect of including the 2009 capital outlays and debt principal payments is to increase net assets.		4,469,569
4	The 2009 depreciation expense increases accumulated depreciation. The net effect of the current year's depreciation is to decrease net assets.		(4,321,934)
5	Various other reclassifications and eliminations are necessary to convert from the modified accrual basis of accounting to accrual basis of accounting. These include recognizing deferred revenue as revenue, eliminating interfund transactions, and recognizing the liabilities associated with maturing long-term debt and interest. The net effect of these reclassifications and recognitions is to increase net assets.		953,239
19	**Net Assets of Governmental Activities**	$	24,203,580

FOR THE YEAR ENDED AUGUST 31, 2009

Total Net Change in Fund Balances - Governmental Funds	$	(1,276,263)
The District uses internal service funds to charge the costs of certain activities, such as self-insurance, to appropriate functions in other funds. The net income (loss) of internal service funds are reported with governmental activities. The net effect of this consolidation is to increase net assets.		198,597
Current year capital outlays and long-term debt principal payments are expenditures in the fund financial statements, but they should be shown as increases in capital assets and reductions in long-term debt in the government-wide financial statements. The net effect of removing the 2009 capital outlays and debt principal payments is to increase net assets.		4,469,569
Depreciation is not recognized as an expense in governmental funds since it does not require the use of current financial resources. The net effect of the current year's depreciation is to decrease net assets.		(4,321,934)
Various other reclassifications and eliminations are necessary to convert from the modified accrual basis of accounting to accrual basis of accounting. These include recognizing deferred revenue as revenue, adjusting current year revenue to show the revenue earned from the current year's tax levy, eliminating interfund transactions, and recognizing the liabilities associated with maturing long-term debt and interest. The net effect of these reclassifications and recognitions is to decrease net assets.		(1,757,263)

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The basic financial statements of Granbury Independent School District (the "District") have been prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP") applicable to governmental units in conjunction with the Texas Education Agency's *Financial Accountability System Resource Guide* (the "Resource Guide"). The Governmental Accounting Standards Board ("GASB") is the accepted standard setting body for establishing governmental accounting and financial reporting principles.

A. Reporting Entity

The Board of Trustees (the "Board") a seven-member group, has governance responsibilities over all activities related to public elementary and secondary education within the jurisdiction of the District. The Board is elected by the public and has the exclusive power and duty to govern and oversee the management of the public schools of the District. All powers and duties not specifically delegated by statute to the Texas Education Agency ("TEA") or to the State Board of Education are reserved for the Board, and the TEA may not substitute its judgment for the lawful exercise of those powers and duties by the Board. The District receives funding from local, state and federal government sources and must comply with the requirements of those funding entities. However, the District is not included in any other governmental "reporting entity" as defined by the GASB in its Statement No. 14, "The Financial Reporting Entity," as revised by GASB Statement No. 39, and there are no component units included within the reporting entity.

B. Government-wide and Fund Financial Statements

The government-wide financial statements (i.e., the statement of net assets and the statement of changes in net assets) report information on all of the nonfiduciary activities of the District. For the most part, the effect of interfund activity has been removed from these statements. *Governmental activities*, which normally are supported by taxes, state foundation funds, grants and other intergovernmental revenue, are reported separately from *business-type activities*, which rely to a significant extent on fees and charges for support.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenue. *Direct expenses* are those that are clearly identifiable with a specific function or segment. The District does not allocate indirect expenses in the statement of activities. *Program revenues* include fees, fines, and charges paid by the recipients of goods or services offered by the programs, and (b) grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. Revenues that are not classified as program revenues, including all taxes, are presented as general revenues.

(continued)

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

B. Government-wide and Fund Financial Statements (Continued)

The fund financial statements provide information about the District's funds, with separate statements presented for each fund category. The emphasis of fund financial statements is on major governmental and Enterprise Funds, each displayed in a separate column. All remaining governmental and Enterprise Funds are aggregated and reported as nonmajor funds.

Proprietary fund operating revenues, such as charges for services, result from exchange transactions associated with the principal activity of the fund. Exchange transactions are those in which each party receives and gives up essentially equal values. Nonoperating revenues, such as subsidies and investment earnings, result from nonexchange transactions or ancillary activities.

C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The government-wide financial statements are reported using the *economic resources measurement focus* and the *accrual basis of accounting*. Revenue is recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenue in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements use the current financial resources measurement focus and the modified accrual basis of accounting. With this measurement focus, only current assets, current liabilities and fund balances are included on the balance sheet. Operating statements of these funds present net increases and decreases in current assets (i.e., revenue and other financing sources and expenditures and other financing uses).

The modified accrual basis of accounting recognizes revenue in the accounting period in which it becomes both measurable and available, and it recognizes expenditures in the accounting period in which the fund liability is incurred, if measurable, except for unmatured interest and principal on long-term debt, which is recognized when due. The expenditures related to certain compensated absences and claims and judgments are recognized when the obligations are expected to be liquidated with expendable available financial resources. The District considers all revenue available if it is collectible within 60 days after year-end.

Revenue from local sources consists primarily of property taxes. Property tax revenue and revenue received from the state are recognized under the susceptible-to-accrual concept. Miscellaneous revenue is recorded as revenue when received in cash because it is generally not measurable until actually received. Investment earnings are recorded as earned, since they are both measurable and available.

(continued)

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation (Continued)

The Proprietary fund types are accounted for on a flow of *economic* resources measurement focus and utilize the accrual basis of accounting. This basis of accounting recognizes revenue in the accounting period in which it is earned and becomes measurable, and expenses in the accounting period in which they are incurred and become measurable. The District applies all GASB pronouncements, as well as the Financial Accounting Standards Board pronouncements issued on or before November 30, 1989. However, from that date forward, proprietary funds will have the option of either 1) choosing not to apply future FASB standards (including amendments of earlier pronouncements), or 2) continuing to follow new FASB pronouncements unless they conflict with GASB guidance. The District has chosen not to apply future FASB standards.

The District reports the following major governmental fund:

General Fund – The General Fund is the District's primary operating fund. It accounts for all financial resources of the District except those required to be accounted for in another fund.

The District reports the following major Enterprise Fund:

Extended Day Program – The Extended Day Program accounts for the operations of the after school day care.

Additionally, the District reports the following fund types:

Internal Service Funds – These funds are used to account for revenues and expenses related to services provided to parties inside the District. These funds facilitate distribution of support costs to the users of support services on a cost-reimbursement basis. Because the principal users of the internal services are the District's governmental activities, this fund type is included in the governmental activities column of the government-wide financial statements.

Agency Funds – These funds are used to report student activity funds and other resources held in a purely custodial capacity (assets equal liabilities). Agency funds typically involve only the receipt, temporary investment, and remittance of fiduciary resources to individuals, private organizations, or other governments.

Fiduciary Funds – These funds are reported in the fiduciary fund financial statements. However, because their assets are held in a trustee or agent capacity and are therefore not available to support District programs, these funds are not included in the government-wide statements.

When both restricted and unrestricted resources are available for use, it is the government's policy to use restricted resources first, then unrestricted resources as they are needed.

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

D. Assets, Liabilities, and Net Assets or Equity

1. Cash and Cash Equivalents

For purposes of the statement of cash flows, highly liquid investments are considered to be cash equivalents if they have a maturity of three months or less when purchased.

2. Property Taxes

Property taxes are levied as of October 1 on the assessed value listed as of the prior January 1 for all real and business personal property in conformity with Subtitle E, Texas Property Tax Code. Taxes are due on receipt of the tax bill and are delinquent if not paid before February 1 of the following year in which imposed. Property tax revenues are considered available 1) when they become due or past due and receivable within the current period, and 2) when they are expected to be collected during a 60-day period after the close of the fiscal year.

Allowances for uncollectible tax receivables within the General and Debt Service Funds are based upon historical experience in collecting property taxes. Uncollectible personal property taxes are periodically reviewed and written off, but the District is prohibited from writing off real property taxes without specific statutory authority from the Texas Legislature.

3. Inventories

The District records purchases of supplies as expenditures, utilizing the purchase method of accounting for inventory in accordance with the Resource Guide.

4. Capital Assets

Purchased or constructed capital assets are reported at cost or estimated historical cost. Donated fixed assets are recorded at their estimated fair value at the date of the donation. The cost of normal maintenance and repairs that do not add to the value of the asset or materially extend assets' lives are not capitalized. A capitalization threshold of $5,000 is used.

Capital assets are being depreciated using the straight-line method over the following estimated useful lives:

Assets	Years
Buildings and improvements	9 - 30
Land improvements	12 - 25
Equipment	5 - 15

(continued)

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

D. Assets, Liabilities, and Net Assets or Equity (Continued)

5. Interfund Activity

Interfund activity results from loans, services provided, reimbursements or transfers between funds. Loans are reported as interfund receivables and payables as appropriate and are subject to elimination upon consolidation. Services provided, deemed to be at market or near market rates, are treated as revenues and expenditures or expenses. Reimbursements occur when one fund incurs a cost, charges the appropriate benefiting fund and reduces its related cost as a reimbursement. All other interfund transactions are treated as transfers. Transfers in and transfers out are netted and presented as a single "transfers" line on the government-wide statement of activities. Similarly, interfund receivables and payables are netted and presented as a single "internal balances" line of the government-wide statement of net assets.

6. Long-term Obligations

In the financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities Statement of Net Assets. Bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life of the bonds using the straight-line method. The difference between this method and the interest method is immaterial. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are reported as deferred charges and amortized over the term of the related debt.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

7. Fund Equity

In the fund financial statements, governmental funds report reservations of fund balance for amounts that are not available for appropriation or are legally restricted by outside parties for use for a specific purpose. Designations of fund balance represent tentative management plans that are subject to change. Reserves are indicated on the balance sheet.

(continued)

I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

D. Assets, Liabilities, and Net Assets or Equity (Continued)

8. Net Assets

Net assets represent the difference between assets and liabilities. Net assets invested in capital assets, net of related debt consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowing used for the acquisition, construction or improvements of those assets, and adding back unspent proceeds. Net assets are reported as restricted when there are limitations imposed on their use either through the enabling legislations adopted by the District or through external restrictions imposed by creditors, grantors or laws or regulations of other governments.

9. Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

The amount of state foundation revenue and recapture cost for a year can and does vary until the time when final values for each of the factors in the formula become available. Availability can be as late as midway into the next fiscal year. It is at least reasonably possible that the foundation revenue and recapture cost estimates as of August 31, 2009, will change.

10. Data Control Codes

Data control codes appear in the rows and above the columns of certain financial statements. The TEA requires the display of these codes in the financial statements filed with TEA in order to in sure accuracy in building a statewide database for policy development and funding plans.

II. COMPLIANCE AND ACCOUNTABILITY

A. Excess of Expenditures over Appropriations

For the year ended August 31, 2009, expenditures exceeded appropriations in various functions of the General Fund. The General Fund budget to actual is presented as Exhibit G-1 on page 44. These over expenditures were funded by positive variances in other functions.

B. Deficit Fund Balance or Fund Net Assets

Following are funds having deficit fund balances or fund net assets at year-end, if any, along with remarks which address such deficits:

Violation	Deficit Amount	Remarks
Extended Day School Program	$ 58,946	The District is currently attempting to reduce this deficit.

III. DETAILED NOTES ON ALL FUNDS

A. Deposits and Investments

The District's funds are required to be deposited and invested under the terms of a depository contract. The depository bank deposits for safekeeping and trust with the District's agent bank approved pledged securities in an amount sufficient to protect District funds on a day-to-day basis during the period of the contract. The pledge of approved securities is waived only to the extent of the depository bank's dollar amount of Federal Deposit Insurance Corporation ("FDIC") insurance.

Cash Deposits

As of August 31, 2009, the District had deposits in the amount of $3,615,310. These deposits were entirely covered by FDIC insurance or by pledged collateral held by the District's bank in the District's name. In addition, the District's highest deposit balance occurred on October 28, 2008, and was not entirely covered by FDIC insurance or by securities held by the pledging financial institution in the District's name. The highest deposit balance was under collateralized by $4,000,138.

III. DETAILED NOTES ON ALL FUNDS (Continued)

A. Deposits and Investments (Continued)

Investments

The Public Funds Investment Act (the "Act") requires an annual audit of investment practices. Audit procedures in this area conducted as a part of the audit of the basic financial statements disclosed that in the areas of investment practices, management reports an establishment of appropriate policies, the District adhered to the requirements of the Act. Additionally, investment practices of the District were in accordance with local policies.

The Act determines the types of investments which are allowable for the District. These include, with certain restrictions, 1) obligations of the U. S. Treasury, U. S. agencies, and the State of Texas, 2) certificates of deposit, 3) certain municipal securities, 4) securities lending program, 5) repurchase agreements, 6) bankers acceptances, 7) mutual funds; 8) investment pools, 9) guaranteed investment contracts, and 10) commercial paper.

The District's investments at August 31, 2009, are shown below:

Investment Type	Fair Value	Weighted Average Maturity (Days)
LOGIC LGIP	$ 14,515,289	57
Lone Star - LGIP	78,143	52
TexPool - LGIP	971,118	44
Texas Term - LGIP	14,037,831	57.3
Total Investments	$ 29,602,381	

Credit Risk. Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The ratings of securities by nationally recognized rating agencies are designed to give an indication of credit risk. At August 31, 2009, the District's investments are rated as to credit quality as follows:

LOGIC LGIP	AAAm
Lone Star - LGIP	AAAm
TexPool - LGIP	AAAm
Texas Term - LGIP	AAAm

III. DETAILED NOTES ON ALL FUNDS (Continued)

A. Deposits and Investments (Continued)

Custodial Credit Risk. Deposits are exposed to custodial credit risk if they are not covered by depository insurance and the deposits are uncollateralized, collateralized with securities held by the pledging financial institution, or collateralized with securities held by the pledging financial institution's trust department or agent but not in the District's name.

Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government, and are held by either the counterparty or the counterparty's trust department or agent but not in the District's name. At year-end, the District was not exposed to custodial credit risk.

Concentration of Credit Risk. This risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer. At year-end, the District was not exposed to concentration of credit risk.

Interest Rate Risk. This is the risk that changes in interest rates will adversely affect the fair value of an investment. At year-end, the District was not exposed to interest rate risk.

Foreign Currency Risk. This is the risk that exchange rates will adversely affect the fair value of an investment. At year-end, the District was not exposed to foreign currency risk.

Investment Accounting Policy

The District's general policy is to report money market investments and short-term participating interest-earning investment contracts at amortized cost and to report nonparticipating interest-earning investment contracts using a cost-based measure. However, if the fair value of an investment is significantly affected by the impairment of the credit standing of the issuer or by other factors, it is reported at fair value. All other investments are reported at fair value unless a legal contract exists which guarantees a higher value. The term "short-term" refers to investments which have a remaining term of one year or less at time of purchase. The term, "nonparticipating" means that the investment's value does not vary with market interest rate changes. Nonnegotiable certificates of deposit are examples of nonparticipating interest-earning investment contracts.

Public Funds Investment Pools

Public funds investment pools in Texas ("Pools") are established under the authority of the Interlocal Cooperation Act, Chapter 79 of the Texas Government Code, and are subject to the provisions of the Public Funds Investment Act (the "Act"), Chapter 2256 of the Texas Government Code. In addition to other provisions of the Act designed to promote liquidity and safety of principal, the Act requires Pools to: 1) have an advisory board composed of participants in the Pool and other persons who do not have a business relationship with the Pool and are qualified to advise the Pool; 2) maintain a continuous rating of no lower than AAA or AAAm or an equivalent rating by at least one nationally recognized rating service; and 3) maintain the market value of its underlying investment portfolio within one half of one percent of the value of its shares.

The District's investments in Pools are reported at an amount determined by the fair value per share of the Pool's underlying portfolio, unless the Pool is 2a7-like, in which case they are reported at share value. A 2a7-like pool is one which is not registered with the Securities and Exchange Commission ("SEC") as an investment company, but nevertheless has a policy that it will, and does, operate in a manner consistent with the SEC's Rule 2a7 of the Investment Company Act of 1940.

B. Receivables

Receivables as of year-end for the District's individual major funds and nonmajor, internal service and fiduciary funds in the aggregate, including the applicable allowances for uncollectible accounts, are as follows:

	General	Nonmajor Governmental	Total
Receivables:			
Taxes	$ 2,103,007	$ 335,767	$ 2,438,774

Accretion of Premium Capital Appreciation Bonds

A portion of the bonds sold in the Unlimited Tax Refunding and School Building Bonds Series 1999 and 2005 was premium capital appreciation bonds. These obligations have par values of $14,963,794 and maturity values of $35,745,000. The interest on these obligations will be paid upon maturity in the fiscal years ending August 31, 2010-2021. The accreted values of these bonds at August 31, 2009, are approximately $10,440,850, which has been allocated to the governmental activities.

Advance Refunding of Debt

GASB Statement No. 7, "Advance Refundings Resulting in Defeasance of Debt," provides that refunded debt and assets placed in escrow for the payment of related debt service be excluded from the financial statements. As of August 31, 2009, outstanding balances of bond issues that have been refunded and defeased in-substance by placing existing assets and the proceeds of new bonds in an irrevocable trust to provide for all future debt service payments are as follows:

Bond Issue	Amount
Series 1994	$ 975,000
Series 1999	32,170,000
Total	$ 33,145,000

F. Commitments Under Noncapitalized Leases

Commitments under operating (noncapitalized) lease agreements for facilities and equipment provide for minimum future rental payments as of August 31, 2009, as follows:

2010	$ 250,746
2011	87,586
2012	26,151
Total minimum lease payments	$ 364,483

IV. OTHER INFORMATION

A. Property Casualty Program

During the year ended August 31, 2009, Granbury ISD participated in the Texas Association of Public Schools Property and Liability Fund (the Fund) with coverage in Auto Liability, Auto Physical Damage, Crime, Equipment Breakdown, General Liability, Manuscript Special, Property, Sexual Misconduct Endorsement, and Special Legal Liability. The Fund was created and is operated under the provision of the Interlocal Cooperation Act, Chapter 791 of the Texas Government Code. All members participating in the Fund execute Interlocal Agreements that define the responsibilities of the parties.

The Fund purchases stop-loss coverage for protection against catastrophic and larger than anticipated claims for the Property Casualty Program. The terms and limits of the stop-loss program vary by line of coverage. The Fund uses the services of an independent actuary to determine the adequacy of reserves and fully funds those reserves. For the year ended August 31, 2009, the Fund anticipates Granbury ISD has no additional liability beyond the contractual obligations for payment of contributions.

The Fund engages the services of an independent auditor to conduct a financial audit after the close of each plan year on August 31. The audit is accepted by the Fund's Board of Trustees in November or December of the current year. The Fund's audited financial statements as of August 31, 2008, are available at the TAPS offices.

B. Pension Plan

Plan Description. Granbury Independent School District contributes to the Teacher Retirement System of Texas (TRS), a cost-sharing multiple employer defined benefit pension plan. TRS administers retirement and disability annuities, and death and survivor benefits to employees and beneficiaries of employees of the public school systems of Texas. It operates primarily under the provisions of the Texas Constitution, Article XVI, Sec. 67, and Texas Government Code, Title 8, Subtitle C. TRS also administers proportional retirement benefits and service credit transfer under Texas Government Code, Title 8, Chapters 803 and 805, respectively. The Texas state legislature has the authority to establish and amend benefit provisions of the pension plan and may, under certain circumstances, grant special authority to the TRS Board of Trustees. TRS issues a publicly available financial report that includes financial statements and required supplementary information for the defined benefit pension plan. That report may be obtained by writing to the TRS Communications Department, 1000 Red River Street, Austin, Texas 78701, by calling the TRS Communications Department at 1-800-223-8778, or by downloading the report from the TRS Internet website, www.trs.state.tx.us, under the TRS Publications heading.

Funding Policy. Contribution requirements are not actuarially determined but are established and amended by the Texas state legislature. The state funding policy is as follows: (1) The state constitution requires the legislature to establish a member contribution rate of not less than 6.0% of the member's annual compensation and a state contribution rate of not less than 6.0% and not more than 10% of the aggregate annual compensation of all members of the system; (2) A state statute prohibits benefit improvements or contribution reductions if, as a result of a the particular action, the time required to amortize TRS' unfunded actuarial liabilities would be increased to a period that exceeds 31 years, or, if the amortization period already exceeds 31 years, the period would be increased by such action. State law provides for a member contribution rate of 6.4% for fiscal year 2009, 2008 and 2007, and a state contribution rate of 6.58% for fiscal years 2009 and 2008 and 6.0% for fiscal year 2007. In certain instances the reporting district is required to make all or a portion of the state's 6.58% contribution for fiscal years 2009 and 2008 and 6.00% for fiscal year 2007. State contributions to TRS made on behalf of Granbury Independent School District's employees for the years ended August 31, 2009, 2008 and 2007 were $2,010,743, $1,529,593, and $1,483,976, respectively. Granbury Independent School District paid additional state contributions for the years ended August 31, 2009, 2008, and 2007 in the amount of $586,162, $496,437, and $365,058, respectively, on the portion of the employees' salaries that exceeded the statutory minimum. These contributions equaled the required contributions each year, respectively.

C. Health Care Coverage

During the year ended August 31, 2009, employees of the District were covered by a health insurance plan (the "Plan"). The District paid premiums of $350 per month, per full-time employee, and $254 per month, per part-time employee to the Plan. Employees, at their option, authorized payroll withholdings to pay premiums for dependents. All premiums were paid to a licensed insurer. The Plan was authorized by Section 21.922, Texas Education Code and was documented by contractual agreement. The contract between the District and the licensed insurer is renewable annually, and terms of coverage and premium costs are included in the contractual provisions. Latest financial statements for the insurer are available for the year ended December 31, 2008, and have been filed with the Texas State Board of Insurance, Austin, Texas, and are public records.

IV. OTHER INFORMATION (Continued)

D. Retiree Health Plan

Plan Description. The Granbury Independent School District contributes to the Texas Public School Retired Employees Group Insurance Program (TRS-Care), a cost-sharing multiple-employer defined benefit post-employment health care plan administered by the Teacher Retirement System of Texas. TRS-Care Retired Plan provides health care coverage for certain persons (and their dependents) who retired under the Teacher Retirement System of Texas. The statutory authority for the program is Texas Insurance Code, Chapter 1575. Section 1575.052 grants the TRS Board of Trustees the authority to establish and amend basic and optional group insurance coverage for participants. The TRS issues a publicly available financial report that includes financial statements and required supplementary information for TRS-Care. That report may be obtained by visiting the TRS Web site at www.trs.state.tx.us, by writing to the Communications Department of the Teacher Retirement System of Texas at 1000 Red River Street, Austin, Texas 78701, or by calling 1-800-223-8778.

Funding Policy. Contribution requirements are not actuarially determined but are legally established each biennium by the Texas Legislature. Texas Insurance Code, Sections 1575.202, 203, and 204 establish state, active employee, and public school contributions, respectively. The State of Texas and active public school employee contribution rates were 1.0% and 0.65% of public school payroll, respectively, with school districts contributing a percentage of payroll set at 0.55% for fiscal years 2009, 2008, and 2007. Per Texas Insurance Code, Chapter 1575, the public school contribution may not be less than 0.25% or greater than 0.75% of the salary of each active employee of the public school. For the years ended August 31, 2009, 2008, and 2007, the State's contributions to TRS-Care were $420,417, $398,420, and $362,710, respectively, the active member contributions were $273,271, $258,973, and $235,762, respectively, and the school district's contributions were $231,229, $219,131, and $199,491, respectively, which equaled the required contributions each year.

Medicare Part D – On-behalf Payments. The Medicare Prescription Drug, Improvement, and Modernization Act of 2003, which was effective January 1, 2006, established prescription drug coverage for Medicare beneficiaries known as Medicare Part D. One of the provisions of Medicare Part D allows for the Texas Public School Retired Employee Group Insurance Program (TRS-Care) to receive retiree drug subsidy payments from the federal government to offset certain prescription drug expenditures for eligible TRS-Care participants. These on-behalf payments of $96,105 and $90,902 were recognized for the years ended August 31, 2009 and 2008, respectively, as equal revenues and expenditures.

IV. OTHER INFORMATION (Continued)

E. Workers' Compensation

Beginning in 1991, the District established a self-insurance plan for workers' compensation benefits as authorized by Section 504.011 of the Labor Code. Claims are paid by a third party administrator acting on behalf of the District under the terms of a contractual agreement. Administrative fees are included within the provisions of that agreement. The liability of the workers' compensation self-insurance plan includes $147,759 of incurred but not reported claims. These liabilities reported in the funds at August 31, 2009, are based on the requirements of Governmental Accounting Standards Board No. 10, which requires that a liability for claims be reported if information prior to the issuance of the financial statements indicates that it is probable that a liability has been incurred at the date of the financial statements, and the amount of the loss can be reasonably estimated. These liabilities include an amount for claims that have been incurred but not reported. Because actual claims liabilities depend on such complex factors as inflation, changes in legal doctrines, and damage awards, the process used in computing claims liability does not necessarily result in an exact amount. Claims are reevaluated periodically to take into consideration recently settled claims, the frequency of claims, and other economic and social factors.

Changes in the workers' compensation claims liability amounts are presented below:

	Beginning Liability	Current Year Claims and Change in Estimates	Claim Payments	Ending Liability
2007	$ 16,220	$ 74,341	$ 49,544	$ 41,017
2008	41,017	292,669	77,812	255,874
2009	255,874	95,082	126,803	224,153

F. Commitments and Contingencies

The District participates in grant programs which are governed by various rules and regulations of the grantor agencies. Costs charged to the respective grant programs are subject to audit and adjustment by the grantor agencies; therefore, to the extent that the District has not complied with the rules and regulations governing the grants, refunds of any money received may be required and the collectibility of any related receivable may be impaired. In the opinion of the District, there are no significant contingent liabilities relating to compliance with the rules and regulations governing the respective grants; therefore, no provision has been recorded in the accompanying basic financial statements for such contingencies.

No reportable litigation was pending against the District at August 31, 2009.

IV. OTHER INFORMATION (Continued)

G. Joint Venture Shared Service Arrangements

The District participates in a shared services arrangement ("SSA") for a federal program with the following school districts:

Dublin ISD	Gorman ISD	Stephenville ISD
Glen Rose ISD	Hamilton ISD	Weatherford ISD
	Mineral Wells ISD	

The District does not account for revenue or expenditures in this program and does not disclose them in these financial statements. The District neither has a joint ownership interest in fixed assets purchased by the fiscal agent, Brazos River Regional Day School Program for the Deaf, nor does the District have a net equity interest in the fiscal agent. The fiscal agent is neither accumulating significant financial resources nor fiscal exigencies that would give rise to a future additional benefit or burden to the District. The fiscal agent manager is responsible for all financial activities of the SSA.

Budgetary Information

The Board of Trustees adopts an "appropriated budget" for the General Fund, Debt Service Fund, and the National School Breakfast and Lunch Fund which is included in the Special Revenue Funds. The District is required to present the adopted and final amended budgeted revenue and expenditures for each of these funds, and compares the final amended budget to actual revenue and expenditures. The District presented the General Fund budgetary comparison schedule as required supplementary information, and the National School Breakfast and Lunch and Debt Service Funds budgetary comparison schedules are presented as required TEA schedules.

The following procedures are followed in establishing the budgetary data reflected in the financial statements:

1. Prior to August 20, the District prepares a budget for the next succeeding fiscal year beginning September 1. The operating budget includes proposed expenditures and the means of financing them.

2. A meeting of the Board is then called for the purpose of adopting the proposed budget. At least 10 days' public notice of the meeting must be given.

3. Prior to September 1, the budget is legally enacted through passage of a resolution by the Board. Once a budget is approved, it can only be amended at the function and fund level by approval of a majority of the members of the Board. Amendments are presented to the Board at its regular meetings. Each amendment must have Board approval. As required by law, such amendments made before the fact, are reflected in the official minutes of the Board, and are not made after fiscal year-end. Because the District has a policy of careful budgetary control, several amendments were necessary during the year. However, none of these were significant.

4. Each budget is controlled by the budget coordinator at the revenue and expenditure function/object level. Budgeted amounts are as amended by the Board. All budget appropriations lapse at year-end.

5. Encumbrances for goods or purchased services are documented by purchase orders or contracts. Under Texas law, appropriations lapse at August 31, and encumbrances outstanding at that time are to be either canceled or appropriately provided for in the subsequent year's budget. The District had no outstanding end-of-year encumbrances.

Excess of Expenditures over Appropriations

The District exceeded appropriations in the General Fund in the following functions:

Function	Amount
Instructional leadership	$ 22,719
School leadership	5,932

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

Board of Trustees
Granbury Independent School District
Granbury, Texas

Members of the Board:

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of Granbury Independent School District as of and for the year ended August 31, 2009, which collectively comprise Granbury Independent School District's basic financial statements and have issued our report thereon dated December 4, 2009. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered Granbury Independent School District's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the District's internal control over financial reporting.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects Granbury Independent School District's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the District's financial statements that is more than inconsequential will not be prevented or detected by the District's internal control.

TEMPLE, TX (254) 791-3460 ■ WHITNEY, TX (254) 694-4600 ■ ALBUQUERQUE, NM (505) 266-5904

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by Granbury Independent School District's internal control.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether Granbury Independent School District's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

This report is intended solely for the information and use management, Board of Trustees, others within the entity, and federal awarding agencies and pass-through entities and is not intended to be used and should not be used by anyone other than these specified parties.

REPORT ON COMPLIANCE WITH REQUIREMENTS APPLICABLE TO EACH MAJOR PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE IN ACCORDANCE WITH OMB CIRCULAR A-133

Board of Trustees
Granbury Independent School District
Granbury, Texas

Members of the Board:

Compliance

We have audited the compliance of Granbury Independent School District (the "District"), with the types of compliance requirements described in the U. S. Office of Management and Budget (OMB) Circular A-133 *Compliance Supplement* that are applicable to each of its major federal programs for the year ended August 31, 2009. The District's major federal programs are identified in the summary of auditors' results section of the accompanying Schedule of Findings and Questioned Costs. Compliance with the requirements of laws, regulations, contracts, and grants applicable to each of its major federal programs is the responsibility of the District's management. Our responsibility is to express an opinion on the District's compliance based on our audit.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Nonprofit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the District's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination of the District's compliance with those requirements.

In our opinion, Granbury Independent School District complied, in all material respects, with the requirements referred to above that are applicable to each of its major federal programs for the year ended August 31, 2009.

Internal Control Over Compliance

The management of Granbury Independent School District is responsible for establishing and maintaining effective internal control over compliance with the requirements of laws, regulations, contracts, and grants applicable to federal programs. In planning and performing our audit, we considered the District's internal control over compliance with the requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness the District's internal control over compliance.

A *control deficiency* in an entity's internal control over compliance exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect noncompliance with a type of compliance requirement of a federal program on a timely basis. A *significant deficiency* is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to administer a federal program such that there is more than a remote likelihood that noncompliance with a type of compliance requirement of a federal program that is more than inconsequential will not be prevented or detected by the entity's internal control.

A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that material noncompliance with a type of compliance requirement of a federal program will not be prevented or detected by the entity's internal control of the significant deficiencies in internal control.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses, as defined above.

This report is intended solely for the information and use of management, Board of Trustees, others within the entity, and federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

SUMMARY SCHEDULE OF PRIOR AUDIT FINDINGS

FOR THE YEAR ENDED AUGUST 31, 2009

Findings and Questioned Costs for Federal Awards

Item 2008-1: Title I, Part A, Federal CFDA #84.010A

Compliance Requirement: Allowable Costs

Criteria: According to OMB Circular A-87, "An employee who works on multiple activities or cost objectives must maintain time and effort distribution records."

Condition: As part of this program, the District has two employees who are split-funded between Title I, Part A and another cost objective. The District failed to maintain any time and effort distribution records documenting the actual split of these employees' time. The amount of questioned costs is $20,000.

Effect: The cost is subject to disallowance and is, therefore, considered a questioned cost.

Cause: District personnel were unaware that time and effort distribution records were required to be maintained.

Recommendation: Management should emphasize the importance of being knowledgeable about the compliance requirements of the program. Personnel should be adequately trained on time and effort documentation requirements of the program to ensure federal funds are expended only for allowable costs.

Current Status: This matter has been resolved.

RE: TEA Expedited Waiver for Textbook Proclamation 2001 and 2002

SUMMARY:

American Sign Language is offered at GHS. The State did not adopt a standard textbook for this class during the 2001 and 2002 Proclamation for Languages Other than English. GISD can apply for a waiver that would allow a purchase be made for a textbook and be reimbursed by the State up to $28.50/student book.

The attached waiver was presented to the GHS Site-Based Decision Making Committee and approved as required. The following is their recommendation.

RECOMMENDATION:

It is recommended that the Board approve the waiver attached and authorize GISD staff to submit to TEA for the purpose described above.

Respectfully submitted,

Sharay S. Boynton
Executive Director of Finance

District Improvement Plan
2009-2010

Mission Statement

The mission of Granbury ISD is a commitment to pursue excellence in education through utilizing all community resources and providing our students with the opportunities to be productive community members.

Goal 1

Develop and implement an effective plan to improve student performance, including subgroups in all academic areas.

- **Clear and Focused Mission**
  - Everyone in the district should understand, know and be able to quote the District Mission Statement.
- **Climate of High Expectations for Success**
  - Teachers and staff convey the expectation that all students are to obtain at least minimum mastery.
  - Target high expectations for all students for academic improvement.
    - Focus on high school enrollment in the "'Distinguished Plan."
    - Focus on high school enrollment in "Recommended Plan."
    - Focus on College Readiness and Post-Secondary Readiness.
    - Focus on increasing the number of students receiving "Commended Performance"
    - Focus on dual credit courses and opportunities for students.
    - Consider open-enrollment for Pre-AP classes in middle school.
    - Focus on Advanced Placement Classes.
  - Provide for materials to reach instructional goals.
- **Opportunity to Learn/Student Time on Task**
  - Instructional time is a priority.
- **Frequent Monitoring of Student Progress**
  - Reward success in the classroom.
  - Use test results to improve the instructional program.
  - Teachers "effectively" use test results to direct instruction in their classroom.
  - District and Campus Performance
    - Target all subgroups for academic improvement.
    - Target specific students for academic performance.
    - Focus on completion rate at all campuses.
      - Target all subgroups for improving completion rate.
      - Target all students for improving completion rate.
    - Focus on instructional snapshots or common assessments.
    - Focus on vertical and horizontal alignment in our curriculum.
    - Make instructional time a priority.
- Focus on CTE Programs and Courses
  - Raise standards and student competency in all CTE programs.
  - Utilize coherent course sequence for CTE.

- Maintain a quality technology plan.
  - Focus on technology instruction for students.
- Consider courses for high school credit for eighth grade.
- Focus on Response to Intervention.

Goal 2

Develop and implement procedures to enhance a positive school climate.

- **Safe and Orderly Environment**

- Responsive Transportation Department
  - Develop a plan to be "User Friendly" to incorporate in the District Improvement Plan.
- Responsive Support Services Department
  - Develop a plan to be "User Friendly" to incorporate in the District Improvement Plan.

Goal 6

Develop and implement an effective facilities improvement plan to address instructional needs in the district.

- Initiate and maintain a Facilities Improvement Plan.
- Keep facilities in the forefront.
- Focus on upgrades, not new buildings.
- Consider restructure of Brawner and Emma Roberson to K-5.

Goal 7

Provide leadership/oversight to ensure the district meets all legal and regulatory requirements.

- Follow Board Policy.
- Keep abreast of state and federal guidelines.
- Continually monitor and revise handbooks and current practices to match Board Policy and the Texas Education Code.

Goal 8

Focus on student participation in extra-curricular activities.

- Recruit students for participation in all programs.
- Encourage students to participate in all programs.
    - Teachers should encourage students to participate in programs.
    - Administration should continually encourage students to participate in programs.
    - Counselors need to be aware of all programs available and encourage students to participate in programs.

SUMMARY:
Ms. Howard, secondary principals, curriculum, special education, technology and career and technology have spent countless hours planning and discussing the numerous changes in courses coming through CTE and what we want to offer students.

I did not anticipate that we would be ready to put these course recommendations on the agenda until January; however, I learned Thursday afternoon it would be beneficial for several reasons, primarily for our students that we present these to you in December. We will have a complete presentation and explanation for you on Monday night to identify the rationale for the consensus recommendation.

I will try to provide you a list in a separate email on Friday.

RECOMMENDATION:
I recommend approval of the courses.

Re:	**Consider Approval of Use of the Agriculture Barn for Baseball and Softball**

SUMMARY:
I received a request from Mitch Galvan, president of the Baseball Booster Club to clean out the front section of the old Ag. Barn and install batting cages for the baseball and softball programs. He reports the following information.

They are currently using the metal building behind Crossland, which allows room for two cages.

The Ag. Barn would allow a minimum of four and a maximum of eight cages.

Booster Club vice president, Alan Hickey met with Mr. Butler and Mr. Leach. Both stated they thought it would be an excellent use of the building. Mr. Hickey contacted Mr. Newton.

The proposal is that representatives from the booster club will remove the pipe for Mr. Newton to use in future projects.

I contacted Mr. Butler, Mr. Leach and Mr. Newton to make sure all are in agreement with the proposal. Apparently, all are in agreement.

		Re:	**Consider Standardized Logo**

SUMMARY:
I was asked to place this on the agenda.

Some thoughts behind the official logo are as follows:

- Only authorized companies will be allowed to use the official logo which can help protect our parents and business people from the fly-by-night firms that make everyone think they have been approved including calendars and items for the cheerleaders to throw out.
- It helps ensure that we don't have five different types of Pirates on a single campus. Through the years, it seems some coaches and booster clubs want their own design instead of what is best for the school.
- It may help economic disadvantaged families from feeling pressure to buy the new hat, jacket, etc. when the logo changes every few years or between sports.
